BASE PROSPECTUS SUPPLEMENT

INVESTEC plc
(incorporated with limited liability in England and Wales with registered number 3633621)

This base prospectus supplement (the "Base Prospectus Supplement") is supplemental to and must be read in conjunction with the base prospectus relating to the £1,000,000,000 Euro Medium Term Note Programme dated 19 March 2015 (the "Base Prospectus") prepared by Investec plc (the "Issuer") in connection with the application made for Notes to be admitted to listing on the Official List of the Financial Conduct Authority in its capacity as competent authority for the purposes of Part VI of the Financial Services and Markets Act 2000 (the "FSMA"), and to trading on the Regulated Market of the London Stock Exchange plc.

This Base Prospectus Supplement constitutes a supplement for the purposes of Directive 2003/71/EC (as amended) (the "Prospectus Directive") and a supplementary prospectus for the purposes of section 87G of the FSMA Terms defined in the Base Prospectus shall have the same meaning when used in this Base Prospectus Supplement.

To the extent that there is any inconsistency between any statement in this Base Prospectus Supplement and any other statement in or incorporated by reference in the Base Prospectus, the statements in this Base Prospectus Supplement will prevail.

The purpose of this Base Prospectus Supplement is to:

- Disclose that on 30 June 2015, the Issuer published its annual report and consolidated financial information for the year ended ended 31 March 2015 (the "2015 Annual Report"), a copy of which is annexed hereto. Any document or information incorporated by reference into the 2015 Annual Report, either expressly or impliedly, does not form part of this Base Prospectus Supplement for the purposes of the Prospectus Directive.

Save as disclosed in this Base Prospectus Supplement, no significant new factor, material mistake or inaccuracy relating to information included in the Base Prospectus has arisen since the publication of the Base Prospectus.

The Issuer accepts responsibility for the information contained in this Base Prospectus Supplement. To the best of the knowledge and belief of the Issuer (which has taken all reasonable care to ensure that such is the case) the information contained in this Base Prospectus Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information.

Annual report
2015

VOLUME 1
Investec strategic report incorporating governance, sustainability and the remuneration report
The 2015 integrated annual report covers the period 1 April 2014 to 31 March 2015 and provides an overview of the Investec group.

This report covers all our operations across the various geographies in which we operate and has been structured to provide stakeholders with relevant financial and non-financial information.

About this report

The 2015 integrated annual report covers the period 1 April 2014 to 31 March 2015 and provides an overview of the Investec group.

This report covers all our operations across the various geographies in which we operate and has been structured to provide stakeholders with relevant financial and non-financial information.

Audited information
Denotes information in the risk, corporate responsibility and remuneration reports that form part of the group’s audited annual financial statements

Reporting standard
Denotes our consideration of a reporting standard

Page references
Refers readers to information elsewhere in this report

Sustainability
Refers readers to further information in our sustainability report available on our website: www.investec.com

Website
Indicates that additional information is available on our website: www.investec.com

VOLUME 1  Strategic report incorporating governance, sustainability and the remuneration report

VOLUME 2  Risk and Basel Pillar III disclosures

VOLUME 3  Annual financial statements
Ongoing and statutory information

During the year the group sold a number of businesses, namely, Investec Bank (Australia) Limited, Kensington Group plc and Start Mortgage Holdings Limited (as discussed on page 22).

The sale of these businesses has had a significant effect on the comparability of our financial statutory position and results. As a result, comparison on a statutory basis of the 2015 results with 2014 would be less meaningful.

In order to present a more meaningful view of our performance, additional management information is presented on our ongoing businesses. This information is only set out in volume one of our annual report. The additional information presented on an ongoing basis excludes items that in management’s view could distort the comparison of performance between periods. Based on this principle, the following items are excluded from underlying statutory profit to derive ongoing operating profit:

- The results of the businesses sold as mentioned above
- The remaining legacy business in the UK (as set out on pages 88 and 89).

A reconciliation between the statutory and ongoing income statement is provided on pages 56 and 57. All information in our annual report comprising volumes one, two and three are based on our statutory accounts unless otherwise indicated.

Feedback

We value feedback and invite questions and comments on our reporting. To give feedback or request hard copies of our reports, please contact our Investor Relations division.

Overview of the year
Delivering on our strategic objectives – continued to grow core franchises and simplified the Specialist Banking business through restructuring and sales

- Continued investments in Asset Management and Wealth & Investment platforms – supported net inflows in excess of £5.8 billion
- The core corporate banking franchise in both the UK and South Africa performed well, benefiting from increased client activity
- The Private Banking and Wealth & Investment businesses in South Africa further entrenched their position as one of the leading integrated private client businesses in the country, successfully launching a number of new products, broadening their client base and leveraging their global platform (One Place)
- The UK Private Banking business enhanced its offering through the launch of its Private Bank Account and the development of its online and digital platforms
- Geographical and operational diversity continued to support a high recurring income base with a sound balance of earnings generated between capital light businesses and capital intensive businesses.

We continued to actively manage down the UK legacy portfolio...

- The legacy portfolio reduced from £3.4 billion at 31 March 2014 to £0.7 billion largely through strategic sales, redemptions, write-offs and transfers to the ongoing book on the back of improved performance in these loans
- The legacy business reported a loss before taxation of £107.7 million (2014: £69.1 million) as the group accelerated the clearance of the portfolio, which resulted in an increase in impairments on these assets
- The group posted a non-operating net loss after tax of £113.7 million on the sale of businesses.

Notes: Refer to page 181 for detailed definitions and explanations.

Sound capital and liquidity principles maintained

Continue to focus on:
- Maintaining a high level of readily available, high-quality liquid assets targeting a minimum cash to customer deposit ratio of 25.0%
- Diversifying funding sources
- Maintaining an appropriate mix of term funding
- Limiting concentration risk.

The intimate involvement of senior management ensures stringent management of risk and liquidity.

A well-established liquidity management philosophy remains in place.

The group’s loan to deposit ratios are as follows:
- Investec Limited: 78.6% (2014: 72.9%)
- Investec plc: 68.5% (2014: 71.0%)

Liquidity remains strong with cash and near cash balances amounting to £10.0 billion (2014: £9.1 billion).

Capital remained well in excess of current regulatory requirements.

Our banking subsidiaries meet current internal targets.

Investec Limited should achieve a common equity tier 1 ratio above 10% by March 2016, and Investec plc already achieves this target.

We are comfortable with our common equity tier 1 ratio target at a 10% level, as our leverage ratios for both Investec Limited and Investec plc are well above 7%.
The value we’ve added

Contributing to society, macro-economic stability and the environment
For Investec, sustainability is about building our businesses to ensure we have a positive impact on the economic and social progress of communities and on the environment, while growing and preserving clients and stakeholders’ wealth based on strong relationships of trust. This commitment to sustainability means integrating social, ethical and environmental considerations into our day-to-day operations. A key element of this is solid corporate governance that ensures sustainable management with a long-term vision.

  - 2014: 2 507

- Scope 2 emissions (tonnes of CO₂e) decreased 5%
  - 2015: 36 548
  - 2014: 38 493

- Scope 3 (tonnes of CO₂e) emissions increased 17% due to improved data collection processes
  - 2015: 31 305
  - 2014: 26 734

Committed £1.1 billion to renewable energy for further information download the sustainability report available on our website.
About the Investec group

We strive to be a distinctive specialist bank and asset manager, driven by commitment to our core philosophies and values.

Who we are

- Founded as a leasing company in Johannesburg in 1974.
- In July 2002, we created a dual listed companies structure (DLC) listed in London and Johannesburg.
- Since inception, we have expanded through a combination of substantial organic growth and a series of strategic acquisitions.
- We acquired a banking licence in 1980 and were listed on the JSE Limited South Africa in 1986.
- A year later, we concluded a significant empowerment transaction in which our empowerment partners collectively acquired a 25.1% stake in the issued share capital of Investec Limited.
- Today, we have an efficient integrated international business platform offering all our core activities in the UK and South Africa.

We value

</tr>
</tbody>
</table>

Our philosophies

- Single organisation
- Meritocracy
- Focused businesses
- Differentiated, yet integrated
- Material employee ownership
- Creating an environment that stimulates extraordinary performance.
We are an international specialist bank and asset manager that provides a diverse range of financial products and services to a niche client base in three principal markets – the UK and Europe, South Africa and Asia/Australia.

Investec focuses on delivering distinctive profitable solutions for its clients in three core areas of activity, namely: Asset Management, Wealth & Investment and Specialist Banking.

Our strategic goals and objectives are based on the aspiration to be recognised as a distinctive specialist bank and asset manager. This distinction is embodied in our entrepreneurial culture, which is balanced by a strong risk management discipline, client-centric approach and an ability to be nimble, flexible and innovative. We do not seek to be all things to all people and aim to build well-defined, value-added businesses focused on serving the needs of select market niches where we can compete effectively.

**The Investec distinction**

**1. Client-focused approach**
- Clients are at the core of our business
- We strive to build business depth by deepening existing and creating new client relationships
- High level of service by being nimble, flexible and innovative.

**2. Specialised strategy**
- Serving select market niches as a focused provider of tailored structured solutions
- Enhancing our existing position in principal businesses and geographies through organic growth and select bolt-on acquisitions.

**3. Sustainable business**
- Contributing to society, macro-economic stability and the environment
- Well-established brand
- Managing and positioning the group for the long term
- Balancing operational risk with financial risk while creating value for shareholders
- Cost and risk conscious.

**4. Strong culture**
- Strong, entrepreneurial culture that stimulates extraordinary performance
- Passionate and talented people who are empowered and committed
- Depth of leadership
- Strong risk awareness
- Material employee ownership.
Our strategic focus

Our strategy

Our strategy for more than 20 years has been to build a diversified portfolio of businesses and geographies to support clients through varying markets and economic cycles. Since inception, we have expanded through a combination of organic growth and strategic acquisitions.

In order to create a meaningful and balanced portfolio we need proper foundations in place which gain traction over time.

Our current strategy

- Maintain momentum in Asset Management
  - focus on investment performance;
  - maintain strong institutional momentum and continue to build our advisor business.
- Continue to internationalise the Wealth & Investment business
  - focus on organic growth within our key markets by enhancing the range of services offered for the benefit of the client; and
  - extend into jurisdictions where the group already has an established business.
- Grow the Specialist Banking businesses
  - continue to build the private client and corporate and institutional client franchise businesses; and
  - focus on improving the returns within the Specialist Banking business.
- Build on the progress made with the digitisation strategy to ensure a superior client service experience that is both high tech and high touch
- Continue to build client franchise businesses that support our entrepreneurial endeavours and provide appropriate returns to shareholders
- Leverage our extensive client base so we can offer them a broad spectrum of services and products.

Our long-term internationalisation strategy

- Follow our customer base
- Gain domestic competence and critical mass in our chosen geographies
- Facilitate cross-border transactions and flow.

Our diversified and balanced business model supporting long-term strategy

Broadly defined, we operate across three areas of specialisation focused on well defined target clients:

- **Asset Management**
  - Operating completely independently
- **Specialist Banking**
  - Corporate/institutional/government
  - Investment management services to external clients
- **Wealth & Investment**
  - Private client (high net worth/high income)/charities/trusts
  - Advisory Transactional banking Lending Treasury and trading Investment activities

We aim to maintain an appropriate balance between revenue earned from operational risk activities and revenue earned from financial risk activities.

This ensures that we are not over-reliant on any one part of our businesses to sustain our activities and that we have a large recurring revenue base that enables us to navigate through varying cycles and supports our long-term strategy.

**Capital light activities**

- Asset management
- Wealth management
- Advisory services
- Transactional banking services
- Property funds

**Capital intensive activities**

- Lending portfolios
- Investment portfolios
- Trading income
  - client flows
  - balance sheet management

**Fee and commission income**

**Types of income**

**Net interest, investment and trading income**

Contribute 56% to group income

Contribute 44% to group income
Operating structure

Investec Limited, which houses our Southern African and Mauritius operations, has been listed in South Africa since 1986.

During July 2002 Investec Group Limited (since renamed Investec Limited) implemented a dual listed companies (DLC) structure and listed its offshore business on the London Stock Exchange.

A circular on the establishment of our DLC structure was issued on 20 June 2002 and is available on our website.

In terms of our DLC structure, Investec Limited is the controlling company of our businesses in Southern Africa and Mauritius, and Investec plc is the controlling company of our non-Southern African businesses.

Our DLC structure and main operating subsidiaries at 31 March 2015

Kensington Group plc was sold on 30 January 2015. Investec Bank (Australia) Limited was sold on 31 July 2014.

* 15% is held by senior management in the company.

All shareholdings in the ordinary share capital of the subsidiaries are 100%, unless otherwise stated.

Salient features of the DLC structure

- Investec plc and Investec Limited are separate legal entities and listings, but are bound together by contractual agreements and mechanisms
- Investec operates as if it is a single unified economic enterprise
- Shareholders have common economic and voting interests as if Investec plc and Investec Limited were a single company
- Creditors, however, are ring-fenced to either Investec plc or Investec Limited as there are no cross-guarantees between the companies.
Our operational footprint

UK, Europe and Other

- In 1992 we made our first international acquisition, acquiring Allied Trust Bank in London
- Since that date, we have expanded organically and through a number of strategic acquisitions
- Developed capabilities in all three of our core activities
- Listed in London in July 2002 through the implementation of a dual listed companies structure
- Offices supporting the UK and Other businesses include Australia; Beijing; Channel Islands; Hong Kong; India; Ireland; London; Manchester; North America; Switzerland; and Taiwan.

Southern Africa

- Founded as a leasing company in 1974
- Acquired a banking licence in 1980
- Listed on the JSE Limited South Africa in 1986
- In 2003 we implemented a 25.1% empowerment shareholding transaction
- Market leading position in all three of our core activities
- Fifth largest bank in the country
- Offices supporting the Southern African businesses include Botswana; Cape Town; Durban; East London; Johannesburg; Knysna; Mauritius; Namibia; Nelspruit; Pietermaritzburg; Port Elizabeth; Pretoria; and Stellenbosch.

Our three distinct business activities are focused on well-defined target clients

Asset Management
Provides investment management services to third party institutions, clients and intermediated savers

Core client base and what we do
Operates independently from Investec’s other businesses and its sole focus is the provision of investment management services to its predominantly global institutional client base

Market positioning
Funds under management
1991: £0.4 billion → 2015: £77.5 billion

Net inflows of £3.1 billion
Good long-term performance with growing traction in our distribution channels

Wealth & Investment
Provides investment management services and independent financial planning advice

Core client base and what we do
Provides investment management services and independent financial planning advice to private clients, charities and trusts

Market positioning
Total funds under management
1997: £0.04 billion → 2015: £46.1 billion

UK: One of the top five players
SA: Largest player

Specialist Banking
Provides a broad range of services:
- Advisory
- Structuring
- Transactional banking
- Lending
- Treasury and trading
- Investment activities

Core client base and what we do
We offer a broad range of services from advisory, structuring, lending, transactional banking, treasury and trading, and investment activities. These services are aimed at government, institutional, corporate and high net worth and high income clients

Market positioning
Global core loan portfolio: £17.2 billion
- Corporate and other clients: £7.1 billion
- Private clients: £10.1 billion

Global deposit book: £22.6 billion

* Before goodwill, acquired intangibles, non-operating items, taxation and after other non-controlling interests.
** NAV is tangible shareholders’ equity as calculated on page 48.
^ COI is cost to income ratio. ROE is the pre-tax return on adjusted average shareholders’ equity as calculated on page 52.
^^ Including legacy assets of £0.7 billion as explained on pages 88 and 89.

The past year focused largely on the execution of our strategic priorities and our performance reflects the positive progress made.

Can you give us an overview of the group’s performance for the financial year?

The group achieved an increase in statutory operating profit of 9.4% to £493.2 million (2014: £450.7 million), an 18.0% increase on a currency neutral basis. Adjusted EPS increased 4.0% from 37.9 pence to 39.4 pence, a 12.4% increase on a currency neutral basis. Distributions to shareholders increased to 20 pence (2014: 19 pence) resulting in a dividend cover of 2.0 times (2014: 2.0 times).

As a result of the strategic sales mentioned above, redemptions, write-offs and transfers to the ongoing book on the back of improved performance in these loans, we were able to reduce the total legacy portfolio to £7.3 billion (2014: £7.9 billion). The consequence of this was a loss before taxation on the legacy business of £0.7 billion (2014: £3.4 billion).

The ongoing business delivered a solid performance with operating profit up 15.0% to £880.7 million (2014: £504.9 million), a 22.6% increase on a currency neutral basis.

The geographical and operational diversity of our business model continued to support the sound balance of earnings generated between capital light businesses and capital intensive businesses. There was continued growth in key earnings drivers with third party assets under management up 13.7% to £124.1 billion (2014: £109.2 billion). The key banking earnings drivers also enjoyed positive growth with core loans and advances up 15.4% to £16.5 billion (2014: £14.3 billion) and customer deposits up 7.3% to £22.6 billion (2014: £21.1 billion).

This supported growth in total operating income before impairment losses up 5.6% to £11.9 billion (2014: £11.8 billion) and an improvement in recurring income to 71.9% of total operating income (2014: 67.9%). Impairments continued their downward trend and fixed costs were marginally up, given the investment in growth businesses.

How did the operating environment support performance?

During the period we experienced a favourable operating environment across all areas of operation although the strength of Pounds Sterling on average against other operating currencies negatively affected overall results.

Global environment

The UK economy recorded the firmest pace of growth of all the advanced economies in 2014 and its fastest growth since 2006 at 2.8%. UK monetary policy remained steady throughout the financial year with overall economic fundamentals continuing to improve.

The US saw its fastest growth rate since 2010. As quantitative easing drew to an end in October 2014, we started to see a normalisation in monetary policy from the US Federal Reserve. Growth in the Euro areas has been more modest and with persistent concerns of deflation, there was further monetary policy easing.

Australia experienced moderate economic performance with the pace of growth on a quarterly basis being slower than historical averages. Headwinds to the economy were centred on the resources sector where failing commodity prices contributed further to a decline in mining investment.

South Africa

South Africa faced a difficult year in 2014, with strike action in the platinum belt persisting and electricity supply constraints causing GDP growth to slip to 1.5% year on year. Higher interest rates and indebtedness negatively affected consumer spending and further hikes are expected from the current, still low, levels. On a more positive note, upward social mobility improved largely as a result of the ongoing roll-out of social services, particularly spend on education and health. This is a positive step towards further reducing inequality and transforming our society and economy for the benefit of all.

In this regard, we remain focused on the corrective strategies as set out in our updated Employment Equity Plan for the period 2013 to 2017. During the year, we received a level 2 BBBEE rating from Empowerdex (improving from level 3) and made good progress in meeting our employment equity targets. We also witnessed good momentum in the Enterprise development programme which was launched in the previous financial year.

While the South African economy is currently underperforming its potential and there are many ongoing challenges, strategic level plans have been adopted and we need to see greater focus on execution of these plans. The effective execution of the National Development Plan is key to dealing with the country’s structural problems and its current inability to create adequate jobs. We support active involvement of the private sector in these development plans with government creating an enabling environment. The increase in dialogue between government and the private sector is encouraging, but we need to see the undertakings translate into action.
How did the three core areas of activity perform on an ongoing basis?

All three key business activities achieved growth during the financial year. Asset Management and Wealth & Investment contributed 39.3% to group operating profit on an ongoing basis.

Asset Management

Asset Management increased operating profit by 3.6% to £149.0 million (2014: £143.8 million), benefiting from higher assets under management and net inflows of £3.1 billion. Total funds under management amounted to £77.5 billion (2014: £68.0 billion). Operating margin has remained consistent at 34.2%.

While momentum is positive, the business remains strategically exposed to emerging markets and management are cautious on the outlook for financial asset prices. Notwithstanding this, the business is in good shape with a strong culture and excellent people who are committed to the long-term strategy.

Wealth & Investment

Wealth & Investment benefited from a rise in equity markets with operating profit increasing 19.2% to £78.8 million (2014: £66.1 million). This performance was supported by higher average funds under management, improved operating margins and net inflows of £2.7 billion. Total funds under management have grown to £46.1 billion (2014: £40.1 billion). The UK and European business has benefited from the investment in platforms and additional talent with operating margins improving to 22.7% (2014: 20.1%). The South African business has continued to successfully leverage off the division’s global investment platform and the group’s integrated private client offering known as Investec One Place.

This business will continue to focus on organic growth in the group’s key markets by enhancing our range of services to benefit clients. At the same time, we continue to perpetuate the strategy to internationalise within jurisdictions where the group already has an established business. We have established a presence in Switzerland and are in the process of commencing operations in Hong Kong. We remain confident in the resilience of the business model and the ability of the current strategy to perform over the medium to longer term.

Specialist Banking

The ongoing business of Specialist Banking increased operating profit 18.4% to £392.3 million (2014: £331.4 million). The South African business reported operating profit up 36.8% in Rand terms with a good performance from all businesses largely as a result of reasonable activity levels across both the corporate and private client activities franchises. Private Banking launched a number of new products, broadened their client base and leveraged off our global platform, entrenching their position as the leading private bank in SA (Euromoney, 2015). The corporate business benefited from a more focused approach to servicing the corporate market.

The UK and Other business benefited from an improvement in its cost of funding and experienced strong growth in corporate fees, notably in the corporate finance and corporate treasury businesses. Private Banking enhanced its offering through the launch of Voyage and Private Bank account and the development of its online and digital platforms. Loan book growth was solid and impairments declined over the year with the credit loss ratio amounting to 0.20% (2014: 0.50%). The results were negatively affected by the poor performance of the Hong Kong investment portfolio.

The strategic focus in the Specialist Banking business has shifted from reshaping to growth, particularly in the UK where the legacy portfolio has been significantly reduced and the current environment is favourable. We are seeing good levels of activity which should support continued momentum in the corporate and specialist businesses and the new initiatives in the private banking business are gaining traction. We have invested in infrastructure and are rolling out our strategy of targeting the professional market.

The South African business enjoyed strong growth which may be difficult to sustain. We have, however, built a resilient business model and see meaningful opportunities to continue to grow. To this end, we will continue to organically drive the private banking businesses, perpetuate our position in the corporate and institutional market and take advantage of growth in Sub-Saharan Africa through our Africa platform.
We remain focused on delivering our brand promise to be Out of the Ordinary and providing exceptional client experiences.
rewarding them for their efforts. We also invest in technology to ensure we have the strong digital platform that complements the skills of our management and staff and ensures we provide our niche client base with the highest level of service.

Part of our responsibility to remain a sustainable business requires a strong board of directors who have the appropriate balance of knowledge, expertise and independence. During the past year, we had several changes to the board. Sir David Prosser decided to retire and hence stepped down as joint chairman of the board. Further, George Alford, Olivia Dickson and Peter Malungani did not seek re-election as directors at the 2014 annual general meeting. Consequently, the board appointed Charles Jacobs, Lord Malloch-Brown, Khumo Shuenyane, Zarina Bassa and Laurel Bowden as independent non-executive directors. While we are sad to say goodbye to those directors leaving the group and thank them for their invaluable contributions, we are pleased to welcome the new board members to the Investec family.

The board will continue with its structured refreshment programme to ensure its composition is the most appropriate to provide effective entrepreneurial leadership and robust oversight. Diversity in terms of a broad range of skills, experience, background and outlook is required to be effective. Recognising that gender is an important aspect of diversity, we have an aspirational target of 25% female representation on the board by the end of 2015 (currently 24%). Succession planning for key management is also a key area of focus and we continually identify talented future leaders and maintain updated management succession plans to ensure Investec’s long-term success.

At the same time, we continue the progress made with the digitisation strategy and will look for further collaboration across our businesses.

The resultant simplification enables the group to enhance the operational focus to grow and develop its core businesses, so that the right outcomes can be delivered for clients and stakeholders including acceptable returns for shareholders. Notwithstanding the structural challenges in the South African economy and the intensified regulatory landscape, we believe there are still opportunities in our key markets and hence we feel positive about the outlook for the year ahead.

What is your strategic focus and outlook for the coming year?

We are pleased that the key strategic initiatives embarked upon over the past two years have been successfully executed. Now that the simplification of the business is complete, the strategic focus for the next financial year is primarily on driving growth in our core businesses. We look to continue the momentum in the Asset Management business by focusing on investment performance with the long-term aim of enabling people to retire with dignity. The Wealth & Investment business continues to increase its market share and grow earnings with opportunities to benefit from extending its international reach. With the reshaping of the Specialist Bank behind us, all efforts are now focused on building the private client and corporate and institutional client franchise businesses.

On behalf of the boards of Investec plc and Investec Limited

Fani Titi  Stephen Koseff  Bernard Kantor
Chairman  Chief executive officer  Managing director

(References to “operating profit” in the text above relates to operating profit before taxation, goodwill, acquired intangibles, non-operating items and after other non-controlling interests.)

The operating financial review provides an overview of our strategic position, performance during the financial year and outlook for the business. It should be read together with the sections that follow on pages 22 to 180 as well as volume two of our integrated annual report, which elaborate on the aspects highlighted in this review.
Financial review

Introduction – understanding our results

Investec operates under a DLC structure with primary listings of Investec plc on the London Stock Exchange and Investec Limited on the JSE Limited.

In terms of the contracts constituting the DLC structure, Investec plc and Investec Limited effectively form a single economic enterprise in which the economic and voting rights of ordinary shareholders of the companies are maintained in equilibrium relative to each other. The directors of the two companies consider that for financial reporting purposes, the fairest presentation is achieved by combining the results and financial position of both companies.

Accordingly, the year-end results for Investec plc and Investec Limited present the results and financial position of the combined DLC group under International Financial Reporting Standards (IFRS), denominated in Pounds Sterling.

All references in this document to Investec or the group relate to the combined DLC group comprising Investec plc and Investec Limited.

Sale of businesses

During the year the group sold a number of businesses namely, Investec Bank (Australia) Limited, Kensington Group plc and Start Mortgage Holdings Limited as set out below.

Sale of Investec Bank (Australia) Limited

The sale of Investec Bank (Australia) Limited’s Professional Finance and Asset Finance and Leasing businesses and its deposit book to Bank of Queensland Limited was effective 31 July 2014 for cash proceeds of £122 million. This has resulted in the derecognition of approximately £1.7 billion of assets and approximately £1.7 billion of liabilities associated with the businesses sold. We continue to have a presence in Australia, focusing on its core activities of Specialised Finance, Corporate Advisory, Property Fund Management and Asset Management. The remaining business will operate as a non-banking subsidiary of the Investec group. As a result, we have decided to no longer report the activities of our Australian businesses separately, with these activities now reported under the ‘UK and Other’ segment.

Sales of Kensington Group plc and Start Mortgage Holdings Limited

On 9 September 2014 we announced the sale of our UK intermediated mortgage business Kensington Group plc (Kensington) together with certain other Investec mortgage assets to funds managed by Blackstone Tactical Opportunities Advisors L.L.C. and TPG Special Situations Partners for £180 million in cash based on a tangible net asset value of the business of £165 million at 31 March 2014. This transaction became effective on 30 January 2015.

On 15 September 2014 we announced the sale of our Irish intermediated mortgage business Start Mortgage Holdings Limited (Start) together with certain other Irish mortgage assets to an affiliate of Lone Star Funds. This transaction became effective on 4 December 2014.

This has resulted in the derecognition of approximately £4.1 billion of assets and approximately £2 billion of external liabilities associated with these businesses sold.

Impact of these sales on our operational performance

The sales of these businesses have had a significant effect on the comparability of our financial statutory position and results. As a result, comparison on a statutory basis of the 2015 results with 2014 would be less meaningful.

In order to present a more meaningful view of our performance, additional management information is presented on our ongoing businesses. This information is only set out in volume one of our annual report. The additional information presented on an ongoing basis excludes items, that in management’s view, could distort the comparison of performance between periods. Based on this principle, the following items are excluded from underlying statutory profit to derive ongoing operating profit:

- The results of the businesses sold as mentioned above
- The remaining legacy business in the UK (as set out on pages 88 and 89).

A reconciliation between the statutory and ongoing income statement is provided on pages 56 and 57. All information in our annual report comprising volumes one, two and three are based on our statutory accounts, unless otherwise indicated.

Exchange rates

Our reporting currency is Pounds Sterling. Certain of our operations are conducted by entities outside the UK. The results of operations and the financial position of our individual companies are reported in the local currencies of the countries in which they are domiciled, including South African Rands, Australian Dollars, Euros and US Dollars. These results are then translated into Pounds Sterling at the applicable foreign currency exchange rates for inclusion in our combined consolidated financial results. In the case of the income statement, the weighted average rate for the relevant period is applied and, in the case of the balance sheet, the relevant closing rate is used.

The following table sets out the movements in certain relevant exchange rates against Pounds Sterling over the period.

<table>
<thead>
<tr>
<th>Currency per £1.00</th>

<td>1.62</td>
</tr>
</tbody>
</table>

Exchange rates between local currencies and Pounds Sterling have fluctuated over the period. The most significant impact arises from the volatility of the Rand. The average Rand: Pounds Sterling exchange rate over the period has depreciated by 10.5% and the closing rate has depreciated by 2.3% since 31 March 2014.
Financial review (continued)

The following tables provide an analysis of the impact of the Rand and Australian Dollar depreciation on our reported numbers.

In the medium to long term, we aim to achieve adjusted EPS growth of 10% in excess of UK inflation (in Pounds Sterling). We continually strive to build and maintain a sustainable business model. We intend to maintain a dividend cover of between 1.7 to 3.5 times based on earnings per share as defined above, denominated in Pounds Sterling

# Restated. Refer to note 59 in volume three.
The World Bank evidences that South Africa has established a more equitable society over the past 20 years via social assistance programmes, particularly spend on education and healthcare.

Upward social mobility persisted, largely on the ongoing roll-out of social services, which accounted for 68% of government revenue. Redistribution between the rich and poor via direct (personal income) taxation is progressive, and the World Bank shows South Africa achieved the largest reduction in poverty and inequality compared to the other middle income economies studied on the provision of free basic services and direct monetary transfers to households. South Africa’s Gini coefficient on income is measured at 0.77 before taxes and social spending and 0.59 after. It is still high, but the fiscal space to spend more to achieve even greater redistribution is extremely limited, with South Africa already receiving a number of credit rating downgrades over the past few years. More needs to be done to reduce inequality, in particular South Africa needs substantially faster economic growth via a tripling in the size of the private corporate sector in order to achieve single digit unemployment, an eradication of poverty and a further reduction in inequality.

South Africa increased its interest rates by 75bps over 2014 and further hikes are expected from current, still low, levels. Electricity supply constraints have proved an inhibitor to economic performance, while higher interest rates and indebtedness impacted household consumption expenditure in 2014.

2014/15 has seen a more conservative budget released than in recent years, detailing reduced projections on government net debt as a percentage of GDP and projected consolidation of the fiscal deficit, with some reduction in government expenditure. If achieved, this should assist South Africa to maintain its credit rating of BBB- from Standard and Poor’s on its long-term foreign currency sovereign debt.

Financial review (continued)
Overview of the year

**United Kingdom**

**Our views**

The UK recorded the firmest pace of growth of all the advanced economies in 2014, and saw its fastest growth pace since 2006.

<table>

<tr>
<td>2014</td>
<td>£26 731</td>
</tr>
</tbody>
</table>

The health of the labour market has also continued to improve markedly with the latest unemployment reading at 5.6% – the lowest level seen since July 2008.

UK monetary policy remained steady throughout the financial year, with the bank rate held at 0.5%, marking six years at a record low. Meanwhile the level of the Bank of England’s asset purchase scheme was maintained at £375 billion. Over the same period the UK’s economic fundamentals continued to strengthen.

Employment growth has also been robust with 617 000 more in work than a year earlier.

The inflation backdrop has been one of very subdued price growth, particularly in the latter part of the fiscal year where CPI inflation fell to a record low of zero in February and March 2015; the main driver has been lower fuel prices, reflecting the sharp decline in the wholesale price of oil. Hence despite the strengthening recovery, there has been little appetite on the MPC for higher interest rates, with the UK Monetary Policy Committee looking to see out the soft price patch and not adjust policy until it gains confidence that inflation is headed back to the 2% target; hence immediate talk of rate hikes has been limited.

The recovery of the UK’s housing market stuttered from summer 2014 onwards as the pace of house price growth eased from its 11.9% June 2014 high as activity, particularly mortgage approvals, stumbled after tighter checks on loan affordability and limits on high loan to income ratio mortgage origination were introduced.

**Australia**

**Our views**

Australia experienced moderate economic performance over the last calendar year, with GDP growth firming to 2.5%, from the 2.3% that was witnessed over 2013.

<table>

</tr>
</tbody>
</table>

On a quarterly basis the pace of growth was slower than historical averages, with quarter-on-quarter growth averaging just 0.3% over the year.

Headwinds to the economy were centred on the resources sector where falling commodity prices contributed further to a decline in mining investment, weighing on output overall. Outside of mining activity was mixed, with household consumption below trend, dampened by slow income growth and rising unemployment. Additionally, the strength of the Australian Dollar over the first half of the fiscal year also posed a headwind. Subsequently, the Australian Dollar weakened to A$0.76 against the US Dollar by the end of the period under review, having started at A$0.93. The housing market has, however, seen strength, with house prices rising 9.4% over 2014.

Having kept policy stable through almost the whole of the 2014/15 fiscal year the Reserve Bank of Australia cut the cash rate from 2.50% to a new record low of 2.25%, as the economy proceeded at a below trend pace and inflation hit its lowest level since Q2 2012.
Overview of the operating environment impacting our business (continued)

United States

Our views

The US labour market saw a more substantial improvement over the past financial year with the unemployment rate falling from 6.2% in April 2014 to 5.5% by March 2015 – the lowest level since May 2008.

US growth slowed to a near standstill in Q1 2015, recorded at just a 0.2% annualised rate, albeit with several transitory factors, not least adverse weather being a particular drag.

Further, gains in non-farm payrolls averaged 260 000 over the 2014/15 year – the strongest run since the late 1990s.

Reflecting these improvements in the US labour market, the US Federal Reserve’s efforts through the first part of the 2014/15 year were focused on bringing its quantitative easing purchases to a close, with the last ‘taper’ taking place in October 2014 while the Federal funds target rate range was held at 0% – 0.25% throughout the period. From October 2014 onwards the Federal Open Market Committee’s (FOMC) communications were focused on adjusting communications to bring the prospect of a near-term rise in interest rates into sight, with the FOMC in its March 2015 communication going as far as removing reference to the committee being ‘patient’ in beginning its normalisation of monetary policy.

Eurozone

Amidst concerns that deflation was becoming a more serious threat in the Eurozone, the European Central Bank (ECB) eased policy further over the 2014/15 year. It opted to cut the ECB’s main lending rates twice, taking the main refinancing rate down to a new record low of 0.05% in September 2014 while the deposit rate reached a low of (0.20%); both rates remained at these levels as the financial year closed. However, ECB policy easing did not stop there as the collapse in oil prices heightened deflation concerns in winter 2014 and culminated in the ECB unveiling a full-scale quantitative easing programme in January 2015, including the purchase of Euro area sovereign bonds. The programme is set to amount to some €1 trillion with purchases of around €60 billion per month running until at least Q3 2016; purchases got underway in March 2015.

The economic background has been one of modest growth with a 0.9% expansion seen in calendar year 2014. Euro area growth has now been mildly positive since Q2 2013 but, with the exception of Q1 2014, has failed to surpass a +0.3% quarterly growth rate in any individual period. However, early indications are that we will see something of a pick-up in growth in 2015.

On the Euro crisis front, Greek troubles reared their head again late in 2014 as the failure of the government to see its presidential candidate elected paved the way for new elections in January 2015. They ushered in a new administration, a coalition between Syriza and the Independent Greeks which has since sought a full-out renegotiation of Greece’s existing arrangements with the IMF, ECB and the European Commission. Progress in putting the details to a reform plan which would see Greece granted disbursements of cash under a four-month extension to the existing bailout has stalled. Furthermore, its cash estimates indicate that a third bailout will be needed before the summer. Finally, note that the Euro area expanded geographically over the period as well, with Lithuania becoming the nineteenth member of the currency union.

Key income drivers

We provide a wide range of financial products and services to a niche client base in three principal markets – the UK and Europe, South Africa and Asia/Australia. We are organised as a network comprising three principal business divisions: Asset Management, Wealth & Investment and Specialist Banking.

There are therefore a number of key income drivers for our business which are discussed below and alongside.

<table>
<thead>
<tr>
<th>Asset Management</th>

In our ordinary course of business we face a number of risks that could affect our business operations.

These risks are summarised briefly in the table below with further details provided in volumes one and two of the report. For additional information pertaining to the management and monitoring of these risks, see the references provided.

<table>
<thead>
<tr>
<th>Risk</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Credit and counterparty risk</td>
<td>Exposes us to losses caused by financial or other problems experienced by our clients.</td>
</tr>
<tr>
<td>Operational risk</td>
<td>May disrupt our business or result in regulatory action.</td>
</tr>
<tr>
<td>Legal and regulatory risks</td>
<td>Are substantial in our businesses.</td>
</tr>
<tr>
<td>Liquidity risk</td>
<td>May impair our ability to fund our operations.</td>
</tr>
<tr>
<td>Operational risk</td>
<td>We are exposed to non-traded currency risk where fluctuations in exchange rates against Pounds Sterling could have an impact on our financial results.</td>
</tr>
<tr>
<td>Legal and regulatory risks</td>
<td>Our net interest earnings and net asset value may be adversely affected by interest rate risk.</td>
</tr>
<tr>
<td>Operational risk</td>
<td>We may be vulnerable to the failure of our systems and breaches of our security systems.</td>
</tr>
<tr>
<td>Operational risk</td>
<td>We may have insufficient capital in the future and may be unable to secure additional financing when it is required.</td>
</tr>
<tr>
<td>Employee misconduct</td>
<td>Could cause harm that is difficult to detect.</td>
</tr>
<tr>
<td>Retail conduct risk</td>
<td>Is the risk that we treat our customers unfairly and deliver inappropriate outcomes. Wholesale conduct risk is the risk of conducting ourselves negatively in the market.</td>
</tr>
</tbody>
</table>

Additional risks and uncertainties not presently known to us or that we currently deem immaterial may in the future also negatively impact our business operations.

* Refer to volume two.
Statutory income statement analysis

The overview that follows will highlight the main reasons for the variance in the major category line items on the face of the income statement during the year under review.

Further details on the key income drivers and significant variances in the various components of our operating income, expenses and profit can be found in the description of our principal businesses on pages 68 to 91.

Total operating income

Total operating income increased by 0.9% to £1 957.5 million (2014: £1 941.0 million). The various components of total operating income are analysed below.

</tbody>
</table>

^ Includes Australia, which was previously reported separately. Refer to page 22.
Net interest income

Net interest income decreased by 2.6% to £635.0 million (2014: £651.7 million) largely due to a lower return earned on the legacy portfolios which are running down; the sales of Investec Bank (Australia) Limited, Kensington UK and Start Irish operations; and the depreciation of the Rand against Pounds Sterling. This was partially offset by solid book growth, a lower cost of funding in the UK and a positive endowment impact in South Africa.

A further analysis of interest received and interest paid is provided in the tables below.

Notes:
1. Comprises (as per the balance sheet) cash and balances at central banks; loans and advances to banks; non-sovereign and non-bank cash placements; reverse repurchase agreements and cash collateral on securities borrowed; sovereign debt securities; and bank debt securities.
2. Comprises (as per the balance sheet) loans and advances to customers and own originated loans and advances to customers securitised.
3. Comprises (as per the balance sheet) other securitised assets.
^ Includes Australia, which was previously reported separately. Refer to page 22.

Notes:

1. Comprises (as per the balance sheet) cash and balances at central banks; loans and advances to banks; non-sovereign and non-bank cash placements; reverse repurchase agreements and cash collateral on securities borrowed; sovereign debt securities; and bank debt securities.
2. Comprises (as per the balance sheet) loans and advances to customers; and own originated loans and advances to customers securitised.
3. Comprises (as per the balance sheet) other securitised assets.
4. Comprises (as per the balance sheet) deposits by banks; debt securities in issue; repurchase agreements and cash collateral on securities lent.
5. Comprises (as per the balance sheet) liabilities arising on securitisation of own originated assets; and liabilities arising on securitisation.
**Net fee and commission income**

Net fee and commission income increased by 10.1% to £1,089.0 million (2014: £989.4 million) as a result of higher average funds under management and net inflows in the asset management and wealth management businesses. The Specialist Banking business benefited from a solid performance from the corporate finance and corporate treasury businesses, notably in the UK, and the private banking business in South Africa continued to perform well.

Overview of the year

Investment income

Investment income decreased by 23.1% to £128.3 million (2014: £166.8 million). Our unlisted investment portfolio in the UK and South Africa delivered a solid performance. This was offset, however, by a poor performance from the Hong Kong portfolio.

Other operating income

Other operating income includes associate income and income earned on an operating lease portfolio.

Impairment losses on loans and advances

Impairments on loans and advances decreased from £166.2 million to £128.4 million. Since 31 March 2014, gross defaults have improved from £658.7 million to £608.4 million. The percentage of default loans (net of impairments, but before taking collateral into account) to core loans and advances amounted to 2.07% (2014: 2.30%). The ratio of collateral to default loans (net of impairments) remains satisfactory at 1.37 times (2014: 1.27 times).

Further information is provided on pages 31 to 33 in volume two.

Operating costs

The ratio of total operating costs to total operating income was 67.6% (2014: 67.6%). Total operating costs grew by 1.2% to £1,322.7 million (2014: £1,307.2 million) reflecting: an increase in headcount in the asset management and wealth management businesses to support growth initiatives; inflationary increases in fixed costs in the Specialist Bank in home currencies; an increase in variable remuneration given increased profitability in certain businesses; and a reduction in costs arising from the sale of certain businesses in Australia.

Financial review (continued)

Operating profit before goodwill, acquired intangibles, non-operating items, taxation and after other non-controlling interests

As a result of the foregoing factors, our operating profit before goodwill, acquired intangibles, non-operating items, taxation and after other non-controlling interests increased by 9.4% from £450.7 million to £493.2 million.

The following tables set out information on operating profit before goodwill, acquired intangibles, non-operating items, taxation and after other non-controlling interests by geography and by division for the year under review.

</tbody>
</table>

* Prior to 25 June 2010, Rensburg Sheppards plc was an associate of Investec and not a 100% owned subsidiary.

** A large portion of the funds under management are non-discretionary funds.

^ The average income yield on funds under management represents the total operating income for the period as a percentage of the average of opening and closing funds under management. This calculation does not take into account the impact of market movements throughout the period on funds under management or the timing of acquisitions and disposals during the respective periods.

^^ Other comprises European Wealth Management, which prior to 1 July 2010 was part of the Private Bank, Investec Wealth & Investment Ireland (formerly NCB), which was acquired on 12 June 2012 and Investec Wealth & Investment Channel Islands.

---

^ Divisional ROEs are reported on a pre-tax basis. For the purpose of this calculation, we have applied the group’s effective tax rate to derive post-tax numbers. Capital as at 31 March 2015 was c.£1.2 billion in the UK and c.R24.6 billion in South Africa.

^^ Impacted by sale of assets.

* Excludes group costs.

** Further information is provided on page 66.

† Includes UK, Europe, Australia and the legacy businesses.

º Restated as per note 59 in volume three.
Impairment of goodwill
The goodwill impairment largely relates to the restructure of the Australian business.

The decrease in goodwill relates to the sale of Investec Bank (Australia) Limited, Kensington UK and Start Irish operations as detailed on page 22.

</tr>
</tbody>
</table>

Amortisation of acquired intangibles
Amortisation of acquired intangibles largely relates to the Wealth & Investment business and mainly comprises amortisation of amounts attributable to client relationships.

Net loss after tax on sale of subsidiaries
Net loss on sale of subsidiaries comprises a net profit on the sale of Investec Bank (Australia) Limited offset by a net loss on the sale of the Kensington UK and Start Irish operations as detailed on page 22.

Net loss after taxation can be analysed further as follows:

<table>
<thead>
<tr>
<th>£’million</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net loss before goodwill and taxation</td>
</tr>
<tr>
<td>Goodwill</td>
</tr>
<tr>
<td>Net loss on sale of subsidiaries</td>

* Restated as per note 59 in volume three.

### Profit attributable to non-controlling interests

Profit attributable to non-controlling interests mainly comprises:

- £18.2 million profit attributable to non-controlling interests in the Asset Management business
- £31.7 million profit attributable to non-controlling interests in the Investec Property Fund Limited
- A reduction of £20.7 million relating to Euro-denominated preferred securities issued by a subsidiary of Investec plc, which are reflected on the balance sheet as part of non-controlling interests. (The transaction is hedged and a forex transaction loss arising on the hedge is reflected in operating profit before goodwill with the equal and opposite impact reflected in earnings attributable to non-controlling interests.)

### Earnings attributable to shareholders

As a result of the foregoing factors, earnings attributable to shareholders decreased from £330.8 million to £245.5 million.

### Dividends and earnings per share

Information with respect to dividends and earnings per share is provided on pages 5, 6 and 53 - 55 in volume three.

### Statutory balance sheet analysis

Since 31 March 2014:

- Total shareholders’ equity (including non-controlling interests) increased by 0.6% to £4.0 billion
- Net asset value per share decreased 3.0% to 364.9 pence and net tangible asset value per share (which excludes goodwill and intangible assets) decreased by 0.3% to 308.1 pence
- The return on adjusted average shareholders’ equity increased from 10.0% to 10.6%.

Overview of the year

Capital management and allocation

We held capital in excess of regulatory requirements targeting a minimum tier 1 capital ratio of 10.5% (11.0% by March 2016) and a total capital adequacy ratio range of 14% to 17% on a consolidated basis for each of Investec plc and Investec Limited.

Further information is provided on pages 78 to 83 in volume two.

* Where: IBP is Investec Bank plc consolidated and IBL is Investec Bank Limited. The information for Investec plc includes the information for IBP. The information for Investec Limited includes the information for IBL.

^ The capital adequacy disclosures follow Investec’s normal basis of presentation so as to show a consistent basis of calculation across the jurisdictions in which the group operates. For Investec plc and Investec Bank plc this does not include the deduction of foreseeable dividends when calculating common equity tier 1 as now required under the Capital Requirements Regulation and European Banking Authority technical standards. The impact of the final proposed ordinary and preference dividends totalling £57 million for Investec plc and £15 million for Investec Bank plc would be around 50bps and 10bps, respectively. At 31 March 2014 the impact of the final proposed ordinary and preference dividends totalling £61 million for Investec plc and £32 million for IBP would be around 40bps and 30bps, respectively.

^^ Based on the group’s understanding of current and draft regulations. ‘Fully loaded’ is based on Basel III capital requirements as fully phased in by 2022.

** The leverage ratios are calculated on an end-quarter basis.

# Based on revised BIS rules.

## The 31 March 2014 capital information has been restated to reflect the implementation of IFRIC 21.

</table>

° The return on equity by business is based on the level of internal capital required by each business, inclusive of an allocation of any surplus capital held by the group. The operating profit is adjusted to reflect a capital structure that includes common equity, additional tier 1 capital instruments and subordinated debt.

^ The Wealth & Investment is consistent with the group computation, except for an adjustment of £159.1 million between ordinary shareholders’ funds and goodwill, which represents historical accounting gains with a corresponding effective increase in goodwill. These gains were excluded from group.

* Restated as per note 59 in volume three.

Divisional review
Group divisional structure

Investec is a focused specialist bank and asset manager striving to be distinctive in all that it does

Our strategic goals and objectives are motivated by the desire to develop an efficient and integrated business on an international scale through the active pursuit of clearly established core competencies in our principal business areas. Our core philosophy has been to build well-defined, value-added businesses focused on serving the needs of select market niches where we can compete effectively.

We seek to maintain an appropriate balance between revenue earned from operational risk businesses and revenue earned from financial risk businesses. This ensures that we are not over-reliant on any one part of our business to sustain our activities and that we have a large recurring revenue base that enables us to navigate through varying cycles and to support our long-term growth objectives.

Our current strategic objectives include increasing the proportion of our non-lending revenue base which we largely intend to achieve through the continued strengthening and development of our wealth and asset management businesses.

### Asset Management

**What we do**

- 4Factor™ equities
- Quality
- Frontier and emerging market equities
- Value
- Commodities and resources
- Emerging market fixed income
- Multi-Asset

### Wealth & Investment

- United Kingdom: David van der Walt, Steve Elliott
Asset Management

At Investec Asset Management, we want to assist people around the globe to retire with dignity. We do this by assisting institutional asset owners and financial advisors to meet the investment objectives of their members and clients. Our business is to manage clients’ investments to the highest standard possible by exceeding their investment and client service expectations.

