China Growth Minerals Increases Shareholding to 16.07%

A-Cap Resources Limited ('A-Cap'), is pleased to announce that China Growth Minerals Limited ('CGM') has acquired a further 13,000,000 shares of A-Cap from Polo Resources plc pursuant to the Share Sale Agreement (refer announcement dated 25 September 2009), bringing their total shareholding to 26,000,000 shares, or 16.07% of the issued share capital.

A-Cap Managing Director Andrew Tunks said, “We welcome CGM’s latest investment in A-Cap, which now increases their shareholding to 16.07%, making CGM our largest shareholder on the register. Their increase in shareholding in A-Cap is further evidence of their ongoing support of our assets in Botswana, particularly the Letlhakane Uranium Project, which we believe is one of the largest uranium discoveries in the world. With the global demand for nuclear energy increasing, particularly in China, we are delighted to have such a prominent Hong-Kong based investment firm on board.”