Global head of Asset Management: Hendrik du Toit (chief executive officer)

Our value proposition

- Organically built an independent global platform from an emerging market base
- Independently managed entity within the Investec group
- Competitive investment performance in chosen specialities
- Global approach:
  - global investing
  - global client base
  - global operations platform
- Institutional and advisor focus
- Unique and clearly understood culture
- Stable and experienced leadership.

Annual highlights

- Net inflows of £3.1 billion
  (2014: £2.6 billion)
- Assets under management
  £77.5 billion
  (2014: £68.0 billion)
- Operating profit before non-controlling interests increased by 3.6% to £149.0 million, contributing 25.7% to group profit
- Operating margin
  34.2%
  (2014: 34.7%)

</tbody>
</table>

* As calculated on pages 52 and 53, based on regulatory capital requirements.

** Earnings after tax attributable to non-controlling interests includes the portion of earnings attributable to the 15% shareholding in the business by employees.

^ Operating profit per employee excludes Silica, our third party administration business.

The variance in operating profit over the year can be explained as follows:

- Rising equity markets and strong fixed income and real estate markets, on the back of quantitative easing, continued to support the performance of asset management firms over the year, including our business. The volatility in emerging markets, specifically emerging market currencies, continued throughout the financial year and has impacted our more recent earnings growth. Performance fees also decreased over the year and impacted our more recent earnings growth.
- Against this backdrop, our operating profit before non-controlling interests, grew by 3.6%. We continue to invest for the longer term and do not focus on short-term earnings.
- Performance fees decreased over the year (£30.5 million) as compared with the prior year (£36.4 million).

Assets under management by asset class

Investment performance

All of our investment capabilities are managed with the simple aim of delivering performance which meets or exceeds our clients’ expectations around agreed, well-defined return and risk parameters. We measure our investment performance relative to peer groups and against benchmarks over one, three, five and 10-year periods, and since inception. Our long-term track record remains competitive.
Asset Management (continued)

Segregated mandates performance

* Since the inception date of each portfolio, only annualised if inception date is older than 12 months.

Source: Calculated by Investec Asset Management gross of fees, portfolio weighted. Performance to 31 March 2015.

Note: Outperformance (underperformance) is calculated as the sum of the total market values for those portfolios that have positive active returns (negative active returns) expressed as a percentage of total assets under management. Market values for the indicated date are used for all periods shown.

Independent recognition

Financial year 2015

Winner of CIO Industry Innovation Award in the Emerging Markets category

Winner of EMEA Finance’s Best Asset Manager in Africa Award for the fourth year running

Winner of Private Equity Africa Award for house recognition

Winner of African Banker Award for Fund of the year

Mutual funds investment performance

Source: Calculated from Morningstar data by value; excludes cash, cash plus and liquidity funds. Performance to 31 March 2014.
Questions and answers

Hendrik du Toit
Chief executive officer

Can you give us an overview of the environment in which you operate?

A Superficially rising markets have created a benign environment for investment managers, but this year was not without its challenges. The volatility in emerging markets, specifically emerging market currencies, continued throughout the financial year and has impacted our short-term growth as well as demand for some of our services. Furthermore, we have had some capacity constraints across some of our strategies. These were caused by the extremely low levels of liquidity available in financial markets. Without these constraints our net inflows would have been substantially higher.

Regulatory initiatives continue across geographies and, given the global nature of our business, consume more and more resources and management time. We do not see this changing in the near term for our industry. Our industry remains fiercely competitive thus requiring constant productivity increases to assure margin retention.

What have been the key developments in the business over the financial year?

A This financial year we continued to invest in growth initiatives across the business. We have invested in building out our Equities and Multi-Asset capabilities, expanded our footprint in most of our large markets and continued to invest in our global support functions. Big wins for the past year were the excellent performance of our global equities business, the graduation of our global Multi-Asset offering onto many consultants’ buy lists and evidence of significant institutional traction in this important growth area.

Our European and Asia Pacific client groups delivered strong net inflows after years of hard work and investment. Our South African business has experienced outflows but we have simplified and focused the business with a clear plan to turn the momentum decisively over the next few years.

Our firm is well positioned in our target markets around the world and as a result of this we are pleased to report the eighth consecutive year of positive net inflows. We continue to attract top talent into our business while maintaining stability across our firm.

What are your strategic objectives in the coming year?

A Our primary goal is to deliver on our clients’ mandates. Our reason for existence is to look after other people’s money. If we pursue their interests, we will do well.

With a long-term horizon and through five geographically defined client groups, we serve the largest and most sophisticated institutional investors and asset platforms, irrespective of where they may be based. We are also committed to building a strong presence in the advisor market in select regions.

Our strategic objectives are to invest in and nurture growth opportunities, enhance depth and quality, and position the firm for long-term sustainability.

Furthermore, recognising that this is, above all, a people’s business, we continue to do our best to attract, develop and promote talent within a stable environment with a long future.

What is your outlook for the coming year?

A Our business has a long-term horizon and as such we do not manage our business for the short-term. However, we believe that the opportunity for growth over the next five years is significant. Our momentum is positive and we are confident that we are well positioned to face the future.

How do you incorporate environmental, social and governance (ESG) considerations into your business?

A In our role as a global asset manager, our primary goal is to deliver on our clients’ mandates. We want to assist our clients to retire with dignity or meet their financial objectives. The essential purpose of which is to preserve and grow the real purchasing power of our clients’ assets over the long term. We do this by assuming a stewardship role over our clients’ assets, including exercising of their ownership rights. This includes ensuring that our investments adhere to appropriate ESG standards and considers both risk and opportunities stemming from ESG issues. We believe this approach benefits both our clients and the social realms in which we invest and operate.
Today the business specialises in wealth management, portfolio management, private office and stockbroking services for individuals, families, trusts and charities. Through the alliance of Investec Private Client Securities in South Africa, Investec Wealth & Investment Limited in the UK, Investec Bank Switzerland, Investec Wealth & Investment Ireland and Investec Wealth & Investment Channel Islands, Investec Wealth & Investment is one of the UK’s leading private client investment managers, the largest in South Africa, and has a significant European presence.

UK head: Jonathan Wragg
Switzerland head: Peter Gyger
South Africa head: Henry Blumenthal
Ireland Wealth Management head: Eddie Clarke

Further detail on the Wealth & Investment management structure is available on our website: www.investec.com

Our value proposition

- Investec Wealth & Investment has been built via the acquisition and integration of businesses and organic growth over a long period of time
- Well-established platforms in the UK, South Africa, Switzerland, Ireland and Guernsey
- The business currently has four distinct channels: direct, intermediaries, charities and international, and is progressing developing its online capabilities to form a fifth ‘digital’ distribution channel
- Strategy to internationalise within jurisdictions where the Investec group already has an established business
- Focus is on organic growth in our key markets and enhancing our range of services for the benefit of our clients.

Annual highlights

Operating profit up 19.2% to £78.8 million, contributing 13.6% to group profit

Assets under management up 13.0% to £46.1 billion

Net new flows of £2.7 billion

Operating margin 25.2% (2014: 22.9%)
Wealth & Investment (continued)

What we do and where we operate

UK and Europe

Investments and savings

- Discretionary and advisory portfolio management services for private clients
- Specialist investment management services for charities, pension schemes and trusts
- Independent financial planning advice for private clients
- Specialist portfolio management services for international clients.

Pensions and retirement

- Discretionary investment management for company pension and Self Invested Personal Pensions (SIPPs)
- Advice and guidance on pension schemes, life assurance and income protection schemes.

Tax planning

- Succession planning
- ISAs
- Retirement planning
- Venture Capital Trusts (VCT) and Enterprise Investment Schemes (EIS).

The European operations are conducted through Investec Wealth & Investment Limited in the UK, Investec Bank Switzerland, Investec Wealth & Investment Ireland, and in Guernsey through Investec Wealth & Investment Channel Islands.

Over 1 150 staff operate from offices located throughout the UK and Europe, with combined funds under management of £29.6 billion. Investec Wealth & Investment is one of the UK’s leading providers of private client investment management services.

South Africa

Investec Wealth & Investment South Africa provides portfolio management, wealth management and stockbroking services for private clients, charities, pension funds and trusts, operating from eight offices across South Africa with R89.4 billion of discretionary and annuity managed assets, and a further R207.4 billion of funds under various other forms of administration.

* As calculated on pages 52 and 53, based on regulatory capital requirements.

The variance in operating profit over the year can be explained as follows:

- The UK and Europe operations have benefited from higher average funds under management in the UK, with a 9% increase in the closing relevant market indices compared to the prior year. Continued investment in the division’s platforms and the employment of additional professional investment managers has supported solid net inflows during the year. Operating margins have improved from 20.1% in 2014 to 22.7%.
- The South African business posted an operating profit of R390 million, an increase of 20.7% over the prior year, benefiting from higher average funds under management and solid discretionary and annuity asset net inflows. In addition, the business has continued to successfully leverage off the division’s global investment platform and the group’s integrated Private Client offering (One Place).

Questions and answers

Steve Elliott
Global head

Can you give us an overview of the environment in which you operated over the past year?

A

UK equity markets saw much greater volatility during the second half of the financial year than the first half. Equity indices had begun the year in a positive mood, but by September 2014 political and economic risks caused the main indices to fall sharply. Despite a period of volatility, equity indices recovered their lost ground and the FTSE 100 reached an all-time high, finally breaking through 7,000 points. While the UK business has benefited from this recovery during the second half, income growth has been pegged back somewhat by the level of transactional volumes, which have remained subdued in reflection of the element of caution which remains in investor sentiment.

The regulatory environment continues to place increasing pressures on UK investment management businesses. This is contributing to consolidation within the UK investment management sector, which remains a continuing feature of the landscape. We continue to pursue opportunities to recruit experienced investment managers who are attracted by the strength of our offering.

Recent events in the Swiss financial markets have given us a chance to examine a wider range of opportunities to grow the business.

The recent positive momentum and growth in the Irish economy continued. With confidence returning, clients are actively seeking investment solutions, particularly in light of the low interest rate environment, and there has been greater demand for portfolio management, diversification, and risk-adjusted returns.

What have been the key developments in the business over the past financial year?

A

In South Africa, the 12 months to end March 2015 proved to be volatile with the JSE reaching a peak of 53,575 and a low during the period of 46,068. This volatility occurred as a result of global economic conditions with accommodative monetary policy and the downturn in commodity prices. Global growth was modest with two of the world’s largest economies, China and the Eurozone, having seen economic growth slow significantly. The spread between US and German 10-year government bond yields widened considerably and Euro quantitative easing weakened the Euro even further. Investors favoured comparatively higher yielding US debt, strengthening the US Dollar with purchases into the safe haven currency.

The Rand has lost significant ground on US Dollar strength although Euro weakness saw the Rand strengthening against the common currency, but not against the UK Pound. The outlook for inflation has been lowered both globally and in South Africa, which has lowered global interest rate expectations. South Africa’s benchmark government bond has seen its yield drop below 7.00% after starting the period at 8.39%, with foreign net purchases of South African bonds and equities recorded at R24.6 billion – a figure which obscures the swings in investor sentiment to some degree.

In the UK, we recognised the increasing need for investment management services to be delivered digitally. Hence we recently announced the development of Investec Click & Invest, which will be one of the first online discretionary investment management services. This new offering will complement our core investment management service and ensure that we are ready to meet the needs of our clients as they change over time, and reach out to individuals who may not otherwise have formed part of our traditional client base. Our business is built on delivering a bespoke service to our clients, which is tailored to the need of each individual, and our digital capability must reflect this. Consequently, we are continuing to enhance those elements of our core offering that can be delivered digitally, in addition to the development of Investec Click & Invest.

The UK business has formally launched its Private Office service during the year, which draws on all of the resources we can offer to meet the needs of higher net worth individuals. Our ability to offer clients a choice of jurisdictions in which to custody their assets, along with access to banking services that the wider Investec group can provide, enables us to meet the more complex needs of these individuals.

While we pursue specific and measured opportunities for growth, our focus on ensuring that we provide our existing clients with the highest possible service will always be fundamental to what we do. Our offices across the UK have achieved rates of net organic growth in funds under management during the year that are ahead of our long-term target. This achievement reflects our continuing focus on the quality of our service and the strength of our investment processes.

In South Africa, we have focused on the expansion of our investment range, the further integration of our global investment forums and the practical application of technology to provide a transparent and cohesive view of the investor’s domestic and international investment holdings. Central to this was the roll-out of the One Place strategy which focused strategic on bringing the Private Banking and Wealth & Investment capabilities closer together around the client. We also opened an office in Stellenbosch to service and grow our client base in that region.
During the year, the South African business continued to enhance its range of domestic and international investment mandates for investors and has been able to deliver positive performance across a number of these. This, together with the depth of investment process and stability of experienced staff, allowed for robust growth in assets under management.

The expansion of the South African offshore offering included launching the segregated Global Leaders Portfolio, a high conviction, concentrated portfolio of leading companies listed in the major developed markets. We have also enhanced our digital capabilities to offer our local and international discretionary investment management services through our Online Portfolio Management service at lower minimum investment levels to existing Wealth & Investment clients and soon to all Investec private clients.

What are your strategic objectives in the coming year?

Serving our existing client base to the best of our ability is central to the strategy of our global Wealth & Investment business, and the foundation on which our future growth and success will be built. We strive to always look forward to predict how our clients’ needs will change over time, in order that we can plan to meet those needs into the future. We expect that an increasing portion of our clients will demand more of the service they receive from us to be delivered digitally going forward. With this in mind, we are investing resources to enhance our digital offering to our current and future clients across all geographies.

Serving our existing client base to the best of our ability is central to the strategy of our global Wealth & Investment business and the foundation on which our future growth and success will be built. We strive to always look forward to predict how our clients’ needs will change over time, in order that we can plan to meet those needs into the future. We expect that an increasing portion of our clients will demand more of the service they receive from us to be delivered digitally going forward. With this in mind, we are investing resources to enhance our digital offering to our current and future clients across all geographies.

In the UK, a key priority is the development of the Investec Click & Invest service, which we aim to launch during the 2016 financial year. We are also developing digital enhancements to our core service, which are becoming increasingly relevant to our clients. While the digital world brings with it opportunities to enhance the service we provide to our clients, it also brings challenges and risks. The security of our clients’ assets is imperative and we continue to invest in our security infrastructure as our digital offering develops.

We remain committed to the continuous development and expansion of our financial planning capability, which is key to our offering and enables clients to access advice in relation to their wider financial position and objectives. Financial planning seems to be growing in importance and the complexity of the personal financial world continues to increase.

We are also seeking to selectively broaden our international presence and build on the opportunities that the geographical spread of our platforms presents. We expect to launch a small operation hosted by the group’s Hong Kong office over the coming months, which will enable us to explore the potential for growth in that market.

In Switzerland we will continue to look for opportunities in the domestic market by offering services mainly to external asset managers and expatriates.

In South Africa, we continue to reinforce our offering services mainly to external asset managers and expatriates.

What is your outlook for the coming year?

A While UK equity indices have recovered from the low point of the second half of the financial year and the FTSE 100 has reached a record high, there remain significant economic and geopolitical risks which have the potential to cause further volatility.

In South Africa, the JSE entered a more volatile period during the last quarter of the financial year. Nevertheless, our positive outlook remains with many of the global threats slowly receding. Electricity load shedding and general weak demand have damped a potential recovery in economic growth, and will likely continue to weigh on the economy going forward. Despite its challenges, there is still a case to own South African equities, particularly those with global exposure. The big picture remains the same, ‘risk’ assets are cheap relative to ‘insurance’ assets, and the corporate sector that supports these risk assets is healthy.

The proven resilience of our business model and the opportunities which we are pursuing through our strategy means we look forward to the forthcoming financial year with confidence.

We are starting to gain traction with our Independent Financial Advisors’ strategy and look to develop it further, investing in dedicated resources to drive and build the business. We are also looking at the Charitable Trust business to manage charitable funds and trusts for our high net worth clients.

* Restated as per note 59 in volume three.
** As calculated on pages 52 and 53, based on regulatory capital requirements.
^ Detailed income statement provided on page 58.

The variance in the operating profit in the UK ongoing business over the year can be explained as follows:

- Net interest income increased as a result of an increase in core loans and advances of 16.4% and an improvement in the cost of funding
- Net fee and commission income increased substantially as a result of a solid performance from the corporate finance, corporate treasury team and aircraft finance business
- Investment income decreased as a result of a lower return generated on the Hong Kong investment portfolio
- Trading income from customer flow improved due to increased corporate treasury activity
- Other trading income includes the impact of accounting for the Euro-denominated preferred securities issued by a subsidiary of Investec plc which are reflected on the balance sheet as part of non-controlling interests. (The transaction is hedged and a forex transaction loss arising on the hedge is reflected in other trading income and the opposite impact is reflected in earnings attributable to non-controlling interests)
- Other operating income includes associate income and income earned on an operating lease portfolio acquired during December 2010
- Total operating income decreased by 2.5%
- Impairments decreased by 45.5%. Further information is provided on pages 32 and 33 in volume two
- Operating expenses increased largely as a result of higher compensation costs.
The variance in the operating profit in Southern Africa over the year can be explained as follows:

- The analysis and variances described below for the South African Specialist Banking division are based on the Rand numbers reported.
- Results in Pounds Sterling have been negatively impacted by the depreciation of the average Rand: Pounds Sterling exchange rate of approximately 11% over the year. The Specialist Banking division reported operating profit before taxation of R4 695 million (2014: R3 431 million).
- Net interest income increased as a result of an increase in core loans and advances of 16.0% and a positive endowment impact.
- Net fee and commission income improved as a result of good performances from the private banking professional finance and property businesses, with corporate fees remaining largely in line with the prior year.
- Investment income was supported by a solid performance from the unlisted investments and investment property portfolios.
- Trading income arising from customer flow declined and other trading activities decreased reflecting less activity on the balance sheet.
- Total operating income increased by 23.4%.
- Impairments decreased by 28.4%. Further information is provided on pages 32 and 33 in volume two.
- Operating expenses increased by 14.7% largely as a result of increased variable remuneration given improved profitability, with fixed costs growing in line with inflation.

Legacy business in the UK Specialist Bank

The legacy business in the UK Specialist Bank comprises:

- Assets put on the bank’s books pre-2008 where market conditions post the financial crisis materially impacted the business model
- Assets written prior to 2008 with very low/negative margins
- Assets relating to business we are no longer undertaking.

During the year management performed a comprehensive review of the group’s legacy portfolio on the back of improved market performance. As a result, assets of £0.9 billion were transferred to the ongoing book (core loans and other assets) where assets generate yields that support targeted return on equity, are performing and no longer meet the definition of the legacy business.

Legacy business – overview of results

The group’s legacy portfolio in the UK has been actively managed down from £3.4 billion at 31 March 2014 to £0.7 billion largely through strategic sales (mentioned on page 22), redemptions, write-offs and transfers (at the end of the period) to the ongoing book on the back of improved performance in these loans. The total legacy business over the period reported a loss before taxation of £107.7 million (2014: £69.1 million) as the group accelerated the clearance of the portfolio, which resulted in an increase in impairments on these assets. The remaining legacy portfolio will continue to be managed down as the group sees opportunities to clear the portfolio. Management believes that the remaining legacy book will still take three to five years to wind down. Total net defaults in the legacy book amount to £218 million.

Questions and answers

David van der Walt
Geographical business leader United Kingdom

Can you give us an overview of the environment in which you have operated over the past year?

A

The UK recorded the firmest pace of growth of all the advanced economies in 2014 and saw its fastest growth pace since 2006. Indeed, at 2.8%, UK growth surpassed that of the United States (2.4%) and our Eurozone neighbours (0.9%). Furthermore, with 2014/15 having been a quieter year for Euro crisis developments, the UK benefited from a more positive risk backdrop. Responding to the solid recovery momentum, the health of the labour market continued to improve markedly over the financial year with the latest unemployment reading at 5.6%, the lowest level seen since July 2008.

The UK inflation background has been one of very subdued price growth, particularly in the latter part of the financial year where CPI inflation fell to a record low of zero in February and March 2015; the main driver has been lower fuel prices, reflecting the sharp decline in the wholesale price of oil. Hence despite the strengthening recovery, there has been little appetite on the UK Monetary Policy Committee (MPC) for higher interest rates, with the MPC not keen to adjust policy until it gains confidence that inflation is headed back to the 2% target. Hence, the bank rate remained at 0.5% through the financial year, marking six years at a record low. Meanwhile the level of the BoE’s asset purchase scheme was maintained at £375 billion.

Geopolitical concerns combined with the regulatory effects on liquidity has meant that volatility in markets has increased.

The conditions above translated into a very favourable business environment with good levels of activity.

What have been the key developments in the business over the last financial year?

A

The major development during the year has been the effective execution of our strategy to divest ourselves of the Professional Finance business in Australia and the sale of Kensington and Start. This completes the process of simplifying the business and allows us to now focus all our energy on building the core business.

In addition to this we have made substantial progress on reducing our legacy portfolio, which was helped by the sale of Kensington and Start, however, good progress was also made on the other corporate, structured credit and property assets. Impairment losses have been higher than budget mostly as a result of accelerating the tidy up of the legacy portfolio.

Corporate activity was very good. M&A activity was at a high helping a very good performance from the Investment Banking and Securities business. The high levels of activity also drove good underlying lending growth in both the Corporate and Specialist Banking activities.

Good progress was made within the Private Banking business. The Private Bank account was successfully launched and very good progress was made with our online and digital platforms. Particular emphasis has been placed on improving the client experience with improvements in security and functionality. We are now in a position to roll out our offering and we are working closely with the Wealth & Investment teams to ensure our clients have the benefit of our full product offering.

Overall, we have made very good progress with the only disappointment being the underperformance of the Hong Kong investment portfolio.

What are your strategic objectives in the coming year?

A

The business is now simplified and focused. We have significant momentum in the corporate and specialist business. Our main objective in the coming year is to grow and increase our core businesses with particular emphasis on growing and gaining traction in the Private Banking business.

To this end we will continue to invest in our private banking infrastructure to ensure our customer experience is the best in the market. In addition, we will roll out our strategy of targeting the professional market with particular emphasis on the accounting, legal and medical professions.

In addition to the client strategy we have a number of projects running to focus on cost efficiencies, reducing the overall cost of funds and the drag from surplus liquidity following the sale of Kensington.

We will continue to actively manage the legacy portfolio and reduce our exposure in the most appropriate manner.

What is your outlook for the coming year?

A

Our central view is that we should see another year of good economic growth in the UK with some of the early election uncertainty out of the way. The event of a Grexit may lead to a drop in confidence and business activity. A certain amount of volatility is to be expected given the geopolitical situation and overall reduced liquidity in markets. Overall, we are expecting our growth momentum to continue.
How do you incorporate environmental and sustainability considerations into your business?

We continue to focus on developing our people and investing in our communities and the environment, receiving a number of awards for our efforts in the past year. We won the Business Charity Award for our partnership with the Bromley by Bow Beyond Business incubator. With our support, the programme has launched 55 new social enterprise businesses creating over 325 new jobs and generating combined annual turnover of over £4 million. We also received recognition for our environmental efforts with the Gresham Street head office placed as a runner-up in the 2014 Clean City Awards Scheme. We continue to raise awareness around environmental concerns with staff through Team Green which was extended to 14 of our other UK offices during the year. Further, volunteerism remains core to our values and community efforts and through employees’ ongoing support of the Amherst School initiative we have volunteered over 50 days per year consistently for the past five years.
Questions and answers

Stephen Koseff  Glynn Burger
Bernard Kantor

Geographical business leaders

Can you give us an overview of the environment in which you operated over the past year?

A The South African operating environment has been mixed. On the one hand, the economic and political environments have been fragile. There has been slow economic growth which impacted spending, domestic fixed investment and production. The Rand continues to weaken against major currencies. Furthermore, strike action persisted and electricity supply constraints have proved an inhibitor to economic performance, while high indebtedness impacted consumer spending.

On the other hand, we have had very positive growth in the equity markets with the JSE All Share Index up 9.2% for the period and overall good activity in corporate South Africa.

What have been the key developments in the business over the past financial year?

A Notwithstanding the economic environment, it has been a particularly good year for the specialist bank in South Africa with operating profit up 36.8% in Rand terms. All businesses have done well largely as a result of reasonable activity levels across both corporates and private clients. We have experienced strong growth in our key drivers with underlying lending up some 16% over the past year and a positive endowment impact.

We continued to be recognised for this focus and performance. From a corporate perspective, the Aviation Finance team won the Corporate Jet Investor award again this past year and our Corporate Finance team came out top in both value and volume of transactions in the DealMakers awards. In the private client space, the Retail Funding business has increased its profile and we were once again recognised as the Best Private Bank in South Africa by Financial Times and Euromoney.

It has been particularly rewarding to see how the collaboration between the Private Bank and Wealth & Investment businesses has benefited the overall business. Furthermore, good progress has been made with rolling out our digitisation strategy as we continually look to enhance this offering to ensure it’s the best solution for our clients.

What are your key strategic objectives for the coming year?

A We will continue with the existing strategy of building and developing our client franchises, which remain integral to the growth and development of our business. This is focused on delivering integrated solutions to both our private and corporate clients, extending the quality of our service and products to attract new clients and ensuring we deepen our existing client relationships.

In the private client space, we will continue to organically grow the existing businesses of transactional banking, property and private capital. Our strategy of cross-selling products across different client bases, providing services between the Private Bank and the Wealth & Investment businesses has proved successful and we will continue to leverage these relationships.

What is your outlook for the coming year?

A The South African business has had a particularly good year and this may be hard to sustain going forward. There are structural challenges in the economy and we are cautious about the political uncertainty which can create a difficult environment for our business. However, the recent national budget proposed is more conservative than in recent years and, if achieved, should assist South Africa in maintaining its investment grade rating. Furthermore, South African corporates tend to be more resilient in a disrupted environment and there are potential opportunities to support them both domestically, on the continent and internationally.

How do you incorporate environmental and sustainability considerations into your business?

A Developing the communities and environment in which we operate is critical to the upliftment of our economy. During the year, we received the Mail & Guardian’s 2014 Investing in the Future Award for our Promaths programme which commended Investec for taking a long-term view to social development by improving skills in Maths and Science for the past 10 years. We also experienced good momentum in the Enterprise Development programme which was launched in the previous financial year and which continues to share valuable strategic, financial and marketing skills to selected entrepreneurs. Our staff remain vital in delivering on our promise to provide exceptional client experiences and hence we continue to focus on attracting, retaining and developing talent. In this regard, Investec was voted one of the most attractive employers in the 2015 Universum Most Attractive Employer awards where Investec was voted Best Bank by both professionals and graduates.
Corporate governance and corporate responsibility
Sound corporate governance is implicit in our values, culture, processes, functions and organisational structure

Chairman’s introduction

Dear Shareholder

It is pleasing to present the 2015 annual corporate governance report which sets out Investec’s approach to corporate governance.

Continuing and embedding our structured board refreshment programme has been a particular area of focus over the past year. It is pleasing that a thorough selection process, overseen by the nominations and directors affairs’ committee (NOMDAC) has led to the appointment of five independent non-executive directors, bringing further diversity of background, skills and experience to the board.

The last year also saw Sir David Prosser stepping down as joint chairman of the board. The transition from a joint chairmanship to a sole chairman has been a smooth one due, in no small part, to the invaluable role Sir David played in chairing the board and supporting me during this time.

Our culture and values

Our culture, values and philosophies provide the framework for how we conduct our business and measure behaviour and practices to ensure that we demonstrate the characteristics of good governance. Our values require that directors and employees act with moral strength and integrity, and conduct themselves to the highest ethical standard to promote and maintain trust.

Sound corporate governance is therefore implicit in our values, culture, processes, functions and organisational structure. Structures are designed to ensure that our values remain embedded in all businesses and processes. We continually refine these structures, and a written statement of values serves as our code of ethics.

Regulatory context

The disclosure of our governance practices requires a description of the regulatory context that Investec, as a dual listed company (DLC), operates within.

We operate under a DLC structure, and consider the corporate governance principles and regulations of both the UK and South Africa before adopting the appropriate standard for the group which also complies with requirements in both jurisdictions. All international business units operate in accordance with the above determined corporate governance principles, in addition to those of their jurisdiction, but with clear adherence at all times to group values and culture.

The board, management and employees of Investec are committed to complying with the disclosure, transparency and listing rules of the United Kingdom Listing Authority (UKLA), the JSE Limited (JSE) Listings Requirements the UK Corporate Governance Code (the Code) which was issued by the UK’s Financial Reporting Council in 2010, revised in September 2012 with the most recent version being published in September 2014 for reporting periods commencing after 1 October 2014, and the King Code of Governance Principles for South Africa (King III).

Therefore, all stakeholders are assured that we are being managed ethically and in compliance with the latest legislation, regulations and best practices.

The past year in focus

Sir David Prosser

Sir David decided in 2014 that it would be an appropriate time for him to retire and therefore stepped down from the board following the annual general meetings of Investec plc and Investec Limited held on 7 August 2014.

Consequently, I assumed the role of sole chairman of the board, with effect from 8 August 2014.

Composition of the board and board refreshment

The board, on the recommendation of the NOMDAC, implemented a structured refreshment programme so as to ensure that we are recruiting new independent non-executive directors and retiring some of our longer serving non-executive directors. Accordingly, the following changes were made to the composition of the board:

- George Alford, Olivia Dickson and Peter Malungani did not seek re-election as directors at the 2014 annual general meeting, and accordingly stepped down from the board at the conclusion of the 2014 annual general meeting
- The board appointed, with effect from 8 August 2014, Charles Jacobs, Lord Malloch-Brown and Khumo Shuenyane as independent non-executive directors
- Perry Crosthwaite was appointed as the senior independent director in place of George Alford on 8 August 2014
Corporate governance (continued)

- Zarina Bassa was appointed as an independent non-executive director of the board, with effect from 1 November 2014, and Laurel Bowden was appointed as an independent non-executive director on 1 January 2015.

Additionally, discussions have been concluded with Haruko Fukuda, who has served on the board for a period exceeding nine years, who has agreed that she will not stand for re-election at the August 2015 annual general meeting.

The board continues to monitor the impact of the evolving regulatory landscape in the UK, and consideration is being given to appoint a UK independent non-executive director with specific and recent financial services knowledge to the board.

Composition of the DLC remuneration committee
- Charles Jacobs was appointed as a member of the committee, effective from 8 August 2014
- Bradley Fried stepped down as a member of the committee, with effect from 18 September 2014.

Composition of the audit committees
- Khumo Shuenyane was appointed as a member of the committees on 1 November 2014
- Laurel Bowden was appointed to the committees with effect from 1 January 2015.

Composition of NOMDAC
- Perry Crossthwaite and David Friedland were appointed as members of NOMDAC on 16 September 2014.

Board and directors’ effectiveness review
The 2015 review of the board’s effectiveness took the form of a detailed questionnaire and a series of structured interviews between the chairman and each individual director (the 2015 review). All directors completed the questionnaire and were interviewed during the course of the 2015 review.

Key themes to emerge from the effectiveness review included:
- Board composition: bedding down the board refreshment programme
- Management succession planning
- Continuing to improve management information
- Strengthening the structures of the regulated subsidiaries
- Directors ongoing development particularly within the context of the changing regulatory landscape
- Streamlining the working between the group risk and capital committee (GRCC) and the board risk and capital committee (BRCC)
- The number of directors on the board.

An externally facilitated board effectiveness evaluation last took place in 2013.

The board has agreed that the 2016 review of the board’s effectiveness will be conducted by an external independent facilitator.

Priorities for the new year
In broad terms, our priorities for 2015, from a corporate governance perspective, are as follows:

Board diversity and effectiveness
The board will continue with its structured refreshment programme to ensure its composition is the most appropriate to provide effective entrepreneurial leadership and robust oversight.

The board believes that diversity in terms of broad range of skills, experience, background and outlook is required for it to be effective. While non-executive appointments are based on merit and overall suitability for the role, the NOMDAC is mindful of all aspects of diversity when making recommendations for appointments to the board.

Per Lord Davies’ report on ‘Women on Boards’, the board has an aspirational target of 25% female representation on the board by the end of 2015. The board recognises that gender is an important aspect of diversity. The NOMDAC continues to implement the structured refreshment programme referred to above so as to ensure that we are retiring some of our longer serving non-executive directors over a period of years. At the date of this report, the board had adopted a board diversity policy and female directors currently comprise 24% of the board.

Management succession
Succession planning for senior management is also a key area of focus and the identification of talented future leaders is essential for Investec’s long-term success.

The NOMDAC received a detailed presentation from the executive management regarding senior management succession, and the NOMDAC is satisfied that there is a formal management succession plan in place. The NOMDAC will continue to focus on ensuring that the management succession plan remains up to date and the respective succession plans in the three core activities continue to be implemented within the respective businesses.

Regulatory and governance best practice
In the United Kingdom, the year ahead will see the group’s implementation of the Financial Services (Banking Reform) Act 2013, bringing about a new Senior Managers Regime which will include specific responsibilities for non-executive directors. A revised UK Corporate Governance Code, published in September 2014, effective for reporting periods beginning on or after 1 October 2014, will see changes to its provisions relating to remuneration, engagement with shareholders and risk management.

Conclusion
The following pages of this report describe in more detail the governance framework, and the structures that are in place to ensure that Investec is able to maintain the highest standards of corporate governance. However, it is important to emphasise once again that underpinning all of this, and at the core of everything we do, are Investec’s culture, values and philosophies.

Increasingly, the importance of organisational culture and its part in ensuring good corporate governance and conduct is understood by other organisations and by our regulators. Our culture and values have always been at the heart of how we operate, and we believe the strength with which these are embedded and lived throughout the organisation distinguishes Investec from others. We believe that these will, as ever, provide the group with a strong foundation to enable it to meet the challenges of the future.

Fani Titi
Chairman
10 June 2015
Corporate governance (continued)

Governance framework

Investec plc (PLC) and Investec Limited (INL) board of directors

- DLC remuneration committee
- DLC nominations and directors' affairs committee
- DLC Audit committee

Statement of compliance

UK Corporate Governance Code

The board is of the opinion that, based on the practices disclosed throughout this report, which were in operation during the year under review, the group has complied with the relevant provisions set out in the UK Corporate Governance Code, save that Bradley Fried, was appointed as a member of the DLC remuneration committee (Remco) on 3 April 2013. Bradley Fried was not considered to be independent as he was employed as Investec Bank plc CEO during the five years prior to his appointment as a director. The board believes that Bradley Fried's knowledge and experience was beneficial to the work of the Remco for the period of his appointment, that he exercised independent judgement, and that the balance of independent non-executive directors on the Remco meant that it was able to effectively discharge its responsibilities. Bradley Fried stepped down as a member of the Remco with effect from 18 September 2014.

King III

The board is of the opinion that, based on the practices disclosed throughout this report, which were in operation throughout the year under review, Investec has applied the King III principles.

For a complete list of all principles and a reference to demonstrate how Investec has applied these principles, please refer to our website.

Financial reporting and going concern

The directors have confirmed that they are satisfied that the group, as well as Investec plc and Investec Limited individually, have adequate resources to continue in business for the foreseeable future. The assumptions underlying the going concern statement are discussed at the time of the approval of the annual financial results by the board and these include:

- Capital
- Liquidity
- Solvency.

The board is of the opinion, based on its knowledge of the group, key processes in operation and enquiries, that there are adequate resources to support the group as a going concern for the foreseeable future.

Further information on our liquidity and capital position is provided on pages 62 to 71 and pages 78 to 83 in volume two.

Furthermore, the board is of the opinion that the group’s risk management processes and the systems of internal control operate effectively.

The directors are responsible for monitoring and reviewing the preparation, integrity and reliability of the Investec plc and Investec Limited combined consolidated financial statements, accounting policies and the information contained in the integrated annual report, and to ensure that the annual financial statements are fair, balanced and understandable.
In undertaking this responsibility, the directors are supported by an ongoing process for identifying, evaluating and managing the key risks Investec faces in preparing the financial and other information contained in this integrated annual report. This process was in place for the year under review and up to the date of approval of this integrated annual report and annual financial statements.

The process is implemented by management and independently monitored for effectiveness by the audit, risk and other sub-committees of the board.

Further information is provided on pages 103 to 112.

Our annual financial statements are prepared on a going concern basis, taking into consideration:

- The group’s strategy and prevailing market conditions and business environment
- Nature and complexity of our business
- Risks we assume, and their management and mitigation
- Key business and control processes in operation
- Credit rating and access to capital
- Needs of all our stakeholders
- Operational soundness
- Accounting policies adopted
- Corporate governance practices
- Desire to provide relevant and clear disclosures
- Operation of board committee support structures.

Management and succession planning

Global business unit heads, geographic management and the heads of central and group service functions are appointed by executive management and endorsed by the board, based on the skills and experience deemed necessary to perform the required function. In general, managers do not have fixed-term employment contracts and there are no employment contracts with managers for a term of more than three years.

Our management structure, reporting lines and the division of responsibilities are built around a geographic, divisional and functional network as depicted on page 68.

Each strategic business unit has a management committee and is responsible for implementing operational decisions, managing risk and aligning divisional objectives with the group strategy and vision.

The NOMDAC receives a detailed presentation from the executive regarding senior management succession and the NOMDAC is satisfied that there is a formal management succession plan in place.

The NOMDAC will continue to focus on ensuring that the management succession plan remains up to date. Senior management succession plans are also presented annually to the banking regulators.

Internal control

Risks and controls are reviewed and monitored regularly for relevance and effectiveness. The DLC board risk and capital committee (BRCC), group risk and capital committee (GRCC) and audit committees assist the board in this regard.

Sound risk management practices are promoted by the group risk management function, which is independent of operational management. The board recognises its responsibility for the overall risk and control framework and for reviewing its effectiveness.

Internal control is designed to mitigate, not eliminate, significant risks faced. It is recognised that such a system provides reasonable, but not absolute, assurance against material error, omission, misstatement or loss. This is achieved within the group through a combination of risk identification, evaluation and monitoring processes, appropriate decision as well as oversight forums, and assurance and control functions such as group risk management, internal audit and compliance.

Internal Audit reports any control recommendations to senior management, group risk management and the relevant audit committee. Appropriate processes, including review by the audit committees’ support structures, ensure that timely corrective action is taken on matters raised by Internal Audit. Significant risks are regularly considered by the executive risk review forum (ERRF) and by the GRCC and BRCC. Material incidents and losses and significant breaches of systems and controls are reported to the BRCC and the audit committees. Reports from the audit committees, BRCC and risk and control functions are reviewed at each board meeting.

Conflict of interest

Certain statutory duties with respect to directors’ conflicts of interest are in force under the UK Companies Act 2006 and the South African Companies Act 2008, as amended. In accordance with these Acts and the Articles of Association (Articles) of Investec plc and the Memorandum of Incorporation (MOI) of Investec Limited, the board may authorise any matter that otherwise may involve the directors breaching their duty to avoid conflicts of interest. The board has adopted a procedure, as set out in the Articles and MOI, that includes a requirement for directors to submit, in writing, disclosures detailing any actual or potential conflict for consideration and, if considered appropriate, approval.

Internal financial controls

Internal financial controls are based on established policies and procedures. Management is responsible for implementing internal financial controls, ensuring that personnel are suitably qualified, that appropriate segregation exists between duties, and that there is suitable independent review. These areas are monitored by the board through the audit committees and are independently assessed by Internal Audit and Compliance. Processes are in place to monitor internal control effectiveness, identify and report material breakdowns, and ensure that timely and appropriate corrective action is taken. Group Finance and Investor Relations coordinate, review and comment on the monthly financial and regulatory reports, and facilitate the interim and annual financial reporting process, including the external audit process.

Directors’ dealings

The remuneration report on pages 140 to 180, contains details of Investec shares held by directors.
Corporate governance (continued)

Directors’ dealings in the securities of Investec plc and Investec Limited are subject to a policy based on regulatory requirements and governance best practice. All directors’ dealings require the prior approval of the Compliance division and the chairman, the senior independent director or the chairman of the audit committees.

All dealings of persons discharging management responsibilities require approval by line management, the Compliance division and the chairman.

Board of directors

In terms of the DLC arrangements, the boards of Investec plc and Investec Limited are identical and the group is managed as a unified economic enterprise. The board seeks to exercise leadership, integrity and judgement in pursuit of strategic goals and objectives, to achieve long-term sustainability, growth and prosperity. The board is accountable for the performance and affairs of Investec. It provides leadership for the group within a framework of prudent and effective controls which allow risks to be assessed and managed.

The board has adopted a board charter which is reviewed annually and which provides, a framework of how the board operates as well as the type of decisions to be taken by the board and which decisions should be delegated to management. The Investec board:

- Approves the group’s strategy
- Monitors group compliance with the applicable laws and regulations and considers adherence to non-binding rules and standards
- Is responsible for the governance of risk, including that of information technology (IT)
- Acts as a focal point for and custodian of corporate governance
- Provides effective leadership on an ethical foundation
- Ensures the group is, and is seen to be, a responsible corporate citizen.

The board meets its objectives by reviewing and guiding corporate strategy, setting the group’s values and standards, promoting high standards of corporate governance, approving key policies and objectives, ensuring that obligations to its shareholders and other stakeholders are understood and met, understanding the key risks, determining our risk tolerance and approving and reviewing the processes in operation to mitigate risk from materialising, including the approval of the terms of reference of supporting board committees. Certain matters are specifically reserved for the board. To achieve its objectives, the board may delegate certain of its duties and functions to various board committees, group forums or the chief executive officer, without abdicating its own responsibilities. The board has formally defined and documented, by way of terms of reference, the authority it has delegated to the various board committees, group forums and chief executive officer.

In fulfilling its responsibilities, the board is supported by management in implementing the plans and strategies approved by the board. Furthermore, directly or through its committees, the Investec board:

- Has delegated the review of the integrated annual report and annual financial statements to the audit committees. The audit committees recommended that, taken as a whole, the integrated annual report is fair, balanced and understandable and the board is satisfied with the recommendation
- Assesses the quantitative and qualitative aspects of Investec’s performance through a comprehensive system of financial and non-financial monitoring involving an annual budget process, detailed monthly reporting, regular review of forecasts and regular management strategic and operational updates
- Approves annual budgets, capital plans, projections and business plans
- Monitors the group’s compliance with relevant laws, regulations and codes of business practice
- Assisted by the audit committees’ support structures and BRCC, ensures that conduct risk is adequately mitigated, managed and addressed
- Ensures there are processes in place enabling complete, timely, relevant, accurate and accessible risk disclosure to stakeholders and monitors our communication with all stakeholders and disclosures made to ensure transparent and effective communication
- Identifies and monitors key risk areas and key performance indicators
- Reviews processes and procedures to ensure the effectiveness of the internal systems of control

- Assisted by the Social and Ethics Committee, ensures we adopt sustainable business practices, including our social and environmental activities
- Assisted by the audit committees, ensures appropriate IT governance processes are in place, the implementation of which management is responsible for, and ensuring that the process is aligned to the performance and sustainability objectives of the board
- Assisted by the audit committees’ support structures and BRCC, monitors cyber risks and mitigating factors to prevent cybercrime
- Monitors and evaluates significant IT investments and expenditure
- Ensures information assets are managed effectively
- Ensures the appropriate risk governance, including IT, is in place including continual risk monitoring by management, determines the levels of risk tolerance and that risk assessments are performed on a continual basis
- Ensures the induction of, and ongoing training and development of, directors
- Evaluates the performance of senior management and considers succession planning.

Membership

At the end of the year under review, the Investec board, including the chairman, comprised four executive directors and 13 non-executive directors. Biographical details of the directors are set out on pages 114 and 115.

Haruko Fukuda will not offer herself for re-election at the August 2015 annual general meeting. In accordance with the UK Corporate Governance Code, the remainder of the board will offer themselves for re-election at the August 2015 annual general meeting.
Corporate governance (continued)

* Sir David J Prosser, GFO Alford, OC Dickson and MP Malungani did not offer themselves for re-election at the annual general meeting held on 7 August 2014, and were therefore only eligible to attend meetings held prior to 7 August 2014.

** ZBM Bassa was appointed to the board with effect from 1 November 2014, and was therefore only eligible to attend meetings held after 1 November 2014.

*** LC Bowden was appointed to the board with effect from 1 January 2015, and was therefore only eligible to attend meetings held after 1 January 2015.

**** CR Jacobs, Lord Malloch-Brown and KL Shuenyane were appointed to the board with effect from 8 August 2014, and were therefore only eligible to attend meetings held after 8 August 2014.

The number of meetings held during the year excludes the single separate meeting for each of Investec plc and Investec Limited.

Board meetings

The combined boards of Investec plc and Investec Limited meet jointly at least six times annually, excluding the annual two-day board strategy session. Three board meetings were held in the UK and three in South Africa, in line with the requirements of our DLC structure.

Furthermore, the boards of Investec plc and Investec Limited held one additional meeting each in the UK and South Africa, respectively. Special (unscheduled) meetings are called as the need arises.

The chairman is responsible for setting the agenda for each meeting, in consultation with the chief executive officer and the company secretaries. Comprehensive information packs on matters to be considered by the board are provided to directors in advance of the meetings.

Board diversity

The board has a broad range of skills and experience. All appointments are made on merit, in the context of the diversity of skills, experience, background and gender required to be effective.
Corporate governance

Independence

- At 31 March 2015, the board is compliant with Principle B.1.2 of the UK Corporate Governance Code in that at least half the board, excluding the chairman, comprises independent non-executive directors.
- At 31 March 2015, the board is compliant with Chapter 2, Principle 2.18 of King III in that the majority of non-executive directors are independent.
- Bradley Fried was previously CEO of Investec Bank plc and given that role and his ongoing relationship with Grovepoint, the board concluded that Bradley could not be considered independent. Bradley has an interest in Grovepoint, which has entered into various transactions in the ordinary course of business with Investec.
- Prior to joining the board on 1 March 2013, David Friedland was a partner of KPMG. KMPG along with Ernst & Young, are joint auditors of Investec Limited. The board concluded that, notwithstanding his previous association with KPMG, David retains independence of judgement given he was never Investec Limited’s designated auditor or relationship partner and was not involved with its Investec account.

Despite the board concluding that Ian and Bradley cannot be considered independent for the reasons explained above, the board is of the view that their skills, knowledge, experience and attributes are nonetheless valuable to the organisation and believe they use their independent judgement when making decisions that affect the organisation and stakeholders.

Tenure

The board is also mindful of its responsibility to ensure that there remains an appropriate balance of skills and experience on the board, and it is therefore of the view that retention of certain members beyond nine years may in certain circumstances be beneficial in ensuring this balance and that orderly succession can take place.

The board follows a thorough process of assessing independence on an annual basis for each director whose tenure exceeds nine years. The board does not believe that tenure of any of the current non-executive directors interferes with their independence of judgement and their ability to act in Investec’s best interests.

Accordingly, the board has concluded that Fani Titi, Cheryl Carolus, Peter Thomas and Haruko Fukuda, despite having been directors of Investec for nine years or more, retain both financial independence and independence of character and judgement.

Haruko Fukuda will not, however, offer herself for re-election at the upcoming annual general meeting.

A summary of the factors the board uses to determine the independence of non-executive directors is detailed below:

Relationships and associations

- Ian Kantor is the brother of Bernard Kantor, Investec’s managing director. Ian is also the founder and was previously CEO of Investec. Accordingly, the board concluded that Ian could not be considered independent under the UK Corporate Governance Code and King III.
- Bradley Fried was previously CEO of Investec Bank plc and given that role and his ongoing relationship with Grovepoint, the board concluded that Bradley could not be considered independent. Bradley has an interest in Grovepoint, which has entered into various transactions in the ordinary course of business with Investec.
- Prior to joining the board on 1 March 2013, David Friedland was a partner of KPMG. KMPG along with Ernst & Young, are joint auditors of Investec Limited. The board concluded that, notwithstanding his previous association with KPMG, David retains independence of judgement given he was never Investec Limited’s designated auditor or relationship partner and was not involved with its Investec account.

Despite the board concluding that Ian and Bradley cannot be considered independent for the reasons explained above, the board is of the view that their skills, knowledge, experience and attributes are nonetheless valuable to the organisation and believe they use their independent judgement when making decisions that affect the organisation and stakeholders.

Tenure

The board is also mindful of its responsibility to ensure that there remains an appropriate balance of skills and experience on the board, and it is therefore of the view that retention of certain members beyond nine years may in certain circumstances be beneficial in ensuring this balance and that orderly succession can take place.

The board follows a thorough process of assessing independence on an annual basis for each director whose tenure exceeds nine years. The board does not believe that tenure of any of the current non-executive directors interferes with their independence of judgement and their ability to act in Investec’s best interests.

Accordingly, the board has concluded that Fani Titi, Cheryl Carolus, Peter Thomas and Haruko Fukuda, despite having been directors of Investec for nine years or more, retain both financial independence and independence of character and judgement.

Haruko Fukuda will not, however, offer herself for re-election at the upcoming annual general meeting.
Corporate governance (continued)

Notwithstanding the guidelines set out in the UK Corporate Governance Code and King III, the board is of the view that these non-executive directors are independent of management and promote the interests of stakeholders. The balance of executive and non-executive directors is such that there is a clear division of responsibility to ensure a balance of power, such that no one individual or group can dominate board processes or have unfettered powers of decision-making. The board believes that it functions effectively and evaluates its performance annually.

Attendance at credit meetings

David Friedland and Peter Thomas regularly attend, by invitation, certain credit committees of the group dealing with large exposures requiring sign off by non-executive directors in terms of the delegation of authority. The board considers their attendance at these committees to be desirable in terms of developing an understanding of the day-to-day issues facing the business. This further allows David to discharge his responsibilities more effectively as chairman of the Investec plc and Investec Limited audit committees and board risk and capital committee. The board concluded that David and Peter retain their independence of character and judgement.

Skills, knowledge, experience, diversity and attributes of directors

The board considers that the skills, knowledge, experience, diversity and attributes of the directors as a whole are appropriate for their responsibilities and the group’s activities. The directors bring a range of skills to the board including:

- International business and operational experience
- Understanding of the economics of the sectors in which the group operates
- Knowledge of the regulatory environments in which the group operates
- Financial, accounting, legal and banking experience and knowledge.

The skills and experience profile of the board and its committees are regularly reviewed by the NOMDAC to ensure an appropriate and relevant composition from a governance, succession and effectiveness perspective.

Board and directors’ performance evaluation

In 2013, the board commissioned a board effectiveness review conducted by an external independent facilitator, Professor Rob Goffee of the London Business School (the 2013 review).

Professor Goffee has no connection with the group. The detailed outcomes of that review were disclosed in the previous integrated annual report. The 2015 review of the board’s effectiveness was accordingly not conducted by an external independent facilitator and took the form of a detailed questionnaire and a series of structured interviews between the chairman and each individual director (the 2015 review).

All directors completed the questionnaire and were interviewed during the course of the 2015 review.

The board was felt to be operating effectively and the key themes, as well as the actions proposed to be taken, were as follows:

- As noted above, the board appointed five new non-executives, and inducting and integrating the new board members has been a key focus during the period under review. The board requested further opportunities for executives and non-executives to meet outside the formal setting of the boardroom and, as a result, informal events were held to facilitate this
- Ensure that the management information strikes an appropriate balance between regulatory, business and strategic issues. The board continues to make refinements to the management information it receives.

Terms of appointment

On appointment, non-executive directors are provided with a letter of appointment. The letter sets out, among other things, duties, responsibilities and expected time commitments, details of our policy on obtaining independent advice and, where appropriate, details of the board committees of which the non-executive director is a member. We have an insurance policy that insures directors against liabilities they may incur in carrying out their duties. On the recommendation of the NOMDAC, non-executive directors will be appointed for an expected term of nine years (three times three-year terms) from the date of their first appointment to the board.

Ongoing development

On appointment, directors are provided with an induction pack and participate in an induction programme tailored to their needs, including meeting with the business unit and central services’ heads to ensure they become familiar with business operations, senior management, our business environment and internal controls, policies, processes and systems for managing risks.

Directors’ ongoing development is a standing board agenda item, including updates on various training and development initiatives. Board members receive regular formal presentations on regulatory and governance matters as well as the business and support functions. Regular interactive workshops are arranged between directors and the heads of risk management, control functions and business units. Topics covered during the past year included recovery and resolution planning, cybercrime, twin peaks legislation in South Africa, advanced internal risk-based modelling, senior management regime and customer outcomes.

The company secretaries liaise with directors to source relevant seminars and conferences which directors could attend, funded by Investec.

Following the board’s and directors’ performance evaluation process, any training needs are communicated to the company secretaries who ensure these needs are addressed.

During the year under review, a number of director workshops were arranged outside of board meetings.

Independent advice

Through the senior independent director or the company secretaries, individual directors are entitled to seek professional independent advice on matters related to the exercise of their duties and responsibilities at the expense of Investec. No such advice was sought during the 2015 financial year.

Remuneration

Details of the directors’ remuneration and remuneration processes are set out in the remuneration report on pages 140 to 180.
Chairman and chief executive officer

The roles of the chairman and chief executive officer are distinct and separate. The chairman leads the board and is responsible for ensuring that the board receives accurate, timely and clear information to ensure that the directors can perform their duties effectively.

Details of the chairman's external directorships are set out on page 114.

The board does not consider that the chairman's external commitments interfere with his performance and responsibilities to Investec. The board is satisfied that the chairman makes sufficient time available to serve Investec effectively. There have been no changes to the significant commitments of the chairman during the period under review. The chairman resides in South Africa but spends approximately a week a month in the UK.

The board has not appointed a deputy chairman.

Senior independent director

George Alford was the senior independent director until he stepped down from the board on 7 August 2014. On 8 August 2014, Perry Crosthwaite became the senior independent director. He is available to address any concerns or questions from shareholders and non-executive directors. In addition, he leads the board in the assessment of the effectiveness of the chairman.

Company secretaries

David Miller is the company secretary of Investec plc and Benita Coetsee was the company secretary of Investec Limited until she stepped down on 30 June 2014. From 1 July 2014, Niki van Wyk assumed the role of company secretary of Investec Limited. The company secretaries are professionally qualified and have experience gained over a number of years. Their services are evaluated by board members during the annual board evaluation process. They are responsible for the flow of information to the board and its committees and for ensuring compliance with board procedures. All directors have access to the advice and services of the company secretaries whose appointment and removal are a board matter.

In compliance with the JSE Listings Requirements, the board has considered and is satisfied that each of the company secretaries is competent, has the relevant qualifications and experience and maintains an arm’s length relationship with the board. In evaluating these qualities, the board has considered the prescribed role and duties pursuant to the requirements codified in the South African and the UK Companies Acts and the listings and governance requirements as applicable.

In addition, the board confirms that for the period 1 April 2014 to 31 March 2015 neither of the company secretaries served as a director on the board nor did they take part in board deliberations and only advised on matters of governance, form or procedure.

Board committees

In exercising control of the group, the directors are empowered to delegate to various board and executive committees. The committees have specific terms of reference, appropriately skilled members and access to specialist advice when necessary.

The full terms of reference are available on our website.

The following table indicates non-executive board representation on the board committees as at the date of this report:

* ZBM Bassa was appointed to the audit committees with effect from 1 November 2014.
** LC Bowden was appointed to the audit committees with effect from 1 January 2015.
*** B Fried stepped down from the DLC remuneration committee with effect from 18 September 2014.
**** CR Jacobs was appointed to the DLC social and ethics committee with effect from 8 August 2014.
***** Lord Malloch-Brown was appointed to the DLC social and ethics committee with effect from 8 August 2014.
****** KL Shuenyane was appointed to the audit committees with effect from 8 August 2014.
Audit committees

Introduction

The audit committee is an essential part of the group’s governance framework to which the board has delegated oversight of the group’s financial reporting, risk management, compliance, internal and external audit.

This report provides an overview of the work of the committee and details how it has discharged its duties over the year.

Following the annual cycle of work of the committees, we concluded that sound risk management and internal controls have been maintained during the year.

The committees were satisfied that the integrated annual report presents fairly and provides a fair, balanced and understandable assessment of the group’s financial position at 31 March 2015, and the results of its operations for the year then ended.

Background

In terms of Investec’s DLC structure, the board has mandated authority to the Investec plc audit committee and the Investec Limited audit committee to be the audit committees for those respective companies and their subsidiaries with each having their own regulatory requirements to meet. A DLC audit committee – which is the combined audit committee of Investec plc and Investec Limited – has responsibility to the board for matters common to both Investec plc and Investec Limited and, in particular, the combined group annual financial statements and results.

The audit committees comply with all legal and regulatory requirements as necessary under both UK and South African legislation and listings rules, and apply the corporate governance principles for audit committees as required by the UK Disclosure and Transparency Rules (7.1.3R), the UK Corporate Governance Code and King III.

The board recognises the important role of the audit committees as part of the risk management and corporate governance processes and procedures of the Investec group. In this regard, the audit committees have oversight of and monitor:

- Financial reporting process and risks
- Fraud and IT risks as they relate to financial reporting
- The effectiveness of the group’s internal controls, internal audit and risk management systems
- The statutory audit and group annual financial statements and the integrated annual report
- The independence and performance of the statutory and internal auditor.

At each audit committee meeting, the group chief executive officer, group managing director and group risk and finance director provide an in-depth assessment of their current risk-related concerns and the procedures introduced by management to control or mitigate these risks.

Following the completion of all group audit committee meetings, a written report is provided to the next meeting of the board of directors highlighting matters of which the audit committee believes the board should be aware.

All responsibilities are covered in the audit committees’ terms of reference.

The board has approved the terms of reference for the audit committees which can be found on our website.

The audit committees approve the annual internal audit plan. The heads of Internal Audit for both Investec plc and Investec Limited have free access to the chairman of the audit committees or any member of the audit committees and they attend all audit committee meetings by invitation.

External auditors from both the UK and South Africa attend audit committee meetings.

Membership and attendance

The audit committees are comprised entirely of independent non-executive directors who must meet predetermined skills, competency and experience requirements.

George Alford and Olivia Dickson did not seek re-election as directors of the group and as such resigned from the audit committees with effect from 7 August 2014.

Our sincere thanks for their wise counsel and contribution over the many years they served as valued members of the audit committees.

The committees have been bolstered following the appointments of Khumo Shuenyane, Zarina Bassa and Laurel Bowden during the year.

In aggregate the audit committees meet 12 times per year. The chairman, chief executive officer, managing director, finance and risk director, heads of Compliance, IT, Operational Risk, Internal Audit, Finance and representatives of the external auditors attend meetings by invitation.

A comprehensive meeting pack is prepared with written reports received from the external auditors and each of the above functions. They present on the significant matters included in their reports.

The chairman of the audit committees regularly meets with the heads of Internal Audit as well as the lead external audit partners outside formal committee meetings.

At the final results audit committee meetings, the external auditors and internal auditors meet separately with the committee members to enable them to have a frank and open debate without the executives being present.
Corporate governance (continued)

*** LC Bowden was appointed to the audit committees with effect from 1 January 2015 and was therefore only eligible to attend meetings held after 1 January 2015.
**** KL Shuenyane was appointed to the audit committees with effect from 8 August 2014 and was therefore only eligible to attend meetings held after 8 August 2014.
***** CB Tshili was a non-executive director of Investec Bank Limited, a major subsidiary of Investec Limited, and represented its interest on this committee. CB Tshili stepped down from the audit committees with effect from 7 August 2014 and was therefore only eligible to attend meetings held prior to 7 August 2014.

Summary of conclusions reached by the audit committees for the year ended 31 March 2015

The individual and combined audit committees, to the best of our knowledge and belief, are satisfied that:

- The finance functions of both Investec plc and its subsidiaries and Investec Limited and its subsidiaries are adequately skilled, resourced and experienced
- The group risk and finance director, GR Burger, has the appropriate expertise and experience to meet the responsibilities of the position
- The group’s internal financial controls are effective and all identified weaknesses in financial control are being addressed
- The external auditors of both Investec plc and Investec Limited are, and remain, independent
- The external auditors perform their functions with the appropriate expertise, competence and experience.

In fulfilling our duties, the audit committees have:

- Considered whether the integrated annual report taken as a whole was fair, balanced and understandable and provided the information necessary for stakeholders to assess the group’s performance
- Reviewed and discussed with the external auditors material areas in which significant judgements were applied
- Reviewed the Internal Audit function including the process for evaluating the control environment, approved the internal audit plan and considered internal audit reports
- Reviewed and considered representations by management on the going concern statement for the group and recommended the adoption of the going concern concept to the board
- Discussed with management the process used to identify, measure and oversee tax risks
- Reviewed the risk assessment process and the manner in which significant business risks are managed
- Recommended to the board the reappointment of our external auditors. (See external auditors on the next page)
- Focused on information security, due to the ever increasing threat posed by cybercrime and risks associated with mobile technology and social media
- Confirmed the absence of any indicators of fraud with regard to financial reporting.

The audit committees recommended the adoption of the integrated annual report to the board.

In this regard the audit committees:

- Considered facts and risks that may impact on the integrity of the integrated annual report
- Reviewed and commented on the annual financial statements included in the integrated annual report
- Reviewed the disclosure of sustainability issues in the integrated annual report to ensure they are reliable and do not conflict with the financial information
- Obtained confirmation from the chief executive officer and group risk and finance director that they considered the disclosures to be fair, reasonable and balanced
Corporate governance (continued)

- Reviewed the annual report to ensure that taken as a whole, it is fair, reasonable and balanced and have advised the board to that effect
- Engaged Grant Thornton to verify all the environmental data included in the report. None of the audit firms engaged in the group’s external audit was considered for the project.

The board subsequently approved the integrated annual report, including the annual financial statements, which will be tabled for approval at the forthcoming annual general meeting.

External auditors

Appointment and independence

The committee considers the reappointment of the external auditor each year before making a recommendation to the board and shareholders. It assesses the independence of the external auditor on an ongoing basis. The external auditor is required to rotate the lead audit partner every five years and other senior audit staff every seven years. Partners and senior staff associated with the Investec audit may only be employed by the group after a cooling off period. The lead partner rotated last year so 2015 was the first year of the new lead partner’s five-year rotation.

Although Ernst & Young has been the group’s auditors since listing on the London Stock Exchange in 2002, we believe that partner rotation, limitations on non-audit services and the confirmation of the independence of both Ernst & Young and the audit team are adequate safeguards to ensure that the audit process is both objective and effective.

Non-audit services

The committees have adopted a policy on the engagement of the external auditors to provide non-audit services. This policy, designed to safeguard auditor objectivity and independence, includes guidelines on permitted and non-permitted services and on services requiring specific approval by the committees.

The committees review whether the level of non-audit fees could impact the independence of the auditors. This is monitored by reference to the level of fees paid for services, excluding services which are required to be provided by the external auditors due to their office, against the fees paid for the audit of the group.

For further details on non-audit services see note 6 on page 48 in volume three.

Internal Audit

The committees are responsible for monitoring and reviewing the scope and the effectiveness of the Internal Audit function. Both the Investec Limited and Investec plc heads of Internal Audit have a direct reporting line to the chairman of the audit committees and they regularly meet to discuss progress with the audit plans, and setting annual objectives. Internal Audit was subject to a ‘quality assurance review’ in 2014. The areas identified for improving efficiency and streamlining the audit process were implemented during the financial year.

Risks addressed during the year under review

Detailed below are significant audit risks the committees focused on:

- Monitoring of credit quality and the appropriateness of the allowance for credit losses
- We discussed with management and the auditors the specific and collective loan provision process, and considered the reasonableness of the allowance relative to the quality of the book and related collateral
- Valuation of financial instruments and unlisted investments
- Unlisted investments often require a large degree of subjectivity surrounding the various inputs to their valuations. We discussed with management the assumptions used in the valuations of unlisted investments, including embedded derivatives
- Accounting and financial reporting of large or complex transactions
- Discussions were held with management and the external auditors with regard to large and complex transactions to ensure compliance with the Accounting Standards including estimates of levels of taxation expected to be payable
- The internal and external auditors provided detailed reporting in respect of these key areas.

In addition, the audit committees considered the following themes:

- Cybercrime
  - The group experienced an escalation in attempted IT fraud and other forms of cybercrime. Considerable effort and time have been devoted by management to ensure that IT controls are robust and appropriate solutions are deployed to protect the group from increased threat levels
- Liquidity risk
  - The adequacy and appropriateness of liquidity management throughout the group’s operations
- Compliance with laws and regulations
  - Adherence to key regulatory issues facing the group
- Control weaknesses
  - Assessing the internal control weaknesses identified by the assurance providers and ensuring appropriate steps are taken within prescribed and specified time limits to mitigate and remedy such weaknesses.

IFRS 9 Financial Instruments

The new standard includes revised guidance on classification and measurement of financial assets including a new expected credit loss model for calculating impairments.

Although the new standard is only effective from the 2019 financial year, the finance team has commenced addressing a number of challenges and uncertainties inherent in implementing the new standard.

Among the key issues are:

- The need to develop more forward-looking estimates of future credit losses
- The transfer of assets between impairment categories is likely to be highly dependent on judgement and internal management processes
- Interpretation of the terms ‘significant increase’ in credit risk and of ‘default’ will also require judgement

The audit committees will use the lead time to challenge management’s assessment of the standard’s effect and remain abreast of its implementation plans.

We are still in the process of assessing the impact of IFRS 9.

Support structures

Audit sub-committees for Investec plc and Investec Limited, and other regulated subsidiaries, have been established.

Reports on the risk and control environment of all business units and principal operating subsidiaries are made to one of the audit sub-committees, with significant issues being escalated to the audit committees. These allow senior managers of the business units, who do not attend the main Investec plc and Investec Limited audit committee meetings, to meet with the risk and control functions and to provide input on the risk and control environment of their business units. Members of the Investec plc and Investec Limited audit committees are entitled to attend these meetings and, as a general rule, at least one non-executive director attends these meetings.

The forums are key to enhancing risk and control consciousness and the associated control environment of the group.

The forums support and provide important insight to the audit committees. Essentially, the forums act as a filter, enabling the audit committees to concentrate their efforts on matters of appropriate materiality.

Audit tendering

In June 2014, European Union (EU) audit legislation came into force. Among other provisions, it imposes mandatory audit firm rotation. The legislation will take effect in June 2016. Special transition arrangements apply to the provisions on mandatory firm rotation.

In December 2014 the UK Government (Department for Business Innovation and Skills (BIS)) and Financial Reporting Council (FRC), respectively, launched a discussion document and detailed consultation paper. Both explore options for the implementation of the EU’s audit legislation. Subject to the responses, BIS is expected to issue a detailed consultation in the last quarter of 2015. Once the FRC has considered the responses to its questions, and decided which options to take forward, it will amend its standards via a further consultation in 2016. BIS will proceed, for the remainder of 2015, drafting amendments to the Companies Act 2006 and the European Communities Act 1972, which will be subject to parliamentary approval, in readiness for June 2016 when the EU legislation takes effect.

The committees will continue to monitor these developments and consider the impact of these regimes on Investec’s external audit arrangements as the UK implementation rules become clearer.

David Friedland
Chairman, audit committees

*** CR Jacobs was appointed to the DLC remuneration committee with effect from 8 August 2014.
**** Sir David J Prosser stepped down from the DLC remuneration committee with effect from 8 August 2014.

Role and responsibilities

The NOMDAC is responsible for, amongst other things:

- Identifying and nominating candidates to the board to fill board vacancies as and when they arise
- Determining and evaluating the adequacy, efficiency and appropriateness of the corporate governance structure and practices of the group
- Establishing and maintaining a board directorship continuity and refreshment programme
- Regularly reviewing the structure, size and composition (including the skills, knowledge and experience) of the board and board committees compared with their current situations and making recommendations to the board regarding any changes
- Reviewing the succession plan of the key positions in Investec Limited and Investec plc and all their major subsidiaries, in order to ensure that an updated management succession plan remains in place.

DLC nominations and directors’ affairs committee (NOMDAC)

Introduction

This report to the board and shareholders, on how the NOMDAC has discharged its duties, has been prepared in accordance with sound governance principles.

Background

The NOMDAC has combined the duties of a nominations committee as well as that of a directors’ affairs committee as required under section 64B of the South African Banks Act.

Major operating subsidiaries in the group are exempt from having their own nominations or directors’ affairs committee, as the NOMDAC fulfils the duties for these companies as well.

The NOMDAC complies with all legal and regulatory requirements as necessary under both UK and South African legislation and listings rules and corporate governance principles.

The board has approved terms of reference for the NOMDAC which can be found on our website.
Membership and attendance

* SE Abrahams and KXT Socikwa are non-executive directors of Investec Bank Limited, a major subsidiary of Investec Limited, and represent its interest on this committee.
** GFO Alford and Sir David J Prosser stepped down from the NOMDAC on 7 August 2014.
*** PKO Crosthwaite and D Friedland were appointed as members of the committee on 30 July 2014 and were only eligible to attend meetings from this date.

Summary of conclusions reached and key recommendations made to the board during the year under review

Board composition
- Reviewed the structure, size and composition of the board and subsidiary boards and the principal board committees and has carefully reviewed the balance of independent non-executives relating to executive directors
- As noted on page 94, the committee considered that it was appropriate to increase the number of independent non-executive directors on the board while ensuring that there is a sufficient number of non-executive directors with experience and knowledge of the business. Accordingly, the board adopted a structured programme of refreshing the board
- The board acknowledges the value to be derived from bringing together on the board individuals with a broad range of backgrounds, experience and outlooks. Gender is recognised to be an important part of that diversity, and currently the board comprises four women
- While non-executive appointments are based on merit and overall suitability for the role, the NOMDAC will be mindful of the value of diversity as it progresses the structured refreshment programme described above
- The NOMDAC has recommended to the board that going forward, non-executive appointments are made for an expected period of nine years (three times three years) from the date the non-executive director was first appointed.

Board succession
The NOMDAC continued to focus on ensuring that the board has the appropriate balance of skills, experience, independence and knowledge of the group. The board agreed, on the recommendation of the NOMDAC, to implement a structured refreshment programme so as to ensure that we are recruiting new, independent non-executive directors and retiring some of our longer serving non-executive directors over a period of years.

In this regard:
- George Alford and Peter Malungani, both of whom successfully served on the board for a period exceeding nine years, did not stand for re-election at the August 2014 annual general meeting
- Olivia Dickson did not offer herself for re-election at the August 2014 annual general meeting
- The board, on the recommendation of the NOMDAC and following regulatory approval, appointed Charles Jacobs, Lord Malloch-Brown and Khumo Shuenyane as independent non-executive directors with effect from 8 August 2014. Zarena Bassa was appointed with effect from 1 November 2014 and Laurel Bowden, with effect from 1 January 2015.

Process for board appointments
Appointments to the board were made following a thorough and extensive recruitment process. The NOMDAC completed an analysis of the skills, experience and diversity of the current board, and recorded this on a detailed skills matrix. This was used to help identify the core competencies desired from new appointments to the board. The NOMDAC retained the services of Woodburn Mann and Zygos Partnership to identify potential candidates and to assist with the selection process. Neither of the external search consultancies has any connections to the companies. A shortlist of candidates was drawn up and selected candidates were interviewed by the chairman and members of the NOMDAC to assess amongst other things their knowledge, commitment and understanding of the role. Following this the NOMDAC made its recommendations to the board.

Management succession
The NOMDAC received a detailed presentation from the executive regarding senior management succession, and the NOMDAC is satisfied that there is a formal management succession plan in place. The NOMDAC derives comfort from the fact that people development is an integral part of Investec’s culture and values creating a deep pool of talent to draw from. The board approved a plan proposed by executive management whereby the chief executive officer and managing director will, in the medium term, delegate more of their operational responsibilities to the executive teams reporting to them. The NOMDAC will continue to focus on ensuring that the management succession plan remains up to date and the respective succession plans in the three pillars continue to be implemented within the respective businesses.

Governance
The NOMDAC:
- Considered changes to the UK Corporate Governance Code published in September 2014
- Monitored the induction programme of new directors
- Ensured that the directors’ ongoing development programme remains relevant and appropriate
- Considered the independence of board members and where necessary made recommendations to the board
- Reviewed the expertise of the company secretaries and made recommendations to the board.

Board effectiveness
- In 2013, the board commissioned a board effectiveness review conducted
Corporate governance (continued)

by an external independent facilitator, Professor Rob Goffee of the London Business School (the 2013 review). Professor Goffee has no connection with the group. The detailed outcomes of that review were disclosed in the previous integrated annual report.

- The 2015 review of the board’s effectiveness was accordingly not conducted by an external independent facilitator and took the form of a detailed questionnaire and a series of structured interviews between the chairman and each individual director (the 2015 review). All directors completed the questionnaire and were interviewed during the course of the 2015 review.

Fani Titi
Chairman, DLC nominations and directors’ affairs committee
10 June 2015

DLC social and ethics committee (SEC)

Introduction
This report to the board and shareholders, on how the SEC has discharged its duties, has been prepared in accordance with sound governance principles.

Background
The SEC is mandated by the board to be the social and ethics committee of Investec plc and Investec Limited and their subsidiaries. The South African Companies Act 2008, as amended (the Act), provides that all listed public companies must establish a social and ethics committee. The Act enables the group to appoint a social and ethics committee for the holding company, which will fulfil the required functions on behalf of the subsidiary companies. Due to the required functions of the committee which are universal in nature, the board resolved to constitute the committee to monitor the activities for the group and not just Investec Limited.

Role and responsibilities
The DLC SEC is responsible for monitoring the group’s activities, having regard to any relevant legislation, other legal requirements or prevailing codes of best practice, with regard to matters relating to:

- Social and economic development
- Good corporate citizenship
- Monitoring Investec Limited and its subsidiaries’ activities, with regard to matters relating to:
  - the Employment Equity Act;
  - the Broad-Based Black Economic Empowerment Act; and
  - contribution to development of the communities in which its products and services are predominantly marketed.
- Talent, retention and attraction of employees
- Culture and ethics.

*The committee’s terms of reference are available on our website.*

Summary of monitoring activities during the year under review

Employment equity
- The committee monitors progress made against Investec Limited’s Employment Equity Plan
- The committee engages with the management of Human Resources to discuss challenges around matters such as diversity and employment equity targets
- The committee engages with members of the employment equity forum
- The committee monitors and reviews diversity across the group and considers any regulatory developments in this regard.

Skills development
- The committee monitors the various learning and leadership programmes on offer by the group
- The committee monitors the group’s spend on skills development and discusses initiatives with Human Resources in this regard.

Corporate social investment (CSI)
- The committee receives regular reports on the group’s CSI initiatives and the CSI strategy and spend.

Transformation
- The committee monitors Investec Limited’s empowerment rating and discusses management how to improve the rating
- The committee received detailed information on the recent developments with respect to the Department of Trade and Industry Codes and the impact on the Financial Sector Charter and scorecards going forward.

Sustainability
- The committee receives regular reports on all matters relating to sustainability
- The committee monitors the group’s initiatives to reduce the carbon footprint.

Conservation
- The committee receives presentations about the group’s initiatives around conservation.

Reputational risk
- The committee receives reports regarding matters that could impact the group’s reputation.

Fani Titi
Chairman, DLC social and ethics committee

Corporate governance (continued)

DLC board risk and capital committee (BRCC)

Introduction
This report to the board and shareholders, on how the BRCC has discharged its duties, has been prepared in accordance with sound governance principles.

Background
The BRCC is the appointed board committee to meet the requirements of the UK and SA regulators for the board of directors of a bank.

The purpose of the BRCC is to determine, under delegated authority from (and as a sub-committee of) the board, the categories of risk, specific risk and the extent of such risks which the group on a consolidated basis, and its banks on a solo basis, should undertake.

Role and responsibilities
The committee will ensure that:

- All decisions of the board on risk management policies and procedures are implemented and monitored throughout Investec
- The risk management structure is adequate, with sufficient resources and budget, and exceptions are reported to the board
- Exposure limits for market, counterparty and credit risk are ratified; liquidity and operational risk are also monitored
- There is an ongoing process of risk and control identification, particularly for any changes to business objectives and the basis of measuring risk
- There is sufficient capital in relation to existing and potential risks to the organisation.

Over the past year the committee has spent a considerable amount of time reviewing and monitoring matters relating to cybercrime and conduct risk across all geographies in which the group operates. The BRCC defines the processes by which internal financial control, risk and capital management are assumed and monitored. The Group Risk Management division provides the expertise, processes and techniques from which the processes can be built and monitored daily.

A number of committees are dedicated to aspects of risk management and report directly to the board and the BRCC. These include the DLC capital committee, ERRF, asset and liability committees, group credit committees, group market risk forum, group deal forum, operational risk committees/forums and group legal risk forum.

The committee’s terms of reference are available on our website.

* SE Abrahams and KXT Socikwa are non-executive directors of Investec Bank Limited, a major subsidiary of Investec Limited, and represent its interests on this committee.
** D Friedland became the chairman of the BRCC with effect from 12 September 2014.
*** MP Malungani and Sir David J Prosser did not offer themselves for re-election at the annual general meeting held on 7 August 2014, and were therefore only eligible to attend meetings held prior to 7 August 2014.
**** F Titi represented Investec at the World Economic Forum in Davos and as such could not attend one meeting.

Additional meetings are held throughout the year when necessary. Material incidents and losses and significant breaches of systems and controls are reported to the BRCC, ERRF, GRCC as well as the audit committees.

For more information on the group’s risk management processes, please refer to volume two.

David Friedland
Chairman
Board risk and capital committee
10 June 2015
Corporate governance (continued)

**Group risk and capital committee (GRCC)**

The GRCC is mandated by the BRCC to be the group risk and capital committee of Investec Limited and Investec plc and their banking and other subsidiaries, as regards enterprise-wide risk and its measurement, monitoring and mitigation.

The purpose of the GRCC is to supplement the BRCC and ERRF.

**Executive risk review forum (ERRF)**

The ERRF is mandated by the BRCC to be the ERRF of Investec plc and Investec Limited and their subsidiaries, as regards enterprise-wide risk and its measurement, monitoring and mitigation.

The purpose of the ERRF is to supplement the BRCC. It assists in determining the categories of risk, the specific risks and the extent of such risks which the group should undertake.

**Role and responsibilities**

The ERRF:

- Evaluates the most significant risks Investec faces in the ordinary course of business
- Reviews the risk models (including, but not limited to, credit models) which need to be incorporated appropriately into the allocation of capital
- Ensures that limits are adhered to and that agreed recommendations to mitigate risk are implemented
- Acts as agent of the board to ensure that all decisions of the board on risk management policies and procedures are implemented and monitored throughout the group
- Ensures the group-wide risk management structure is adequately resourced and has an appropriate budget
- Provides regular reports to the board focusing on effectiveness of the control framework
- Provides regular reports on group-wide adherence to regulatory requirements and advises on how changes to regulatory requirements will affect us
- Ensures that there is an ongoing process of risk and control identification, particularly in line with any changes to business objectives, such as the commencement of a new trading area or product stream.

Meetings take place every Monday except on the BRCC dates.

**DLC capital committee**

The DLC capital committee is mandated by the BRCC to be the capital committee of Investec plc and Investec Limited and their subsidiaries, as regards capital allocation and structuring, performance measurement, investment decisions and capital-based incentivisation.

**Role and responsibilities**

The DLC capital committee is responsible for:

- Determining the DLC group’s capital requirements
- Reviewing capital adequacy submissions to be made to regulators
- Considering the ongoing requirements and consequences of Basel III and other regulatory requirements and their impacts on regulatory capital requirements
- Reviewing the risk models which need to be incorporated appropriately into the allocation of capital
- Considering, determining and approving capital issues relating to any corporate structuring for acquisitions
- Monitoring the capital positions and returns on internal capital of each business unit
- Submission of capital recommendations to the BRCC.

Stephen Koseff
Chairman

Group risk and capital committee, Executive risk review forum and DLC capital committee

10 June 2015

**Risk management**

The board is responsible for the total process of risk management and the systems of internal control. A number of committees and forums assist in this regard. Senior management is responsible for identifying risks and implementing appropriate mitigation processes and controls within their businesses.

The independent group risk management functions, accountable to the board, are responsible for establishing, reviewing and monitoring the process of risk management. Group Risk Management reports regularly to the BRCC, the GRCC and the ERRF.

Risk management is discussed in more detail in volume two.

**Internal Audit**

Each significant jurisdiction has an internal audit presence that is appropriate for the size, nature and extent of business conducted. Smaller geographies are supported by the Internal Audit teams of the Investec plc and Investec Limited groups.

A risk-based audit approach is followed and the audit committee approves annual audit plans.

*For further details on the Internal Audit, see page 97 in volume two.*

**External audit**

Investec’s external auditors are Ernst & Young LLP and Ernst & Young Inc, at a DLC level. Ernst & Young Inc and KPMG Inc are joint auditors of the Investec Limited silo and Ernst & Young LLP are the auditors of the Investec plc silo. The independence of the external auditors is reviewed by the audit committees each year.

The audit committees meet with the external auditors to review the scope of the external audit, budgets, the extent of non-audit services rendered and all other audit matters.

The external auditors are invited to attend audit committee meetings and have access to the chairman of each audit committee. Recommendations on the rotation of auditors, as laid out in the UK Auditing Practices Board Ethical Standard 3 as well
as Directive 6/2008 of the South African Banks Act, were adhered to during the year under review.

Non-audit services are dealt with in terms of an agreed policy which states that:

- External audit firms will have internal standards and processes to monitor and maintain their independence and these must be presented to the audit committees on an annual basis. These will be considered based on the explicit exclusions contained in existing rules and guidelines
- Safeguards must be in place to ensure that there is no threat to the objectivity and independence in the conduct of the audit, resulting from the provision of non-audit services by the external auditors.

Total audit fees paid to all auditors for the year ended were £16.4 million (2014: £12 million), of which £3.2 million (2014: £2.1 million) related to the provision of non-audit services.

For further details on non-audit services see note 6 on page 45 in volume three.

Compliance

The Compliance function ensures that Investec continuously complies with existing and emerging regulation impacting on its operations. We recognise our responsibility to conduct business in accordance with the laws and regulations in the countries and areas in which we operate. The Compliance function is managed by group Compliance and supported by the compliance officers in the business units.

For further details on the Compliance function, see pages 98 to 100 in volume two.

Dealing in securities

Deals in securities are subject to the personal account dealing policy. The policy is based on regulatory guidance and industry practice and is updated to ensure compliance with applicable regulations and industry best practice.

The policy is designed to discourage speculative trading and highlights the potential conflicts of interest between the interests of employees and the Investec group or any of its clients, shareholders or potential shareholders. The UK’s disclosure and transparency rules require us to disclose transactions in shares and related securities by all persons discharging management responsibilities and their ‘connected persons’. These include directors and senior executives of the group.

The UK and South African Companies Acts require directors to disclose any direct or indirect material interest they have in contracts, including proposed contracts, which are of significance to the company’s business. Directors are required to make these disclosures at board meetings, and all disclosures made are recorded in the minutes of that meeting.

Staff are required to undertake not to use any personal hedging strategies to lessen the impact of a reduction in value of any share award or any vested shares which are subject to a retention period following any vesting date. Any breach of this condition will result in the lapse of any unvested proportion of such award, unless the remuneration committee determines otherwise.

Values and code of conduct

We have a strong organisational culture of entrenched values, which forms the cornerstone of our behaviour towards all stakeholders. These values are embodied in a written statement of values, which serves as our code of ethics and is continually reinforced.

We view all employees as the custodians of ethical behaviour, which is reinforced through internal processes, policies and procedures. As such all new employees are invited, and are strongly encouraged, to attend an induction process at which our philosophies, values, culture, risk management and compliance procedures are explained and discussed.

Our Organisation Development team plays an important role in facilitating the understanding and ongoing practice of our values, philosophies and culture. In addition to our values, acceptable business practices are communicated through the human resources practices manual, available on the intranet.

Approved and authorised for issue by the board of directors on 10 June 2015 and signed on its behalf by:

David Miller
Company secretary
Investec plc

Niki van Wyk
Company secretary
Investec Limited
Corporate governance and corporate responsibility

Executive directors

(details as at 30 June 2015)

**Stephen Koseff** (63)
Chief executive officer
BCom, CA(SA), H Dip BDP, MBA

Board committees: DLC board risk and capital, DLC capital and DLC social and ethics

Appointed to the board in October 1986. Stephen joined Investec in 1980. He has had diverse experience within Investec as chief accounting officer and general manager of banking, treasury and merchant banking.

Other directorships include: Investec Bank Limited, Investec plc and a number of Investec subsidiaries.

**Bernard Kantor** (65)
Managing director
CTA

Board committees: DLC board risk and capital, DLC capital and DLC social and ethics

Appointed to the board in June 1987. Bernard joined Investec in 1980. He has had varied experience within Investec as a manager of the Trading division, marketing manager and chief operating officer.

Other directorships include: Phumelela Gaming and Leisure Limited, Investec Bank Limited, Investec Bank plc and a number of Investec subsidiaries.

**Glynn R Burger** (58)
Group risk and finance director
BAcc, CA(SA), H Dip BDP, MBA

Board committees: DLC board risk and capital and DLC capital

Appointed to the board in July 2002. Glynn joined Investec in 1980. His positions within Investec have included chief accounting officer, group risk manager and joint managing director for South Africa.

Other directorships include: Investec Bank Limited and a number of Investec subsidiaries.

**Hendrik J du Toit** (53)

BCom Law, BCom (Hons) (cum laude), MCom (cum laude), MPhil (Cambridge)

Appointed to the board in December 2010. After lecturing economics at the University of Stellenbosch, Hendrik joined the Investment division of Old Mutual from where he moved to Investec in 1991 as portfolio manager and later chief executive officer of Investec Asset Management.

Other directorships include: Investec Asset Management Holdings (Pty) Ltd and Investec Asset Management Limited as well as their subsidiaries.

Non-executive directors

(details as at 30 June 2015)

**Fani Titi** (53)
Chairman
BSc (Hons), MA, MBA

Board committees: DLC remuneration, DLC board risk and capital, DLC nominations and directors’ affairs, DLC social and ethics and DLC capital

Appointed to the board in January 2004. Following the retirement of Sir David Prosser in August 2014, Fani became the sole chairman.

Fani is chairman of Investec Bank Limited, Investec Bank plc and former chairman of Tiso Group Limited and former deputy chairman of the Bidvest Group.

Other directorships include: Investec Bank Limited (chairman), Investec Bank plc (chairman), Investec Employee Benefits Limited and Investec Asset Management Holdings (Pty) Ltd, Investec Asset Management Limited, Kumba Iron Ore Limited (chairman), MTN Group Limited and MRC Media (Pty) Ltd.

**Zarina BM Bassa** (51)
BAcc, DipAcc, CA(SA)

Board committees: DLC audit, Investec plc audit and Investec Limited group audit and DLC board risk and capital

Appointed to the board in November 2014.

Zarina is the executive chairman of Songhai Capital. A former partner of Ernst & Young Inc., she joined the Absa Group in 2002 and was an executive director and a member of the bank’s executive committee, with accountability for private banking. She has previously chaired the Public Accountants’ and Auditors’ Board and the Auditing Standards Board and has been a member of the JSE GAAP Monitoring Panel.

**Laurel C Bowden** (50)
National Higher Diploma Engineering, BSc, MBA

Board committees: DLC audit committee, Investec plc audit and Investec Limited group audit

Appointed to the board in January 2015.

Laurel is a partner at 83 North, where her areas of focus include internet, enterprise software and fintech. Laurel has over 15 years’ investment experience and was previously a director at GE Capital in London, where she was responsible for acquisitions in consumer and transport finance in Europe.

Other directorships include: Bluevine Capital Inc., Edbury Partners Limited, 83 North, GE Ventures Limited, iZettle AB, Notonthehighstreet Enterprises Limited, and Wonga Group Limited.

**Cheryl A Carolus** (57)
BA (Law), BEd, Honorary doctorate in Law

Senior independent director

Board committees: DLC social and ethics

Appointed to the board in March 2005.

Cheryl acted as the South African High Commissioner to London between 1998 and 2001 and was chief executive officer of South African Tourism.

**Perry KO Crosthwaite** (66)
Senior independent director
MA (Hons) in modern languages

Board committees: DLC remuneration and DLC nominations and directors’ affairs
Directorate Investec plc and Investec Limited (continued)

Appointed to the board in June 2010.

Perry is a former chairman of Investec Investment Banking and Securities and director of Investec Bank plc.

Other directorships include: Investec Bank plc, Jupiter Green Investment Trust plc, Melrose Industries plc, Investec Holdings (Ireland) Limited and Investec Capital and Investments (Ireland) Limited.

Bradley Friedland (49)
BCom, CA(SA), MBA
Board committees: DLC board risk and capital
Appointed to the board in April 2010.

Bradley previously held the positions of joint head of investment banking and chief executive of Investec Bank plc. He is the chief executive in residence at Judge Business School.

Other directorships include: Investec Wealth & Investment Limited, Grovepoint Capital LLP and deputy chairman of the Court of Bank of England.

David Friedland (62)
BCom, CA(SA)
Board committees: DLC audit, Investec plc audit, Investec Limited group audit, DLC board risk and capital, DLC capital and DLC nominations and directors’ affairs
Appointed to the board in March 2013.

David is a former partner of both Arthur Andersen and KPMG Inc. where he also served as head of audit and risk in KPMG, Cape Town office.

Other directorships include: Investec Bank Limited, Investec Bank plc., The Foschini Group Limited, Pick n Pay Stores Limited and Pres Les (Pty) Ltd.

Haruko Fukuda OBE (68)
MA (Cantab), DSc
Board committees: DLC board risk and capital
Appointed to the board in July 2003.

Haruko was previously chief executive officer of the World Gold Council, and senior adviser at Lazard. She is former vice chairman of Nikko Europe plc and a partner of James Capel & Co and a former director of AB Volvo and of Foreign and Colonial Investment Trust plc.

Other directorships include: Investec Bank plc, director of Aberdeen Asian Smaller Companies Investment Trust Plc. She is an adviser to Braj Binani Group of India.

Charles R Jacobs (48)
LLB
Board committees: DLC remuneration
Appointed to the board in August 2014.

Charles Jacobs is a senior partner of Linklaters LLP specialising in public and private M&A, capital raisings and initial public offerings, joint ventures, corporate governance and other corporate work. Charles also heads Linklaters’ global mining team and much of his work is in this sector. Charles has been a solicitor at Linklaters for over 20 years and has been a partner since 1999.

Other directorships include: Linklaters LLP and Fresnillo plc (Director and chairman of the remuneration committee)

Ian R Kantor (68)
BSc (Eng), MBA
Appointed to the board in July 1980.

Other directorships include: Insinger de Beaufort Holdings SA (in which Investec Limited indirectly holds an 8.6% interest), Bank Insinger de Beaufort NV (where he is chairman of the management board) Investec Asset Management Holdings (Pty) Ltd and Investec Asset Management Limited.

Lord Malloch-Brown KCMG (61)
BA (Hons) History, MA (Political Science)
Board committees: DLC social and ethics
Appointed to the board in August 2014.

Lord Malloch-Brown is a former chairman of Europe, Middle East and Africa at FTI Consulting.

From 2007 to 2009, Lord Malloch-Brown was a UK government minister. Lord Malloch-Brown was formerly the deputy secretary-general of the United Nations as well as development specialist at the World Bank and United Nations and a communications consultant and journalist with wide ranging experience of boards.

Other directorships include: Gadco Cooperative U.A., Seplat Petroleum Development Company plc and Smartmatic Limited.

Khumo L Shuenyane (44)
Associate CA (Member of the Institute of Chartered Accountants in England and Wales)
Bachelor in Social Science (International studies with Economics)

Board committees: DLC audit, Investec plc audit and Investec Limited group audit and DLC board risk and capital
Appointed to the board in August 2014.

Khumo is a chartered accountant (England and Wales), BEcon and International Studies and was previously group chief officer (Mergers and Acquisitions and International Business Development) of MTN Group Limited. Until 2007, Khumo was head of Principal Investments at Investec Bank Limited.

Other directorships include: Investec Bank Limited and Famous Brands Limited.

Peter RS Thomas (70)
CA(SA)
Board committees: DLC audit, Investec plc audit, Investec Limited group audit, DLC board risk and capital, DLC nominations and directors’ affairs, DLC social and ethics and DLC capital
Appointed to the board in June 1981.

Peter was the former managing director of The Unisec Group Limited.

Other directorships include: Investec Bank Limited, various Investec subsidiaries, JCI Limited and various unlisted companies.

Footnotes
- George FO Alford, Olivia C Dickson and M Peter Malungani resigned as directors with effect from 7 August 2014
- Charles R Jacobs, Lord Malloch-Brown and Khumo L Shuenyane were appointed as directors with effect from 8 August 2014
- Zarina BM Bassa was appointed as a director with effect from 1 November 2014
- Laurel C Bowden was appointed as a director with effect from 1 January 2015.

Details of the Investec committees can be found on pages 103 to 112.

Details of the board members of our major subsidiaries are available on our website.

¹ The LSE only includes the shares in issue for Investec plc, i.e. currently 613.6 million, in calculating market capitalisation, as Investec Limited is not incorporated in the UK.
² Calculations are based on the group’s consolidated earnings per share before goodwill, acquired intangibles and non-operating items; and dividends per share as prepared in accordance with IFRS and denominated in Pounds Sterling.
² The JSE Limited agreed to use the total number of shares in issue for the combined group, comprising Investec plc and Investec Limited in calculating market capitalisation, i.e. currently a total of 899.3 million shares in issue.
### Investec perpetual preference shares

Building trust and credibility among our stakeholders is vital to good business

The board recognises that effective communication is integral in building stakeholder value and is committed to providing meaningful, transparent, timely and accurate financial and non-financial information to primary stakeholders, as defined below. The purpose is to help these stakeholders make meaningful assessments and informed investment decisions about the group.

We endeavour to present a balanced and understandable assessment of our position by addressing material matters of significant interest and concern. We seek to highlight the key risks to which we consider ourselves exposed and our responses to minimise the impact of these risks. Another objective is to show a balance between the positive and negative aspects of our activities in order to achieve a comprehensive and fair account of our performance.

As a requirement of our DLC structure, we comply with the disclosure obligations contained in the applicable listing rules of the UKLA and JSE and other exchanges on which our shares are listed and with any public disclosure obligations as required by the UK Regulators and SARB. We also recognise that from time to time we may be required to adhere to public disclosure obligations in other countries where we have operations.

The Investor Relations division has a day-to-day responsibility for ensuring appropriate communication with stakeholders and, together with the Company Secretarial division, ensures that we meet our public disclosure obligations.

We have a board-approved policy statement in place to ensure that we comply with all relevant public disclosure obligations and uphold the board’s communication and disclosure philosophy.

Investec integrated annual report 2015
Corporate responsibility

Sustainable business practices

Our sustainability philosophy

Guided by our purpose to create sustained long-term wealth, we seek to be a positive influence in all our core businesses and in each of the societies in which we operate. We do this by empowering communities through entrepreneurship and education and leveraging the value in our diversity. We recognise the challenges that climate change presents to the global economy and we will consider supporting any meaningful activity that either reduces the negative impact on, or prolongs the life of, our planet.

Investec as a responsible corporate

At Investec we recognise that while our shareholders remain at the forefront, our purpose ultimately is not only about driving profits. We strive to be a distinctive specialist bank and asset manager, demonstrating cast-iron integrity, moral strength and behaviour which promote trust. Our core values include unselfishly contributing to society, valuing diversity and respecting others. Outstanding and empowered talent, entrepreneurial spirit and regard for the planet are other qualities that align with the culture of our organisation and our approach to responsible business.

Our culture and values demonstrate our belief that as an organisation we can and must have a positive impact on the success and well-being of communities local to our offices, the environment, and on overall macro-economic stability.

Our philosophy seeks to align the interests of shareholders and stakeholders over time, and provides the individual business units and regions with a basis from which to determine their own approach. The group’s philosophy is not intended to be mutually exclusive or exhaustive, but allows us to concentrate, for now, on key focus areas. Deliberately not driven on a top-down basis, the executive maintains responsibility for oversight, direction, coordination and integration of our sustainability efforts while the individual business units provide the key drivers behind our activities, in a manner that best makes sense to each.

Please refer to the website for Investec’s full Corporate Citizenship statement.

Sustainability at Investec

Investec’s sustainability focus encompasses endurance and the interdependence of the three key areas of profit, people and planet:

<table>
<thead>
<tr>
<th>Profit</th>
<th>People</th>
<th>Planet</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financial strength and resilience (of the business and the economy) • Balanced and resilient business model.</td>
<td>Internal employees: • Strong, diverse and capable workforce</td>
<td>Internal • Reduce operational impacts.</td>
</tr>
<tr>
<td>Risk management and compliance • Strong risk consciousness • Responsible banking practices • Responsible lending and investing.</td>
<td>External CSI initiatives: • Education • Entrepreneurship • Environment.</td>
<td>External • Embed environmental considerations into business activities.</td>
</tr>
<tr>
<td>Governance • Strong culture and values to underpin our processes, functions and structures.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Our approach to sustainability is documented throughout this integrated annual report with further detail in a more extensive sustainability report on our website.
Corporate responsibility (continued)

Sustainability initiatives

Investec participates and has maintained its inclusions in the following international initiatives:

- The Dow Jones Sustainability Investment Index
- The JSE Limited Socially Responsible Investment Index
- The FTSE4Good Index
- UN Principles for Responsible Investment (PRI)
- UN Global Compact
- The Carbon Disclosure Project – Investec is a member and Investec Asset Management is a signatory investor.

Responsibility

The social and ethics committee is responsible for monitoring the non-profit elements of sustainability (see page 110).

The mandate of this committee places a strong emphasis on the responsibility of the group towards the communities in which we operate, on social transformation in the workplace, and on preserving the well-being and dignity of our employees.

We also have sustainability representatives in each of the major geographies in which we operate who drive our sustainability objectives as well as various forums discussing sustainability considerations. Feedback on relevant sustainability issues is provided to board members at each board meeting.

Reporting

Our approach to sustainability is documented throughout this integrated annual report with further detail available in a more extensive sustainability report on our website.

Our approach to reporting has followed guidance from the King Code of Governance Principles for South Africa (King III), the Global Reporting Initiative’s (GRI) G3.1 sustainability reporting guidelines. An index of these indicators together with our response to each of them can be found in our separate sustainability report. We have self-assessed our reporting to be application level B.

Assurance

Investec Internal Audit performed a limited review of the quantitative and qualitative sustainability information disclosed on pages 124 to 138 of this report. This included the review of corporate social spend, learning and development spend, employee headcount and carbon footprint.

Grant Thornton has provided limited assurance over selected environmental, human resources and corporate social spend key performance indicators, as set out in the corporate responsibility review of this integrated annual report, which have been extracted from the 2015 sustainability report. For a better understanding of the scope of Grant Thornton’s assurance process, the extracted environmental, human resources and corporate social key performance indicators in this report should be read in conjunction with the full 2015 sustainability report containing their assurance statement.
In identifying material issues for the group, consideration is given to those issues we believe have the potential to significantly influence our ability to have a positive impact on the success and well-being of communities local to our offices, the environment and on overall macro-economic stability. In identifying these issues, we consider Investec’s values and philosophies and input obtained from our stakeholders in the context of our three key focus areas of profit, people and planet.

<tbody>
<tr>
<td><strong>Profit</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Balanced and resilient business model</td>
<td>The financial strength and resilience of Investec depends on a balanced business model that supports our long-term growth vision through varying economic cycles. We aim to maintain an appropriate balance between revenue earned from operational risk activities and revenue earned from financial risk activities.</td>
<td>Our capital light activities contributed 56% to group income and capital-intensive activities contributed 44% to group income. Please refer to the operational and strategic report on pages 18 to 21 for more information.</td>
</tr>
<tr>
<td>Responsible banking practices</td>
<td>We strive to demonstrate cast-iron integrity by displaying moral strength, risk consciousness and holding ourselves to the highest ethical standards. Our robust risk management processes and governance systems provide a strong foundation for responsible banking practices.</td>
<td>The Compliance function ensures that Investec continuously complies with existing and emerging regulation impacting on its operations. Organisation Development (OD) acts to strengthen the culture of the business, ensure its values are lived, build capability and contribute to the long-term sustainability of the organisation. Please refer to pages 98 to 100 of volume two for more detail on the Compliance function.</td>
</tr>
<tr>
<td><strong>People</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Engaging, developing and retaining our employees</td>
<td>The sustainability of our business depends largely on our people and positioning Investec as an attractive employer in the financial services industry. We focus on building a strong, diverse and capable workforce by providing a workplace that stimulates and rewards distinctive performance.</td>
<td>In 2015, we invested £14.1 million in the learning and development of our employees, compared to £11.8 million in 2014. Investec has been voted one of the most attractive employers in the 2015 Universum Most Attractive Employer awards. Investec was voted Best Bank by both professionals and graduates. Please refer to pages 140 to 180 for our remuneration report.</td>
</tr>
<tr>
<td>Making an unselfish contribution to society</td>
<td>Our approach to CSI focuses on education, entrepreneurship and the environment. We believe that to focus on education and entrepreneurship is an effective way to create opportunities for employment, wealth creation and to stimulate socio-economic growth.</td>
<td>We invested £5.4 million in corporate social investment, (2014: £5.1 million). Promaths received Mail &amp; Guardian’s 2014 Investing in the Future Award. Investec won the 2015 Business Charity Award for community impact in the UK for our partnership with Bromley by Bow Beyond Business incubator. During our period of involvement, the programme has launched 55 new social enterprise businesses, creating 325 new jobs.</td>
</tr>
<tr>
<td><strong>Planet</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Sustainable finance and investment</td>
<td>As a niched, specialist financial services organisation with a small physical presence, the direct environmental and social impacts of Investec’s daily operations are limited. The area in which Investec can make the most meaningful contribution to the environment is through responsible financing and investing and supporting businesses involved in renewable energy and green developments.</td>
<td>We committed £1.1 billion to renewable energy. Investec, in partnership with Vuselela Energy, launched a first of its kind co-generation power plant in South Africa, Eternity Power. Our Asset Management business designed an ESG tool that enables databases of ESG information to be built, and will ultimately monitor the ESG performance of investments.</td>
</tr>
<tr>
<td>Reducing our operational impacts</td>
<td>While the direct environmental impacts of Investec’s daily operations are limited, we seek to reduce our resource consumption and waste generation and thereby limit our environmental impact.</td>
<td>Scope 1 emissions decreased by 21% and scope 2 emissions by 5% as a result of a number of greening initiatives across our offices. Scope 3 emissions increased due to improved data collection processes which resulted in the coverage of our smaller offices. Investec Gresham Street was a runner-up in the 2014 Clean City Awards Scheme.</td>
</tr>
</tbody>
</table>
Corporate responsibility (continued)

Our people

Investec employees remain critical to continued business success and to overall sustainability efforts. The expertise and dedication of staff are fundamental in meeting our clients’ needs and delivering distinctive results. It is therefore vital that we engage, develop and retain a high-value workforce. One of the group’s values is to ensure open and honest communication and hence we encourage active and open dialogue between staff and senior management. As a responsible employer, Investec aims to offer staff a stimulating and progressive working environment in which they can flourish and realise their true potential.

In assuming responsibility for our people we seek to promote sustainability through:

- **1.** Competitive remuneration and reward
- **2.** Bespoke (specialised) learning environment
- **3.** Measures to ensure the health and well-being of employees
- **4.** Performance consulting through regular reviews, pathing and development
- **5.** Leadership development and business continuity
- **6.** Resourcing and recruiting that prioritises a diverse workforce
- **7.** Facilitating an understanding of the Investec culture and people practices

Our internal people activities involve dedicated divisions such as Human Resources (HR) and Organisational Development (OD), which serve to supplement the ongoing people focus of our individual business units. The Investec Careers and HR teams are mandated to enable the attraction, development and retention of talent who can perform in a manner consistent with our culture and values. OD acts to strengthen the culture of the business, ensure its values are lived, build capability and contribute to the long-term sustainability of the organisation.

The HR division participates in local and international forums to ensure alignment of HR strategy with business strategy. As our operating jurisdictions have different legal and regulatory requirements, our various HR functions operate in a differentiated but integrated way adhering to the group philosophical approach. Senior responsibility for reporting employee-related issues falls under Marc Kahn who heads our Human Resources and Organisational Development.

Our approach to sustainability is documented throughout this integrated annual report with further detail in a more extensive sustainability report on our website.

Employee strategy

The core areas of emphasis regarding our people strategy are:

To attract, retain and motivate the right people who can perform extraordinarily

Our internal resourcing function forms an integral part of our broader talent management as it enables us to source and redeploy talent internally and, where required, to recruit externally to address any skills gaps identified.

We invest significantly in a number of opportunities for developing and training employees and in leadership programmes to develop current and future leaders of the group. Our Learning and Development Centre plays a critical role in the development of our employees as well as assisting the business areas to achieve their learning objectives. Such learning objectives are always aligned to the business strategy and market trends. The centre is also involved in group-wide activities such as an induction programme for new employees, providing learning advice to individual employees and facilitating the development of generic programmes in the fields of information technology, banking and finance, compliance, e-learning, talent retention and mentoring.

To retain and motivate staff through appropriate remuneration and reward structures

Our remuneration practices comply with the principles of local regulations, while continuing to reward people meaningfully for performance and contribution. Our remuneration strategy is based on the philosophy that employees are innovative, entrepreneurial and work in an environment that encourages and fosters extraordinary performance. In line with our philosophy of employee ownership, staff share schemes provide all employees, at all levels of the organisation, with the opportunity to participate in our long-term growth.

Further information is provided on pages 140 to 180.

To ensure that performance management is effectively and constructively practised

Our culture of open and honest dialogue promotes immediate and direct performance-related feedback between manager, employee and team to help individuals identify and address their development needs.

Working at Investec

The policies and business practices of Investec are outlined in Becoming Acquainted with Investec (BAWI) or regional equivalents; and in the compliance handbook. They are intended to guide our conduct and ensure that at all times our actions and attitude reflect the group’s values and philosophies.

These policies and business practices can be found on our website, including more details on the following:

Promoting equity and diversity in the workplace

Our promotion of equal opportunity and workplace diversity is not merely a social responsibility, but a means of ensuring that we foster a culture of diversity in the belief that this brings business advantage. We have various processes to encourage debate and dialogue around appreciating diversity and different cultures. Emerging and established leaders are invited to participate in talent discussions with executive management around all issues related to talent management. In addition, our Zebra Crossing initiative, which is aligned to our employment equity plan, aims to raise levels of multi-cultural awareness of staff at Investec and enable them to appreciate and celebrate the richness of our diverse population and to take these insights back into the business. Over 2 500 employees have participated in this programme since its inception in 2009.

Our approach to sustainability is documented throughout this integrated annual report with further detail in a more extensive sustainability report on our website.

* A senior manager is defined as a person who: (a) has responsibility for planning, directing or controlling the activities of the company, or a strategically significant part of the company, and (b) is an employee of the company.

Transformation

In South Africa, Investec remains committed to black economic empowerment. Our approach involves:

- Using our entrepreneurial expertise to foster the creation of new black entrepreneurial platforms
- Serving as a leading source of empowerment financing
- Encouraging internal transformation by bringing about greater representivity in our workplace. In this regard, we are focusing on creating black entrepreneurs within the organisation.

During the year we received a level 2 BBBEE rating status from Empowerdex, up from a level 3. We are committed to achieving and sustaining an equitable workplace that encourages and manages diversity and as such remains focused on the corrective strategies as set out in our Employment Equity Plan for the period 2013 to 2017. In terms of numerical targets for 2014 we met the targets for top management, and at the senior management level were just shy of meeting our targets. We did not meet our targets for junior management, however, we exceeded our targets at the middle management level and at the semi-skilled level (due to the implementation of various learnership programmes).

Recognising that enterprise development is vital to South Africa’s transformation aspirations, we continue to run an enterprise development programme in partnership with Raizcorp to back entrepreneurs who are managing their own businesses and have potential to grow and create jobs. The entrepreneurs selected for the programme are assigned a dedicated team of trained Raizcorp guides who focus on key areas of strategy, finance and marketing to sales and personal development. The selected entrepreneurs are directly responsible for the creation of over 300 jobs through their businesses.

Further information on the employment equity statistics of our South African business is available on our website.

Discrimination

We endeavour to prevent and/or eliminate any form of discrimination based on gender, race, religion, age and sexual preference (or any other basis as envisaged by the South African Bill of Rights in the Constitution or regional equivalents). Investec has a formal grievance procedure (and a written policy) to deal appropriately with any incident which may occur. Furthermore, there are several informal avenues for employees who wish to discuss concerns, for example, OD, HR, Employee Relations and our independent external consultants.

There are no recorded incidents of discrimination for the period under review.

Health and safety

A group-wide formal health and safety programme identifies and manages all health and safety risks, and carries out regular safety audits. Health and safety is overseen by a health and safety committee that meets quarterly to review health and safety concerns.
Corporate responsibility (continued)

This management comprises:
- Craig Gunnel – head of facilities SA
- Tony Grimes – head of facilities UK

In South Africa, Investec’s HIV/AIDS policy and management forum extends to all permanent employees.

**Employee wellness**
To enable and develop employee health and well-being, Investec provides employees with a bespoke employee assistance and wellness programme. The comprehensive and integrated health and wellness programme, which expresses our focus of care and concern for the wellness of employees, provides personalised wellness interventions offered in face-to-face counselling and coaching. The wellness interventions are provided by a multi-disciplinary team of select health professionals who are all specialists in their fields of practice. Investec values the physical and psychological health, welfare and safety of our people. Our offices also host wellness days for staff to raise awareness and education around health issues through a unique, fun and interactive approach which focuses on physical and mental health.

**Retrenchment policy**
Where it becomes necessary for Investec to terminate employment based on operational requirements, the procedure to be followed will be in accordance with Investec’s retrenchment policy which is more favourable than the local regulatory requirements. We conduct consultation for a period which exceeds the minimum prescribed period during which we attempt to find a suitable alternative position for the affected employee.

**Whistle-blowing policy and protected disclosures**
One of Investec’s values requires employees to ‘conduct all internal and external dealings with integrity, consistently and uncompromisingly displaying moral strength and behaviour which promotes trust’. Integrity and confidentiality are critical to our reputation and sustainability.

The purpose of our whistle-blowing policy is to encourage employees to raise concerns or disclose information about possible fraudulent, unethical, criminal or other improper behaviour or workplace misconduct in total confidentiality and anonymity and without fear of retribution. We seek to protect all employees who disclose unlawful or irregular conduct by the company, its employees or other stakeholders.

To review the full details on employees and our policies relating to business practices, please refer to the separate sustainability report on our website.

**Corporate social investment (CSI)**
Our CSI endeavours are central to the group’s values of making an unselfish contribution to society, valuing diversity and respecting others, and also underpins Investec’s aim of being a good corporate citizen. Our approach to CSI focuses on education, entrepreneurship and the environment. We believe that to focus on education and entrepreneurship is an effective way to create opportunities for employment, wealth creation and to stimulate socio-economic growth.

In keeping with our business model of independent, highly autonomous business units supported by a strong centre, there is no single overriding approach to social investment within the group, although clear commonalities exist. Each of the regions has pursued social investment as deemed appropriate to their circumstances and where they are in the evolution of their business.

The active involvement of our people, through volunteering, remains at the core of our social investment strategy. We have many well-established charitable partnerships and volunteering initiatives to support these partners. Further, we make donations to charities in response to requests for assistance across all regions and business areas within the group. This allows us to allocate meaningful grants in areas which might not fall within our main focus areas.

Our approach to sustainability is documented throughout this integrated annual report with further detail in a more extensive sustainability report on our website.

UK and Other
The corporate social investment programme plays a key role in the fulfillment of Investec’s core values focusing on making an unselfish contribution to society.

Our approach encompasses the principal elements of:

- Facilitating employee volunteering with local charitable partners
- Granting charitable donations to small local charities
- Facilitating and recognising fundraising endeavours of employees through organised events and Employee Charity Funding
- Providing a Give-As-You-Earn facility to encourage employee payroll giving.

We champion sustainable social investment by:

- Building dedicated charitable partnerships
- Engaging all of our people in making a positive difference
- Harnessing our diverse resources and collective talent.
Corporate responsibility (continued)

We support many causes through sponsorships and charitable donations, but our social investment programme is focused on education, entrepreneurship and the environment – areas identified by employees as best aligned with Investec’s culture and core values.

**Highlights during the period**

- Employees continue to support our partner Amherst School, volunteering over 50 days per year consistently for the past five years. We support the core activities of reading, maths and vocabulary, alongside a variety of annual activities such as the Lihou Island year six camp. We continue to subsidise the breakfast club and funded new tables and chairs at the club, which now runs five mornings a week with our volunteers providing cover each morning.

- Investec is a founding partner in Arrival Education’s four-year talent development programme. We have indirectly supported 908 Arrival students this year, with approximately 205 students impacted directly through life skills workshops and programme sessions hosted at Investec. Volunteers across our business have dedicated more than 280 hours toward positively impacting Arrival students this year. We have also been shortlisted in the Business Charity awards 2015 for our partnership with Arrival Education in the Community Impact category.

- Morpeth School is a mixed comprehensive secondary school situated in east London. The pupils are from diverse backgrounds and ethnic groups and an above-average proportion is disabled. Various opportunities provided by Investec in the last year resulted in the attendance of 300 pupils. This year’s group was chosen from a variety of backgrounds and some were targeted because they are feared to be at risk of becoming disengaged. Many from this group are going on to take one or two GCSE exams early and 85% of the group are expected to achieve at least one A* – C grade in the coming year, with 30% being predicted an A or A*.

- Investec won the Business Charity awards for Community Impact in 2015 for the Beyond Business social enterprise incubation programme we run in partnership with the Bromley by Bow Centre. The programme focuses on economic regeneration in Tower Hamlets. Twenty-two volunteers from 10 different business areas volunteered more than 91 hours in office time to support the programme this year. Over the last financial year, six new social enterprises were launched, 66% of which are Black Minority or Ethnic-led; and 50% are run by women.

- We were also shortlisted in The Card & Payments awards 2015 for Best CSR programme (for our London-based programme) and, with the Lord’s Taverners, in the Corporate Engagement awards 2014, for best collaboration of a single event for the Investec Ashes Cycle Challenge. This is a bespoke cricket-themed challenge, created in partnership with the Lord’s Taverners charity. It successfully engaged employees, partners and clients of several of our offices and raised more than £279 000 for the Lord’s Taverners and other local charities.

- The Investec Foundation in Australia embodies our philanthropic commitment to the community. This commitment is illustrated primarily through supporting meaningful health, welfare and education programmes. The Australia office contributed A$276 226 (2014: A$253 009) to various programmes.

**Southern Africa**

Aligned with the group approach, our CSI endeavours in South Africa focus on education and entrepreneurship. Wherever possible, we seek to collaborate with partners so as to leverage resources and expertise and help ensure enduring impact and long-term sustainability for our projects. In all cases, we look to clear indications that projects are enduring, sustainable and replicable (where appropriate) and are guided by strategic intent, rather than philanthropic well-meaning.

Our CSI strategy is to focus on a more clearly defined pipeline of educational and entrepreneurial projects. The strategy is aimed at facilitating the empowerment of talented individuals within a defined continuum of interventions through school and university to the workplace. The following two key objectives have been identified:

- To facilitate an increase in the number of entrepreneurially-minded matriculants as well as those with a decent pass in English, Maths and Science who have an aspiration to proceed beyond matric
- To facilitate access to quality tertiary education.

The illustration below shows how various components of our strategy form a pipeline of interventions starting at high school and progressing to the workplace.

**Southern African pipelines of interventions**

**High school**

- Maths and Science
- Entrepreneurial thinking
- Exposure to careers

**Tertiary**

- Access to tertiary
- Support performance

**Workplace**

- Transition to workplace
- Invite as alumni

Our approach to sustainability is documented throughout this integrated annual report with further detail in a more extensive sustainability report on our website.
Highlights during the period

- Promaths is a partnership between Investec and Kutlwanong Centre for Maths, Science and Technology that has been giving extra Maths and Science lessons to learners in grades 10 to 12 for almost 10 years. The initiative received Mail & Guardian’s 2014 Investing in the Future Award. The judges labelled Promaths a winning formula for tomorrow’s leaders and commended Investec for taking a long-term view to social development by constantly looking to improve the programme.

- In the 2014 academic year, 203 Promaths students obtained greater than 80% in their matric Maths, Physical Science or Maths and Physical Science.

- As part of the expansion of the Promaths programme, Investec, Kutlwanong and the Promaths Alumni embarked on starting and running Promaths Kutlwanong Societies on different university campuses. Societies have been launched at Wits University, University of Cape Town, University of Pretoria and University of Johannesburg.

- Investec, in partnership with Study Trust, awards young South Africans who have academic potential and financial need with the opportunity to study towards financial sector-related degrees at selected local universities. The programme currently has 89 bursary recipients from first year to honours level. In 2014, 19 of our bursary recipients graduated and entered the world of work, bringing the total number of our ex-bursary holders who are now professionals and part of our alumni to 86.

- Investec has continued its partnership with the Independent Schools Association of Southern Africa (ISASA) and the Department of Education. The main objective of the initiative is to develop quality teachers of Maths, Science and English, producing a new breed of teachers. In the 2015 academic year an additional 60 new teacher interns were recruited, bringing the number of interns to over 120. The total number of schools where teacher interns can be placed has grown to over 40 schools across the country.

- The Mini Enterprise programme is an entrepreneurship programme, a partnership with Junior Achievement South Africa (JASA), that runs over 11 weeks. The programme covers skills ranging from financial planning to forming management structures and selling company shares. In 2014, 45 finalists spent four days refining their initial concepts and participating in the Junior Innovators Competition. The winner received a R60 000 bursary for her ‘Heating Cooling Bottle’, a water bottle that can perform the function of a household kettle without the use of electricity.

- The Cradle Project, a group of Investec employees who volunteer their time and resources to improving the lives of those less fortunate in our surrounding communities, allocated R570 303 (2014: R628 297) to a variety of worthy causes.

- Mandela Day is a campaign driven across the country by the Nelson Mandela Foundation in which Investec participates. In 2014, staff members were encouraged to find ways of giving back during the month of July and entered our Mandela Day competition in which they stood a chance to win a donation for their charity. As a result, R100 000 was distributed to various charities.

- Investec Bank Mauritius’ CSI strategy focuses on projects and initiatives in education, environment and sports development. The office contributed £64 520 (2014: £58 269) to a number of corporate social investment projects during the financial year.

Please refer to pages 56 to 58 of the Investec Bank (Mauritius) Limited’s annual report for more detail.
Our planet

Investec’s environmental policy takes into account the challenges that climate change presents to the global economy and we will consider any meaningful activity that either reduces the negative impact on, or prolongs the life of, our planet. We believe that as a bank, and given our positioning in the first and emerging worlds, we can make a meaningful impact in addressing climate change.

Carbon footprint for the group

* The increase in commercial airlines is a result of an improved data collection process which has resulted in commercial air flights being recorded for all UK and Other offices.

Our approach to sustainability is documented throughout this integrated annual report with further detail in a more extensive sustainability report on our website.
Highlights for the UK

- We have smart meters in 70% of our UK offices which help us to monitor and better manage our energy usage; 100% of our Gresham Street energy is monitored via smart meters. We continue to exceed our energy reduction targets, despite a headcount increase of 7% this period. With a base year of 2008/09, in 2014/15 our electricity reduction was 29% against a target reduction of 27%, while our gas reduction was 66% against a target of 27%. Our overall carbon reduction in electricity and gas was 24%.
- Where we have direct control over our energy suppliers, we have selected green energy tariffs. This constitutes five of our UK offices. The bulk of the supply to our head office is from wind power, while the bulk of the supply to the other four offices is hydropower.
- Our environment programme is communicated to staff through our dedicated team – Team Green – who have run campaigns, primarily in our UK head office and Dublin offices, since 2006. During 2015 the programme was rolled out to 14 of our other UK offices. Each of these offices has their own Team Green groups and communicates directly with their own offices, focusing on local environmental issues. All teams work together to communicate cohesive environmental messages across all offices.
- The main campaign run across all offices in this period was the Watch Your Waste campaign. The aim of the campaign was to reduce overall waste across our offices. The campaign demonstrated the connections between creating waste and the unintended consequences on human and planetary health. The two specific focuses of the campaign were paper waste and plastic waste.
- Investec Gresham Street was a runner-up in the 2014 Clean City Awards Scheme. The scheme is run by the Corporation of London and promotes best practice with regards to waste minimisation and waste management in the Square Mile, following the waste hierarchy. There are 1 600 participants in the scheme. We continue to operate a zero-to-landfill waste policy, and our current recycling rate is 82%, 30%.

* Due to improved data collection processes, the coverage of paper, general waste, waste recycled and commercial airline business travel increased to include smaller UK and other offices. In the past only the major offices were included.

^ Includes Australia, which was previously reported separately.

^^ As a result of the business sold, Southampton, Clywd and Dublin NCB have been excluded. Australia office space and headcount decreased.

** Restated.
the remaining two of our UK HR teams switched from supplying monthly paper payslips to online payslips. The paper payslip system used to involve the annual distribution of 30 000 paper payslips across our UK offices – travelling 29 458 miles. As well as a more secure means of delivery and reducing our annual travel footprint by over 29 000 miles, moving to paperless payslips will help us reduce our annual paper consumption by at least 195 kg.

- In Gresham Street we continue to bottle our own pure drinking water into Investec branded glass bottles for use in our hospitality suite. We refilled 27 282 litre bottles during 2015, helping reduce our delivery footprint, and reducing our glass waste by 7 638 kg.

- Investec was one of the first City businesses to sign up to the Air Quality Pledge. The pledge commits us to try to raise the profile of air quality, to reduce gas consumption, to promote walking and cycling, to reduce the number of deliveries servicing our business and to encourage ‘no engine idling’. We continue to promote the pledge and participated in the City of London’s Cleaner Action Days during this reporting period.

- Our commitment to reducing our environmental impact includes promoting sustainable travel. We remain members of a UK car club, and a UK car-sharing social enterprise. Our Cycle2Work scheme continues to grow, with membership rolled out to all UK offices during this period. We ran a series of lunchtime Cycle Safety seminars for our staff in our Gresham Street office in September.

- The remaining two of our UK HR teams switched from supplying monthly paper payslips to online payslips. The paper payslip system used to involve the annual distribution of 30 000 paper payslips across our UK offices – travelling 29 458 miles. As well as a more secure means of delivery and reducing our annual travel footprint by over 29 000 miles, moving to paperless payslips will help us reduce our annual paper consumption by at least 195 kg.

- In Australia, in order to decrease our electricity usage at our Sydney office, an audit of high-power usage supplementary air-conditioning systems was performed and amenities in the kitchens were consolidated to reduce running time on supplementary fridges.

**Highlights for Southern Africa**

- Electricity is the largest contributor to our direct environmental impact. With rising electricity costs, energy supply concerns in South Africa and pending carbon tax costs it is becoming more imperative that we reduce our energy consumption. As such Investec Sandton (our largest office, comprising 49% of group floor space) has set an energy reduction target of 10% by 2020, with 2014 as a base year. We have set 2014 as a base year because we spent R4.5 million on energy efficiency initiatives in 2009 and have already seen reductions of 26% from 2008 to 2014. We seek to further increase our efficiencies by 2020.

- Our biggest energy consumers are heating, ventilation and air-conditioning systems, lighting and information technology. During 2015 we focused on energy efficiency initiatives such as data centre efficiencies and the use of specialised database appliances.

- In order to encourage recycling and simultaneously support surrounding communities, Investec staff partnered with Interwaste, a waste management company, in an initiative called ‘Tops and Tags’ where companies or individuals collect plastic bottle tops and plastic bread tags to be recycled. When contributors have collected 100 000 tops and tags they exchange these for a wheelchair which is then donated to a charity of their choice. Since inception, staff have collected enough tops and tags to donate 24 wheelchairs to the community.

- During the period, we reaffirmed our recycling programme to remind staff of recycling options available at Investec. Staff were made aware that Investec recycles paper, cans, plastic and glass. Food waste that is fit for consumption is distributed to charities. E-waste is sent to an outside organisation to refurbish or dispose of the computers in an environmentally-friendly manner. Refurbished computers are then distributed to selected Investec charities.

- Given that travel emissions are a major contributor to overall carbon footprint, we launched a Bike to Work campaign to raise awareness of alternative modes of transport available to staff to reduce their travel footprint. Staff were encouraged to either walk, run, cycle, use the Gautrain or share a lift to work. Investec partnered with Liftshare to offer staff the possibility of car-sharing with fellow Investec employees through a secure online system. Staff were also made aware of the video conferencing rooms in the building which are equipped with state-of-the-art video conferencing facilities and could be used as an alternative to travelling to meetings.

Sustainable finance and investment
Sustainable risk considerations are considered by the credit committee and investment committee when making lending or investment decisions. In particular the following factors are taken into account when a transaction might be approved or declined based on the outcome of the sustainability considerations:

- Environmental (including animal welfare)
- Social
- Economic.

We require that all projects comply with applicable environmental, planning, labour and procurement law and do not fund or invest in projects which do not have acceptable environmental impact assessments, do not comply with procurement and labour laws, and either do or could reasonably be expected to breach acceptable behavioural, ethical or moral standards. We target transactions in countries with established laws that comply with World Bank Standards and that have due processes that are applied reasonably and effectively. If not, sponsors and suppliers are obliged to give undertakings and compliance with such standards.

In addition, we have now designed an internal framework to provide enhanced procedures to evaluate and actively avoid, manage and mitigate the potential social and environmental impacts of the projects proposed. For further information please refer to the detailed sustainability report.

In our role as a global asset manager, our primary goal is to deliver on our clients’ mandates. The essential purpose of which is to preserve and grow the real purchasing power of our clients’ assets over the long term. We do this by assuming a stewardship role over our clients’ assets, including exercising of their ownership rights. Over the years, we have invested in recruiting a number of environmental, social and governance (ESG) investment professionals, as well as developing tools and processes which leverage increasingly available data. The practical end of our stewardship responsibility lies with the different investment teams who aim to incorporate material ESG issues into their analysis and portfolio construction in their aim to fulfil their client mandate. We believe this approach benefits both our clients and the social realms in which we invest and operate.

Information technology
Our vision is to continuously deliver an effective and efficient information technology (IT) platform that serves the needs of the business to deliver excellent client service.

Key infrastructure-related developments reducing our environmental footprint during the period include:

- The continued collaboration across geographies, ensuring effective leveraging of international teams regarding specific technologies
- Expansion of telepresence implementation into three additional territories across the globe, further improving the global collaboration with an associated reduction in business travel costs
- Data centre efficiencies through virtualisation continues across all geographies. The use of specialised database appliances in South Africa will reduce storage growth and improve processing capacity, while at the same time reducing our technology footprint (cooling and power usage)
- The use of cloud-based services, wherever feasible, continues to be a major consideration across all geographies and businesses in an effort to reduce physical infrastructure and energy requirements. Cloud solutions have been utilised in supplying basic office infrastructure services in Hong Kong, New York, and Australia. The ‘Mail in the Cloud’ initiative has been completed in the UK with the implementation of Microsoft’s Office 365 solution. This initiative will be expanded to South Africa during 2015, effectively reducing on-premise hardware and hosting
- Completion of the UK office’s footprint of ‘thin’ desktops. This is a compact piece of computing technology that accesses data remotely through a connection to a server and brings a virtual desktop to the user, thereby reducing total energy consumption
- Improved power consumption at South Africa’s Midrand alternative processing site with the introduction of power-saving initiatives which automate the hibernation of desktop equipment during periods of low usage.

Key infrastructure-related developments improving our IT efficiency during the period include the following:

- The implementation of a Software Asset Management (SAM) toolset has paid dividends in recent licencing negotiations resulting in optimal licencing levels across the group
- We continued the collaboration across geographies ensuring effective leveraging of international teams regarding specific technologies
- Investec in South Africa concluded a co-location of infrastructure agreement with the JSE facilitating a competitive, low latency trading environment
- In South Africa the concerning and ongoing power supply situation has resulted in the start of discussions related to the possible hosting of South Africa infrastructure outside of the country.

Key business application-related developments:

- The strategic focus to become an internationally focused client-centric organisation continues
- The Single Specialist Bank initiative continues to focus on the elimination of duplicate business processes across divisions and geographies to deliver a cost-effective, global client-friendly service through our Client Support Centre in South Africa. A single browser-based dashboard has been launched to accompany the Investec mobile application
- One Place digital manifestation now includes full transactional capability for Wealth & Investment and Private Banking in South Africa and Private Banking in the UK, with read-only capability for Wealth & Investment in the UK and Wealth & Investment in Switzerland
Corporate responsibility (continued)

- Our digital platforms have now been launched into the UK banking client base, and we are in the process of migrating Wealth & Investment UK, Switzerland, Mauritius and Channel Islands onto the single global platform.
- Investec digital platforms in South Africa have been enhanced to allow clients the ability to incorporate externally held transactional accounts, investments and loyalty programmes to complete a One Place solution. This functionality will be rolled out in the UK later this year.
- The first version of our unified digital offering for the intermediary market is in trial with the Mauritius community in the form of an intermediary App.
- An online discretionary management service for the South African client base has also been incorporated. Major initiatives now include a unified Online Apply for all Investec accounts, with UK Banking being the first to launch.
- Wealth & Investment in South Africa and UK have partnered to provide a single leveraged platform for international trading and investment management to South African clients. Platforms and operations will be run out of the UK business.
- In the UK, the drive to move clients into online banking, online processing and electronic statement distribution for our Private Banking, Mortgage and Asset Finance businesses continues.
- Continued consolidation and merging of technology and support teams across divisions, and in some cases geographies, is gaining momentum.
- This convergence will lead to opportunities to leverage resources, skills and licensing internationally and help the achievement of our four strategic goals to:
  - align architectural principles across all businesses and geographies;
  - reduce the international business applications footprint;
  - commoditise common functionality wherever commercially viable; and
  - simplify the environment.

Security and risk management
We continue to enhance security and risk management functions based on clear strategies supported by specialised and coordinated teams across all geographies. We have increased the team capacity to ensure we meet the ever-growing demands of our threat landscape and continue to place emphasis on collaborative and proactive risk and security management.

Procurement report
We recognise the potential for our procurement and supply chain practices to be agents for change in respect of the different aspects of sustainability. We continue to engineer, within select industries, changed outcomes across economic, social and environmental fronts.

In the UK, additions have been made to our procurement policy to incorporate both green and corporate social responsibility aspects. We now incorporate evaluation criteria into all of our procurement documentation to allow us to measure and demonstrate our intent to procure effectively without compromising the environment. We have recently committed to ensuring that 100% of our beverage offering has the Fairtrade label. This includes beverages available in our staff teapoints, our coffee bar and our hospitality suite. A product that carries the Fairtrade Certification Mark has met the rigorous Fairtrade standards, which focus on improving labour and living conditions for farming communities and promoting a way of farming that doesn’t harm either people or the environment.

In South Africa, our procurement practices seek to accord with the BEE requirements of the Department of Trade and Industry’s Codes of Good Practice, and we have an established process for monitoring and measuring our broad-based BEE procurement efforts. Environmentally responsible partners are key to the procurement process and we focus on sustainability criteria when contracting with potential and existing vendors. Our largest suppliers of PCs and server equipment subscribe to an electronic code of conduct, which assists in monitoring compliance across several areas such as environmental impact, labour, health and safety. We always consider the Energy Star endorsement before purchasing equipment.

Our approach to sustainability is documented throughout this integrated annual report with further detail in a more extensive sustainability report on our website.
Remuneration report
Chaired of remuneration committee statement

This remuneration report was prepared by the board remuneration committee (the committee) and approved by the board.

Overview of the year

Changes were put in place for the 2015 financial year in response to the cap on variable remuneration that can be paid to Prudential Regulation Authority (PRA) Code Staff under the Capital Requirements Directive IV (CRD IV) and the PRA Remuneration Code (PRA Code). These regulations affect the remuneration that we can pay the chief executive, managing director and group risk and finance director, as well as some of our employees in the Specialist Bank in the UK who are classified as PRA Code Staff.

Although shareholders at the 2014 annual general meeting voted overwhelmingly in favour of our remuneration report for the year ended 31 March 2014, the committee was disappointed that only 56% of shareholders supported the executive directors’ remuneration policy.

Listening to and acting on shareholders’ concerns

The committee has directed much of its time and effort since the 2014 annual general meeting into establishing the reasons behind the significant vote against the directors’ remuneration policy and implementing changes to address shareholders’ concerns.

The four main areas identified by shareholders as reasons for voting against the directors’ remuneration policy were:

- Absence of a Long-Term Incentive Plan (LTIP) with forward-looking performance conditions
- Extent of discretion provided for in the executive directors’ recruitment policy
- Lack of transparency over how Hendrik du Toit’s compensation is determined
- The quantum of executive directors’ remuneration.

We have responded to those issues by:

- Reintroducing annual LTIP awards equal to one times fixed remuneration (while reducing the maximum short-term incentive (STI) sharing percentage by 50%) for the executive directors subject to CRD IV
- Amending the executive directors’ recruitment policy so that discretion can only be exercised within clear limits
- Providing more detailed disclosures in respect of the performance assessment and incentive arrangements for Hendrik du Toit
- Undertaking a benchmarking exercise to validate the levels of executive directors’ remuneration.

In addition, in view of the forthcoming changes to the PRA Code, we have built flexibility into the directors’ remuneration policy to lengthen deferral or holding periods to comply with future regulatory requirements for individuals identified as PRA Code Staff without the need to revert to shareholders for a further binding requirement.

We have also extended the current malus provision to all incentives and introduced clawback so that the committee can apply either malus or clawback to all incentives for a period of up to seven years from the date of award (for PRA Code Staff).

These proposals will be put to shareholders for approval at the annual general meeting in August 2015 as part of the directors’ remuneration policy and the remuneration report. We have discussed these proposals with a representative group of our largest shareholders both in the UK and South Africa. These shareholders have been broadly supportive of these proposed changes and share the committee’s view that Investec has to adopt policies that allow it to remain competitive in attracting and retaining talent and ensuring the long-term success of the business. We would like to thank our shareholders for the open and frank nature of these conversations and for the various suggestions that were made.

Business context and outcomes for the year under review

Investec successfully executed on its key strategic initiatives embarked upon over the past two years. The group continued to grow its core franchises and simplified the Specialist Banking business through restructuring and strategic sales. The resultant simplification enables the group to enhance the operational focus to grow and develop its core businesses, so that the right outcomes can be delivered for clients and stakeholders including acceptable returns for shareholders.

The group’s performance against key metrics is shown in the table below.

</tr>
</tbody>
</table>
In light of the positive financial performance of the group in 2015 and the resultant progress achieved across a range of financial and non-financial measures (in terms of the executive short-term incentive plan as approved by shareholders and reflected on pages 147 to 149), the remuneration committee approved an annual bonus of £2.5 million each for Stephen Koseff and Bernard Kantor, and £2.25 million for Glynn Burger. Stephen Koseff, Bernard Kantor and Glynn Burger receive 20% of their bonuses in cash with the balance deferred in shares over three years, subject to six months retention. Malus and clawback arrangements apply to these awards.

Hendrik du Toit was awarded a bonus of £4.36 million, determined solely in relation to the performance of Investec Asset Management as set out on page 146. The bonus payable to Hendrik du Toit will not be deferred until such time as the debt taken out by him to fund a substantial investment into Investec Asset Management has been repaid.

The remuneration committee approved inflationary increases in the salary and benefits of the executive directors in line with average salary increases provided to employees across the group.

The board approved a modest increase in fees for the forthcoming year for the non-executive directors, roughly in line with inflation.

**Remuneration philosophy remains unchanged**

Our overarching remuneration philosophy has remained unchanged from prior years as we maintain focus on employing and retaining the highest calibre individuals through the payment of industry competitive packages and long-term share awards which ensure alignment with key stakeholders in our business.

Our rewards continue to be distributed from pools of realised earnings generated in excess of targeted thresholds which reflect usage of risk-adjusted capital. This economic value-added model has been in operation for about 16 years and ensures that risk and capital management form the basis for key processes at both a group and transaction level thus balancing the rewards between all stakeholders.

We recognise that financial institutions have to distribute the return from their enterprises between the suppliers of capital and labour and the societies in which they do business, the latter through taxation and corporate social responsibility activities. Our group-wide remuneration philosophy seeks to maintain an appropriate balance between the interests of these stakeholders, and is closely aligned to our culture and values which include risk consciousness, meritocracy, material employee ownership and an unselfish contribution to colleagues, clients and society.

**Looking forward**

The committee will continue to ensure that reward packages remain appropriately competitive, provide an incentive for performance, and take due regard of our culture, values, philosophies, business strategy, risk management and capital management frameworks.

Where appropriate, we will continue to consult shareholders and shareholder bodies on any significant proposed changes in remuneration policy.

We are seeking shareholder approval at the 2015 annual general meeting for:

- Our directors’ remuneration policy
- Our 2015 annual report on directors’ remuneration
- Our non-executive directors’ remuneration.

Signed on behalf of the board

Perry Crosthwaite
Chairman, DLC remuneration committee

10 June 2015

Executive directors

The executive directors whose remuneration is disclosed in this report are referred to as follows:

- Stephen Koseff – chief executive officer (CEO)
- Bernard Kantor – managing director (MD)
- Glynn Burger – group risk and finance director (GRFD)
- Hendrik du Toit – chief executive officer of Investec Asset Management (CEO of IAM)

Compliance and governance statement

The remuneration report complies with the provisions of Schedule 8 of the Large and Medium-sized Companies and Groups (Accounts and Reports) (Amendment) Regulations 2013, the UK Corporate Governance Code 2012, the UK Companies Act 2006, the Rules of the UK Listing Authority, the UK Financial Conduct Authority rules, the PRA Remuneration Code, the South African King III Code of Corporate Practice and Conduct, the South African Companies Act 2008, the JSE Limited Listings Requirements and the South African Notice on the Governance and Risk Management Framework for Insurers, 2014.

The remuneration report comprises the annual statement from the committee chair, the revised directors’ remuneration policy that sets out our remuneration policy for the next three years and the differences between the future policy and the policy operated in the 2015 financial year, and the annual report on remuneration that explains how the policy has been implemented in the 2015 financial year. The report also contains Pillar 3 disclosures as mandated by the UK’s PRA and the South African Reserve Bank.
A summary of the remuneration decisions made during the year ended 31 March 2015

Remuneration philosophy

Our philosophy, which remains unchanged from prior years, is to:

- Employ the highest calibre individuals who are characterised by integrity, intellect and innovation and who adhere and subscribe to our culture, values and philosophies
- Strive to inspire entrepreneurship by providing a working environment that stimulates extraordinary performance, so that executive directors and employees may be positive contributors to our clients, their communities and the group
- Provide staff share ownership through participation in our employee share schemes to align interests with those of our owners

- Continue to acknowledge the importance of the appropriate division of the returns generated by our business between our owners, our workforce and the societies in which we operate.

In summary, we estimate our total economic return has been divided between government through taxation, owners through dividends and employees through total compensation as follows:

The total cost of compensation is managed through staff compensation ratios which are reviewed regularly. The total staff compensation ratios are as follows:

* Deferred in shares over a period of three years, subject to six months retention.
^ 75% released in year four and 25% released in year five.
\^ Fixed allowances have been awarded in 2015, in terms of the implementation of the requirements of CRD IV. In 2014 long-term incentive awards were made as these requirements were not yet in place. No long-term incentive award was made in 2015.
** LTIPS awarded in prior years which have vested over the financial period. The value represents the number of shares that vested multiplied by the market price of the shares at the date on which they vested.
Changes to executive remuneration

We are proposing to respond to the issues raised by shareholders by making the following changes to the remuneration arrangements of the executive directors who are subject to CRD IV:

- Providing an inflationary increase in base salary and benefits
- Maintaining fixed allowances at their current levels
- Reducing the level of the short-term incentive sharing percentage by 50%
- Reintroducing annual LTIP awards equal to one times fixed remuneration.

These proposals apply from the 2016 financial year (and subsequent years) and are subject to approval at the 2015 annual general meeting.

An example of how the changes will impact the remuneration package of the CEO is shown in the table below:

<table>
<thead>
<tr>

<td>£1 million (paid in shares)</td>
<td>£1 million (paid in shares)</td>
</tr>
<tr>
<td>Short-term incentive (maximum)</td>
<td>200% of fixed remuneration</td>
<td>100% of fixed remuneration**</td>
</tr>
<tr>
<td>Long-term incentive</td>
<td>n/a</td>
<td>100% of fixed remuneration**</td>
</tr>
</tbody>
</table>

** Valued in line with European Banking Authority (EBA) discounting rules.

The graphs below compare the current and proposed remuneration structures on a target basis. Specific values shown relate to the CEO although a similar structure would apply to all executive directors subject to the CRD IV bonus cap.

Proposed remuneration structure

- The split between cash and share awards is unchanged
- The LTIP award makes up 50% of variable remuneration whereas previously there was no separate LTIP
- The pay-out profile of variable remuneration is extended with a greater proportion deferred for up to five years.

The remuneration of the CEO of IAM will continue to be determined by reference to the remuneration policy applicable to the IAM business.
Annual report on directors’ remuneration

The Investec group aims to apply remuneration policies to executive directors and employees that are largely consistent across the group, but recognises that certain parts of the group are governed by local regulations that may contain more onerous requirements in certain respects.

Composition and role of the committee

Perry Crosthwaite is the chairman of the committee. The other members of the committee are Fani Titi and Charles Jacobs. During the year Olivia Dickson, Bradley Fried and Sir David Prosser stepped down from the committee. Current members of the committee are deemed to be independent as discussed on page 99.

One of the members of the committee is also a member of the group’s board risk and capital committee (as discussed on page 111), thus bringing risk and control mechanisms into the committee’s deliberations.

The committee’s principal responsibilities and objectives are to:

- Determine, develop and agree with the board, the framework or broad policy for the remuneration of executive directors and executive management (comprising individuals discharging managerial responsibilities, who are the global heads of our core areas of activity and are members of our global operations forum)

- Commission and consider the results of an annual central and internal review of remuneration policy implementation

- Ensure that qualified and experienced management and executives are provided with appropriate incentives to encourage enhanced performance and are, in a fair and responsible manner, rewarded for their contribution to the success of the group and alignment with the corporate objectives and business strategy

- Review and approve the design of, and determine targets and objectives for any performance-related remuneration schemes operated by the group and approve the aggregate annual payouts under such schemes

- Review and approve, within the terms of the agreed policy, the total individual remuneration packages of executive directors and persons discharging managerial responsibilities and PRA Code Staff including, where appropriate, bonuses, incentive payments and share scheme awards

- Review and approve, within the terms of the agreed policy, the total individual remuneration packages of members of the internal audit, risk and compliance functions

- Oversee any major changes in our employee benefit structures

- Ensure that the comments, recommendations and rules within the UK and South Africa pertaining to remuneration are respected.

The committee is authorised by the board to seek any information it requires from any employee in order to perform its duties.

The committee’s terms of reference are subject to annual review and are available on our website.

Meetings

The remuneration committee met nine times during the financial year. An attendance schedule is provided on page 108. The company secretary of Investec plc acts as the secretary. Executive directors do not attend meetings of the committee, unless invited or required to do so by the chairman of the committee. The chairman of the committee reports on the activities of the committee at each meeting of the board.

Advisers to the committee and the company

Where appropriate, the committee has access to independent executive remuneration consultants. The selection of the advisers is at the discretion of the committee and Investec funds any expenses relating to their appointment.

During the financial year, the committee continued to use the services of its principal advisers, New Bridge Street, which among other things specifically reviewed and provided information on executive remuneration and our remuneration policy in light of CRD IV, industry consultation papers, regulations and developments with respect to remuneration practices and our alignment to them. In addition, they continued to review and provide information on appropriate benchmarks, industry and comparable organisations’ remuneration practices. Their recommendations are valued in the ongoing review of our remuneration practices. New Bridge Street is a signatory to the UK Remuneration Consultants Group’s Code of Conduct and does not conduct any material work for the company other than for the committee and is part of Aon plc. The committee, on an annual basis, formally evaluates the advice received from New Bridge Street to ensure that it is both objective and independent, and considers whether this service should be retained for the forthcoming year. Total fees paid to New Bridge Street for the year amounted to £31,000, (based on their standard hourly rates).

The company retained the services of PricewaterhouseCoopers to assist with the development of executive director and other PRA Code Staff incentive arrangements in light of CRD IV and to understand industry remuneration developments. This information was also shared with the committee.

Furthermore, we have used the services of Linklaters who have advised this year mainly on a number of issues pertaining to our existing incentive plans. Linklaters is one of Investec plc’s legal advisers.

Certain specialist divisions within the group, for example, human resources and the staff shares schemes division, provide supporting information and documentation relating to matters that are presented to the committee. This includes, for example, comparative data and motivations for proposed salary, bonus and share awards. The variable remuneration pools are determined by our finance teams taking into account risk-adjusted capital requirements and after eliminating unrealised gains. The employees within these specialist divisions, which provide support to the committee, are not board directors and are not appointed by the committee.
Statement of implementation of remuneration policy for the year ending 31 March 2016

Executive directors
Pending approval at the 2015 annual general meeting, the remuneration policy for the executive directors will be implemented as follows:

<table>

<td>Deferral period lengthened: equal vesting over years three to five, subject to six-month holding period</td>
</tr>
</tbody>
</table>

* Cap defined in line with EBA discounting rules which allow, when 25% of variable remuneration is deferred over at least five years, a slightly higher cap than 2x fixed remuneration (typically approximately 2.2x fixed remuneration dependent on interest rates and inflation). These limits will be in line with this EBA cap.
Further details on the executive directors’ short-term incentive plan:

<table>
<thead>
<tr>
<th>Performance conditions</th>
<th>Weighting</th>
<th>Score range</th>
<th>Achievement levels</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financial metrics</td>

</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Target (100%)</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Stretch (200%)</td>
</tr>
</tbody>
</table>

Each financial and non-financial metric has set threshold levels below which no short-term incentive will be earned and stretch levels whereby the pool for short-term incentives earned will be increased, but to a level capped as a percentage of adjusted operating profit. The committee believes that these stretch levels are demanding and will result in an incentive pool which will reflect actual performance and align the interests of the executive directors with the interests of shareholders. Achievement levels for the short-term incentive will be reviewed annually by the committee.

**Executive short-term incentive – financial metrics and weightings**

The weightings for each financial metric are as follows:

<table>
<thead>
<tr>
<th>Financial metric</th>
<th>Weighting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aggregate</td>
<td>85%</td>
</tr>
<tr>
<td>Return on risk-weighted assets¹</td>
<td>35%</td>
</tr>
<tr>
<td>Return on equity²</td>
<td>25%</td>
</tr>
<tr>
<td>Tier 1 capital adequacy³</td>
<td>12.5%</td>
</tr>
<tr>
<td>Liquidity cover ratio⁴</td>
<td>6.25%</td>
</tr>
<tr>
<td>Net stable funding ratio⁴</td>
<td>6.25%</td>
</tr>
</tbody>
</table>

¹ Return on risk-weighted assets is defined as adjusted earnings/average risk-weighted assets, where adjusted earnings are earnings attributable to ordinary shareholders after taxation, non-controlling interests and preference dividends, but before goodwill, acquired intangibles and non-operating items.

² Return on equity is defined as adjusted earnings/average ordinary shareholders’ equity (excluding preference share capital).

³ Tier 1 capital adequacy condition is a blend of the underlying tier 1 capital adequacy ratios for Investec plc and Investec Limited (50% plc: 50% Limited).

⁴ The liquidity metrics (liquidity cover ratio and net stable funding ratio) are a blend of the underlying liquidity metrics weighted by region (55% South Africa: 45% UK).

The financial metrics are designed to ensure an appropriate balance between measures which drive profitability (return on risk-weighted assets and return on equity) which comprise 60% of the total weighting of 85% and prudential measures (tier 1 capital adequacy ratios, liquidity cover ratios and the net stable funding ratio) which comprise 25% of the total weighting of 85%.

**Executive short-term incentive – financial metrics: achievement levels**

Achievement levels for each of the financial metrics, as described above, which determine threshold, target and stretch performance are reviewed and set annually by the committee, following a careful and detailed review of relevant economic and market conditions. The threshold, target and stretch performance levels for the financial metrics set by the committee are outlined on the next page. Achievement levels for the year ended 31 March 2015 are shown on page 152.
Weighting | Achievement levels
--- | ---
Financial metric | 85% | Threshold (0%) | Target (100%) | Stretch (200%)
Return on risk-weighted assets | 35% | 0.9% | 1.2% | 1.6%
Return on equity | 25% | 9% | 12% | 15%
Tier 1 capital adequacy | 12.5% | 9.5% | 10.5% | 12%
Liquidity cover ratio* | 6.25% | 115% | 132.5% | 162.5%
Net stable funding ratio* | 6.25% | 82% | 89.5% | 99.5%

* The liquidity metrics (liquidity cover ratio and net stable funding ratio) are a blend of the underlying liquidity metrics weighted by region (55% South Africa: 45% UK) as set out below:

<table>
<thead>
<tr>
<th>Measure</th>
<th>South Africa</th>
<th>UK</th>
</tr>
</thead>
<tbody>
<tr>
<td>Geographical weighting</td>
<td>55%</td>
<td>45%</td>
</tr>
<tr>
<td>Liquidity cover ratio</td>
<td>55%</td>
<td>150%</td>
</tr>
<tr>
<td>Threshold</td>
<td>65%</td>
<td>175%</td>
</tr>
<tr>
<td>Target</td>
<td>75%</td>
<td>225%</td>
</tr>
<tr>
<td>Stretch</td>
<td>65%</td>
<td>95%</td>
</tr>
<tr>
<td>Net stable funding ratio</td>
<td>75%</td>
<td>100%</td>
</tr>
<tr>
<td>Threshold</td>
<td>85%</td>
<td>110%</td>
</tr>
<tr>
<td>Target</td>
<td>95%</td>
<td>100%</td>
</tr>
<tr>
<td>Stretch</td>
<td>85%</td>
<td>110%</td>
</tr>
</tbody>
</table>

Stretch achievement levels for return on risk-weighted assets and return on equity are considered to be demanding:

- The group’s adjusted earnings for the year ended 31 March 2015 amounted to £339.5 million.
- In order to achieve the stretch achievement level for the return on risk-weighted assets metric, the group’s adjusted earnings for the year ended 31 March 2015 would have needed to be 28% larger at £434.5 million ceteris paribus.
- In order to achieve the stretch achievement level for the return on equity metric, the group’s adjusted earnings for the year ended 31 March 2015 would have needed to be 42% larger at £481 million ceteris paribus.

**Executive short-term incentive – non-financial metrics: achievement levels**

The committee believes that it is right to incentivise executive directors to attend to important matters on which the long-term performance of the company depends, but which cannot in any one performance period be directly linked to financial returns. The executive directors have a low level of fixed gross remuneration relative to their peers. Therefore, without a meaningful weighting and target score for non-financial metrics, the executives would not be rewarded in any significant way for activities which the committee and the board regard as essential to the reputation, risk profile, capability and overall long-term sustainability of the company. The committee considers that both the short- and long-term incentive schemes should properly reflect the board’s view of the proper balance of responsibilities for the executive directors.

The areas of focus, weightings and objectives for the non-financial metrics are assessed on a four-point scale (these are reviewed and set annually). These are as follows:

<table>
<thead>
<tr>
<th>Non-financial metrics</th>
<th>Weighting</th>
<th>0%</th>
<th>50%</th>
<th>100%</th>
<th>150%</th>
<th>200%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Culture and values</td>
<td>3.75%</td>
<td>0</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>Franchise development</td>
<td>3.75%</td>
<td>0</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>Governance and regulatory and shareholder relationships</td>
<td>3.75%</td>
<td>0</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
<tr>
<td>Employee relationship and developments</td>
<td>3.75%</td>
<td>0</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
</tbody>
</table>
The committee has set the following areas of focus in respect of the non-financial performance conditions:

- **Culture and values**
  - Management visible and proactive in demonstrating appropriate behaviour
  - Performance-driven, transparent and risk-conscious organisation
  - Delivering appropriate and sustainable products with high levels of service and responsiveness
  - Acting with integrity, supporting the community, developing people and maintaining good relations with key stakeholders
  - Continual monitoring of the culture of the group

- **Franchise development**
  - Quality of brand, development of client base, commitment to the community and progress in building the firm

- **Environmental and other sustainability issues**

- **Governance and regulatory and shareholder relationships**
  - Maintaining open and transparent relations with regulators
  - Regulators should have confidence that the firm is being properly governed and managed
  - Shareholders should have confidence that the firm is being properly managed

- **Employee relationship and development**
  - Succession and the development of the next generation
  - Diversity and black economic empowerment initiatives and results
  - Continued development of people – both on the job and extramurally.

The committee assesses achievement against objectives for the non-financial metrics on a four-point scale and score 0 (0%) and 4 (200%) only in exceptional circumstances, with the typical score range being 1 (50%), 2 (100%) or 3 (150%).

### Further details on the executive directors’ long-term incentive plan

The vesting of awards for the executive directors will be conditional on performance weighted as to financial and non-financial performance and measured against prescribed achievement levels.

The number of shares awarded will be decreased or increased by a performance multiplier comprising weightings and achievement scores within score ranges for the financial and non-financial metrics, as follows:

<table>
<thead>
<tr>
<th>Weighting</th>
<th>Score range</th>
<th>Achievement levels</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Financial metrics</strong></td>
<td>75%</td>
<td>0 – 150%</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Non-financial metrics</strong></td>
<td>25%</td>
<td>0 – 200%</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The number of shares which vest against both the financial and non-financial performance conditions depend on whether threshold (0%), target (100%) or stretch (150%) levels are achieved, with awards vesting on a linear basis between each level.

If the stretch achievement levels for both the financial and non-financial metrics are satisfied, the number of shares vesting will be increased to a maximum of 135% of the number of shares awarded at the time of grant.

### Executive long-term incentive – financial metrics: achievement levels

The achievement levels for each financial metric which determine threshold, target and stretch performance for the three-year performance period applicable to each annual award will be reviewed and set annually by the committee in advance of the award being made after a careful review of relevant economic and market conditions. The weightings for each of the financial metrics are expected to remain constant going forward.

Threshold, target and stretch achievement levels for the financial metrics currently are as follows:

<table>
<thead>
<tr>
<th>Weighting</th>
<th>Achievement levels</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Financial metrics</strong></td>
<td>75%</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>Growth in tangible net asset value(^1)</td>
<td>40%</td>
</tr>
<tr>
<td>Return on risk-weighted assets(^2)</td>
<td>35%</td>
</tr>
</tbody>
</table>

\(^1\) The growth in tangible net asset value is expressed per share based on neutral currency and after adding back dividends and will be measured over the three financial years preceding the first date of vesting.

\(^2\) Return on risk-weighted assets is defined as adjusted earnings/average risk-weighted assets, where adjusted earnings are earnings attributable to ordinary shareholders after taxation, non-controlling interests and preference dividends, but before goodwill, acquired intangibles and non-operating items, and will be measured over the three financial years preceding the first date of vesting by averaging the actual return on risk-weighted assets achieved for each of those three financial years.

The awards will be tested over the three financial years preceding the first date of vesting against the achievement levels set on grant and the number of shares to be received will be determined by reference to the combined total which has been achieved.
Executive long-term incentive – non-financial metrics: achievement levels

The non-financial metrics and associated objectives for the three-year performance period applicable to each annual award will be reviewed and set annually by the committee, in advance of the award being made, taking into account the group’s strategic and operational objectives.

The current non-financial metrics are as follows:

<table>
<thead>
<tr>
<th>Weighting</th>
<th>Achievement levels</th>
</tr>
</thead>
<tbody>
<tr>
<td>25%</td>
<td>0%</td>
</tr>
<tr>
<td>50%</td>
<td>100%</td>
</tr>
<tr>
<td>150%</td>
<td>200%</td>
</tr>
<tr>
<td>Non-financial metrics</td>
<td></td>
</tr>
<tr>
<td>Culture and values</td>
<td>4%</td>
</tr>
<tr>
<td>Franchise development</td>
<td>13%</td>
</tr>
<tr>
<td>Governance and regulatory and shareholder relationships</td>
<td>4%</td>
</tr>
<tr>
<td>Employee relationship and development</td>
<td>4%</td>
</tr>
</tbody>
</table>

The committee assesses achievement against objectives for the non-financial metrics on a four-point scale and score 0 (0%) and 4 (200%) only in exceptional circumstances with the typical score range being 1 (50%), 2 (100%) or 3 (150%).

Non-executive directors

The fee structure for non-executive directors for the 2015 and 2016 financial years is shown in the table below:

<table>
<thead>

Salary and benefits

- Gross remuneration comprises base salary, fixed allowance and other benefits.
- Gross remuneration of S Koseff and B Kantor (excluding the fixed allowance of £1 million) increased by 4.4% from £450 000 to £470 000. The gross remuneration for HJ du Toit largely remained the same as the prior year. The gross remuneration of GR Burger (excluding the fixed allowance of £1 million) is largely determined in Rands and converted into Pounds Sterling. In Rand terms GR Burger’s Rand-based gross remuneration increased by 6.0% from R4 000 000 in March 2014 to R4 240 000 in March 2015 and his Pound-based gross remuneration increased 2.9% from £84 000 to £86 500 in March 2015.
- The executive directors receive other benefits which may include pension schemes; life, disability and personal accident insurance; medical cover; and fixed allowances, on similar terms to other senior executives.
- As part of the restructuring of the remuneration arrangements last year to ensure compliance with the requirements of CRD IV, the CEO, MD and GRFD have received fixed allowances, payable in shares. The fixed allowance of £1 million each to S Koseff, B Kantor and GR Burger was awarded in the form of 203 418 forfeitable Investec plc shares to each of the directors which vested immediately on award. These shares are, however, subject to a retention period in terms of which 75% of the shares are subject to a retention period of four years and the remaining 25% of the shares are subject to a retention period of five years. The 203 418 Investec plc shares for each of the directors is included in their beneficial and non-beneficial interest holding on page 156.
- Retirement benefits: None of the directors belong to a defined benefit pension scheme and all are members of one of our defined contribution pension or provident schemes. The amounts reflected in the table above represent the contribution to these schemes payable by the company.

STI

- Notwithstanding that HJ du Toit is currently a director of Investec plc and Investec Limited, he does not perform Investec group-wide executive activities. Accordingly, HJ du Toit and any remuneration benefits due to him are subject to the remuneration policies, rules and regulations applicable to employees of IAM and not the remuneration policies, rules and regulations applicable to other entities within the Investec group. HJ du Toit is the founder and CEO of IAM and is not classified as PRA Code Staff by PRA regulations. As a result, his compensation arrangements are not affected by the cap on variable remuneration. The short-term incentive payable to the CEO of IAM is 1.85% of the earnings of IAM before variable compensation and tax. For the year ended 31 March 2015, a payment of £4.360 million was paid and was paid in cash shortly after the year end. There will be no deferral of the short-term incentive until such time as the debt taken out by the CEO of IAM to fund a substantial investment in IAM has been repaid. Further detail on this equity transaction is provided on page 175. IAM reported an increase in adjusted operating profit before tax and non-controlling interests of 3.6% to £149 million. Assets under management amounted to £77.5 billion, with £3.1 billion in net inflows.
- S Koseff, B Kantor and GR Burger are classified as PRA Code Staff.
- The annual bonus for the year ended 31 March 2015 for S Koseff, B Kantor and GR Burger was determined with reference to performance against financial and non-financial metrics as set out below and described in detail on pages 147 to 149.
- Further information on the short-term incentives is set out on pages 147 to 149 and as discussed on page 146 a portion of bonuses are paid in cash and a portion is deferred. The portion deferred is deferred in shares.

The determination of bonuses for the CEO, MD and GRFD are set out below:

- The short-term incentive pool available for the CEO, MD and GRFD for the year ended 31 March 2015 amounted to 1.3% of the group’s adjusted operating profit, defined as operating profit before taxation, goodwill, acquired intangibles and non-operating items and after non-controlling interests. If the target performance conditions are achieved, distribution of the pool will be as follows: 0.45% to the CEO, 0.45% to the MD and 0.40% to the GRFD.
- The pool is decreased or increased by a performance multiplier comprising weightings and achievement scores within score ranges for the financial and non-financial performance measures described in the table below. The maximum aggregate pool, if all financial and non-financial stretch levels are achieved, would be 180% of (adjusted operating profit x 1.3%), subject to the remuneration cap as approved by shareholders.
The determination of the bonus for S Koseff and B Kantor is shown below:

Adjusted operating profit at 31 March 2015 (£’000) 474 973
CEO/MD ‘incentive pool’ at 0.45% (£’000) 2 137
Maximum leverage at 180%, i.e. maximum potential bonus before application of the remuneration cap (£’000) 3 847

<table>

<td>107.8%</td>
<td>82%</td>
</tr>
<tr>
<td>Total</td>
<td>2 115</td>
<td>116.5%</td>
</tr>
</tbody>
</table>

The portion of the 2014 bonus ‘achieved’ for financial metrics amounted to £1 640 000 (£612 000 for return on risk-weighted assets; £194 000 for return on equity; £312 000 for tier 1 capital adequacy; £275 000 for the LCR; and £247 000 for the NSFR). The increase in the portion of the bonus for the 2015 financial year attributable to performance against financial metrics is thus largely a result of the improvement in return on risk-weighted assets, return on equity and the tier 1 capital adequacy ratio.

Non-financial metrics

Following an assessment of these metrics (as described on page 149) the remuneration committee decided to allocate an award of approximately £385 000 (2014: £330 000) for performance against non-financial metrics. A score of 2 (i.e. weighting of 100%) was awarded to the ‘culture and values’ and ‘governance and regulator and shareholder relationships’ categories and a score of 3 (i.e. weighting of 150%) was awarded to the ‘franchise development’ and ‘employee relationship and development’ categories. Further information is provided on the next page.

The determination of the bonus for GR Burger is shown below:

Adjusted operating profit at 31 March 2015 (£’000) 474 973
GRFD ‘incentive pool’ at 0.40% (£’000) 1 900
Maximum leverage at 180%, i.e. maximum potential bonus before application of the remuneration cap (£’000) 3 420

<td>116.5%</td>
</tr>
</tbody>
</table>

The portion of the 2014 bonus ‘achieved’ for financial metrics amounted to £1 475 000 (£550 000 for return on risk-weighted assets; £174 000 for return on equity; £281 000 for tier 1 capital adequacy; £248 000 for the LCR; and £222 000 for the NSFR). The increase in the portion of the bonus for the 2015 financial year attributable to performance against financial metrics is thus largely a result of the improvement in return on risk-weighted assets, return on equity and the tier 1 capital adequacy ratio.

Non-financial metrics

Following an assessment of these metrics (as described on page 149) the remuneration committee decided to allocate an award of approximately £370 000 (2014: £295 000) for performance against non-financial metrics. A score of 2 (i.e. weighting of 100%) was awarded to the ‘culture and values’ and ‘governance and regulator and shareholder relationships’ categories and a score of 3 (i.e. weighting of 150%) was awarded to the ‘franchise development’ and ‘employee relationship and development’ categories.

<tbody>
<tr>
<td><strong>Culture and values:</strong></td>
<td></td>
</tr>
<tr>
<td>• Management visible and proactive in demonstrating appropriate behaviour</td>
<td>• The executive continued to actively engage with employees through, for example, management hosted breakfasts, management panels, induction presentations – facilitating discussions on a number of aspects, including culture and values</td>
</tr>
<tr>
<td>• Performance-driven, transparent and risk-conscious organisation</td>
<td>• The executive hosted a risk appetite forum in which a number of case studies were presented on various aspects of risk. The purpose of these case studies was to foster debate on our risk culture and lessons learnt over the past few years</td>
</tr>
<tr>
<td>• Delivering appropriate and sustainable products with high levels of service and responsiveness</td>
<td>• Our HR and Organisational Development divisions continued to actively work with the executive and our management teams to ensure our values are lived and entrenched into our day-to-day activities</td>
</tr>
<tr>
<td>• Acting with integrity, supporting the community, developing people and maintaining good relations with key stakeholders</td>
<td></td>
</tr>
<tr>
<td>• Continual monitoring of the culture of the group</td>
<td></td>
</tr>
<tr>
<td><strong>Governance and regulatory and shareholder relationships:</strong></td>
<td></td>
</tr>
<tr>
<td>• Maintaining open and transparent relations with regulators</td>
<td>• The chairman and senior independent non-executive director (SID) attended a number of meetings with shareholders during the course of the year. These meetings facilitated debate and feedback between the board and shareholders.</td>
</tr>
<tr>
<td>• Regulators should have confidence that the firm is being properly governed and managed</td>
<td>A number of topics were discussed, including executive remuneration arrangements, board refreshment, succession planning and overall group strategy. The chairman and the SID received feedback from shareholders that they were generally pleased with the execution of the group’s strategy by the executive and the board</td>
</tr>
<tr>
<td>• Shareholders should have confidence that the firm is being properly managed</td>
<td></td>
</tr>
<tr>
<td><strong>Franchise development:</strong></td>
<td></td>
</tr>
<tr>
<td>• Quality of brand, development of client base, commitment to the community and progress in building the firm</td>
<td>• The past year focused largely on the execution of our planned strategy; we are pleased that the results reflect the positive strategic progress made. The reshaping of the Specialist Bank was completed with the sale of the UK Kensington business, the Start (Irish) mortgage business and part of the Australian business. Further, significant effort was focused on accelerating the run down of the legacy portfolio in the UK</td>
</tr>
<tr>
<td>• Environmental and other sustainability issues</td>
<td>• All of these were executed while we continued to grow the core franchises of the Specialist Bank as well as invest in the growth of our Asset Management and Wealth &amp; Investment businesses</td>
</tr>
<tr>
<td></td>
<td>• Investec maintained its inclusion in a number of international sustainability indices</td>
</tr>
<tr>
<td></td>
<td>• Our core values include unselfishly contributing to society. During the year we spent £5.4 million on social investment initiatives (2014: £5.1 million)</td>
</tr>
<tr>
<td></td>
<td>• Our South African Promaths initiative received the Mail &amp; Guardian’s 2014 Investing in the Future Award</td>
</tr>
<tr>
<td></td>
<td>• Investec won the Business Charity Award for Community Impact in the UK for our partnership with the Bromley by Bow Beyond Business incubator</td>
</tr>
<tr>
<td></td>
<td>• Investec Gresham Street (UK) was a runner-up in the 2014 Clean City Awards Scheme</td>
</tr>
<tr>
<td></td>
<td>• The Gresham Street (UK) office was awarded ISO 14001 certification and the Energy Reduction Verification (ERV) Kitemark</td>
</tr>
<tr>
<td></td>
<td>• Investec was one of the first UK City businesses to sign up to the Air Quality Pledge</td>
</tr>
<tr>
<td></td>
<td>• We committed £1.1 billion to renewable energy. Investec, in partnership with Vuselesa Energy, launched a first of its kind co-generation power plant in South Africa, Eternity Power</td>
</tr>

</table>

**Long-term incentive awards**

- No long-term incentive awards have been granted during the 2015 financial year nor have any LTIPs vested for S Koseff, B Kantor or GR Burger
- LTIPs for HJ du Toit have vested in 2015 and 2014. The values provided in the tables above represent the number of shares that vested multiplied by the market price of the shares at the date on which they vested. Further information is provided on page 157.

The table above reflects holdings of shares by current directors.

The number of shares in issue and share prices for Investec plc and Investec Limited over the period is provided on page 159.

The beneficial and non-beneficial holdings of S Koseff, B Kantor and GR Burger, include 203 418 Investec plc shares which relate to the award to each of the directors of shares in respect of a £1 million fixed allowance on 8 August 2014 (as explained on page 151). The shares are subject to a retention period of four years in respect of 75% of the shares and the remaining 25% of the shares are subject to a retention period of five years.

There are no requirements for directors to hold shares in the group.

The group has made awards in respect of nil cost options in the capital of Investec plc for nil consideration pursuant to the Long-Term Incentive Plan (LTIP). The awards are in accordance with the determination of the remuneration committee and with the rules of the LTIP. These awards were made prior to Hendrik du Toit becoming an executive director. Hendrik du Toit exercised his options and sold 62 500 Investec plc shares on 25 June 2014 at an average share price of £5.23 per share. Hendrik du Toit exercised his options and sold a further 162 500 Investec plc shares on 1 July 2014 at an average share price of £5.26 per share, 100 000 Investec plc shares on 1 August 2014 at an average price of £5.04 per share, and 300 000 Investec plc shares on 26 August 2014 at an average price of £5.45 per share. There were no performance conditions attached to these awards.

None of the outstanding awards at 31 March 2015 have vested.

The Executive Incentive Plan and the awards made on 16 September 2013 were approved at the July 2013 annual general meeting in terms of which 600 000 nil cost options each were awarded to S Koseff, B Kantor and GR Burger.

The performance criteria in respect of these awards are detailed on pages 149 and 150. None of these awards have as yet vested. The face value at grant for these awards, assuming ‘at target’ performance (as described on pages 149 and 150) amounts to £2 652 000 based on an actual share price for Investec plc of £4.42 on 16 September 2013 (date of grant), and 600 000 awards vesting.
The number of shares in issue and share prices for Investec plc and Investec Limited over the period are provided below.

---

1. The limits for allocations to employees and executive management during a financial year may be exceeded if the directors determine that exceptional circumstances make it desirable that options should be granted in excess of that limit.
2. This represents the number of awards made to all participants. For further details, see page 49 in volume three. More details on the directors’ shareholdings are also provided in tables accompanying this report.
3. Dilution limits: Investec is committed to following the Investment Association principles of remuneration: 2014 edition (formerly ABI remuneration principles) and accordingly, as from the date of the implementation of our DLC structure (29 July 2002), the maximum number of new shares which may be issued by the company under all of the share plans (in respect of grants made after July 2002) may not exceed 10% of the issued share capital of the company over a rolling 10-year period. We have, since our listing date, complied with both the 10% in 10 years guideline for discretionary and non-discretionary awards in aggregate as well as the 5% in 10 years guideline for discretionary awards. The committee regularly monitors the utilisation of dilution limits and available headroom to ensure that these guidelines are complied with. The issued share capital of Investec plc and Investec Limited at 31 March 2015 was 613.6 million shares and 285.7 million shares, respectively.
4. The market price of an Investec plc share at 31 March 2015 was £5.61 (2014: £4.85), ranging from a low of £4.91 to a high of £6.06 during the financial year.
5. The market price of an Investec Limited share at 31 March 2015 was R100.51 (2014: R84.84), ranging from a low of R86.02 to a high of R107.35 during the financial year.
6. The rules of these long-term incentive plans do not allow awards to be made to executive directors. The table above excludes details of the Investec plc executive incentive plan 2013 on page 158.
Directors’ remuneration – alignment of interests with shareholders (unaudited)

Performance graph: total shareholder return

We recognise that remuneration is an area of particular interest to shareholders and that in setting and considering changes to remuneration it is important that we take their views into account. Accordingly, a series of meetings are held each year with our major shareholders and shareholder representative groups. The remuneration committee chairman attends these meetings, accompanied by senior Investec employees and the group chairman. This engagement is meaningful and helpful to the committee in its work and contributes directly to the decisions made by the committee.

We have implemented a DLC structure, in terms of which we have primary listings in London and Johannesburg. The listing on the London Stock Exchange (LSE) took place on 29 July 2002. We have been listed in South Africa since 1986.

Schedule 8 of the UK Large and Medium-sized Companies and Groups (Accounts and Report) Regulations 2008 (as amended) requires this report to include a performance graph of Investec plc’s total shareholder return (TSR) performance against that of a broad market index. A number of companies within the FTSE 350 General Finance Index conduct similar activities to us, although they do not necessarily have the same geographical profile. Nevertheless, to date this has been the most appropriate index against which to measure our performance on the LSE. Although we are not currently included in the FTSE 100, we were part of that index between 2010 and 2011 and we have included the total shareholder return of that index for illustrative purposes.

The graph below shows the cumulative shareholder return for a holding of our shares (in blue) in Pounds Sterling on the LSE, compared with the average total shareholder return of other members of the FTSE 350 General Finance Index and the FTSE 100 Index. It shows that, at 31 March 2015, a hypothetical £100 invested in Investec plc at 31 March 2009 would have generated a total return of £141 compared with a return of £244 if invested in the FTSE 350 General Finance Index and a return of £114 if invested in the FTSE 100 Index. Investec plc has therefore underperformed the FTSE 350 General Finance Index over the period.

During the period from 1 April 2014 to 31 March 2015, the return to shareholders of Investec plc (measured in Pounds Sterling) and Investec Limited (measured in Rands) was 19.7% and 22.5%, respectively. This compares to a 20.9% return for the FTSE 350 General Finance Index, a return of 5.5% for the FTSE 100 Index and a return of 10.0% for the JSE Top 40 Index.

The market price of our shares on the LSE was £5.61 at 31 March 2015, ranging from a low of £4.91 to a high of £6.06 during the financial year. The market price of our shares on the JSE Limited was R100.51 at 31 March 2015, ranging from a low of R86.02 to a high of R107.35 during the financial year.

Additional remuneration disclosures (unaudited)

South African Companies Act, 2008 disclosures

Subsequent to regulatory developments in South Africa, Investec Limited is required to disclose the remuneration of those individuals that are defined by the South African Companies Act, No 71 of 2008 (as amended), read together with the Companies Regulations 2011 (together the Act), as prescribed officers.

In keeping with the group’s integrated global management structure as well as the three distinct business activities of the group, i.e. Asset Management, Wealth & Investment and Specialist Banking, the prescribed officers for Investec Limited, as per the Act, are the following global heads of the group’s three distinct business activities:

- Asset Management
  - Hendrik du Toit
- Wealth & Investment
  - Steve Elliott
- Specialist Banking
  - Stephen Koseff
  - Bernard Kantor
  - Glynn Burger

Hendrik du Toit, Stephen Koseff, Bernard Kantor and Glynn Burger are also the four executive directors of Investec Limited and their remuneration is disclosed on page 151.

Steve Elliott is remunerated by Investec Wealth & Investment Limited (a UK domiciled company and subsidiary of Investec plc) and is not required to disclose his remuneration under the South African Companies Act.

Directors’ remuneration policy for the year ending 31 March 2016 and subsequent years

This directors’ remuneration policy will be put to a binding shareholder vote at the annual general meeting in August 2015 and, subject to approval, will be effective from that date. It is anticipated that it will remain in force until the 2018 annual general meeting unless regulatory changes or the business or economic environment necessitate earlier amendment.

Scope of our remuneration policy

The Investec group aims to apply remuneration policies to executive directors and employees that are largely consistent across the group, but recognises that certain parts of the group are governed by local regulations that may contain more onerous requirements in certain respects.

In those cases, the higher requirements are applied to that part of the group. This is relevant to Investec plc and its subsidiary companies that are subject to the PRA Remuneration Code (as a level 2 organisation as defined therein), and in particular in relation to PRA Code Staff. Additionally, where any aspect of our remuneration policy contravenes local laws or regulations, the local laws or regulations shall prevail.

The following Investec plc group entities are separately regulated by the PRA and/or FCA and as such maintain their own remuneration policies separate from the Investec group policy and in line with such entity’s own risk profile and business activities:

- Investec Asset Management Limited
- Investec Wealth & Investment Limited
- Investec Bank plc
- Hargreave Hale Limited.

Under the PRA Remuneration Code, Investec Bank plc is the only group entity which is classified as being level 2. It should be noted that our Asset Management and Wealth Management businesses have been classified as level 3 entities under the proportionality rules of the PRA Remuneration Code.

More details of the remuneration policies applying in each of our subsidiary companies can be found on pages 170 to 176.

Remuneration philosophy

Our philosophy, which remains unchanged from prior years, is to employ the highest calibre individuals who are characterised by integrity, intellect and innovation and who adhere and subscribe to our culture, values and philosophies. We strive to inspire entrepreneurship by providing a working environment that stimulates extraordinary performance so that executive directors and employees may be positive contributors to our clients, their communities and the group.

Remuneration principles

Remuneration policies, procedures and practices, collectively referred to as the ‘remuneration policy’, are designed, in normal market conditions, to:

- Be in line with the business strategy, objectives, values and long-term interests of the Investec group
- Be consistent with and promote sound and effective risk management, and not encourage risk taking that exceeds the level of tolerated risk of the Investec group
- Ensure that payment of variable remuneration does not limit the Investec group’s ability to maintain or strengthen its capital base
- Target gross fixed remuneration (base salary and benefits including pension) at median market levels to contain fixed costs
- Ensure that variable remuneration is largely economic value added (EVA) – based and underpinned by our predetermined risk appetite and capital allocation
- Facilitate alignment with shareholders through deferral of a portion of short-term incentives into shares and long-term incentive share awards
- Target total compensation (base salary, benefits and incentives) to the relevant competitive market at upper quartile levels for superior performance.

Given our stance on maintaining a low fixed cost component of remuneration, our commitment to inspiring an entrepreneurial culture, and our risk-adjusted return on capital approach to EVA, we do not apply an upper limit on variable rewards other than in respect of PRA Code Staff (as discussed on page 163).

We reward employees generally for their contribution through:

- An annual gross remuneration package (base salary and benefits) providing an industry competitive package
- A variable short-term incentive related to performance (annual bonus)
A long-term incentive plan (share awards) providing long-term equity participation

Certain of our PRA Code Staff receive fixed monthly cash allowances and a commensurate reduction of variable short-term incentive in order to comply with the two times cap in terms of CRD IV.

Benchmarks
The short-term incentive allocated to the CEO and pool (for the year ended 31 March 2015) was arrived at after extensive benchmarking over a five-year period against short-term incentives of: (i) chief executive officers, and (ii) groups of executive directors for a bespoke peer group (and sub-groups of South African and non-South African peers) comprising: Aberdeen Asset Management, Barclays Africa Group, Alliance Bernstein, Close Brothers Group, FirstRand, Invesco, Jefferies, Julius Baer, Macquarie Group, Man Group, Nedbank Group, Rathbone Brothers, Schroders, Standard Bank Group and Tullett Prebon.

The levels of CEO profit share and the pool are more compatible with international reward levels than South African reward levels. The committee believes this is appropriate, given the complexity of Investec and the challenges involved in managing a group operating across three businesses in two core geographies. The pool is decreased or increased by a performance multiplier comprising weightings and achievement scores within score ranges for the financial and non-financial performance measures (as discussed on pages 147 to 149).

The short-term incentive pool and target award levels have been reduced for the year ending 31 March 2016 and subsequent years, due to the reintroduction of the long-term incentive (refer to page 146). The total maximum pool, if all financial and non-financial stretch levels are achieved, would be 180% of (adjusted operating profit x 0.66%)

Impact of CRD IV on executive directors’ remuneration arrangements
CRD IV is EU regulation that has been effective from 1 January 2014. The main feature of CRD IV that impacts directors’ remuneration at Investec is the application of a cap on variable remuneration that can be awarded to PRA Code Staff (including executive directors). At the 2014 annual general meeting, shareholders approved a maximum variable remuneration: fixed remuneration ratio of 2:1, which applied to variable remuneration awarded in respect of the 2015 performance year.

For the CEO, MD and GRFD, changes were made to our remuneration arrangements for the 2015 financial year to ensure compliance with CRD IV, including the introduction of a fixed allowance payable in shares. The fixed allowance had been intended to replace our long-term incentive for the affected directors but, in response to the concerns expressed by shareholders at and following the 2014 annual general meeting, we have decided to reintroduce an element of long-term incentive and make other changes to the structure of the directors’ remuneration packages, as set out below in the remuneration policy table.

Remuneration of the CEO of IAM

Notwithstanding that Hendrik du Toit is currently a director of Investec plc and Investec Limited, he does not perform Investec group-wide executive duties.

Accordingly, Hendrik du Toit and any remuneration benefits due to him are subject to the remuneration policies, rules and regulations applicable to employees of IAM and not the remuneration policies, rules and regulations applicable to other entities within the Investec group. Consequently, the structure and quantum of his remuneration differs in many respects from that of the other executive directors. For example, in line with practice in asset management businesses, his short-term incentive is uncapped and no deferral applies.

Hendrik du Toit’s remuneration arrangements are not impacted by CRD IV as IAM is not subject to these requirements, and accordingly Hendrik du Toit is not defined as PRA Code Staff. He is entitled to an annual bonus as determined with respect to the performance of IAM only. Hendrik is the founder of IAM and is entitled to 1.85% of the earnings of IAM before tax and variable remuneration. Hendrik du Toit will no longer receive long-term incentive awards as he is a participant in the IAM equity ownership scheme (as explained on page 175).
## Executive directors’ remuneration policy table

The table below summarises the remuneration policy for executive directors for the year ending 31 March 2016 and subsequent years.

<table>
<thead>
<tr>
<th>Purpose and link to strategy</th>

Notes to the table above:

1 Peer group companies include Aberdeen Asset Management, Barclays Africa Group, Alliance Bernstein, Close Brothers Group, FirstRand, Invesco, Jefferies, Julius Baer, Macquarie Group, Man Group, Nedbank Group, Rathbone Brothers, Schroders, Standard Bank Group and Tullet Prebon.

2 AOP defined as operating profit before taxation, goodwill, acquired intangibles and non-operating items and after non-controlling interests.

3 Notwithstanding that Hendrik du Toit is currently a director of Investec plc and Investec Limited, he does not perform Investec group-wide executive activities. Accordingly, Hendrik du Toit and any remuneration benefits due to him are subject to the remuneration policies, rules and regulations applicable to employees of IAM and not the remuneration policies, rules and regulations applicable to other entities within the Investec group. Hendrik du Toit is not defined as PRA Code Staff and is entitled to an annual bonus as determined with respect to the performance of IAM only as explained in the table above.

4 Hendrik du Toit will no longer receive long-term incentive awards as he is a participant in the IAM equity ownership scheme as explained on page 175.

5 Cap defined in line with EBA discounting rules which allow, when 25% of variable remuneration is deferred over at least five years, a slightly higher cap than 2x fixed remuneration (typically approximately 2.2x fixed remuneration dependent on interest rates and inflation). These limits will be in line with this EBA cap.
How will executive directors’ performances be assessed?

The short-term and long-term incentives are subject to performance conditions. A detailed explanation of these performance measures is provided on page 147 to 149. The performance measures have been selected taking into account:

- Key stakeholders’ requirements (including shareholders and regulators) which were assessed through extensive consultations on the matter
- The preference of the committee and the board is for a range of financial metrics that ensure an appropriate balance between measures which drive profitability and prudential measures. In addition, the remuneration committee believes that it is right to include non-financial measures in determining levels of awards as directors should be incentivised to attend to important matters on which the long-term performance of the company depends, but which cannot in any one performance period be directly linked to financial returns.

Differences between the remuneration policy of the executive directors and the policy for all employees

We apply consistent remuneration principles and philosophies across the whole employee population and are cognisant of these when considering executive directors’ remuneration. The quantum of salary and benefits paid to executive directors is benchmarked against appropriate comparator groups (as discussed on page 163), however, the annual increase in such remuneration is referenced to the average increase awarded to employees in South Africa and the UK, respectively. Although this has not been the case of late, the remuneration committee may, under certain circumstances, make adjustments outside these parameters, particularly in cases where there have been large adjustments in the comparator group referenced.

As is the case with other employees, the short-term incentive is performance based, however, there are a number of specific performance criteria that apply in the case of determining the annual bonus for the CEO, MD and GRFD (as set out below). The annual bonus for Hendrik du Toit (CEO of IAM and executive director of the Investec group) is referenced to the performance of IAM only. Short-term incentives for executive directors and the employees, defined as PRA Code Staff, are subject to deferral, malus and clawback requirements. The requirements of CRD IV are only applicable to the CEO, MD and GRFD and to some employees in the UK Specialist Bank who are classified as PRA Code Staff. More details of the approach to employee remuneration can be found on pages 170 to 177.

Policy for the recruitment of new executive directors

It is intended that the approach to the recruitment of new executive directors will be in line with the current remuneration policy for executive directors as outlined above and below. However, the remuneration committee will consider levels of remuneration for new recruits that are competitive for the skills and experience of the individual being recruited. For individuals covered by the bonus cap under CRD IV, the treatment of each element of remuneration on recruitment will be as set out below.

<table>
<thead>
<tr>
<th>Element</th>
<th>Commentary</th>
<th>Maximum value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Salary</td>
<td>• Determined by market conditions, market practice and ability to recruit</td>
<td>In line with policy</td>
</tr>
<tr>
<td></td>
<td>• If salary below market level on recruitment or promotion, remuneration committee may realign salary over transitional period with higher than normal increases</td>
<td></td>
</tr>
<tr>
<td>Fixed allowance</td>
<td>Determined by similar factors to salary</td>
<td>Currently £1 million</td>
</tr>
<tr>
<td>Pension</td>
<td>In line with normal policy</td>
<td>15% of salary</td>
</tr>
<tr>
<td>Other benefits</td>
<td>Offered in line with normal policy</td>
<td>In line with policy</td>
</tr>
<tr>
<td>STI</td>
<td>In line with normal policy</td>
<td>100%* of fixed remuneration</td>
</tr>
<tr>
<td>LTIP</td>
<td>In line with normal policy</td>
<td>100%* of fixed remuneration</td>
</tr>
<tr>
<td>Buy-outs</td>
<td>• The remuneration committee can buy out bonus opportunity or incentive awards that the new executive director has forfeited as a result of accepting the appointment, subject to proof of forfeiture where applicable</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• As required by the PRA Remuneration Code, any award made to compensate for forfeited remuneration should be broadly no more generous than, and should aim to mirror the value timing, and form of delivery of the forfeited remuneration</td>
<td></td>
</tr>
</tbody>
</table>

* Cap defined in line with EBA discounting rules which allow, when 25% of variable remuneration is deferred over at least five years, a slightly higher cap than 2x fixed remuneration (typically approximately 2.2x fixed remuneration dependent on interest rates and inflation). These limits will be in line with this EBA cap.

If the new joiner is not affected by the bonus cap then the remuneration committee may construct a package as set out above, but then may allocate the amount of the fixed allowance into STI or LTI award opportunities as appropriate given market factors and other relevant comparator trends.
Service contracts and terms of employment

The terms of service contracts and provision for compensation for loss of office for the four executive directors is set out below.

<table>
<thead>
<tr>
<th>CEO, MD and GRFD</th>

<td>n/a</td>
</tr>
<tr>
<td>In the event of a takeover or major corporate event, the remuneration committee has the discretion to determine whether all outstanding awards vest at the time of the event or whether they continue in the same or revised form</td>
<td>n/a</td>
</tr>
<tr>
<td>There is no formal shareholding requirement</td>
<td>There is no formal shareholding requirement</td>
</tr>
</tbody>
</table>

Executive directors are permitted to accept outside appointments on external boards or committees provided these are not deemed to interfere with the business of the company. Any fees earned by executives in this regard are forfeited to Investec.

Copies of the service contracts are available for inspection at the company’s registered office.

How does executive directors’ remuneration change based on performance?

Illustrative scenarios for executive directors’ remuneration

The charts on page 169 show the potential value of the executive directors’ remuneration arrangements under this policy in three performance scenarios:

- ‘Minimum’ – fixed remuneration only
- ‘At target’ – fixed remuneration and the ‘at target’ variable short-term annual incentive and ‘at target’ vesting of any long-term incentives that may be awarded
- ‘At stretch’ – fixed remuneration and the ‘stretch’ achievement levels that may be awarded for variable short-term annual incentive and ‘stretch’ vesting of any long-term incentives that may be awarded.

The scenarios do not reflect share price movement between award and potential vesting, nor are any dividends or dividend equivalents taken into account.

For the CEO, MD and GRFD based on the remuneration policy proposed for the year ending 31 March 2016:

- Fixed remuneration includes salaries, company pension contributions and benefits receivable (i.e. as proposed for the year ending 31 March 2016), and a fixed allowance of £1 million
- Target variable short-term incentive is 0.23% (CEO and MD) and 0.20% for the GRFD of adjusted operating profit based on £475 million as reported for the financial year ended 31 March 2015 and maximum variable short-term incentive is 180% of target (subject to an overriding maximum in terms of the remuneration cap as approved by shareholders)

For the CEO of IAM:

- Fixed remuneration includes the latest known salary, company pension contributions and the benefits receivable during the year ended 31 March 2015
- Variable short-term incentive is 1.85% of pre-tax and pre-compensation earnings of IAM, determined on a discretionary and uncapped basis
- Hendrik du Toit will no longer receive long-term incentive awards as he is a participant in the IAM equity ownership scheme
- Forecasted information cannot be provided to determine a stretch or target amount for future years and thus the graph on the next page merely depicts amounts paid in the current and prior financial year.

Remuneration policy for non-executive directors

The board’s policy is that fees should reflect individual responsibilities and membership of board committees. The increase in non-executive directors’ fees for the forthcoming year reflects current market conditions (with the focus on controlling fixed remuneration) and additional time commitment required. Their fee structure covers the dual roles that the directors perform for the UK-listed Investec plc and the South African listed Investec Limited boards and are awarded equally between the two companies.

### Purpose and link to strategy

<table>
<thead>
<tr>
<th>Operation</th>
<th>Maximum value and performance targets</th>
<th>Changes from prior year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-executive directors’ remuneration</td>
<td>Fees</td>
<td></td>
</tr>
<tr>

<td>Fees of non-executive directors are reviewed annually by the board taking into account market data and time commitment</td>
<td>Fee increases will generally be in line with inflation and market rates</td>
</tr>
<tr>
<td></td>
<td>The fee structure covers the dual roles that the directors perform for the UK-listed Investec plc and the South African-listed Investec Limited boards</td>
<td>Aggregate fees are subject to an overall maximum of £1 million under the Investec plc Articles</td>
</tr>
<tr>
<td></td>
<td>In addition to fees for board membership, fees are payable to the senior independent director, chairmanship and membership of major DLC board committees, membership of the Investec Bank Limited board and for attendance at certain committee meetings</td>
<td>Refer to page 150 for further information</td>
</tr>
</tbody>
</table>

Fees are also payable for any additional time committed to the group, including attendance at certain other meetings.

There is no requirement for non-executive directors to hold shares in a group company. The group has left this choice to the discretion of each non-executive director.

The policy as described above will be taken into account in the recruitment of new non-executive directors.

Copies of the letters of appointment are available for inspection at the company’s registered office.

### Shareholder and employee views

**Shareholder views in the consideration of executive directors’ remuneration arrangements**

We recognise that remuneration is an area of particular interest to shareholders and shareholder representative bodies, and that in setting and considering changes to remuneration it is important that we take their views into account. Accordingly, a series of meetings are held each year with our major shareholders and shareholder representative groups. The remuneration committee chairman attends these meetings, accompanied by senior Investec employees and the chairman. This engagement is meaningful and helpful to the committee in its work and contributes directly to the decisions made by the committee.

Following the significant vote against our directors’ remuneration policy at the 2014 annual general meeting, we have consulted with shareholders to understand the areas in which they had concerns. We have endeavoured to address those concerns by making changes to our directors’ remuneration policy as explained above. The remuneration committee and the board believe in effective and transparent communication with key stakeholders, and will continue to engage on matters that may arise and are of importance and/or concern to stakeholders.

**Statement of consideration of employment conditions elsewhere in the group**

The remuneration policy of executive directors has been drawn up in line with our group-wide remuneration philosophy and principles (refer below), subject to the requirements of CRD IV. The committee is mindful of the remuneration arrangements across the group.

**Additional remuneration disclosures (unaudited)**

**Remuneration policy and principles for employees**

Our policy with respect to the remuneration of employees has remained unchanged during the year ending 31 March 2015. Minor changes were made to incorporate the impact of CRD IV (as discussed on page 163). Investec currently has 47 PRA Code Staff, of which approximately three-quarters are impacted by the two times cap on variable remuneration and for whom a fixed monthly cash allowance has been introduced.

All remuneration payable (salary, benefits and incentives) is assessed at a group, business unit and individual level. This framework seeks to balance both financial and non-financial measures of performance to ensure that the appropriate factors are considered prior to making awards, and that the appropriate mix of cash and share-based awards are made.

We reward employees generally for their contribution through:

- An annual gross remuneration package (base salary and benefits) providing an industry competitive package
- A variable short-term incentive related to performance (annual bonus)
Remuneration report (continued)

- A long-term incentive plan (share awards) providing long-term equity participation
- Certain of our PRA Code Staff receive fixed monthly cash allowances and a commensurate reduction of variable short-term incentive in order to comply with the two times cap.

We consider the aggregate of the above as the overall remuneration package designed to attract, retain, incentivise and drive the behaviour of our employees over the short, medium and longer term in a risk conscious manner. Overall, rewards are considered as important as our core values of work content (greater responsibility, variety of work and high level of challenge) and work affiliation (entrepreneurial feel to the company and unique culture) in the attraction, retention and motivation of employees.

We have a strong entrepreneurial, merit- and values-based culture, characterised by passion, energy and stamina. The ability to live and perpetuate our culture and values in the pursuit of excellence in a regulated industry and within an effective risk management environment is considered paramount in determining overall reward levels.

The type of people the organisation attracts, and the culture and environment within which they work, remain crucial in determining our success and long-term progress. Our reward programmes are clear and transparent, designed and administered to align directors’ and employees’ interests with those of all stakeholders and ensure the group’s short-, medium- and long-term success.

We target total compensation (base salary, benefits and incentives) to the relevant competitive market at upper quartile levels for superior performance.

Given our stance on maintaining a low fixed cost component of remuneration, our commitment to inspiring an entrepreneurial culture, and our risk-adjusted return on capital approach to EVA, we do not apply an upper limit on variable rewards other than in respect of PRA Code Staff (as discussed on page 163).

The fixed cost component of remuneration is, however, designed to be sufficient so that employees do not become dependent on their variable compensation as we are not contractually (and do not consider ourselves morally) bound to make variable remuneration awards. Investec has the ability to pay no annual bonuses and make no long-term incentive awards should the performance of the group or individual employees require this.

We do not pay remuneration through vehicles that facilitate avoidance of applicable laws and regulations.

Furthermore, employees must undertake not to use any personal hedging strategies or remuneration or liability-related contracts of insurance to undermine the risk alignment effects embedded in their remuneration arrangements. Group compliance maintains arrangements designed to ensure that employees comply with this policy.

No individual is involved in the determination of his/her own remuneration rewards and specific internal controls and processes are in place to prevent conflicts of interest between Investec and its clients from occurring and posing a risk to the group on prudential grounds.

In summary, we recognise that financial institutions have to distribute the return from their enterprises between the suppliers of capital and labour and the societies in which they do business, the latter through taxation and corporate social responsibility activities. Our group-wide remuneration philosophy seeks to maintain an appropriate balance between the interests of these stakeholders, and is closely aligned to our culture and values which include risk consciousness, meritocracy, material employee ownership and an unselfish contribution to colleagues, clients and society.

**Determination of remuneration levels**

Qualitative and quantitative considerations form an integral part of the determination of overall levels of remuneration and total compensation for each individual.

Factors considered for overall levels of remuneration at the level of the group include:

- Financial measures of performance:
  - Risk-adjusted EVA model
  - Affordability
- Non-financial measures of performance:
  - Market context
  - Specific input from the group risk and compliance functions.

Factors considered to determine total compensation for each individual include:

- Financial measures of performance
  - Achievement of individual targets and objectives
  - Scope of responsibility and individual contributions
- Non-financial measures of performance
  - Alignment and adherence to our culture and values
  - The level of cooperation and collaboration fostered
  - Development of self and others
  - Attitude displayed towards risk consciousness and effective risk management
  - Adherence to internal controls procedures
  - Compliance with the group’s regulatory requirements and relevant policies and procedures, including treating customers fairly
  - The ability to grow and develop markets and client relationships
  - Multi-year contribution to performance and brand building
  - Long-term sustained performance
  - Specific input from the group risk and compliance functions
  - Attitude and contribution to sustainability principles and initiatives.

Remuneration levels are targeted to be commercially competitive, on the following basis:

- The most relevant competitive reference points for remuneration levels are based on the scope of responsibility and individual contributions made
- The committee recognises that we operate an international business and compete with both local and international competitors in each of our markets
- Appropriate benchmark, industry and comparable organisations’ remuneration practices are reviewed regularly
- For employees generally, combinations of firms from the JSE Financial 15 and the FTSE 350 General Finance sector have offered the most appropriate benchmarks
Variable short-term incentive: annual bonus

All employees are eligible to be considered for a discretionary annual bonus, subject inter alia to the factors set out above in the section dealing with the determination of remuneration levels. The structure of short-term incentives varies between employees of our three operating divisions: Asset Management, Wealth & Investment and the Specialist Bank. This reflects differing regulatory requirements on the different legal entities and also differing competitive pressures in each distinct market.

Specialist Banking: variable short-term incentive

Risk-weighted returns form basis for variable remuneration levels

In our ordinary course of business we face a number of risks that could affect our business operations, as highlighted on page 34.

Group risk management is independent from the business units and monitors, manages and reports on the group’s risk to ensure it is within the stated risk appetite as mandated by the board of directors through the board risk and capital committee (BRCC). The group monitors and controls risk exposure through credit, market, liquidity, operational and legal risk divisions/forums/committees.

Risk consciousness and management is embedded in the organisational culture from the initiation of transactional activity through to the monitoring of adherence to mandates and limits and throughout everything we do.

The BRCC (comprising both executive and non-executive directors) meets six times per annum and sets the overall risk appetite for the Investec group and determines the categories of risk, the specific types of risks and the extent of such risks which the group should undertake, as well as the mitigation of risks and overall capital management and allocation process. Senior members of the group’s risk management teams, who provide information for the meeting packs and present and contribute to the committee’s discussions, attend these meetings.

The DLC capital committee is a sub-committee of the BRCC and provides detailed input into the group’s identification, quantification and measurement of its capital requirements, taking into account the capital requirements of the banking regulators. It determines the amount of internal capital that the group should hold and its minimum liquidity requirements, taking into account all the associated risks plus a buffer for any future or unidentified risks. This measure of internal capital forms part of the basis for determining the variable remuneration pools of the various operating business units (as discussed above).

The executive risk review forum (ERRF), comprising members of the executive and the heads of the various risk functions, meets weekly. Its responsibilities include approving limits and mandates, ensuring these are adhered to and that agreed recommendations to mitigate risk are implemented.

The group’s central credit and risk forums provide transaction approval independent of the business unit on a deal-by-deal basis, and the riskiness of business undertaken is therefore evaluated and approved at initiation of the business through deal forum, investment committee and ERRF and is reviewed and ratified at ERRF on a regular basis. These central forums provide a level of risk management by ensuring that risk appetite and various limits are being adhered to and that an appropriate interest rate and, by implication, risk premium is built into every approved transaction. The approval of transactions by these independent central forums thus ensures that every transaction undertaken by the group results in a contribution to profit that has already been subject to some risk adjustment.

Our EVA model as described in detail below is principally applied to realised profits against predetermined targets above risk and capital weighted returns. In terms of the EVA structure, capital is allocated based on risk and therefore the higher the risk, the higher the capital allocation and the higher the hurdle return rate required. This model ensures that risk and capital management are embedded in key processes at both a group and transaction level, which form the basis of the group’s performance-related variable remuneration model, thus balancing the interests of all stakeholders.

Further, both the risk and compliance functions are also embedded in the operating business units and are subject to review by the internal audit and compliance monitoring teams. The risk and compliance functions also provide, on an exception-only basis, information relating to the
Remuneration report

The profitability of each operating business unit is determined as if they are a stand-alone business. Gross revenue is determined based on the activity of the business, with arm’s length pricing applicable to inter-segment activity. Profits are determined as follows:

- Realised gross revenue (net margin and other income)
- Less: Funding costs
- Less: Impairments for bad debts
- Add back: Debt coupon or preference share dividends paid out of the business (where applicable)
- Less: Direct operating costs (personnel, systems, etc)
- Less: Group-allocated costs and residual charges (certain independent group functions are provided on a centralised basis, with an allocation model applied to charge out costs incurred to business units. Costs allocated are based on the full operational costs for the particular central service area, inclusive of the variable remuneration cost of the central service. Allocation methodologies generally use cost drivers as the basis of allocation)
- Less: Profits earned on retained earnings and statutory held capital
- Add: Notional profit paid by centre on internal allocated capital
- Equals: Net profits

Capital allocated is a function of both regulatory and internal capital requirements, the risk assumed within the business and our overall business strategy.

- The group has always held capital in excess of minimum regulatory requirements, and this principle is perpetuated in our internal capital allocation process. This process ensures that risk and capital discipline is embedded at the level of deal initiation and incorporates independent approval (outside of the business unit) of transactions by the various risk and credit committees.

A detailed explanation of our capital management and allocation process is provided on pages 78 to 93 in volume two.

- Internal capital comprises the regulatory capital requirement taking into account a number of specified risks plus a capital buffer which caters, inter alia, for any unspecified or future risks not specifically identified in the capital planning process. The Investec group then ensures that it actually holds capital in excess of this level of internal capital.
- Internal capital is allocated to each business unit via a comprehensive analysis of the risks inherent within that business and an assessment of the costs of those risks.
- Hurdle rates or targeted returns are determined for each business unit based on the weighted average cost of capital (plus a buffer for trading businesses to take into account additional risks not identified in the capital allocation process) applied to internal capital.
- Targeted returns differ by business unit reflecting the competitive economics and shareholder expectation for the specific area of the business, and are set with reference to the degree of risk and the competitive benchmarks for each product line.

- In essence, varying levels of return are required for each business unit reflecting the state of market maturity, country of operation, risk, capital invested (capital intensive businesses) or expected expense base (fee-based businesses).
- Growth in profitability over time will result in an increasing bonus pool, as long as it is not achieved at the expense of capital efficiency.
- Target returns must be reflective of the inherent risk assumed in the business. Thus, an increase in absolute profitability does not automatically result in an increase in the annual bonus pool. This approach allows us to embed risk and capital discipline in our business processes. These targets are subject to annual review.
- The group’s credit and risk forums provide transaction approval independent of the business unit on a deal-by-deal basis adding a level of risk consciousness to the predetermined (and risk-adjusted) capital allocation and required hurdle rates and thus ensure that each transaction generates a return that is commensurate with its associated risk profile.

In terms of our EVA process, if business and individual performance goals are exceeded, the variable element of the total remuneration package is likely to be substantially higher than the relevant target benchmark. This ensures that overall remuneration levels have the potential to be positioned at the upper quartile level for superior performance, in line with our overarching remuneration policy.

In circumstances where an operating business unit does not have an EVA pool (e.g., when it incurs a loss or when it is a start-up), the chief executive officer and managing director may consider a discretionary allocation to allow for a modest bonus for those staff who were expected to contribute to the longer-term interests of that business unit or the group, despite the lack of EVA profits in the short term, e.g., control functions, support staff and key business staff.

It should be noted the salaries and proposed bonuses for employees responsible for risk, internal audit and compliance are not based on a formulaic approach and are independent of any revenues or profits.
The group remuneration committee specifically reviews and approves the individual remuneration packages of the executive directors, persons discharging managerial responsibilities, and PRA Code Staff. The committee also reviews the salaries and performance bonuses awarded to a number of other senior and higher paid employees across the group. In addition, the committee specifically reviews and approves the salaries and performance bonuses awarded to each employee within the internal audit, compliance and risk functions, both in the business units and in the central functions, ensuring that such packages are competitive and are determined independently of the other business areas. In making these decisions the committee relies on a combination of external advice and supporting information prepared internally by the group.

### Deferral of annual bonus awards: other than PRA Code Staff within the Specialist Bank

All annual bonus awards exceeding a predetermined hurdle level are subject to 60% deferral in respect of that portion that exceeds the hurdle level. The deferred amount is awarded in the form of: forfeitable share awards vesting in three equal tranches at the end of 12 months, 24 months and 36 months; or cash released in three equal tranches at the end of 12 months, 24 months and 36 months. Where shares are being awarded to employees as part of the deferral of performance bonus awards, these are referred to as EVA shares. These awards are made in terms of our existing long-term incentive plans (refer to page 159). The entire amount of the annual bonus that is not deferred is payable up front in cash.

### Deferral of annual bonus awards: UK PRA Code Staff within the Specialist Bank

- **PRA Code Staff include senior management, risk takers, staff engaged in central functions and any other employees whose professional activities have a material impact on Investec’s risk profile within Investec plc**
- **Individual awards to PRA Code Staff are determined based on EVA pools in the same manner as is applicable to all staff (as set out above), and subject to the group remuneration policy and governance processes (also set out above)**
- **Annual bonus awards to directors of the UK Specialist Bank (excluding executive directors who are employees of a separately regulated firm) and all annual bonus awards where total variable remuneration exceeds £500 000 are subject to 60% deferral**
- **All other annual bonus awards to PRA Code Staff are subject to 40% deferral**
- **The 40% not deferred in the former instance or the 60% not deferred in the latter instance will be awarded as to 50% in cash and 50% in EVA forfeitable shares (upfront EVA forfeitable shares)**
- **The upfront EVA forfeitable shares will vest immediately, but will only be released after a period of six months, which we consider to be an appropriate retention period**
- **Discretionary bonuses for PRA Code Staff who are not exempted by the de minimis concession are subject to 40% deferral (60% if total variable remuneration exceeds £500 000) after taking into account the value of LTIPs granted to each staff member in the applicable financial year and which are included in deferred variable remuneration. The deferred portion of discretionary awards to PRA Code Staff will, at the election of the staff member, be made either entirely in the form of EVA forfeitable shares, or 50% in EVA forfeitable shares and 50% in cash**
- **All deferrals in the form of EVA forfeitable shares (being either 50% or 100% of such deferral) vest in equal amounts at the end of 12 months, 24 months and 36 months and are then subject to an appropriate period of retention, being six months.**

**IAM: variable incentive**

The Investec Asset Management (IAM) remuneration committee is responsible for considering, agreeing and overseeing all elements of remuneration and the overall remuneration philosophy, principles and policy of IAM. The proposals from this committee are subject to final approval by the DLC remuneration committee.

IAM operates the following annual bonus schemes which may result in annual payments to employees:

- **Annual Discretionary Cash Bonus Scheme (ADCBS) (all employees of IAM are currently eligible to be considered for a cash bonus payment under this scheme)**
Deferred Bonus Plan (DBOP)
Participation in this scheme is determined on an annual basis at the discretion of IAM based on the roles of individual employees.

The percentage of profit allocated to the variable remuneration pool has been agreed (at a fixed participation rate) and approved by both the DLC and IAM remuneration committees. The same fixed participation rate has been applied consistently for many years. This structure has been a key contributor to the long-term success of IAM and encourages the staff to behave like owners. We believe in aligning the long-term interests of clients, shareholders and staff.

Individual annual bonus awards are approved by the IAM remuneration committee and the DLC remuneration committee annually.

Annual Discretionary Cash Bonus Scheme (ADCBS)
Awards under the ADCBS are payable entirely in cash. The purpose of the cash bonus is to reward behaviour and effort against objectives and values, and retain key employees. The cash bonus pool determination is based on the profitability of IAM only. In principle, there would be no cash bonus payments should IAM be loss making (although this would be reviewed where it was considered that bonus payments were necessary in order to retain staff and protect the business in the long term even if the business had been loss making in the short term).

Management information is provided to the IAM remuneration committee to ensure that IAM’s financial results are put into the context of the risk appetite of the business and the IAM remuneration committee is able to risk-adjust the cash bonus pool should they believe this is required given the risk taken and the overall financial results.

Deferred Bonus Plan (DBOP)
As noted above, participation in the DBOP is determined on an annual basis at the discretion of IAM based on the roles of individual employees. The purpose of the DBOP is both to retain key employees and to provide better alignment of the interests with clients and to manage potential, currently unknown future risks.

The conditions for participation in the DBOP are approved by the IAM remuneration committee annually, based on the remuneration requirements in the year being considered. This will take into consideration local market remuneration practices and relevant and required regulations.

The DBOP awards are made in the form of investments into various funds managed by IAM and with specific allocations for the portfolio managers into their own funds. The deferral period is just over three years and awards are only paid out under specific listed conditions. The award does not accrue to the employee until the end of the deferral period and as such both the asset and liability remain on the balance sheet of IAM until that time. Employees forfeit their allocations if they resign or their employment terminates (other than at the discretion of IAM for redundancy, retirement, death or disability) prior to the vesting date.

Payments can only be made to participants prior to a scheduled vesting date with the consent of the IAM executive committee and ultimately by the IAM remuneration committee.

IAM’s governance processes, operating within the context of the broader Investec group’s processes, ensure robust oversight of reward and effective management of any potential conflicts of interest while reflecting the need to link remuneration decisions with IAM’s risk appetite.

The head of the IAM risk committee assesses the risk appetite, risk tolerance level and risk management for IAM and feeds her views into the remuneration decision-making process, including sending a risk report to the IAM remuneration committee for consideration when making remuneration decisions.

In addition, IAM human resources and compliance are responsible for ensuring that the IAM remuneration committee takes into consideration financial and non-financial criteria, risk and compliance reports, and any other relevant information in making decisions around remuneration.

The primary determinant of the variable compensation pool available for distribution is IAM’s own annual profit. There is an annual budget against which the business is measured.

The variable compensation pool is allocated to business divisions and then to individuals based on divisional performance and the individual’s performance. This ensures that staff are rewarded appropriately for meeting their objectives and keeping within the values of the business.

The oversight of conflicts of interest and the link between risk and reward is achieved through a combination of effective remuneration components, designed to incorporate risk and of the dual operation of the DLC remuneration committee and IAM remuneration committee in ensuring appropriate and, where necessary, independent oversight of both remuneration policy and outcomes.

Employee equity ownership
In August 2013, 40 employees of IAM acquired a 15% stake in the IAM business, ultimately through a trust structure in which each employee owns a portion of the underlying trust assets. Each employee funded their portions through a combination of existing deferred compensation (for which vesting was accelerated), personal debt and personal cash. Annual bonuses for these senior employees will not generally be deferred until such time as the debt taken out by these employees to fund their investment has been repaid. This structure locks in key talent and aligns employees’ interests with the interests of the firm as a whole, our shareholders and our clients.

Employees’ portion holdings are governed by the terms of a trust deed to which all portion holders have agreed. In summary, various pre-emption provisions apply to the transfer of employees’ portions. On leaving, an employee is required to offer their portions for sale (save in limited circumstances where part of the portion holding may be retained). Good leaver/bad leaver provisions apply to determine the price at which the portions must be offered for sale.

Investec Wealth & Investment other than in South Africa: variable short-term incentive
Investec Wealth & Investment (IW&I) recognises Investec’s obligation to ensure that all businesses within the group satisfy their obligations under the remuneration code. IW&I recognises that the policy, procedures and practices it has adopted should not conflict with the group’s obligations under the remuneration code. The IW&I remuneration committee is responsible for considering, agreeing and overseeing all elements of remuneration and the overall remuneration philosophy and policy of IW&I within the context of the Investec group’s agreed remuneration
philosophy and policy. The proposals from this committee are subject to final approval by the DLC remuneration committee.

IW&I operates the following performance-related discretionary remuneration plans:

- **Core incentive plan** – for those in client-facing roles and administrative staff who support them directly
- **Bonus plan** – for those in non-client-facing, central services and support functions
- **Growth plan** – for staff primarily in client-facing roles who generate income directly.

Funding is at the discretion of the remuneration committee. Under the core plan, an incentive pool is derived from a formula that is directly related to the profitability of a team or business unit. The pool is distributed to the members of the team or business unit on a discretionary basis.

Funding for bonuses is related to the overall profitability of the IW&I business and is awarded to individuals on a discretionary basis.

The growth plan incentivises growth in revenues, net of the impact of market movements. Awards relate to performance for each year to 28 February, are payable in cash, and are deferred over a three-year period. Payments do not attract employer pension contributions.

Under the core incentive and bonus plans, awards relate to performance for the financial year ending 31 March. An interim payment on account of the annual award is considered at the half-year.

Non-financial performance is reviewed, and where individuals fall below the standards expected, awards may be deferred or forfeited, in part or in full. Payments are made entirely in cash and do not attract employer pension contributions. The award may be paid directly to the individual (subject to the deduction of income tax and national insurance) or, at IW&I’s discretion, as an additional employer pension contribution.

IW&I executive directors participate in the bonus plan, and where an individual’s role is primarily client-facing, that director will also be eligible to participate in the core incentive and growth plans.

**Investec Wealth & Investment South Africa: variable short-term incentive**

As there are no overriding regulatory requirements applicable to the business, the policies applicable to the Specialist Bank are applied to this business unit as set out on pages 172 to 174.

**Other information on deferred awards and clawback provisions within the group**

Employees who leave the employment of Investec prior to vesting of deferred incentive awards will lose their EVA forfeitable shares other than as a result of retirement, subject to the group’s normal good leaver provisions and approval process in exceptional cases.

The deferred share awards for PRA Code Staff are subject to malus and clawback adjustments of unpaid EVA. The assessment of whether any malus adjustment should be made to an individual’s unvested award will be undertaken within the following framework:

- Where there is reasonable evidence of employee misbehaviour
- Where the firm or operating business unit suffers a material downturn in its financial performance
- Where the firm or business unit suffers a material failure of risk management.

In these cases, management and the remuneration committee will take into account the following factors in determining the extent (if any) to which the quantum of deferred awards should be subject to clawback:

- The extent to which the individual had control over the outcome
- Failure of internal control systems
- The impact of the risk profile of the relevant member of the group or business unit
- Any violation of the group’s culture and values
- The long-term impact of the outcome on the group or relevant business unit
- External factors including market conditions
- Any other relevant factors.

Specifically for EVA share awards, where profits used to determine the original EVA bonus are materially reduced after the bonus determination, the awards will be recalculated for such reduction and consideration given to clawback (if any) to the extent that the prior period’s EVA pool is reduced and the extent to which it affected each employee.

**Long-term incentive: share awards**

We have a number of share option and long-term share incentive plans that are designed to align the interests of employees with those of shareholders and long-term organisational interests, and to build material share ownership over the long term through share awards. These share option and incentive plans are also used in appropriate circumstances as a mechanism for retaining the skills of key talent.

Awards are made in the form of nil cost options other than for countries where the taxation of such awards is penal. In these cases awards are made in the form of forfeitable shares, conditional awards or market strike options.

In principle all employees are eligible for long-term incentives. Awards are considered by the remuneration committee and made only in the 42-day period following the release of our interim or final financial results in accordance with the Investment Association principles of remuneration: 2014 edition (formerly ABI remuneration principles). These awards comprise three elements, namely:

- ‘New starter’ awards are made based on a de facto non-discretionary basis using an allocation table linked to salary levels
- ‘General allocation’ awards are also de facto non-discretionary awards of the same quantum as new starter awards and are made to employees who have not had any other share award in a three-year period
- ‘Top up’ awards are made at the discretion of line management primarily to ensure multi-year performance and long-term value generation.

All proposed long-term incentive plan (LTIP) awards are recommended by business unit management, approved by the staff share executive committee and then the remuneration committee before being awarded. Awards of Investec plc LTIPs
are made to employees of Investec plc and awards of Investec Limited LTIPs for employees of Investec Limited. At IAM, LTIP awards are only generally considered for employees who do not participate in the DBOP and/or the IAM equity ownership scheme.

LTIP awards for non-PRA Code Staff are subject to 75% vesting at the end of four years and the final 25% at the end of the fifth year, which we believe is appropriate for our business requirements. LTIP awards to PRA Code Staff are subject to performance conditions and to 75% vesting at the end of three and a half years and the final 25% at the end of four and a half years, and are then subject to a six-month retention period. The awards are forfeited on termination, but ‘good leaver’ discretion is applied in exceptional circumstances.

Retention is addressed through the long-term nature of awards granted, which provides an element of ‘lock-in’ for employees throughout the vesting period and allows for multi-year contribution to performance and brand building.

**Other remuneration structures**

**Guaranteed variable remuneration**

Guaranteed variable remuneration comprises all forms of remuneration whose value can be determined prior to award. This includes, but is not limited to sign-on, buy-out and guarantee awards. Guaranteed variable awards will not be awarded, paid or provided to any individual within the group unless they are:

- Exceptional
- In the context of hiring new staff
- Limited to the first year of service.

The remuneration committee at least annually reviews guaranteed variable remuneration payments and the number of guarantees awarded and approves any exceptions.

**Retention awards**

Investec only pays retention awards to serving staff in exceptional circumstances. In all such cases, human resources shall review proposed payments to ensure that they are in line with this policy and any other relevant regulation. Additionally for PRA Code Staff, the remuneration committee shall review all proposed awards. Circumstances where the group will consider paying a retention award are in the case of a major restructuring of the company or any subsidiary or one of its business units (for instance in the start-up of a new business line, or the closure of a business line), where the retention of individuals is essential to the completion of the task. A valid business case for the retention of the individual must be presented in order for a retention award to be approved and the PRA should be notified prior to the retention award being made to PRA Code Staff, and should consider seeking guidance on the appropriateness of retention awards for certain individuals.

**Severance awards**

Severance payments by Investec plc or one of its subsidiary companies for the early termination of a contract are at executive management’s absolute discretion and must reflect performance achieved over time and be designed in a way that does not reward failure. Severance payments for PRA Code Staff individuals shall be subject to approval by the DLC remuneration committee.

**Discretionary extended pension benefits policy**

All proposed extended pension payments made to employees upon reaching retirement should be reviewed by the remuneration committee for alignment with appropriate laws, policy and regulation.

**PRA Remuneration Code disclosures**

In terms of the PRA’s Chapter on Disclosure Requirements (BIPRU 11.5.18) the bank in the UK is required to make certain quantitative and qualitative remuneration disclosures on an annual basis with respect to PRA Code Staff.

PRA Code Staff are defined as those employees (including directors) whose professional activities could have a material impact on the bank’s risk profile. A total of 47 individuals were PRA Code Staff in 2015.

The bank’s qualitative remuneration disclosures are provided on pages 140 to 177.

The information contained in the tables below sets out the bank’s quantitative disclosures in respect of PRA Code Staff for the year ended 31 March 2015.

^ Senior management: all members of our South African general management forum, excluding executive directors.

Risk takers: includes anyone (not categorised above) who is deemed to be responsible for a division/function (e.g. lending, balance sheet management, advisory and transactional banking activities) which could be incurring risk on behalf of the bank.

Financial and risk control staff: includes everyone in central group finance and central group risk as well as employees responsible for risk and finance functions within the operating business units.
Definitions

Adjusted shareholders’ equity
Refer to calculation on page 50

Cost to income ratio
Operating costs divided by operating income (net of depreciation on leased assets). Depreciation on operating leased assets has been netted off against operating income

Core loans and advances
Net loans and advances to customers plus net own originated securitised assets
Refer to calculation on page 31 in volume two

Dividend cover
Adjusted earnings per ordinary share before goodwill and non-operating items divided by dividends per ordinary share

Earnings attributable to ordinary shareholders before goodwill, acquired intangibles and non-operating items (i.e. adjusted earnings)
Refer to page 53 in volume three

Adjusted earnings per ordinary share before goodwill, acquired intangibles and non-operating items
Refer to page 53 in volume three

Effective operational tax rate
Tax on profit on ordinary activities (excluding non-operating items) divided by operating profit

Market capitalisation
Total number of shares in issue (including Investec plc and Investec Limited) multiplied by the closing share price of Investec plc on the London Stock Exchange

Net tangible asset value per share
Refer to calculation on page 48

Non-operating items
Reflects profits and/or losses on termination, restructuring or disposal of group operations and acquisitions made

Operating profit
Operating income less administrative expenses, impairments for bad and doubtful debts and depreciation of tangible fixed assets. This amount is before goodwill, acquired intangibles and non-operating items

Operating profit per employee
Refer to calculation on page 53

Recurring income
Net interest income plus net annuity fees and commissions expressed as a percentage of total operating income

Return on average adjusted shareholders’ equity
Refer to calculation on page 50

Return on average adjusted tangible shareholders’ equity
Refer to calculation on page 50

Return on risk-weighted assets
Adjusted earnings divided by average risk-weighted assets

Risk-weighted assets
Is calculated as the sum of risk-weighted assets for Investec plc and Investec Limited (converted into Pounds Sterling) as reflected on page 89 in volume two

Staff compensation to operating income ratio
All employee-related costs expressed as a percentage of operating income

Third party assets under administration
Includes third party assets under administration managed by the Wealth & Investment, Asset Management and Property businesses

Total capital resources
Includes shareholders’ equity, subordinated liabilities and non-controlling interests

Total equity
Total shareholders’ equity including non-controlling interests

Weighted number of ordinary shares in issue
The number of ordinary shares in issue at the beginning of the year increased by shares issued during the year, weighted on a time basis for the period during which they have participated in the income of the group less treasury shares. Refer to calculation on page 53 in volume three

Risk and Basel Pillar III disclosures
Risk management

Group Risk Management objectives are to:

- Be the custodian of adherence to our risk management culture
- Ensure the business operates within the board-stated risk appetite
- Support the long-term sustainability of the group by providing an established, independent framework for identifying, evaluating, monitoring and mitigating risk
- Set, approve and monitor adherence to risk parameters and limits across the group and ensure they are implemented and adhered to consistently
- Aggregate and monitor our exposure across risk classes
- Coordinate risk management activities across the organisation, covering all legal entities and jurisdictions
- Give the boards reasonable assurance that the risks we are exposed to are identified and appropriately managed and controlled
- Run appropriate risk committees, as mandated by the board.

Overview of disclosure requirements

Risk disclosures provided in line with the requirements of International Financial Reporting Standard 7 Financial Instruments: Disclosures (IFRS 7) and disclosures on capital required by International Accounting Standard 1 Presentation of Financial Statements (IAS 1) are included within this section of the integrated annual report on pages 7 to 96 with further disclosures provided within the annual financial statements section in volume three.

All sections, paragraphs, tables and graphs on which an audit opinion is expressed are marked as audited.

Information provided in this section of the integrated annual report is prepared on an Investec DLC consolidated basis (i.e. incorporating the results of Investec plc and Investec Limited), unless otherwise stated.

The risk disclosures comprise Investec Limited and Investec plc’s Pillar III disclosures as required in terms of Regulation 43 of the regulations relating to banks in South Africa and under the Capital Requirements Regulation pertaining to banks in the UK.

The group also publishes Pillar III and other risk information for its “silo” entity holding companies and its significant banking subsidiaries on a consolidated basis. This information is contained in the respective annual financial statements for those respective entities.

Statement from the chairman of the group risk and capital committee

Philosophy and approach to risk management

The board risk and capital committee (comprising both executive and non-executive directors) meets six times per annum and approves the overall risk appetite for the Investec group. The group’s risk appetite statement sets broad parameters relating to the board’s expectations around performance, business stability and risk management. The board ensures that there are appropriate resources to manage the risk arising from running our businesses.

Our comprehensive risk management process involves identifying, quantifying, managing and mitigating the risks associated with each of our businesses.

Risk awareness, control and compliance are embedded in all our day-to-day activities. We seek to achieve an appropriate balance between risk and reward, taking cognisance of all stakeholders’ interests. A strong risk and capital management culture is embedded into our values.

Group Risk Management monitors, manages and reports on our risks to ensure that they are within the stated risk appetite mandated by the board of directors through the board risk and capital committee.

We monitor and control risk exposure through independent Credit, Market, Liquidity, Operational, Legal Risk, Internal Audit and Compliance teams. This approach is core to assuming a tolerable risk and reward profile, helping us to pursue controlled growth across our business.

Group Risk Management operates within an integrated geographical and divisional structure, in line with our management approach, ensuring that the appropriate processes are used to address all risks across the group. There are specialist divisions in the UK and South Africa and smaller risk divisions in other regions tasked with promoting sound risk management practices.

Risk Management units are locally responsive yet globally aware. This helps to ensure that all initiatives and businesses operate within our defined risk parameters and objectives, continually seeking new ways to enhance techniques.

We believe that the risk management systems and processes we have in place are adequate to support the group’s strategy (as explained on page 4 in volume one) and allow the group to operate within its risk appetite tolerance as set out on page 9.

This volume of our integrated annual report, explains in detail our approach to managing our business within our risk appetite tolerance, across all main aspects of risk.

A summary of the year in review from a risk perspective

Executive management is intimately involved in ensuring stringent management of risk, liquidity, capital and conduct.
Risk management (continued)

We continue to seek to achieve an appropriate balance between risk and reward in our business, taking cognisance of all stakeholders’ interests. The group predominantly remained within its risk appetite limits/targets across the various risk disciplines. Our risk appetite framework as set out on page 9 continues to be assessed in light of prevailing market conditions and group strategy.

The group has significantly derisked its balance sheet through a number of strategic sales completed during the financial year (as discussed in detail on page 22 in volume one) which resulted in a reduction in legacy assets of approximately £1.5 billion and total assets of approximately £6 billion.

Our core loan book (excluding strategic sales) has grown steadily over the year in home currencies, reflecting an increase of approximately 16% in both our UK and South African businesses. This has been supported by solid growth in our residential owner-occupied mortgage portfolios and private client lending, and steady growth in our UK Asset Finance business and other diversified corporate lending activities.

Credit and counterparty exposures are to a select target market and our risk appetite continues to favour lower risk, income-based lending, with credit risk taken over a short to medium term. We expect our target clients to demonstrate sound financial strength and integrity, a core competency and an established track record.

Our core loan book remains well diversified with commercial rent producing property loans comprising approximately 17% of the book, other lending collateralised by property 8%, HNW and private client lending 34% and corporate lending 41% (with most industry concentrations well below 5%). We anticipate that future growth in our core loan portfolios will largely come from professional mortgages, HNW mortgages, asset finance, fund finance and power and infrastructure finance. These asset classes have historically reported low default ratios with satisfactory net margins.

Our legacy portfolio in the UK has been actively managed down from £3.4 billion at 31 March 2014 to £0.7 billion largely through strategic sales, redemptions, write-offs and transfers (at the end of the period) to the ongoing book on the back of improved performance in these loans. The remaining legacy portfolio will continue to be managed down as we see opportunities to clear this portfolio. Management believes that the remaining legacy book will still take three to five years to wind down as explained in detail in volume one on pages 88 and 59.

Impairments on loans and advances decreased from £166.2 million to £128.4 million. Since 31 March 2014 gross defaults have improved from £658.7 million to £608.4 million. The percentage of default loans (net of impairments but before taking collateral into account) to core loans and advances amounted to 2.07% (2014: 2.30%). The ratio of collateral to default loans (net of impairments) remains satisfactory at 1.37 times (2014: 1.27 times).

The credit loss ratio on core loans in our South African business has continued to decline to the current level of 0.28%. The credit loss ratio in our UK and other businesses increased during the year to 1.16% as we divested assets and increased impairments on the legacy portfolio. Our credit losses on our core ‘ongoing’ UK and Other book remain low at 0.20% (2014: 0.50%).

Our investment portfolios in the UK and South Africa is to identify and regularly test the bank's conduct, recovery and resolution risks.

We continue to spend much time and resources to improve our Basel III LCR in light of regulations which were implemented from 1 January 2015. Investec Bank Limited (solo basis) ended the year with the three-month average of its LCR at 100.3%, which is well ahead of the minimum levels required. The cost of funding continued to decrease in our UK business and we comfortably exceed Basel liquidity requirements for the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR).

In South Africa, we continued to build our structural liquidity cash resources to improve our Basel III LCR in light of regulations which were implemented from 1 January 2015. Investec Bank Limited (solo basis) ended the year with the three-month average of its LCR at 100.3%, which is well ahead of the minimum levels required. The cost of funding continued to decrease in our UK business and we comfortably exceed Basel liquidity requirements for the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR).

In South Africa, we continued to build our structural liquidity cash resources to improve our Basel III LCR in light of regulations which were implemented from 1 January 2015. Investec Bank Limited (solo basis) ended the year with the three-month average of its LCR at 100.3%, which is well ahead of the minimum levels required. The cost of funding continued to decrease in our UK business and we comfortably exceed Basel liquidity requirements for the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR).

We continue to spend much time and effort focusing on operational, reputational, conduct, recovery and resolution risks. During the year, Investec enhanced its stress testing framework by developing a repeatable stress testing process designed to identify and regularly test the bank’s key ‘vulnerabilities under stress’. The key is to understand these potential threats
to our sustainability and profitability and thus a number of risk scenarios have been developed and assessed. These Investec-specific stress scenarios form an integral part of our capital planning process. The stress testing process also informs the risk appetite review process and the management of risk appetite limits, and is a key risk management tool of the bank. This process allows the bank to identify underlying risks and manage them accordingly.

Conclusion

The current regulatory and economic environment continues to prove challenging to our business, however, we are comfortable that we have robust risk management processes and systems in place which provide a strong foundation to the board and the business to manage and mitigate risks within our risk appetite tolerance framework.

Signed on behalf of the board

Stephen Koseff
Chairman of the group risk and capital committee
10 June 2015
Geographic summary of the year in review from a risk perspective

This section should be read in conjunction with, and against the background provided in, the overview of the operating environment section on pages 28 to 31 in volume one.

Detailed information on key developments during the financial year in review is provided in the sections that follow:

Refer to pages 19 and 20, page 57 and pages 70 to 71, with a high-level geographic summary of the most salient aspects provided below.

UK and Other

Credit risk
We continue to realign and rebalance our portfolio in line with our stated risk appetite, which is reflected in the growth in corporate client exposures and the decline in lending collateralised by property exposures. Material progress has been made during the year in our strategic portfolio rebalancing, in part through strategic divestments but also through active portfolio management and the consistent application of our risk appetite statement.

Net core loans and advances decreased by 14.1% from £8.2 billion at 31 March 2014 to £7.1 billion at 31 March 2015 due to the strategic divestments of Investec Bank (Australia) Limited and Kensington new mortgages. Excluding these sales net core loans increased by approximately 16%, largely as a result of solid growth in our diversified corporate lending activities.

Default loans (net of impairments) have decreased from 3.2% to 3.0% of core loans and advances. The credit loss ratio is at 1.16% (2014: 0.99%), impacted by the divestment of assets and increased impairments on the legacy portfolio.

Traded market risk
We continue to manage to a very low level of market risk with VaR at £0.7 million as at 31 March 2015.

There has been ongoing growth in client activity across the interest rate and foreign exchange corporate sales desks. The structured equity desk’s retail product sales have remained strong and they continue to develop both their product range and distribution capacity.

Balance sheet risk
The bank entered the year with a strong surplus liquidity position. Funding rates continued to be driven down throughout the year as market liquidity and improved funding conditions persisted. This cost reduction was complemented by strategic initiatives including amendment to retail product terms. The overall impact led to a reduction in the bank’s cost of funds. Cash surpluses increased further at the end of January 2015 following the strategic sale of Kensington. This is being managed in the context of the overall treasury funding plan to bring cash levels back to our normal levels of cash surpluses. Cash and near cash balances at 31 March 2015 amounted to £5.0 billion (2014: £4.3 billion) with total UK customer deposits increasing by 9.5% to £10.3 billion (2014: £9.4 billion). We continue to comfortably exceed Basel liquidity requirements.

Southern Africa

Credit risk
Net core loans and advances grew by 16% to R182.1 billion with residential owner-occupied, private client lending and corporate portfolios representing the majority of the growth for the financial year in review.

Default loans (net of impairments) as a percentage of core loans and advances reduced from 1.46% to 1.43% with an improvement in the lending collateralised by property portfolio.

The credit loss ratio improved to 0.28% from 0.42% as we saw stability in the number of new defaulted loans and sufficient collateral available for these transactions.

Our legacy default portfolio which largely relates to lending collateralised by property, notably residential land transactions earmarked for developments, continues to be managed down.

Traded market risk
Trading conditions have remained difficult. Traders have had to contend with very uncertain markets as well as declining market liquidity. While client flow has been under pressure, Investec remains committed to trading on client flow and not proprietary trading. The equity derivatives business has continued to grow both their product offering and the diversity of their client base. Currency markets have generally been illiquid and volatile. Corporate foreign exchange volumes are up leading to increased revenue, however, profit margins have tightened. The trend of low discretionary risk taking in local rates continued in the past year. Little uncertainty and stable
interest rates in the local rate environment has not encouraged corporate hedging activity.

**Balance sheet risk**
Investec continued to build its structural liquidity cash resources over the course of the year as part of its drive to improve the Basel III LCR in order to adhere to regulations which were implemented from 1 January 2015. We ended the year with the three-month average of Investec Bank Limited’s (solo basis) LCR at 100.3% which is well ahead of the minimum level required.

The cost of funding continued to increase for local banks, including Investec, as competition for ‘Basel III friendly’ deposits increased.

Total customer deposits increased by 8% from 1 April 2014 to R221.4 billion at 31 March 2015 (Private Bank deposits amounted to R89.8 billion and other external deposits amounted to R131.6 billion). Cash and near cash balances increased by 5% from 1 April 2014 to R88.7 billion at 31 March 2015.

^ The group numbers have been “derived” by adding Investec plc and Investec Limited (Rand converted into Pounds Sterling) numbers together.
# Where return represents operating profit after taxation and non-controlling interests and after deducting preference dividends, but before goodwill, acquired intangibles and non-operating items. Average balances are calculated on a straight-line average.
• Certain information is denoted as n/a as these statistics are not applicable at a consolidated group level and are best reflected per banking entity or jurisdiction in line with regulatory and other requirements; or were not previously disclosed.
Overall group risk appetite

The group has a number of board-approved risk appetite statements and policy documents covering our risk tolerance and approach to all aspects of risk. In addition, a number of committees and forums identify and manage risk at a group level. The group risk appetite statement and framework sets out the board’s mandated risk appetite. The group risk appetite framework acts as a guide to determine the acceptable risk profile of the group by the owners of the group’s capital. The group risk appetite statement ensures that limits/targets are applied and monitored across all key operating jurisdictions and legal entities. The group risk appetite statement is a high-level, strategic framework that supplements and does not replace the detailed risk policy documents at each entity and geographic level. The group risk appetite framework is a function of business strategy, budget process and the regulatory and economic environment in which the group is operating. The group risk appetite framework is reviewed (in light of the above aspects) and approved at least annually or as business needs dictate. A documented process exists where our risk profile is measured against our risk appetite and this positioning is presented to the group risk and capital committee and the board risk and capital committee.

The table below provides a high-level summary of the group’s overall risk tolerance framework.

<table>
<thead>
<tr>
<th>Risk appetite and tolerance metrics</th>
<th>Positioning at 31 March 2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>• We seek to maintain an appropriate balance between revenue earned from capital light and capital intensive activities. Ideally the split in revenue should be 50:50, dependent on prevailing market conditions</td>
<td>Capital light activities contributed 56% to total operating income and capital intensive activities contributed 44%</td>
</tr>
<tr>
<td>• We have a solid recurring income base supported by diversified revenue streams, and target a recurring income ratio in excess of 65%</td>
<td>Recurring income amounted to 74.2% of total operating income. Refer to page 24 in volume one for further information</td>
</tr>
<tr>
<td>• We seek to maintain strict control over fixed costs and target a group cost to income ratio of below 65%</td>
<td>The cost to income ratio amounted to 67.6%. Refer to page 27 in volume one for further information</td>
</tr>
<tr>
<td>• We aim to build a sustainable business generating sufficient return to shareholders over the longer-term, and target a long-term return on equity ratio range of between 12% and 16%, and a return on risk-weighted assets in excess of 1.2%</td>
<td>The return on equity amounted to 10.6% and our return on risk-weighted assets amounted to 1.25%. Refer to pages 27 and 45 in volume one for further information</td>
</tr>
<tr>
<td>• We are a lowly leveraged firm and target a leverage ratio in all our banking subsidiaries in excess of 6%</td>
<td>We achieved this internal target; refer to page 93 for further information</td>
</tr>
<tr>
<td>• We intend to maintain a sufficient level of capital to satisfy regulatory requirements and our internal target ratios. We target a capital adequacy ratio range of between 14% and 17% on a consolidated basis for Investec plc and Investec Limited and we target a minimum tier 1 ratio of 10.5% (11.0% by March 2016) and a common equity tier 1 ratio above 10.0% (by March 2016)</td>
<td>We meet current capital targets; refer to page 93 for further information</td>
</tr>
<tr>
<td>• We target a diversified loan portfolio, lending to clients we know and understand. We limit our exposure to a single/connected individual or company to 5% of tier 1 capital (up to 10% if approved by the relevant board committee). We also have a number of risk tolerance limits and targets for specific asset classes</td>
<td>We maintained this risk tolerance level in place throughout the year</td>
</tr>
<tr>
<td>• There is a preference for primary exposure in the group’s main operating geographies (i.e. South Africa and UK). The group will accept exposures where we have a branch/banking business. The group will also tolerate exposures to other countries where it has core capabilities</td>
<td>Refer to page 22 for further information</td>
</tr>
<tr>
<td>• The level of defaults and impairments continues to improve and we target a credit loss charge on core loans of less than 0.5% of average core advances (less than 1.25% under a weak economic environment/stressed scenario), and we target defaults net of impairments less than 1.5% of total core loans (less than 4% under a weak economic environment/ stressed scenario)</td>
<td>The credit loss charge on core loans amounted to 0.68% and defaults net of impairments amounted to 2.07% of total core loans. Refer to page 31 for further information</td>
</tr>
<tr>
<td>• We carry a high level of liquidity in all our banking subsidiaries in order to be able to cope with shocks to the system, targeting a minimum cash to customer deposit ratio of 25%</td>
<td>Total cash and near cash balances amounted to £10 billion, representing 38.2% of our liability base. Refer to page 86 for further information</td>
</tr>
<tr>
<td>• We have modest market risk as our trading activities primarily focus on supporting client activity and our appetite for proprietary trading is limited. We set an overall tolerance level of a one-day 95% VaR of less than R15 million for Investec Limited and less than £5 million for Investec plc</td>
<td>We meet these internal limits; refer to page 53 for further information</td>
</tr>
<tr>
<td>• We have moderate appetite for investment risk, and set a risk tolerance of less than 30% of tier 1 capital for our unlisted principal investment portfolio</td>
<td>Our unlisted investment portfolio is £810 million, representing 26.3% of total tier 1 capital. Refer to page 47 for further information</td>
</tr>
<tr>
<td>• Our Operational Risk Management team focuses on improving business performance and compliance with regulatory requirements through review, challenge and escalation</td>
<td>Refer to pages 72 to 75 for further information</td>
</tr>
<tr>
<td>• We have a number of policies and practices in place to mitigate reputational, legal and conduct risks.</td>
<td>Refer to pages 76 to 78 for further information</td>
</tr>
</tbody>
</table>
Risk management (continued)

An overview of key risks

In our daily business activities, the group enters into a number of risks that could have the potential to affect our business operations or financial performance.

These risks have been highlighted on page 34 in volume one.

The sections that follow provide information on a number of these risk areas.

Additional risks and uncertainties that are currently considered immaterial and not included in this report may in the future impact our business operations and financial performance.

Risk management framework, committees and forums

A number of committees and forums identify and manage risk at group level, as described more fully below. These committees and forums operate together with Group Risk Management and are mandated by the board.

A diagram of our governance and risk framework is provided on page 96 in volume one.

The group committees and forums listed below have mandated certain committees and forums within the jurisdictions in which the group operates to support them in their objectives:

ECB European Central Bank  SARB South African Reserve Bank
**Credit and counterparty risk management**

**Credit and counterparty risk description**

Credit and counterparty risk is defined as the risk arising from an obligor’s (typically a client or counterparty) failure to meet the terms of any agreement. Credit and counterparty risk arises when funds are extended, committed, invested, or otherwise exposed through contractual agreements, whether reflected on- or off-balance sheet.

Credit and counterparty risk arises primarily from three types of transactions:

- **Lending transactions through loans and advances to clients** and counterparties creates the risk that an obligor will be unable or unwilling to repay capital and/or interest on loans and advances granted to them. This category includes bank placements, where we have placed funds with other financial institutions.

- **Issuer risk on financial instruments** where payments due from the issuer do not take place as expected. Our definition of a settlement debtor is a short-term receivable (i.e. less than five days) which is excluded from credit and counterparty risk due to market guaranteed settlement mechanisms.

- **Trading transactions**, giving rise to settlement and replacement risk (collectively counterparty risk):
  - **Settlement risk** is the risk that the settlement of a transaction does not take place as expected. It arises when default risk and credit exposure increase together.
  - **Replacement risk** is the financial cost of having to enter into a replacement contract with an alternative market counterparty, following default by the original counterparty.

Credit and counterparty risks can be impacted by country risk where cross-border transactions are undertaken. This can include geopolitical risks, transfer and convertibility risks, and the impact on the borrower’s credit profile due to local economic and political conditions.

Whilst we do not have a separate country risk committee, the local and global credit committees will consider, analyse and assess the appropriate limits to be recorded when required, to assume exposure to foreign jurisdictions. The local group credit committee has the authority to approve country limits within mandate. The global credit committee is responsible for approving country limits not within the mandate of local group credit committees.

The relevant credit committees within Investec will also consider wrong-way risk at the time of granting credit limits to each counterparty. In the banking book environment, wrong-way risk occurs where the value of collateral to secure a transaction, or guarantor, is positively correlated with the probability of default of the borrower or counterparty. For counterparty credit risk resulting from transactions in traded products (such as OTC derivatives), wrong-way risk is defined as exposure to a counterparty that is adversely correlated with the credit quality of that counterparty. It arises when default risk and credit exposure increase together.

Credit and counterparty risk may also arise in other ways and it is the role of the Global Risk Management functions and the various independent credit committees to identify risks falling outside these definitions.

**Credit and counterparty risk governance structure**

To manage, measure, monitor and mitigate credit and counterparty risk, independent credit committees exist in each geography where we assume credit risk. These committees operate under board-approved delegated limits, policies and procedures. There is a high level of executive involvement and non-executive review and oversight in the credit decision-making forums. It is our policy that all centralised credit committees are comprised of voting members who are independent of the originating business unit. All decisions to enter into a transaction are based on unanimous consent.

In addition to the group credit committee, the following processes assist in managing, measuring and monitoring credit and counterparty risk:

- **Day-to-day arrears management and regular arrears forecast reporting** ensure that individual positions and any potential trends are dealt with in a timely manner.

- **Watchlist committees**, which review the management of distressed loans, potential problem loans and exposures in arrears that require additional attention and supervision.
Risk management (continued)

- Corporate watch forum, which reviews and manages exposures that may potentially become distressed as a result of changes in the economic environment or adverse share price movements, or that are vulnerable to volatile exchange rate or interest rate movements
- Arrears, default and recoveries forum which specifically reviews and manages distressed loans and potentially distressed loans for private clients. This forum also reviews and monitors counterparties who have been granted forbearance measures.

Credit and counterparty risk appetite
There is a preference for primary exposure in the group’s main operating geographies (i.e. South Africa and the UK). The group will accept exposures where we have a branch or local banking subsidiary, and tolerate exposures to other countries where we have developed a local understanding and capability or we are facilitating a transaction for a client who requires facilities in a foreign geography.

Our assessment of our clients and counterparties includes consideration of their character and integrity, core competencies, track record and financial strength. A strong emphasis is placed on the historic and ongoing stability of income and cash flow streams generated by the clients. Our primary assessment method is therefore the ability of the client to meet their payment obligations.

**We have little appetite for unsecured debt and require that good quality collateral is provided in support of obligations (refer to page 43 for further information).**

Target clients include high net worth and/or high income individuals, professionally qualified individuals, established corporates, small and medium enterprises, financial institutions and sovereigns. Corporates must have scale and relevance in their market, an experienced management team, able board members, strong earnings and cash flow.

We are client-centric in our approach and originate loans with the intent of holding these assets to maturity, thereby developing a ‘hands-on’ and long-standing relationship.

Interbank lending is largely reserved for those banks and institutions in the group’s core geographies of activity which are systemic and highly rated. Direct exposures to cyclical industries and start-up ventures are generally avoided.

**In certain instances we have elected to sell certain assets down and/or securitise them (refer to pages 48 to 51 for further information).**

Concentration risk
Concentration risk is when large exposures exist to a single client or counterparty, group of connected counterparties, or to a particular geography, asset class or industry. An example of this would be where a number of counterparties are affected by similar economic, legal, regulatory or other factors that could mean their ability to meet contractual obligations are correlated.

Concentration risk can also exist where portfolio loan maturities are clustered to single periods in time. Loan maturities are monitored on a portfolio and a transaction level by Group Risk Management, Group Lending Operations as well as the originating business units.

Credit and counterparty risk is always assessed with reference to the aggregate exposure to a single counterparty or group of related parties to manage concentration risk.

Risk appetite
The board has set a group risk appetite limit framework which regulates the maximum exposures we would be comfortable to tolerate in order to diversify and mitigate risk. This limit framework is monitored on an ongoing basis and reported to the GRCC and BRCC on a regular basis. Should there be any breaches to limits, or where exposures are nearing limits, these exceptions are specifically highlighted for attention, and any remedial actions agreed.

**Sustainability considerations**
Investec has a holistic approach to sustainability, which runs beyond recognising our own footprint on the environment and includes our many CSI activities and our funding and investing activities. This is not merely for business reasons, but based on a broader responsibility to our environment and society. Accordingly, sustainability risk considerations are considered by the credit committee and investment committee when making lending or investment decisions. In particular the following factors are taken into account when a transaction might be approved or declined based on the outcome of the sustainability considerations:

- Environmental considerations (including animal welfare)
- Social considerations
- Economic considerations.

*Refer to our sustainability report on our website.*

Management and measurement of credit and counterparty risk
Fundamental principles employed in the management of credit and counterparty risk are:

- A clear definition of our target market
- A quantitative and qualitative assessment of the creditworthiness of our counterparties
- Analysis of risks, including concentration risk (concentration risk considerations include asset class, industry, counterparty and geographical concentration)
- Decisions are made with reference to risk appetite limits
- Prudential limits
- Regular monitoring and review of existing and potential exposures once facilities have been approved
- A high level of executive involvement in decision-making with non-executive review and oversight.

Regular reporting of credit and counterparty risk exposures within our operating units is made to management, the executives and the board at the GRCC and BRCC. The board regularly reviews and approves the appetite for credit and counterparty risk, which is documented in risk appetite statements and policy documents. This is implemented and reviewed by Group Credit.

Despite strict adherence to the above principles, increased default risk may arise from unforeseen circumstances particularly in times of extreme market volatility and weak economic conditions. A large proportion of the bank’s portfolio is not rated by external rating agencies. We place reliance upon internal consideration of counterparties and borrowers, and use...
ratings prepared externally where available as support in our decision-making process. Within the credit approval process, internal and external ratings are included in the assessment of the client quality.

Internal credit rating models are being developed to cover all material asset classes. The internal ratings are incorporated in the risk management and decision-making process and are used in credit assessment, monitoring and approval as well as pricing.

Exposures are classified to reflect the bank’s risk appetite and strategy. At a high level the exposures are classified according to the Basel asset classes which include sovereign, bank, corporate, retail, equity, securitisation and specialised lending (which is further categorised into project finance; commodities finance; high volatility commercial real estate; and income-producing commercial real estate).

Fitch, S&P, Moody’s and DBRS have been approved as eligible external credit assessment institutions (ECAs) for the purposes of determining external credit ratings with the following elections:

- In relation to sovereigns and securitisations, Fitch, Moody’s, S&P and DBRS have been selected by Investec as eligible ECAs
- In relation to banks, corporates and debt securities, Fitch, Moody’s and S&P are recognised as eligible ECAs
- If two assessments are available, the more conservative will apply
- Where there are three or more credit ratings with different risk weightings, the credit ratings corresponding to the two lowest ratings should be referred to and the higher of those two ratings should be applied.

The group applies the standardised approach for capital requirements in the assessment of its credit and counterparty exposures. The group's banking subsidiaries conduct their mapping of credit and counterparty exposures in accordance with the mapping procedures specified by the Central Bank Registrar, in the respective geographies in which the group operates.

**Risk and Basel Pillar III disclosures**

**Stress testing and portfolio management**

During the year, Investec has enhanced its stress testing framework by developing a repeatable stress testing process, designed to identify and regularly test the bank’s key ‘vulnerabilities under stress’.

A fundamental part of the stress testing process is a full and comprehensive analysis of all the bank’s material business activities, incorporating views from Risk, the business and the Executive – a process called the ‘bottom-up’ analysis. Out of the ‘bottom-up’ analysis the Investec-specific stress scenarios are designed to specifically test the unique attributes of the bank’s portfolio.

These Investec-specific stress scenarios form an integral part of our capital planning process. The stress testing process also informs the risk appetite review process, and the management of risk appetite limits and is a key risk management tool of the bank. This process allows the bank to identify underlying risks and manage them accordingly.

Notwithstanding the form of the stress testing process, the framework should not impede the group from being able to be flexible and perform ad hoc stress tests, which by their nature need to be completed on request and in response to emerging risk issues.

Quarterly portfolio reviews are also undertaken on all material businesses, where the portfolios are analysed to assess any migration in portfolio quality, highlight any vulnerabilities, identify portfolio concentrations and make appropriate recommendations, such as a reduction in risk appetite limits or specific exposures.

**Credit and counterparty risk – nature of lending activities**

Credit and counterparty risk is assumed through a range of client-driven lending activities to private and corporate clients and other counterparties, such as financial institutions and sovereigns. These activities are diversified across a number of business activities.

**Lending collateralised by property**

Client quality and expertise are at the core of our credit philosophy. Our exposure to the property market is well diversified with strong bias towards prime locations for residential exposure and focus on tenant quality for commercial assets. Debt service cover ratios are a key consideration in the lending process supported by reasonable loan to security value ratios.

We provide senior debt and other funding for property transactions, with a strong preference for income producing assets supported by an experienced sponsor providing a material level of cash equity investment into the asset.

**Private client activities**

Our private banking activities target high net worth individuals, active wealthy entrepreneurs, high-income professionals, newly qualified professionals with high-income earning potential, self-employed entrepreneurs, owner managers in small to mid-cap corporates and sophisticated investors.

Lending products are tailored to meet the requirements of our clients. Central to our credit philosophy is ensuring the sustainability of cash flow and income throughout the economic cycle. As such, the client base has been grouped and defined to include high net worth clients (who, through diversification of income streams, will reduce income volatility) and individuals with a profession which has historically supported a high and sustainable income stream irrespective of the stage in the economic cycle.

Credit risk arises from the following activities:

- **Personal Banking** delivers products to enable target clients to create and manage their wealth. This includes private client mortgages, transactional banking, high net worth lending, trust and fiduciary, offshore banking and foreign exchange.

- **Residential Mortgages** provides mortgage loan facilities for high-income professionals and high net worth individuals tailored to their individual needs as well as vanilla mortgage products for professional target market clients.

- **Specialised Lending** provides tailored credit facilities to high net worth individuals and their controlled entities.

An analysis of the lending collateralised by property portfolio and asset quality information is provided on pages 38 to 41.
Risk management (continued)

Corporate client activities
We focus on traditional client-driven corporate lending activities, in addition to customer flow related treasury and trading execution services.

Within the corporate lending businesses, credit risk can arise from corporate loans, acquisition finance, asset finance, power and infrastructure finance, asset-based lending, fund finance and resource finance. We also undertake debt origination activities for corporate clients.

The Credit Risk Management functions approve specific credit and counterparty limits that govern the maximum credit exposure to each individual counterparty. In addition, further risk management limits exist through industry and country limits to manage concentration risk. The credit appetite for each counterparty is based on the financial strength of the principal borrower, the underlying cash flow to the transaction, the substance and track record of management, and the security package. Political risk insurance, and other insurance is taken where they are deemed appropriate.

Investec has limited appetite for unsecured credit risk and facilities are typically secured on the assets of the underlying borrower.

A summary of the nature of the lending and/or credit risk assumed within some of the key areas within our corporate lending business is provided below:

- **Corporate Loans:** provides senior secured loans to mid-to-large cap companies. Credit risk is assessed against debt service coverage from the robustness of the cash generation for the business based on historic and forecast information. We typically act as transaction lead or arranger, and have a close relationship with management and the sponsor.

- **Corporate Debt Securities:** these are tradable corporate debt instruments, purchased based on acceptable credit fundamentals typically with a medium-term hold strategy where the underlying risk is to UK, European and South African corporates. This is a highly diversified, granular portfolio that is robust, and spread across a variety of geographies and industries.

- **Acquisition Finance:** provides debt funding to proven management teams, running small to mid-cap sized companies. Credit risk is assessed against debt service coverage from the robustness of the cash generation of the business. This will be based on historic and forecast information. We typically lend on a bilateral basis and benefit from a close relationship with management.

- **Asset Based Lending:** provides working capital and corporate loans secured to mid-caps. These loans are secured by the assets of the business, for example, the accounts receivable, inventory, plant and machinery. In common with our corporate lending activities, strong emphasis is placed on backing companies with scale and relevance to their industry, stability of cash flow, and experienced management.

- **Fund Finance:** provides debt facilities to asset managers and fund vehicles, principally in private equity and credit asset classes. The geographical focus is the UK, Western Europe and North America, where Investec can support experienced asset managers and their funds which show strong, long-term value creation and good custodianship of investors’ money. Fund manager loans are structured against committed fund management cash flows and the managers’ investment stake in their own funds.

- **Small Ticket Asset Finance:** provides highly diversified lending to small and medium-sized corporates to support asset purchases and other business requirements. These facilities are secured against the asset being financed and are a direct obligation of the company.

- **Large Ticket Asset Finance:** provides the finance and structuring expertise for aircraft and larger lease assets, the majority of which are senior secured loans with a combination of corporate, cash flow and asset-backed collateral against the exposure.

- **Power and Infrastructure Finance:** arranges and provides typically long-term financing for infrastructure assets, in particular renewable power projects and transport, against contracted future cash flows of the project(s) from recognised utilities and power companies as well as the balance sheet of the corporate. There is a strong equity contribution from an experienced sponsor.

- **Resource Finance:** debt arranging and underwriting together with structured hedging solutions mainly within the mining sectors. The underlying commodities are mainly precious and base metals and coal. Our clients in this sector are established mining companies which are typically domiciled and publicly listed in one of the following geographies – the UK, South Africa, North America and Australia. All facilities are secured by the borrower’s assets and repaid from mining cash flows.

- **Structured Credit:** these are bonds secured against a pool of assets, typically UK residential mortgages or European or US leverage loans. The bonds are mainly investment grade rated, which benefit from a high-level of credit subordination and can withstand a significant level of portfolio defaults.

- **Treasury Placements:** The treasury function, as part of the daily management of the bank’s liquidity, places funds with central banks and other commercial banks and financial institutions. These transactions are typically short term (less than one month) money market placements or secured repurchase agreements. These market counterparties are high investment grade rated entities that occupy dominant and systemic positions in their domestic banking markets. These counterparties are located in the UK, Western Europe, North America and in South Africa.

- **Corporate advisory and investment banking activities:** Counterparty risk in this area is modest. The business also trades approved shares on an approved basis and makes markets in shares where we are appointed corporate broker under pre-agreed market risk limits. Settlement trades are largely on a delivery versus payment basis, through major stock exchanges. Credit risk only occurs in the event of counterparty failure and would be linked to any fair value losses on the underlying security.

- **Customer trading activities to facilitate client lending:** Our customer trading portfolio consists of derivative contracts in interest rates, foreign exchange, commodities and equities that are entered to facilitate a client’s hedging requirements. The counterparties to such transactions are typically corporates, in particular where they have a sizeable exposure to foreign exchange due to operating in sectors that include imports.
and exports of goods and services. These positions are marked to market with daily margin calls to mitigate credit exposure in the event of counterparty default.

An analysis of the corporate client loan portfolio and asset quality information is provided on pages 38 to 41.

Wealth & Investment

Investec Wealth & Investment provides investment management services to private clients, charities, intermediaries, pension schemes and trusts. Wealth & Investment is primarily an agency business with a limited amount of principal risk. Its core business is discretionary and non-discretionary investment management services.

Settlement risk can arise due to undertaking transactions in an agency capacity on behalf of clients. However, the risk is not considered to be material as most transactions are undertaken with large institutional clients, are monitored daily, and trades are usually settled within two days.

Asset Management

Investec Asset Management regularly transacts with well-known rated market counterparties. These are all on an exchange traded delivery versus payment basis and exposure is to a movement in the value of the underlying security in the unlikely event a counterparty fails. Direct cash placements follow our policy, as outlined above, of only being exposed to systemic banks of investment grade quality in Southern Africa, the UK, Europe and the US.

Asset quality analysis – credit risk classification and provisioning policy

It is a policy requirement overseen by Central Credit Management that each operating division makes provision for specific impairments and calculates the appropriate level of portfolio impairments. This is in accordance with established group guidelines and in conjunction with the watchlist committee process. In the annual financial statements, credit losses and impairments are reported in accordance with International Financial Reporting Standards (IFRS).

  - Credit exposures overdue 61 – 90 days. |
## Risk management (continued)

<table>
<thead>
<tr>
<th>Regulatory and economic capital classification</th>
<th>IFRS impairment treatment</th>
<th>Arrears, default and recoveries classification category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assets in default (non-performing assets)</td>
<td>Specific impairments are evaluated on a case-by-case basis where objective evidence of impairment has arisen. In determining specific impairments, the following factors are considered: • Capability of the client to generate sufficient cash flow to service debt obligations and the ongoing viability of the client’s business • Likely dividend or amount recoverable on liquidation or bankruptcy or business rescue • Nature and extent of claims by other creditors • Amount and timing of expected cash flows • Realisable value of security held (or other credit mitigants) • Ability of the client to make payments in the foreign currency, for foreign currency denominated accounts.</td>
<td>Sub-standard</td>
<td>The counterparty is placed in sub-standard when the credit exposure reflects an underlying, well defined weakness that may lead to probable loss if not corrected: • The risk that such credit exposure may become an impaired asset is probable • The bank is relying, to a large extent, on available collateral, or • The primary sources of repayment are insufficient to service the remaining contractual principal and interest amounts, and the bank has to rely on secondary sources for repayment. These secondary sources may include collateral, the sale of a fixed asset, refinancing and further capital. Credit exposures overdue for more than 90 days will at a minimum be included in “sub-standard” (or a lower quality category).</td>
</tr>
<tr>
<td>Doubtful</td>
<td>The counterparty is placed in doubtful when the credit exposure is considered to be impaired, but not yet considered a final loss due to some pending factors such as a merger, new financing or capital injection which may strengthen the quality of the relevant exposure.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Loss</td>
<td>A counterparty is placed in the loss category when: • The credit exposure is considered to be uncollectible once all efforts, such as realisation of collateral and institution of legal proceedings, have been exhausted, or • Assets in this category are expected to be written off in the short term since the likelihood of future economic benefits resulting from such assets are remote.</td>
<td></td>

Credit risk mitigation

Credit risk mitigation techniques can be defined as all methods by which Investec seeks to decrease the credit risk associated with an exposure. Investec considers credit risk mitigation techniques as part of the credit assessment of a potential client or business proposal and not as a separate consideration of mitigation of risk. Credit risk mitigants can include any collateral item over which the bank has a pledge of security, netting and margining agreements, covenants, or terms and conditions imposed on a borrower with the aim of reducing the credit risk inherent to that transaction.

As Investec has a limited appetite for unsecured debt, the credit risk mitigation technique most commonly used is the taking of collateral, with a strong preference for tangible assets. Collateral is assessed with reference to the sustainability of value and the likelihood of realisation. Acceptable collateral generally exhibits characteristics that allow for it to be easily identified and appropriately valued.

An analysis of collateral is provided on page 43.

Where a transaction is supported by a mortgage or charge over property, the primary credit risk is still taken on the borrower. For property backed lending such as residential mortgages, the following characteristics of the property are considered: the type of property; its location; and the ease with which the property could be re-let and/or re-sold. Where the property is secured by lease agreements, the credit committee prefers not to lend for a term beyond the maximum of the lease. Commercial real estate generally takes the form of good quality property often underpinned by strong third party leases. Residential property is also generally of a high quality and based in desirable locations. Residential and commercial property valuations will continue to form part of our ongoing focus on collateral assessment. It is our policy to obtain a formal valuation of every commercial property offered as collateral for a lending facility before advancing funds. Residential properties are valued by desktop valuation and/or approved valuers, where appropriate.

Other common forms of collateral in the retail asset class are motor vehicles, cash and share portfolios. In addition, the relevant credit committee normally requires a suretyship or guarantee in support of a transaction in our private client business.

The second primary collateral in private client lending transactions is over a high net worth individual’s investment portfolio. This is typically in the form of a diversified pool of equity, fixed income, managed funds and cash. Often these portfolios are managed by Investec Wealth & Investment. Lending against investment portfolios is typically geared at very conservative loan-to-value ratios after considering the quality, diversification, risk profile and liquidity of the portfolio.

Our corporate, government and institutional clients provide a range of collateral including cash, corporate assets, debtors (accounts receivable), trading stock, debt securities (bonds), listed and unlisted shares and guarantees.

The majority of credit mitigation techniques linked to trading activity is in the form of netting agreements and daily margining. The primary market standard legal documents that govern this include the International Swaps and Derivatives Association Master Agreements (ISDA), Global Master Securities Lending Agreement (GMSLA) and Global Master Repurchase Agreement (GMRA). In addition to having ISDA documentation in place with all market and trading counterparties in over-the-counter (OTC) derivatives, a Credit Support Annex (CSA) ensures that all mark-to-market credit exposure is mitigated daily through the calculation and placement/receiving of cash collateral. Where netting agreements have been signed, the enforceability is supported by external legal opinion within the legal jurisdiction of the agreement.

Set-off has been applied between assets subject to credit risk and related liabilities in the annual financial statements where:

- A legally enforceable right to set-off exists
- There is the intention to settle the asset and liability on a net basis, or to realise the asset and settle the liability simultaneously.

In addition to the above accounting set-off criteria, banking regulators impose the following additional criteria:

- Debit and credit balances relate to the same obligor/counterparty
- Debit and credit balances are denominated in the same currency and have identical maturities
Exposures subject to set-off are risk-managed on a net basis.

Market practice considerations.

For this reason there will be instances where credit and counterparty exposures are displayed on a net basis in these annual financial statements but reported on a gross basis to regulators.

Investec places minimal reliance on credit derivatives in its credit risk mitigation techniques. Periodically the bank in the UK will enter into Credit Default Swaps (CDS) in order to hedge a specific asset held or to create a more general or macro hedge against a group of exposures in one industry or geography. In these instances, the bank is deemed to be "buying protection" against the assets. Depending on the perceived risk, or "spread", of the underlying exposure, the CDS will fluctuate in value; increasing in value when the asset has become more risky and decreasing when risk has reduced. Occasionally, the bank will enter into trading/investment CDS positions where we buy protection or sell protection without owning the underlying asset. The total amount of net credit derivatives outstanding at 31 March 2015 amounts to £10.9 million, of which £6.3 million is used for credit mitigation purposes and the balance for trading and investment. Total protection bought amounts to £15.2 million (£9.8 million relating to credit derivatives used in credit mitigation) and total protection sold amounts to £4.3 million (£3.5 million relating to credit derivatives used in credit mitigation).

Further information on credit derivatives is provided on page 58.

Investec endeavours to implement robust processes to minimise the possibility of legal and/or operational risk through good quality tangible collateral. The legal risk function in Investec ensures the enforceability of credit risk mitigants within the laws applicable to the jurisdictions in which Investec operates. When assessing the potential concentration risk in its credit portfolio, consideration is given to the types of collateral and credit protection that form part of the portfolio.

For regulatory reporting purposes, exposures may be reduced by eligible collateral. Under the standardised approach credit risk mitigation can be achieved through either funded or unfunded credit protection. Where unfunded credit protection is relied upon for mitigation purposes, the exposure to the borrower will be substituted with an exposure to the protection provider, after applying a "haircut" to the value of the collateral due to currency and/or maturity mismatches between the original exposure and the collateral provided. Unfunded credit protection includes eligible guarantees and credit derivatives. Where we rely on funded protection in the form of financial collateral, the value of collateral is adjusted using the financial collateral comprehensive method. This method applies supervisory volatility adjustments to the value of the collateral, and includes the currency and/maturity haircuts discussed above.

Please refer to the credit quality step table disclosed on pages 94 and 95 for a breakdown of regulatory exposure values before and after credit risk mitigation has been applied.

Credit and counterparty risk year in review

UK and Other

We continue to realign and rebalance our portfolio in line with our stated risk appetite, which is reflected in the growth in corporate client exposures and the decline in lending collateralised by property exposures. Material progress has been made during the year in our strategic portfolio rebalancing, in part through strategic divestments but also through active portfolio management and the consistent application of our risk appetite statement.

Three divestments, namely the sale of Kensington, Start (Irish mortgages) and Investec Bank (Australia) Limited's professional finance and asset finance businesses were the principal drivers behind the 56.6% decline in HNW and other private client lending, which has decreased from £2.8 billion at 31 March 2014 to £1.2 billion at 31 March 2015. The Kensington and Start divestments have significantly reduced our legacy exposures.

Active portfolio management has materially refocused the bank’s core lending portfolio – lending collateralised by property has declined by 8.7% from £2.5 billion at 31 March 2014 to £2.3 billion at 31 March 2015; whilst corporate client and other lending has increased 20.2% from £3.1 billion at 31 March 2014 to £3.7 billion at 31 March 2015. On a like-for-like basis, after excluding the impact of divestments, HNW and other private client lending increased by 12% year on year.

Net core loans and advances have decreased by 14.1% to £7.1 billion at 31 March 2015 from £8.2 billion at 31 March 2014 reflecting the impact of the divestments, but partially offset by increased net loan growth. Excluding divestments, net core loans increased by approximately 16%.

Default loans (net of impairments) have decreased by 19.7% or £52 million on an absolute basis and decreased to 3.0% from 3.21% as a percentage of core loans and advances. Gross defaults decreased by 12.4% or £57 million from £457 million at 31 March 2014 to £400 million at 31 March 2015. The credit loss ratio is at 1.16% (2014: 0.99%); the increase in the credit loss ratio is largely attributable to the reduction in denominator (gross core loans and advances have decreased to £7.2 billion from £8.4 billion), due to the sale of core loans through the divestments. We have reported an increase in impairments on the legacy portfolio.

The sections that follow provide high-level commentary for each of our key business areas. We are highly focused on reducing legacy assets and originating good quality assets.

Lending collateralised by property

The overall exposure to property collateralised assets, as a proportion of our total loan exposures, has reduced in line with our risk appetite statement. A large proportion of property collateralised assets are located in the UK and, notwithstanding the improved UK market and particularly in London, our underwriting criteria has remained tight and we remain committed to following a client-centric approach, backing counterparties with strong balance sheets and requisite expertise.

We have actively managed the legacy portfolio down, working assets to achieve optimal recovery but taking opportunistic offers on properties where appropriate. The continuing improvement in the UK property market has assisted further acceleration of this process and we expect this to continue over the forthcoming 12 months.

Private client activities

The existing high net worth mortgage book has continued to grow significantly and is expected to continue in the next 12 months as the bank moves to increase its private client offering, providing a more holistic private bank experience from transactional banking to wealth management. Investec Professional Mortgages was relaunched in October 2014 for professional individuals.
Credit and counterparty exposures decreased by 1.8% to £36.8 billion largely as a result of strategic divestments.

Corporate client activities
Our corporate lending businesses have seen strong growth during the financial year under review. Growth in our corporate lending activities has been diversified across all our business lines, whilst ensuring that we maintain strong asset quality and adherence to our core credit philosophies.

Performance of the Corporate portfolio, including Small Ticket Asset finance, Large Ticket Asset finance, Power and Infrastructure finance and Fund finance, has remained strong during the financial year 2015, with the markets seeing lending activity levels increase, bolstered by strong private equity sponsor appetite for assets. Underlying asset cover quality is good, and portfolios remain well diversified by borrower, sector and geography, albeit with a natural skew towards the UK.

Southern Africa
The financial year in review has seen a combination of trends and factors impacting on the credit quality and assessment of credit and counterparty risk.

Further information is provided in the financial review on pages 28 to 31 in volume one.

Against this backdrop, core loans and advances grew by 16% to R182.1 billion with residential owner-occupied, private client lending, corporate and public sector portfolios representing the majority of the growth for the financial year in review.

Where we have been facing greater competitive pressure on margins, particularly in the corporate market, we have maintained a conservative lending approach. Our lending appetite is based on a client-centric approach with a strong focus on client cash flows underpinned by tangible collateral.

Default loans (net of impairments) as a percentage of core loans and advances improved slightly from 1.46% to 1.43%.

Defaults for the lending collateralised by property portfolio improved. These defaults are mostly related to historical residential land earmarked for developments and continue to be managed down. However, this process does take time as we continue to focus on maximising recoveries.

Defaults in the private client and corporate client portfolios increased slightly.

The credit loss ratio improved to 0.28% from 0.42% as we saw stability in the number of new defaulted loans and sufficient collateral available for these transactions.

Lending collateralised by property
The majority of the property assets are commercial investment properties and are located in South Africa. This investment portfolio grew by 7.1% during the year, in line with our risk appetite framework.

LTVs remain conservative and transactions are supported by strong cash flows. We follow a client-centric approach, backing counterparties with strong balance sheets and requisite expertise.

Private client activities
We have seen continued growth in our private client portfolio and client base as we actively focus on increasing our positioning in this space.

Our high net worth client portfolio and residential mortgage book growth in particular has been encouraging a total increase of 17.2% over the year.

Growth in both of these areas has been achieved with strong adherence to our conservative lending appetite.

Corporate client activities
The overall portfolio continues to perform well and higher levels of activity by mid to large corporates have contributed to growth of 19.9% over the year. Major contributors to growth were renewable energy transactions, corporate facilities and public sector lending.
Credit and counterparty risk information

Pages 7 to 20 describe where and how credit risk is assumed in our operations.

The tables that follow provide an analysis of the credit and counterparty exposures.

An analysis of gross credit and counterparty exposures

Credit and counterparty exposures decreased by 2.4% to £36.7 billion largely as a result of the divestments of Kensington, Start and Investec Bank (Australia) Limited. Cash and near cash balances amount to £10.0 billion and are largely reflected in the following line items in the table below: cash and balances at central banks, loans and advances to banks, non-sovereign and non-bank cash placements and sovereign debt securities.

</table>

1. Largely relates to exposures that are classified as equity risk in the banking book. Further information is provided on pages 44 to 47.
2. Largely relates to impairments.
3. Whilst the group manages all risks (including credit risk) from a day-to-day operational perspective, certain of these assets are within special purpose vehicles that ring-fence the assets to specific credit providers and limit security to the assets in the vehicle. The table above reflects the net credit exposure in the vehicles that the group has reflected in the ‘total credit and counterparty exposure’ with the maximum credit exposure referenced to credit providers external to the group in the column headed ‘assets that we deem to have no legal credit exposure’. Also includes cash in the securitised vehicles.
4. Other assets include settlement debtors which we deem to have no credit risk exposure as they are settled on a delivery against payment basis.
A further analysis of our on-balance sheet credit and counterparty exposures (continued)

1. Largely relates to exposures that are classified as equity risk in the banking book. Further information is provided on pages 44 to 47.
2. Largely relates to impairments.
3. Whilst the group manages all risks (including credit risk) from a day-to-day operational perspective, certain of these assets are within special purpose vehicles that ring-fence the assets to specific credit providers and limit security to the assets in the vehicle. The table above reflects the net credit exposure in the vehicles that the group has reflected in the ‘total credit and counterparty exposure’ with the maximum credit exposure referenced to credit providers external to the group in the column headed ‘assets that we deem to have no legal credit exposure’.
4. Includes net investments in Kensington securitised vehicles to which Investec has no direct exposure. Also includes liquidity facilities provided to third party securitisation vehicles in South Africa. These facilities have remained undrawn and are reflected as a contingent liability, i.e. off-balance sheet exposure of the bank.
5. Other assets include settlement debtors which we deem to have no credit risk exposure as they are settled on a delivery against payment basis.

^ Historically legacy positions to non-target market clients.
^^ Excludes guarantees provided to clients which are backed/secured by cash on deposit with the group.
Private client loans account for 59.0% of total gross core loans and advances, as represented by the industry classification ‘HNW and professional individuals’.

Summary analysis of gross credit and counterparty exposures by industry

A description of the type of private client lending and lending collateralised by property we undertake is provided on page 14, and a more detailed analysis of these loan portfolios are provided on pages 38 to 41.

The remainder of core loans and advances largely relate to corporate client lending and are evenly spread across industry sectors.

Other credit and counterparty exposures are largely reflective of cash and near cash balances held with institutions and central banks, thus the large balance reflected in the ‘public and non-business services’ and ‘finance and insurance’ sectors. These exposures also include off-balance sheet items such as guarantees, committed facilities and contingent liabilities, largely to our HNW and professional individual clients.

A description of the type of corporate client lending we undertake is provided on pages 15 and 16, and a more detailed analysis of the corporate client loan portfolio is provided on pages 38 to 41.

</table>

*Net core loans and advances in the UK have decreased by 14.1% to £7.1 billion at 31 March 2015 from £8.2 billion at 31 March 2014 reflecting the impact of the divestments, but partially offset by increased net loan growth. Excluding divestments, net core loans increased by approximately 16%. Net core loans and advances in South Africa increased by 16% to R182.1 billion at 31 March 2015 from R156.9 billion at 31 March 2014.*  
[^]: Includes Australia, which was previously reported separately.

<td>1.16%**</td>
<td>0.99%</td>
<td>0.28%</td>
</tr>
</tbody>
</table>

** The credit loss ratio is at 1.16% (2014: 0.99%); the increase in the credit loss ratio is largely attributable to the reduction in denominator (gross core loans and advances have decreased to £7.2 billion from £8.4 billion), due to the sale of core loans through the divestments.

^ Includes Australia, which was previously reported separately.

* A large percentage of these exposures (for example bank placements) are to highly rated financial institutions where limited collateral would be required due to the nature of the exposure.
Equity and investment risk in the banking book

Equity and investment risk description

Equity and investment risk in the banking book arises primarily from the following activities conducted within the group:

- **Principal Investments (Private Equity and Direct Investments):** investments are selected based on the track record of management, the attractiveness of the industry and the ability to build value for the existing business by implementing an agreed strategy. In addition, as a result of our local market knowledge and investment banking expertise, we are well positioned to take direct positions in listed shares where we believe that the market is mispricing the value of the underlying portfolio with the intention to stimulate corporate activity. In South Africa, we also continue to pursue opportunities to help create and grow black-owned and controlled companies.

- **Lending transactions:** the manner in which we structure certain transactions results in equity, warrant and profit shares being held, predominantly within unlisted companies.

- **Property activities:** we source development, investment and trading opportunities to create value and trade for profit within agreed risk parameters.

- **Central Funding:** in South Africa Central Funding is the custodian of certain equity and property investments.

Management of equity and investment risk

As equity and investment risk arises from a variety of activities conducted by us, the monitoring and measurement thereof varies across transactions and/or type of activity.

</tbody>
</table>

Risk appetite targets are set to limit our exposure to equity and investment risk. An assessment of exposures against targets as well as stress testing scenario analysis are performed and reported to GRCC, BRCC and the board. As a matter of course, concentration risk is avoided and investments are well spread across geographies and industries.
Valuation and accounting methodologies

For a description of our valuation principles and methodologies refer to pages 24 and 25 in volume three and pages 62 to 73 in volume three for factors taken into consideration in determining fair value.

We have a low level of assets exposed to the volatility of IFRS fair value accounting with level 3 assets amounting to 3.9% of total assets. Refer to page 62 in volume three for further information.

The tables below provide an analysis of income and revaluations recorded with respect to these investments.

* In order to assess our earnings sensitivity to a movement in the valuation of these investments, the following stress testing parameters are applied.
º Restated.
** Includes the investment portfolio and non-current assets classified as held for sale lines as per the balance sheet.
^^ Includes Australia, which was previously reported separately.
^ For the purposes of the above analysis, the exposures arising from the consolidation of the Investec Property Fund have been reflected at the level of our economic ownership, being 33.1% in 2015 and 44.3% in 2014.

Stress testing summary

Based on the information at 31 March 2015, as reflected above, we could have a £261 million reversal in revenue (which assumes a year in which there is a ‘severe stress scenario’ simultaneously across all asset classes). This would not cause the group to report a loss, but could have a significantly negative impact on earnings for that period. The probability of all these asset classes in all geographies in which we operate being negatively impacted at the same time is very low, although the probability of listed equities being negatively impacted at the same time is very high.

Capital requirements

In terms of Basel III capital requirements for Investec Limited, unlisted and listed equities within the banking book are represented under the category of ‘equity risk’ and investment properties, profit shares and embedded derivatives are considered in the calculation of capital required for credit risk. In terms of CRD IV capital requirements for Investec plc, unlisted and listed equities within the banking book are considered in the calculation of capital required for credit risk.

Refer to page 88 for further detail.

Securitisation/structured credit activities exposures

Overview

The group’s definition of securitisation/structured credit activities (as explained below) is wider than the definition as applied for regulatory capital purposes, which largely focuses on those securitisations in which the group has achieved significant risk transfer. We, however, believe that the information provided below is meaningful in that it groups all these related activities in order for a reviewer to obtain a fuller picture of the activities that we have conducted in this space. Some of the information provided below overlaps with the group’s credit and counterparty exposure information.

Refer to page 23 for the balance sheet and credit risk classification.

The group applies the standardised approach in the assessment of regulatory capital for securitisation exposures within its banking book and trading book. The trading book exposures at 31 March 2015 are not regarded as material, and therefore no further information is disclosed for these exposures.

The information below sets out the initiatives we have focused on over the past few years, albeit that most of these business lines have been curtailed given the changes in the securitisation market and given the strategic divestments Investec has undertaken last year.

UK and Other

The bank plays an originator role in the securitisation of assets it has originated. To date these have largely been traditional securitisations of residential mortgages originated through the Kensington business which was disposed of in January 2015.

For regulatory purposes, structured entities are not consolidated where significant risk in the structured entities has been transferred to third parties. The positions we continue to hold in the securitisation will be either risk-weighted and/or deducted from capital.

The bank has no securitisations backed by revolving exposures.

Fitch Ratings, Moody’s, S&P and DBRS have been involved in rating these abovementioned transactions.

During the year we undertook one new securitisation transaction – Temese Funding 2 Plc, a £280 million securitisation of finance lease receivables which closed in November 2014. The deal consists of a £228 million A note (AAA rated by S&P) and unrated B and C notes of £47 million and £5.3 million, respectively. All of the notes issued by the structure were retained by Investec Bank plc. The purpose of the transaction was for long-term funding at an attractive rate. The group does not apply the securitisation rules to the above originated transactions when calculating risk-weighted assets. For regulatory capital purposes, the group continues to recognise the underlying securitised assets in the consolidated regulatory balance sheet and applies the standardised credit risk rules.

We hold rated structured credit instruments (including resecuritisation exposures). These exposures are largely in the UK and amount to £317 million at 31 March 2015 (31 March 2014: £349 million). This is intended as a hold to maturity portfolio rather than a trading portfolio. Therefore, since our commercial intention is to hold the assets to maturity, the portfolio will be valued on an amortised cost basis. These investments are risk weighted for regulatory capital purposes.

In the prior year we held £8 million rated securitised assets and £448 million of own originated private client assets, relating to Australia’s professional finance business. This business and our residual exposures were sold in July 2014.

In the prior year we held residual net exposures amounting to £927 million to the assets originated, warehoused and securitised by Kensington. This business and our residual exposures were sold in January 2015.

South Africa

In South Africa, our securitisation business was established over 15 years ago. Over this time, we have arranged a number of residential and commercial mortgage-backed programmes, asset-backed commercial paper conduits (ABCP), and third party securitisations.

Historically, we have also assisted in the development of select securitisation platforms with external third party originating intermediaries. Our exposure to these platforms has reduced and been sold down over the last few years and at present we have a single limited warehouse funding line to one platform.

Furthermore, we are sponsor to and provide a standby liquidity facility to Private Mortgages 1. This facility, which totalled R0.2 billion at 31 March 2015 (31 March 2014: R1.3 billion), has not been drawn on and is reflected as off-balance sheet contingent exposures in terms of our credit analysis.

Refer to pages 50 and 51.

This exposure is risk weighted for regulatory capital purposes. The liquidity risk associated with this facility is included in the stress testing for the group and is managed in accordance with our overall liquidity position.

We have also sought out select opportunities in the credit/debt markets and traded and purchased in structured credit. These have largely been rated instruments within the UK and Europe, totalling R1.4 billion at 31 March 2015 (31 March 2014: R3.5 billion). We sold a number of these investments during the year. These investments are risk weighted for regulatory capital purposes.

In addition, we have our own originated, securitised assets in our Private Client business in South Africa. The primary motivations for the securitisation of assets within our Private Client division are to:

- Provide an alternative source of funding
- Act as a mechanism to transfer risk
- Leverage returns through the retention of equity tranches in low default rate portfolios.
Total assets that have been originated and securitised by the Private Client division amount to R8.1 billion at 31 March 2015 (31 March 2014: R7.5 billion) and consist of residential mortgages (R8.1 billion). Within these securitisation vehicles loans greater than 90 days in arrears amounted to R24.1 million.

Private Residential Mortgages (PRM) Limited – Series 2 (PRM2) was refinanced internally for R3.46 billion in June 2014. During the year we arranged two new Investec Private Client originated residential mortgage securitisation transactions, namely, Fox Street 3 (RF) Limited (FS3 for R1.95 billion), and Fox Street 4 (RF) Limited (FS4 for R3.73 billion). These two RMBS transactions were structured as amortising transactions and the notes are held internally by Investec in order to make use of the SARB’s committed liquidity facility (CLF). FS1 to FS4 are rated by Fitch. The group has acted as sole originator and sponsor in these securitisation transactions, which are considered to be traditional securitisations and in which a complete transfer of risk has deemed to have occurred for regulatory capital purposes. The group has retained an investment in all of these transactions. In terms of current securitisation rules, the group cannot act as liquidity provider to these transactions, and thus for these Fox Street structures, the special purpose entity has an internal liquidity reserve that has been funded. Credit mitigants have not been used in these transactions. An exemption notice in terms of securitisation rules has been applied for in relation to all the transactions.

For regulatory capital purposes, the majority of these transactions are treated as deductions against capital. The group has no resecuritisation exposures in South Africa.

**Accounting policies**

Refer to page 25 in volume three.

**Risk management**

All existing or proposed exposures to a securitisation or a resecuritisation are analysed on a case-by-case basis, with final approval typically required from the group’s global credit committee. The analysis looks through to the historical and expected future performance of the underlying assets, the position of the relevant tranche in the capital structure as well as analysis of the cash flow waterfall under a variety of stress scenarios. External ratings are presented, but only for information purposes since the bank principally relies on its own internal risk assessment. Overarching these transaction level principles is the board-approved risk appetite policy, which details the group’s appetite for such exposures, and each exposure is considered relative to the group’s overall risk appetite. We can use explicit credit risk mitigation techniques where required, however, the group prefers to address and manage these risks by only approving exposures to which the group has explicit appetite through the constant and consistent application of the risk appetite policy.

**In addition, securitisations of Investec own originated assets are assessed in terms of the credit risk management philosophies and principles as set out on page 48.**

**Credit analysis**

In terms of our analysis of our credit and counterparty risk, exposures arising from securitisation/structured credit activities reflect only those exposures to which we consider ourselves to be at risk. In addition, assets that have been securitised by our Private Client division are reflected as part of our core lending exposures and not our securitisation/structured credit exposures as we believe this reflects the true nature and intent of these exposures and activities.

Risk management (continued)

Market risk in the trading book

Traded market risk description
Traded Market Risk is a measure of potential change in the value of a portfolio of instruments as a result of changes in the financial environment (resulting from changes in underlying market risk factors, such as interest rates, equity markets, bond markets, commodity markets, exchange rates and volatilities) between now and a future point in time. The Market Risk Management team identifies, quantifies and manages the effects of these potential changes in accordance with Basel and policies determined by the board.

Within our trading activities, we act as principal with clients or the market. Market risk, therefore, exists where we have taken on principal positions, resulting from proprietary trading, market making, arbitrage, underwriting and investments in the foreign exchange, capital and money markets. The focus of these businesses is primarily on supporting client activity. Our strategic intent is that proprietary trading should be limited and that trading should be conducted largely to facilitate clients in deal execution.

Traded market risk governance structure
To manage, measure and mitigate market risk, we have independent Market Risk Management teams in each geography where we assume market risk. Local limits have been set to keep potential losses within acceptable risk tolerance levels. A global market risk forum (mandated by the various boards of directors) manages the market risks in accordance with pre-approved principles and policies. Risk limits are reviewed and set at the global market risk forum and ratified at the ERRF in accordance with the risk appetite defined by the board. Limits are reviewed at least annually or in the event of a significant market event (e.g. 11 September 2001) or at the discretion of senior management.

Management and measurement of traded market risk
Market Risk Management teams review the market risks on our books. Detailed risk reports are produced daily for each trading desk and for the aggregate risk of the trading book.

These reports are distributed to management and traders. There is a formal process for management recognition and authorisation for any risk excesses incurred. The production of risk reports allows for the monitoring of every instrument traded against prescribed limits. Valuation models for new instruments or products are independently validated by Market Risk before trading can commence. Each traded instrument undergoes various stresses to assess potential losses. Each trading desk is monitored on an overall basis as an additional control. Trading limits are generally tiered with the most liquid and least ‘risky’ instruments being assigned the largest limits.

The Market Risk Management teams perform a profit attribution, where our daily traded revenue is attributed to the various underlying risk factors on a day-to-day basis. An understanding of the sources of profit and loss is essential to understanding the risks of the business.

Measurement techniques used to quantify market risk arising from our trading activities include sensitivity analysis, value at risk (VaR), stressed VaR (sVaR), expected tail loss (ETL) and extreme value theory (EVT). Stress testing and scenario analysis are used to simulate extreme conditions to supplement these core measures. VaR numbers are monitored daily at the 95%, 99% and 100% (maximum loss) confidence intervals, with limits set at the 95% confidence interval. ETLs are also monitored daily at the 95% and 99% levels. Scenario analysis considers the impact of a significant market event on our current trading portfolios. We consider the impact for the 10 days after the event, not merely the instantaneous shock to the markets.

Included in our scenario analysis are for example the following: October 1987 (Black Monday), 11 September 2001, the December Rand crisis in 2001 and the Lehmans crisis. We also consider the impact of extreme yet plausible future economic events on the trading portfolio as well as possible worst case (not necessarily plausible) scenarios. Scenario analysis is done once a week and is included in the data presented to ERRF.

All VaR models, while forward-looking, are based on past events and depend on the quality of available market data. The accuracy of the VaR model as a predictor of potential loss is continuously monitored through backtesting. This involves comparing the hypothetical (clean) trading revenues arising from the previous day’s closing positions with the one-day VaR calculated for the previous day on these same positions. If the revenue is negative and exceeds the one-day VaR, a ‘backtesting breach’ is considered to have occurred. Over time we expect the average rate of observed backtesting breaches to be consistent with the percentile of the VaR statistic being tested.

In South Africa, we have internal model approval from the SARB and so trading capital is calculated as a function of the 99% 10-day VaR as well as the 99% 10-day sVaR. Backtesting results and a detailed stress-testing pack are submitted to the regulator on a monthly basis. In the UK, the market risk capital requirement is measured using an internal risk management model, approved by the PRA, for netting certain parts of the portfolio, whilst the capital requirements of the whole portfolio are calculated using standard rules.

The graphs that follow show the result of backtesting total daily VaR against profit and loss figures for our trading activities over the reporting period. The values shown are for the 99% one-day VaR, i.e. 99% of the time, the total trading activities will not be expected to lose more than the values depicted below. Based on these graphs, we can gauge the accuracy of the VaR figures.

* The consolidated VaR for each entity is lower than the sum of the individual VaRs. This arises from the consolidation offset between various asset classes (diversification).

^ Where 31 March 2015 includes Australia and 31 March 2014 excludes Australia. Australia consolidated VaR at 31 March 2014 was A$45 600.

### UK and Other**

The average VaR utilisation was lower than in 2014, largely as a result of a reduction in risk in the Structured Equity business. Using hypothetical (clean) profit and loss data for backtesting resulted in one exception over the year at the 99% confidence level, i.e. where the loss was greater than the 99% one-day VaR. This is less than expected at the 99% level and is largely due to continued subdued volatility levels over most of the past year.

### 99% one-day VaR backtesting

** Includes Australia, which was previously reported separately.
Southern Africa
VaR for 2015 in the South African trading book was marginally higher than 2014. Using hypothetical (clean) profit and loss data for backtesting resulted in two exceptions (as shown in the graph below), which is in line with the two to three exceptions that a 99% VaR implies. The exceptions were due to normal trading losses.

* The consolidated ETL for each entity is lower than the sum of the individual ETLs. This arises from the correlation offset between various asset classes.

** Where 31 March 2015 includes Australia and 31 March 2014 excludes Australia, Australia consolidated ETL at 31 March 2014 was A$72 600.

### Stress testing

The table below indicates the potential losses that could arise if the portfolio is stress tested under extreme market conditions. The method used is known as extreme value theory (EVT), the reported stress scenario below calculates the 99% EVT which is a 1-in-8 year possible loss event. These numbers do not assume normality but rather rely on fitting a distribution to the tails of the distribution.

Profit and loss histograms

UK and Other^  
The histogram below illustrates the distribution of revenue during the financial year for our trading businesses. The distribution is skewed to the profit side and the graph shows that positive trading revenue was realised on 161 days out of a total of 253 days in the trading business. The average daily trading revenue generated for the year to 31 March 2015 was £162,486 (2014: £132,949).

Southern Africa  
The histogram below illustrates the distribution of daily revenue during the financial year for our trading businesses. The distribution is skewed to the profit side and the graph shows that positive trading revenue was realised on 189 days out of a total of 250 days in the trading business. The average daily trading revenue generated for the year to 31 March 2015 was R1.5 million (2014: R1.4 million).

^ Includes Australia, which was previously reported separately.
Risk management (continued)

Traded market risk mitigation

The Market Risk Management team has a reporting line that is separate from the trading function, thereby ensuring independent oversight. The risk management software runs independently from source trading systems and values all trades separately. The values from the two systems are reconciled daily. The values from the risk system are also used for profit attribution, another risk management tool.

Risk limits are set according to guidelines set out in our risk appetite policy and are calculated on a statistical and non-statistical basis. Statistical limits include VaR and ETL analyses at various confidence intervals. Historical VaR is used (over 510 days of unweighted data), where every ‘risk factor’ is exposed to daily moves over a sample period. With the equity markets, for example, the price history for every share and index is taken into account as opposed to techniques where a reduced set of proxies are used.

Non-statistical limits include limits on risk exposure to individual products, transaction tenors, notional amounts, liquidity, buckets and option sensitivities (greeks). When setting and reviewing these limits, current market conditions are taken into account. Bucket limits are set on time buckets, generally at three-month intervals out to two years and then, on a less granular basis, out to 30 years.

It is risk policy that any significant open position in a foreign currency is held in the trading book. These positions are managed within approved limits and monitored within VaR models.

Traded market risk year in review

Trading conditions have remained difficult. Traders have had to contend with very uncertain markets as well as declining market liquidity. While client flow has been under pressure, Investec remains committed to trading on client flow and not proprietary trading. The equity derivatives business has continued to grow both their product offering and the diversity of their client base. Currency markets have generally been illiquid and volatile. Corporate foreign exchange volumes are up leading to increased revenue, however, profit margins have tightened. The trend of low discretionary risk taking in local rates continued in the past year. Little uncertainty and stable interest rates in the local rate environment has not encouraged corporate hedging activity.

In London, there continues to be ongoing growth in client activity across the interest rate and foreign exchange corporate sales desks. The structured equity desk’s retail product sales have remained strong, consistent with the performance of underlying equity markets, and the desk continues to develop both their product range and distribution capacity across geographies. Equity market making has further expanded its coverage of stocks listed in the United Kingdom, Ireland and South Africa. Market risk exposures across all asset classes have remained small throughout the year.

In June 2014 responsibility for managing the market risk in the Australian portfolio was transferred to London.

Risk management (continued)

Market risk – derivatives

We enter into various derivatives contracts, largely on the back of customer flow for hedging foreign exchange, commodity, equity and interest rate exposures and to a small extent as principal for trading purposes. These include financial futures, options, swaps and forward rate agreements. The risks associated with derivative instruments are monitored in the same manner as for the underlying instruments. Risks are also measured across the product range to take into account possible correlations.

Information showing our derivative trading portfolio over the reporting period on the basis of the notional principal and the fair value of all derivatives can be found on pages 76 and 77 in volume three.

The notional principal indicates our activity in the derivatives market and represents the aggregate size of total outstanding contracts at year end. The fair value of a derivative financial instrument represents the present value of the positive or negative cash flows which would have occurred had we closed out the rights and obligations arising from that instrument in an orderly market transaction at year end. Both these amounts reflect only derivatives exposure and exclude the value of the physical financial instruments used to hedge these positions.

Balance sheet risk management

Balance sheet risk description

Balance sheet risk encompasses the financial risks relating to our asset and liability portfolios, comprising market liquidity, funding, concentration, non-trading interest rate and foreign exchange risks on balance sheet, encumbrance and leverage.

Balance sheet risk governance structure and risk mitigation

Under delegated authority of the board, the group has established asset and liability management committees (ALCOs) within each core geography in which it operates, using regional expertise and local market access as appropriate. The ALCOs are mandated to ensure independent supervision of liquidity risk and non-trading interest rate risk within a board-approved risk appetite.

The size, materiality, complexity, maturity and depth of the market as well as access to stable funds are all inputs considered when establishing the liquidity and non-trading interest rate risk appetite for each geographic region. Specific statutory requirements may further dictate special policies to be adopted in a region.

Detailed policies cover both domestic and foreign currency funds and set out sources and amounts of funds necessary to ensure the continuation of our operations without undue interruption. We aim to match-fund in currencies, other than the domestic currency, where it is practical and efficient to do so and hedge any residual currency exchange risk arising from deposit and loan banking activities.

The group’s liquidity policy requires each geography to be self-funding so that there is no reliance on inter-group lines either from or to other group entities.

Geographic entities have no responsibility for contributing to group liquidity.

The ALCOs typically comprise the group risk and finance director, the head of risk, the head of Corporate and Institutional Banking activities and private banking, economists, divisional heads, the balance sheet risk management team, the treasurer and business heads. The ALCOs formally meet on a monthly basis to review the exposures that lie within the balance sheet together with market conditions, and decide on strategies to mitigate any undesirable liquidity and interest rate risk. The Central Treasury function within each region is mandated to holistically manage the liquidity mismatch and non-trading interest rate risk arising from our asset and liability portfolios on a day-to-day basis.

The treasurers are required to exercise tight control of funding, liquidity, concentration and non-trading interest rate risk within parameters defined by the board-approved risk appetite policy. Non-trading interest rate risk and asset funding requirements are transferred from the originating business to the treasury function.

The Central Treasury, by core geography, directs pricing for all deposit products (including deposit products offered to the private clients), establishes and maintains access to stable wholesale funds with the appropriate tenor and pricing characteristics, and manages liquid securities and collateral, thus providing prudential management and a flexible response to volatile market conditions.

The Central Treasury functions are the sole interface to the wholesale market for both cash and derivative transactions.

We maintain an internal funds transfer pricing system based on prevailing market rates. Our funds transfer pricing system charges the businesses the price of short-term and long-term liquidity taking into account the behavioural duration of the asset. The costs and risks of liquidity are clearly and transparently attributed to business lines and are understood by business line management, thereby ensuring that price of liquidity is integrated into business level decision-making and drives the appropriate mix of sources and uses of funds.

The Balance Sheet Risk Management team, in their respective geographies based within Group Risk Management, independently identify, quantify and monitor risks, providing daily independent governance and oversight of the treasury activities and the execution of the bank’s policy, continuously assessing the risks whilst taking changes in market conditions into account. In carrying out its duties, the Balance Sheet Risk Management team monitors historical liquidity trends, tracks prospective on- and off-balance sheet liquidity obligations, identifies and measures internal and external liquidity warning signals which permit early detection of liquidity issues through daily liquidity reporting, and further perform scenario analysis which quantifies our exposure, thus providing a comprehensive and consistent governance framework. The Balance Sheet Risk Management team proactively identifies proposed regulatory developments, best risk practice, and measures adopted in the broader market, and implements changes to the bank’s risk management and governance framework where relevant.

Scenario modelling and rigorous daily liquidity stress tests are designed to measure and manage the liquidity position such that payment obligations can be met under a wide range of normal company-specific and market-driven stress scenarios. These assume the rate and timing of deposit withdrawals and drawdowns on lending facilities are varied, and the ability to access funding and to generate funds from asset portfolios is restricted.

The parameters used in the scenarios are reviewed regularly, taking into account
changes in the business environments and input from business units. The objective is to analyse the possible impact of economic event risk on cash flows, liquidity, profitability and solvency position, so as to maintain sufficient liquidity, in an acute stress, to continue to operate for a minimum period as detailed in the board-approved risk appetite.

The integrated balance sheet risk management framework is based on similar methodologies to those contemplated under the Basel Committee on Banking Supervision’s (BCBS) ‘liquidity risk measurement standards and monitoring’.

It is compliant with the ‘principles of sound liquidity risk management and supervision’ as well as ‘guidelines for the management of interest rate risk in the banking book’. The BCBS announced that they propose to both strengthen and harmonise global liquidity standards and plan to introduce two new liquidity standards. The Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) are due to be implemented by 2015 and 2018, respectively. The BCBS published the final calibration of the LCR in January 2013 to be phased in from 2015 and the final consultation paper for the NSFR was published in October 2014.

Each banking entity within the group maintains a contingency funding plan designed to protect depositors, creditors and shareholders and maintain market confidence during adverse liquidity conditions and pave the way for the group to emerge from a potential funding crisis with the best possible reputation and financial condition for continuing operations. The liquidity contingency plans outline extensive early warning indicators, clear lines of communication, and decisive crisis response strategies.

There is a regular internal audit of the Balance Sheet Risk Management function, the frequency of which is determined by the independent audit committees.

The group operates an industry-recognised third party risk modelling system in addition to custom-built MIS systems designed to identify, measure, manage and monitor liquidity risk on both a current and forward looking basis. The system is reconciled to the bank’s general ledger and audited by Internal Audit thereby ensuring integrity of the process.

Daily, weekly and monthly reports are independently produced highlighting bank activity, exposures and key measures against thresholds and limits and are distributed to management, ALCO, the Central Treasury function, ERF, GRCC, BRCC and the board.

Statutory reports are submitted to the relevant regulators in each jurisdiction within which we operate.

Non-trading interest rate risk description

Non-trading interest rate risk, otherwise known as interest rate risk in the banking book, is the impact on net interest earnings and sensitivity to economic value as a result of unexpected adverse movements in interest rates arising from the execution of our core business strategies and the delivery of products and services to our customers.

Sources of interest rate risk include:

- **Repricing risk**: arises from the timing differences in the fixed rate maturity and floating rate repricing of bank assets, liabilities and off-balance sheet derivative positions. This affects the interest rate margin realised between lending income and borrowing costs when applied to our rate sensitive portfolios.
- **Yield curve risk**: repricing mismatches also expose the bank to changes in the slope and shape of the yield curve.
- **Basis risk**: arises from imperfect correlation in the adjustments of the rates earned and paid on different instruments with otherwise similar repricing characteristics.
- **Embedded option risk**: we are not materially exposed to embedded option risk, as contract breakage penalties on fixed-rate advances specifically cover this risk, while prepayment optionality is restricted to variable rate contracts and has no impact on interest rate risk.
- **Endowment risk**: refers to the interest rate risk exposure arising from the net differential between interest rate insensitive assets, interest rate insensitive liabilities and capital.

The above sources of interest rate risk affect the interest rate margin realised between lending income and borrowing costs, when applied to our rate sensitive asset and liability portfolios, which has a direct effect on future net interest income and the economic value of equity.

Management and measurement of non-trading interest rate risk

Non-trading interest rate risk in the banking book is an inherent consequence of conducting banking activities, and arises from the provision of retail and wholesale (non-trading) banking products and services. The group considers the management of banking margin of vital importance, and our core non-trading interest rate risk policy is reflected in day-to-day practices which encompass the following:

- The group complies with the BCBS framework for assessing banking book (non-trading) interest rate risk.
- The management of interest rate risk in the banking book is centralised within the Central Treasury function and treasury is mandated by the board to actively manage the liquidity mismatch and non-trading interest rate risk arising from our asset and liability portfolios.
- The treasurer is required to exercise tight control of funding, liquidity, concentration and non-trading interest rate risk within parameters defined by the risk appetite policy.
- The non-trading interest rate risk appetite has been set based on the loss under a worst-case 200bps parallel shock as a percentage of capital. This level applies to both earnings risk and economic value risk.
- Internal capital is allocated for non-trading interest rate risk.
- The non-trading interest rate risk policy dictates that long-term non-trading interest rate risk is materially eliminated. In accordance with the policy the bank swaps its fixed deposits and loans into variable rate in the wholesale market via interest rate swaps.
- Together with the business, the treasurer develops strategies regarding changes in the volume, composition, pricing and interest rate characteristics of assets and liabilities to mitigate the interest rate risk and ensure a high degree of net interest margin stability over an interest rate cycle. These are presented, debated and challenged in the liability product and pricing forum and ALCO.
- It is the responsibility of the liability product and pricing forum, a sub-committee of ALCO, to review the liquidity, interest rate and concentration.
Risk management (continued)

Characteristics of all new products and approve their issuance, ensuring that both standard and non-standard deposit products, particularly those designed for the Private Banking customers, both match market curves and can be hedged if necessary.

- Pricing for all deposit products (including deposit products offered to the private clients) is set centrally. In so doing we manage access to funding at cost-effective levels, considering also the stressed liquidity value of the liabilities.

- Balance Sheet Risk Management independently measures and analyses both traditional interest rate repricing mismatch and net present value (NPV) sensitivity to changes in interest rate risk factors, detailing the sources of interest rate exposure.

- The bank maintains an internal funds transfer pricing system based on prevailing market rates which charges out the price of long- and short-term funding to consumers of liquidity and provides long-term stable funding for our asset creation activity.

- Daily management of interest rate risk is centralised within Treasury and is subject to independent ALCO review.

- Treasury is the primary interface to the wholesale market.

- We carry out technical interest rate analysis and economic review of fundamental developments by geography and global trends.

Non-trading interest rate risk is measured and analysed by utilising standard tools of traditional interest rate repricing mismatch and NPV sensitivity to changes in interest rate risk factors. We detail the sources of interest rate exposure, whether repricing risk, yield curve risk, basis risk or embedded option risk. This is performed for a variety of interest rate scenarios, covering:

- Interest rate expectations and perceived risks to the central view.
- Standard shocks to levels and shapes of interest rates and yield curves.
- Historically-based yield curve changes.

This is consistent with the standardised interest rate measurement recommended by the Basel framework for assessing interest rate risk in the banking book (non-trading interest rate risk).

The aim is to protect and enhance net interest income and economic value in accordance with the board-approved risk appetite and ensure a high degree of net interest margin stability over an interest rate cycle. Economic value measures have the advantage that all future cash flows are considered and therefore can highlight risk beyond the earnings horizon. The repricing gap provides a basic representation of the balance sheet, with the sensitivity of earnings to changes in interest rates calculated off the repricing gap. This allows for the detection of interest rate risk by concentration of repricing buckets. Net interest income sensitivity measures the change in accruals expected over the specified horizon in response to a shift in the yield curve, whilst economic value sensitivity and stress testing to macro-economic movement or changes to the yield curve measures the interest risk implicit change in net worth as a result of a change in interest rates on the current values of financial assets and liabilities.

Technical interest rate analysis and economic review of fundamental developments are used to estimate a set of forward-looking interest rate scenarios incorporating movements in the yield curve level and shape, after taking global trends into account.

These combinations of measures provide senior management (and the ALCOs) with an assessment of the financial impact of identified rate changes on potential future net interest income and sensitivity to changes in economic value.

Our risk appetite policy requires that interest rate risk arising from fixed interest loans is transferred from the originating business to the Central Treasury function by match-funding. In turn, Treasury hedges material fixed rate assets with a term of more than one year on a deal-by-deal basis with the use of variable versus fixed interest rate swaps. The market for these vanilla swaps is deep, with the result that such hedging is efficient. Likewise, Treasury also hedges all fixed rate deposits with a term of more than one year to variable rate. These derivative hedging trades are executed with the bank’s Interest Rate Trading desk. Limits exist to ensure there is no undesired risk retained within any business or product area.

Operationally, non-trading interest rate risk is transferred within pre-defined guidelines from the originating business to the Central Treasury function and aggregated or netted providing Central Treasury with a holistic view of the exposure. Treasury then implements appropriate balance sheet strategies to achieve a cost-effective source of funding and mitigates any residual undesirable risk where possible, by changing the duration of the banking group’s discretionary liquid asset portfolio, or through derivative transactions which transfer the risk into the trading books within the Corporate and Institutional Banking division to be traded with the external market. The treasury mandate allows for a tactical response to market opportunities which may arise during changing interest rate cycles. Any resultant interest rate position is managed under the market risk limits.

Investec has a relatively small endowment risk due to paying market rates on all deposits, compared to banks with significant low or non-interest-bearing current and cheque accounts. Endowment risk due to free funding, comprising mainly ordinary share capital and reserves, is managed passively, with the focus on measuring and monitoring. The endowment risk is included within our non-trading interest rate risk measures.

The Basel Financial Market Committee has indicated that after completing and embedding the current reforms (covering capital, leverage and liquidity), the capital framework for interest rate risk on the banking book will be revisited. In part this is due to the increase in the quantum of high-quality liquid assets (HQLA) which banks will need to hold in meeting the new liquidity ratios and the potential increase in interest rate risk thereon.

The expectation is that Basel will produce additional consultation documents in the next year on minimum standards for interest rate measurement in the banking book.
Interest rate sensitivity gap

The tables below show our non-trading interest rate mismatch. These exposures affect the interest rate margin realised between lending income and borrowing costs assuming no management intervention.

Risk management (continued)

Economic value sensitivity at 31 March 2015

For the reasons outlined above, our preference for monitoring and measuring non-trading interest rate risk is economic value sensitivity. The tables below reflect our economic value sensitivity to a 2% parallel shift in interest rates assuming no management intervention. The numbers represent the change to the value of the interest rate sensitive portfolios should such a hypothetical scenario arise. This sensitivity effect does not have a significant direct impact on our equity.

Liquidity risk

Liquidity risk description

Liquidity risk is the risk that, despite being solvent, we have insufficient capacity to fund increases in assets, or are unable to meet our payment obligations as they fall due, without incurring unacceptable losses. This includes repaying depositors or maturing wholesale debt. This risk is inherent in all banking operations and can be impacted by a range of institution-specific and market-wide events.

Liquidity risk is further broken down into:

- **Funding liquidity**: which relates to the risk that the bank will be unable to meet current and/or future cash flow or collateral requirements in the normal course of business, without adversely affecting its financial position or its reputation.

- **Market liquidity**: which relates to the risk that the bank may be unable to trade in specific markets or that it may only be able to do so with difficulty due to market disruptions or a lack of market liquidity.

Sources of liquidity risk include:

- Unforeseen withdrawals of deposits

- Restricted access to new funding with appropriate maturity and interest rate characteristics

- Inability to liquidate a marketable asset in a timely manner with minimal risk of capital loss

- Unpredicted customer non-payment of loan obligations

- A sudden increased demand for loans in the absence of corresponding funding inflows of appropriate maturity

Management and measurement of liquidity risk

Maturity transformation performed by banks is a crucial part of financial intermediation that contributes to efficient resource allocation and credit creation.

Cohesive liquidity management is vital for protecting our depositors, preserving market confidence, safeguarding our reputation and ensuring sustainable growth with established funding sources. Through active liquidity management, we seek to preserve stable, reliable and cost-effective sources of funding. Inadequate liquidity can bring about the untimely demise of any financial institution. As such, the group considers ongoing access to appropriate liquidity for all its operations to be of paramount importance, and our core liquidity philosophy is reflected in day-to-day practices which encompass the following robust and comprehensive set of policies and procedures for assessing, measuring and controlling the liquidity risk:

- **Our liquidity management processes encompass principles set out by the regulatory authorities in each jurisdiction, namely the PRA, SARB, the Bank of Mauritius, Guernsey Financial Services and Swiss Financial Supervisory Authority**

- **The group complies with the BCBS Principles for Sound Liquidity Risk Management and Supervision**

- The group has committed itself to implementation of the updated BCBS guidelines for liquidity risk measurement, standards and monitoring to be phased in from 2015

- The risk appetite is clearly defined by the board and each geographic entity must have its own board-approved policies with respect to liquidity risk management

- Each geographic entity must be self-sufficient from a funding and liquidity standpoint so that there is no reliance on intergroup lines either from or to other group entities

- Geographic entities have no responsibility for contributing to group liquidity

- We maintain a liquidity buffer in the form of unencumbered, cash, government or rated securities (typically eligible for repurchase with the central bank), and near cash well in excess of the statutory requirements as protection against unexpected disruptions in cash flows

- Funding is diversified with respect to currency, term, product, client type and counterparty to ensure a satisfactory overall funding mix

- We monitor and evaluate each banking entity’s maturity ladder and funding gap (cash flow maturity mismatch) on a ‘liquidation’, ‘going concern’ and ‘stress’ basis
Risk management (continued)

- Daily liquidity stress tests are carried out to measure and manage the liquidity position such that payment obligations can be met under a wide range of normal and unlikely but plausible stressed scenarios, in which the rate and timing of deposit withdrawals and drawdowns on lending facilities are varied, and the ability to access funding and to generate funds from asset portfolios is restricted. The objective is to have sufficient liquidity, in an acute stress, to continue to operate for a minimum period as detailed in the board-approved risk appetite.

- Our liquidity risk parameters reflect a collection of liquidity stress assumptions which are reviewed regularly and updated as needed. These stress factors go well beyond our experience during the height of the recent financial crisis.

- The Balance Sheet Risk Management team independently monitors key daily funding metrics and liquidity ratios to assess potential risks to the liquidity position, which further act as early warning indicators to potential normal market disruption.

- The group centrally manages access to funds in both domestic and offshore markets through the Corporate and Institutional Banking division.

- The maintenance of sustainable prudent liquidity resources takes precedence over profitability.

- Each major banking entity maintains an internal funds transfer pricing system based on prevailing market rates. The treasury function charges out the price of long- and short-term funding to internal consumers of liquidity, which ensures that the costs, benefits, and risks of liquidity are clearly and transparently attributed to business lines and are understood by business line management. The funds transfer pricing methodology is designed to signal the right incentive to our lending business.

- The group maintains adequate contingency funding plans designed to protect depositors, creditors and shareholders and maintain market confidence during adverse liquidity conditions.

Our liquidity risk management reflects evolving best practice standards in light of the challenging environment. Liquidity risk management encompasses the ongoing management of structural, tactical day-to-day and contingent stress liquidity.

Management uses assumptions-based planning and scenario modelling that considers market conditions, prevailing interest rates and projected balance sheet growth, to estimate future funding and liquidity needs whilst taking the desired nature and profile of liabilities into account. These metrics are used to develop our funding strategy and measure and manage the execution thereof. The funding plan details the proportion of our external assets which are funded by customer liabilities, unsecured wholesale debt, equity and loan capital, thus maintaining an appropriate mix of structural and term funding, resulting in strong balance sheet liquidity ratios.

We measure liquidity risk by quantifying and calculating various liquidity risk metrics and ratios to assess potential risks to the liquidity position. Metrics and ratios include:

- Local regulatory requirements
- Contractual run-off based actual cash flows with no modelling adjustment
- ’Business as usual’ normal environment where we apply rollover and reinvestment assumptions under benign market conditions
- Stress conditions based on statistical historical analysis, documented experience and prudent judgement
- Basel standards for liquidity measurement:
  - Liquidity Coverage Ratio (LCR)
  - Net Stable Funding Ratio (NSFR)
- Quantification of a ‘survival horizon’ under stress conditions. The survival horizon is the number of business days it takes before the bank’s cash position turns negative based on statistical historical analysis, documented experience and prudent judgement
- Other key funding and balance sheet ratios
- Monitoring and analysing market trends and the external environment.

This ensures the smooth management of the day-to-day liquidity position within conservative parameters and further validates that we are able to generate sufficient liquidity to withstand short-term liquidity stress or market disruptions in the event of either a firm-specific or general market contingent event.

We maintain a funding structure with stable private client deposits and long-term wholesale funding well in excess of illiquid assets. We target a diversified funding base, avoiding undue concentrations by investor type, maturity, market source, instrument and currency. This validates our ability to generate funding from a broad range of sources in a variety of geographic locations, which enhances financial flexibility and limits dependence on any one source so as to ensure a satisfactory overall funding mix to support loan growth.

We acknowledge the importance of our private client base as the principal source of stable and well diversified funding for Investec’s risk assets. We continue to develop products to attract and service the investment needs of our Private Bank client base. Although the contractual repayments of many Private Bank customer accounts are on demand or at short notice, in practice such accounts remain a stable source of funds. We continued to successfully raise private client deposits despite competitive pressures with total deposits (excluding divestments of businesses) increasing by 7.3% to £22.6 billion at 31 March 2015. The growth in retail deposits benefited from the wider macro-economic trend of expanded money supply, customer deleveraging and loan growth. We also have a number of innovative retail deposit initiatives within our Private Banking division and these continued to experience strong inflows during the financial year. On average our fixed and notice customer deposits have amounted to approximately 84% of total deposits since April 2006 for Investec plc, thereby displaying a strong ‘stickiness’ and willingness to reinvest by our retail customers.

Entities within the group actively participate in global financial markets and our relationship is continuously enhanced through regular investor presentations internationally. Entities are only allowed to have funding exposure to wholesale markets where they can demonstrate that the market is sufficiently deep and liquid, and then only relative to the size and complexity of their business. We have instituted various offshore syndicated loan programmes to broaden and diversify term funding in supplementary markets and currencies, enhancing the proven capacity to borrow in the money markets. The group remains committed to increasing its core deposits and accessing domestic and foreign capital markets when appropriate.
Decision on the timing and tenor of accessing these markets are based on relative costs, general market conditions, prospective views of balance sheet growth and a targeted liquidity profile.

The group’s ability to access funding at cost-effective levels is influenced by maintaining or improving the entity’s credit rating. A reduction in these ratings could have an adverse effect on the group’s funding costs, and access to wholesale term funding. Credit ratings are dependent on multiple factors, including business model, strategy, capital adequacy levels, quality of earnings, risk appetite and exposure, and control framework.

As mentioned above, we hold a liquidity buffer in the form of unencumbered readily available, high quality liquid assets, typically in the form of government or rated securities eligible for repurchase with the central bank, and near cash well in excess of the statutory requirements as protection against unexpected disruptions in cash flows, which puts us in a favourable position to meet the Basel III liquidity requirements. These portfolios are managed within board-approved targets, and apart from acting as a buffer under going concern conditions, also form an integral part of the broader liquidity generation strategy. Investec remains a net liquidity provider to the interbank market, placing significantly more funds with other banks than our short-term interbank borrowings. We do not rely on interbank deposits to fund term lending. From 1 April 2014 to 31 March 2015 average cash and near cash balances over the period amounted to £9.1 billion (£4.4 billion in UK and Other; R86.3 billion in South Africa).

The group does not rely on committed funding lines for protection against unforeseen interruptions to cash flow. We are currently unaware of any circumstances that could significantly detract from our ability to raise funding appropriate to our needs.

The liquidity contingency plans outline extensive early warning indicators, clear lines of communication and decisive crisis response strategies. Early warning indicators span bank-specific and systemic crises. Rapid response strategies address action plans, roles and responsibilities, composition of decision-making bodies involved in liquidity crisis management, internal and external communications including public relations, sources of liquidity, avenues available to access additional liquidity, as well as supplementary information requirements required to manage liquidity during such an event. This plan helps to ensure that cash flow estimates and commitments can be met in the event of general market disruption or adverse bank-specific events, while minimising detrimental long-term implications for the business.

Asset encumbrance
An asset is defined as encumbered if it has been pledged as collateral against an existing liability and, as a result, is no longer available to the group to secure funding, satisfy collateral needs or be sold to reduce the funding requirement. An asset is therefore categorised as unencumbered if it has not been pledged against an existing liability. Risk Management monitors and manages total balance sheet encumbrance via a board-approved risk appetite framework. The group holds a liquidity buffer in the form of unencumbered, readily available, high-quality liquid assets, typically in the form of government or rated securities eligible for repurchase with the central banks in the respective jurisdictions.

The group utilises securitisation in order to raise external term funding as part of its diversified liability base. Securitisation notes issued are also retained by the group which are available to provide a pool of collateral eligible to support central bank liquidity facilities, including the Bank of England Funding for Lending Scheme. During the year the group issued £280 million of notes through securitisations in the UK and R6.2 billion in South Africa.

The group uses secured transactions to manage short-term cash and collateral needs. Details of assets pledged through repurchase activity and collateral pledges are reported by line item of the balance sheet on which they are reflected on page 74 in volume three. Related liabilities are also reported.

On page 74 in volume three we disclose further details of assets that have been received as collateral under reverse repurchase agreements and securities borrowing transactions where the assets are allowed to be resold or pledged.

Liquidity mismatch

The tables that follow show our contractual liquidity mismatch across our core geographies.

The tables will not agree directly to the balances disclosed in the respective balance sheets since the tables incorporate cash flows on a contractual, undiscounted basis based on the earliest date on which the group can be required to pay.

The liquidity position of the group remained sound with total cash and near cash balances amounting to £10.0 billion.

We continued to enjoy strong inflows of customer deposits while maintaining good access to wholesale markets despite the underlying market environment. Our liquidity and funding profile reflects our strategy, risk appetite and business activities.

The tables reflect that loans and advances to customers are largely financed by stable funding sources.

With respect to the contractual liquidity mismatch:

- No assumptions are made except as mentioned below, and we record all assets and liabilities with the underlying contractual maturity as determined by the cash flow profile for each deal.
- As an integral part of the broader liquidity generation strategy, we maintain a liquidity buffer in the form of unencumbered cash, government, or rated securities and near cash against both expected and unexpected cash flows.
- The actual contractual profile of this asset class is of little consequence, as practically Investec would meet any unexpected net cash outflows by repo’ing or selling these securities. We have:
  - set the time horizon to ‘on demand’ to monetise our statutory liquid assets for which liquidity is guaranteed by the central bank;
  - set the time horizon to one month to monetise our cash and near cash portfolio of ‘available-for-sale’ discretionary treasury assets, where there are deep secondary markets for this elective asset class; and
  - reported the ‘contractual’ profile by way of a note to the tables.

With respect to the behavioural liquidity mismatch:

- Behavioural liquidity mismatch tends to display a fairly high probability, low severity liquidity position. Many retail deposits, which are included within customer accounts, are repayable on demand or at short notice on a contractual basis. In practice, these instruments form a stable base for the group’s operations and liquidity needs because of the broad base of customers. To this end, behavioural profiling is applied to liabilities with an indeterminable maturity, as the contractual repayments of many customer accounts are on demand or at short notice but expected cash flows vary significantly from contractual maturity. An internal analysis model is used, based on statistical research of the historical series of products. This is used to identify significant additional sources of structural liquidity in the form of core deposits that exhibit stable behaviour. In addition, reinvestment behaviour, with profile and attrition based on history, is applied to term deposits in the normal course of business.

The liquidity position of the group remained sound with total cash and near cash balances amounting to £10.0 billion.

The group has committed itself to implementation of the BCBS guidelines for liquidity risk measurement standards and the enhanced regulatory framework to be established.

**Balance sheet risk year in review**
- Investec maintained and improved its strong liquidity position ahead of Basel III and continued to hold high levels of surplus liquid assets.
- We sustained strong term funding in demanding market conditions while focusing on lowering the weighted average cost of funding.
- Our liquidity risk management process remains robust and comprehensive.

**UK and Other**
The bank has maintained a strong surplus liquidity position throughout the year. During the first half of the year, the liquidity surplus was bolstered by raising funds to fund strong asset growth, including the transfer of residual assets from Australia as part of the disposal of Investec Bank (Australia) Limited.

The liquidity position in the second half of the year was then further enhanced by the disposal of the Kensington and Start (Irish) mortgage businesses. A strategy to manage down surplus liabilities was initiated following the strategic sales.

This strategy has continued through to the year end and into 2015/16, with the aim of reducing both cash and liquidity back to normalised levels through both asset growth and further liability management, while maintaining our overall conservative approach to liquidity risk management.

Funding rates continued to be driven down throughout the year, while the weighted average contractual maturity of the liability book has been lengthening, to give closer matching of asset and liability maturities.

The bank has continued to diversify its funding mix including utilisation of the Bank of England’s Funding for Lending Scheme and has pre-positioned several mortgage portfolios together with retained securitisation investments.

Cash and near cash balances at 31 March 2015 amounted to £5.0 billion (2014: £4.3 billion), enhanced by the strategic business sales. Total UK customer deposits increased by 9.5% from £9.4 billion to £10.3 billion at 31 March 2015. We continue to exceed Basel liquidity requirements for the LCR and NSFR comfortably.

**South Africa**
The past financial year was marked by a continual increase in the cost of funds to local banks including Investec. The banking industry as a result witnessed some compression in interest rate margins. The rise in the cost of funds was driven by increased competition for deposits ahead of the implementation of new liquidity regulations introduced by the Bank of International Settlements. The LCR had to be met by banks from 1 January 2015 at a minimum compliance rate of 60% moving to 100% by 2019. This has led to increased demand for so-called Basel III friendly deposits (retail and longer dated wholesale deposits) by South African banks. This adjustment in the liability structure of the banking system could raise the cost of borrowing which may ultimately be passed on to borrowers.

Investec grew its total customer deposits by 8% from R204.9 billion to R221.4 billion at 31 March 2015. Our Private Bank’s deposit raising channels grew by 17.5% to R89.8 billion over the financial year; whereas wholesale deposit growth was muted. The bankruptcy of African Bank resulted in a loss of some cash from Money Market Funds as they met requests for redemptions. This was countered by both private individuals and corporates entering the banking system directly. Our liquidity was further boosted by several successful medium-term senior unsecured bonds issued totalling R4 billion. Investec Bank Limited (solo basis) ended the financial year with the three-month average of its LCR at 100.3%, which is well ahead of the minimum level required.

Three and five year dollars amounting to US$532 million were raised in several club, bilateral and structured loan deals over the course of the year as the cost of term dollars fell to levels last witnessed over five years ago. In a world of negative rates, plentiful liquidity and quantitative easing we expect this trend to continue.

Cash and near cash balances grew by R4.2 billion to R88.7 billion at 31 March 2015. The bank’s overall liquidity position is sound going into 2016.

**Regulatory considerations – balance sheet risk**
The banking industry continued to experience elevated levels of prospective changes to laws and regulations from national and supranational regulators.
Risk management (continued)

Regulators propose to both strengthen and harmonise global liquidity standards and to ensure a strong financial sector and global economy. We believe that we are well positioned for the proposed regulatory reform as we have maintained strong capital, funding and liquidity positions.

The BCBS published the final calibration of the LCR in January 2013. The main changes to the LCR were to introduce level 2b qualifying assets and recalculate run-off factors for non-financial commercial depositors and committed facilities. The LCR ratio will be phased in from 2015 to 2019.

The BCBS published the final consultation document on the NSFR in October 2014 with a number of changes. The main changes to the NSFR were to introduce a bucket to recognise financial deposits greater than six months in sources of available stable funding, recalculate run-off factors for performing loans less than one year, and revise treatment of both derivative and repo’ transactions. The NSFR ratio will be introduced in 2018.

The strategic impact of Basel III internationally is significant, and has the potential to change the business model of non-compliant banks while the regulatory developments could result in additional costs.

The group has committed itself to implementation of the BCBS guidelines for liquidity risk measurement standards and the enhanced regulatory framework to be established. Investec has been proactively reporting on these ratios internally according to the emerging Basel definitions since February 2010. Investec already exceeds minimum requirements of these standards. We continue to reshape our liquidity and funding profile where necessary as we approach the compliance timeline.

UK and Other

In June 2013, the European Union published legislation to implement within the EU Basel III, the international regulatory framework for banks via CRD IV. This requires the reporting of the LCR and the NSFR to the EBA from March 2014. The LCR will be introduced on 1 October 2015 with a minimum requirement of 60% increasing to 100% by January 2018 as stated in the regulation document. However, individual member states can require a higher standard and the PRA has indicated that it will set the initial requirement at 80% from October 2015.

Investec Bank plc currently comfortably exceeds its regulatory liquidity requirements and will progress to implement the forthcoming liquidity proposals included in the CRD IV (Basel III) package. Investec Bank plc is currently shadowing and comfortably exceeds the draft LCR and NSFR liquidity ratios. We will continue to monitor these rules until final implementation.

South Africa

South Africa, a member of the G20, is committed to implementing the BCBS guidelines for ‘liquidity risk measurement standards and monitoring’ published in December 2010 and January 2013, by the due dates of 2015 to 2019.

Investec is involved in the process in the following ways:

- Collectively via the Banking Association of South Africa (BASA) and their task groups
- Direct bilateral consultation with SARB and SARB task teams
- As part of the Quantitative Impact Study by BCBS via SARB
- As part of National Treasury Structural Funding and Liquidity Risk task team.

South Africa is a region with insufficient liquid assets; to address this systemic challenge, the SARB announced the introduction of a committed liquidity facility (CLF) whereby South African banks can apply to the Reserve Bank for the CLF against eligible collateral for a prescribed commitment fee. The CLF will be limited to 40% of Net Outflows under the LCR.

Investec Bank Limited already exceeds the minimum requirement for the LCR in 2015. The South African banking industry, however, will find it difficult to meet the NSFR ratio, as currently defined, as a result of the shortcomings and constraints in the South African environment. The banking sector in South Africa is characterised by certain structural features such as a low discretionary savings rate and a higher degree of contractual savings that are captured by institutions such as pension funds, provident funds and providers of asset management services. The proposed liquidity measures have the potential to impact growth and job creation in the economy. In recognition thereof, the Finance Minister instituted a Structural Funding and Liquidity Risk task team to investigate the constraints in the South African market and make recommendations to address these limitations.

Notwithstanding the above constraints, Investec in South Africa is committed to meet the NSFR.
Operational risk

Operational risk definition
Operational risk is defined as any instance where there is potential or actual impact to the group resulting from inadequate or failed internal processes, people, systems or from external events. The impacts can be financial as well as non-financial such as customer detriment, reputational or regulatory consequences.

Operational risk exists as part of the normal activities of a bank. The group aims to manage operational risk by adopting sound operational risk management practices which are fit for purpose. These include, inter alia, minimising internal losses in a cost effective manner in accordance with the operational risk appetite and tolerance.

Operational risk management framework
The bank continues to operate under the Standardised Approach (TSA) to operational risk which forms the basis of the operational risk management framework. The framework is embedded at all levels of the organisation and is continually reviewed to ensure appropriate and effective management of operational risk.

The diagram below depicts how the components of operational risk are integrated.

During the year under review, significant enhancements of all the components of the operational risk management framework have been made and the focus on advancing practices will continue.

The process of advancing practices and understanding regulatory requirements is supported by regular interaction with the regulator and with industry counterparts at formal industry forums.

An independent group operational risk management function, mandated by the board risk and capital committee, ensures that operational risk policies and procedures are developed and applied consistently and effectively throughout the bank. Business unit management, supported by operational risk managers (ORMs) who operate at a business unit level, are responsible for embedding and implementing operational risk practices and policies. All personnel are adequately skilled at both a business unit and a group level.

Governance
The governance structure adopted to manage operational risk is enforced in terms of a levels of defence model and supports the principle of combined assurance in the following manner:

Board and board committees
- Review and approval of the overall risk management strategy, including determination of the risk appetite and tolerance for the bank
- Monitor and review the operational risk exposures and metrics.

External assurance and supervision
- External assessment of operational risk environment
- Onsite reviews by the SARB, FCA, PRA and other regulators.

Internal assurance
- Independent review of framework and its effectiveness
- Audit findings integrated into operational risk management process.

Group operational risk management
- Challenge and review business unit operational risk practices and data
- Maintain operational risk framework and policy
- Report to board and board committees on operational risk exposures, events and emerging issues.

Business unit management
- Identify, own and mitigate operational risk
- Establish and maintain an appropriate operational risk and control environment
- Maintain an embedded operational risk management capability.
Risk appetite and tolerance

The Operational Risk Tolerance policy defines the amount of operational risk exposure, or potential adverse impact from a risk event, that the bank is willing to accept or retain. The objective of the policy is to encourage action and mitigation of risk exposures and provides management guidance to respond appropriately. Additionally, the policy defines capturing and reporting thresholds for risk events and guidance to respond to key risk indicators appropriately.

Operational risk practices

The following practices are used for the management of operational risk as illustrated in the diagram below:

<table>
<thead>
<tr>
<th>Risk and control assessment</th>

<td>0.1</td>
</tr>
</tbody>
</table>

Notes to graphs above:

- Overall, risk events and losses are managed within tolerance
- Comparative numbers have been restated due to organisational changes, including business disposals
- There has been a decline in both the number and value of risk events in the execution, delivery and process management category. Losses reported in this category are mainly as a result of process failure. Trend and causal analysis are performed to improve the control environment
- The external fraud risk event category includes credit card fraud and relates to financial crime risk. In 2015 the number of credit card-related risk events in this category has increased in line with industry trends. Included in this category are other financial crime-related incidents, e.g. phishing
- Our internal fraud experience remains low
- The clients, products and business practices category is driven by a single large loss.
The following key risks may result in loss of value should they materialise.

| **Financial crime**                                                               | • Proactive strategy which includes business wide and customer risk assessments  
• Development of policies which comply with regulations and industry guidance  
• Monitoring the adequacy and effectiveness of financial crime controls and reporting to governance bodies, e.g. audit committees  
• Training all staff with enhanced bespoke training delivered to staff in higher risk functions  
• Frequent delivery of management information focused on key risk indicators  
• Review external and industry events by engaging with external partners such as South African Banking Risk Information Centre (SABRIC), SAPS and agency banks  
• Understanding and proactively managing the emerging threat of cybercrime across the industry | Financial crime awareness training internally including the use of e-learning platforms  
• Development of a money laundering, counter-terrorist financing, bribery and sanctions compliance risk appetite statement  
• Enhance money laundering transaction monitoring capabilities and bespoke training for staff in key risk functions                                                                 |  |
| **Information security**                                                           | • Identification of threats and associated risks to our information assets including legal and regulatory requirements  
• Development and monitoring of policies, processes and technical controls designed to mitigate the risks to our information  
• Evaluation of risks introduced by our information supply chain  
• Maintenance and testing of our security incident and breach response processes | Ensure appropriate controls are in place to manage cyber threats, including the sharing of information with peers, law enforcement and industry bodies  
• Raising awareness with internal and external stakeholders of the threats, controls and policies relating to information security and their responsibility in protecting our information  |  |
| **Process failure**                                                                | • Weaknesses in controls are identified through the causal analysis process following the occurrence of risk events  
• Thematic reviews are performed to monitor the effectiveness of controls across business units  
• Effective management of change remains a focus area for the year ahead | Enhancement of processes to identify risks related to new products and projects  |  |
| **Regulatory and compliance**                                                      | • Group Compliance and Group Legal Risk assist in the management of regulatory and compliance risk  
• Identification and adherence to legal and regulatory requirements  
• Review practices and policies as regulatory requirements change | Alignment of regulatory and compliance approach to reflect new regulatory landscapes (particularly change of regulatory structures in UK and SA)  
• Managing business impact and implementation challenges as a result of significant volumes of statutory and regulatory changes and developments  
• Ensuring existing monitoring remains focused appropriately as areas of conduct and regulatory risk develop |  |
| **Technology**                                                                     | • Establishment and maintenance of an IT risk assessment framework to consistently and effectively assess IT exposures across the business  
• Monitoring risk exposures related to adoption of new technologies  
• Identification and remediation of vulnerabilities identified in IT systems, applications, and processes  
• Establishing appropriate IT recovery capabilities to safeguard against business disruptions resulting from systems failures and IT service outages | Enhancing resilience of our technical infrastructure and our process to IT failures or service interruptions  
• Identifying, monitoring and reducing risks in our digital channel, following the introduction of mobile applications and our increased online presence |  |

**Insurance**

The group maintains adequate insurance to cover key insurable risks. The insurance process and requirements are managed by the group insurance risk manager. Regular interaction between Group Operational Risk Management and Group Insurance Risk Management ensures that there is an exchange of information in order to enhance the mitigation of operational risks.
Business continuity management

The group maintains a global business continuity management capability which incorporates an appropriate level of resilience into the bank’s operations to minimise the risk of severe operational disruptions occurring.

In the event of a major disruption, an incident management framework will be used to manage the disruption. Continuity will be achieved through a flexible and adaptable response, which includes relocating impacted business to the designated recovery site. Dedicated resources ensure all governance processes are in place with business and technology teams responsible for activating and managing the recovery process.

The group conducts regular exercises and testing of recovery procedures to ensure that its recovery capability remains appropriate.

We continue to build and enhance our infrastructure to manage the electricity supply crisis in South Africa. We remain active participants with all industry bodies to ensure we are abreast of industry views and concerns.

Recovery and resolution planning

UK and Other

In the EU, the Bank Recovery and Resolution Directive (BRRD) was adopted in June 2014 by the European Commission. The BRRD came into effect from 1 January 2015, with the option to delay implementation of bail-in provisions until January 2016. Regardless of this, the UK introduced bail-in powers from 1 January 2015. The UK transposition of the BRRD builds on the resolution framework already in place in the UK.

In January 2015, the PRA published a policy statement containing updated requirements for recovery and resolution planning which revises PRA rules that have been in force since 1 January 2014. In addition, the EBA has produced a number of regulatory technical standards, some of which are yet to be finalised, and will further inform the BRRD requirements.

In line with PRA and EU requirements, Investec plc maintains a resolution pack and a recovery plan.

South Africa

Financial Stability Board member countries are required to have recovery and resolution plans in place for all systemically significant financial institutions. The SARB has adopted this requirement and has to date required South African domestically significant banking institutions to develop recovery plans. Guidance issued by the Financial Stability Board and the SARB has been incorporated into Investec’s recovery plan.

The SARB has focused on finalising the recovery plans for the local banks. It is expected that the SARB will issue guidance on resolution planning in the near future. We will then look to integrate our existing recovery plan into the SARB’s resolution planning.

Group

The purpose of the recovery plans are to document how the board and management will recover from extreme financial stress to avoid liquidity and capital difficulties in Investec plc and Investec Limited, respectively. The plans are reviewed and approved by the board on an annual basis.

The recovery plan for Investec plc and Investec Limited, respectively:

- Integrates with existing contingency planning
- Analyses the potential for severe stress in the group
- Identifies roles and responsibilities
- Identifies early warning indicator and trigger levels
- Analyses how the group could be affected by the stresses under various scenarios
- Includes potential recovery actions available to the board and management to respond to the situation, including immediate, intermediate and strategic actions
- Assesses how the group might recover as a result of these actions to avoid resolution.

Reputational risk

Reputational risk is damage to our reputation, name or brand. Reputational risk arises as a result of other risks manifesting and not being mitigated.
Pension risk

Pension risk arises from obligations arising from defined benefit pension schemes, where Investec plc is required to fund any deficit in the schemes.

There are two defined benefit schemes within Investec plc and both are closed to new business. Pension risk arises if the net present value of future cash outflows is greater than the current value of the asset pool set aside to cover those payments.

Primary sources at risk include:
- A mismatch in the duration of the assets relative to the liabilities
- Market-driven asset price volatility
- Increased life expectancy of individuals leading to increased liabilities.

Investec plc monitors the position of the funds closely and regularly assesses potential adverse movements in the schemes in close conjunction with external independent advisers.

Further information is provided on pages 92 to 95 in volume three.

Legal risk management

Legal risk is the risk of loss resulting from any of our rights not being fully enforceable or from our obligations not being properly performed. This includes our rights and obligations under contracts entered into with counterparties. Such risk is especially applicable where the counterparty defaults and the relevant documentation may not give rise to the rights and remedies anticipated when the transaction was entered into.

Our objective is to identify, manage, monitor and mitigate legal risks throughout the group. We seek to actively mitigate these risks by identifying them, setting minimum standards for their management and allocating clear responsibility for such management to legal risk managers, as well as ensuring compliance through proactive monitoring.

The scope of our activities is continuously reviewed and includes the following areas:
- Relationship contracts
- Legislation/governance
- Litigation
- Corporate events
- Incident or crisis management
- Ongoing quality control.

The legal risk policy is implemented through:
- Identification and ongoing review of areas where legal risk is found to be present
- Allocation of responsibility for the development of procedures for management and mitigation of these risks
- Installation of appropriate segregation of duties, so that legal documentation is reviewed and executed with the appropriate level of independence from the persons involved in proposing or promoting the transaction
- Ongoing examination of the inter-relationship between legal risk and other areas of risk management, so as to ensure that there are no ‘gaps’ in the risk management process
- Establishing minimum standards for mitigating and controlling each risk. This is the nature and extent of work to be undertaken by our internal and external legal resources
- Establishing procedures to monitor compliance, taking into account the required minimum standards
- Establishing legal risk forums (bringing together the various legal risk managers) to ensure we keep abreast of developments and changes in the nature and extent of our activities, and to benchmark our processes against best practice.

Overall responsibility for this policy rests with the board. The board delegates responsibility for implementation of the policy to the global head of legal risk.

The global head assigns responsibility for controlling these risks to the managers of appropriate departments and focused units throughout the group.

A legal risk forum is constituted in each significant legal entity within the group. Each forum meets at least half-yearly and more frequently where business needs dictate, and is chaired by the global head of legal risk or an appointed deputy.

Conduct risk

UK and Other

As part of the regulatory restructure, the new FCA in the UK has outlined its approach to managing firms’ conduct.

By conduct risk we mean the risk that detriment is caused to the bank, its customers, its counterparties or the market, as a result of inappropriate execution of business activities.

The focus on conduct risk is intended to go beyond the current compliance monitoring frameworks in order to move away from the culture of ‘tick box’ compliance. As a result, firms are expected to look across their business models and strategies and assess how to balance the pursuit of profits with good outcomes for clients and proper standards of market conduct. All firms will be expected to take an holistic approach to assessing their key conduct risks and to ensure that these are being managed in accordance with FCA’s strategic objectives of protecting clients, ensuring markets function effectively and promoting competition.

The group’s work on conduct risk, particularly in the UK, includes assessing key risks across the business, identifying key controls and ensuring that the board is receiving the right information to enable it to challenge effectively the management of risks by the business. This work is set to continue for the coming year and will aim to build on the existing controls such as the compliance monitoring. Treating Customers Fairly (TCF) and operational risk frameworks.

South Africa

The South African financial sector regulatory landscape has been under review for the last few years. A new regulatory structure is developing, and existing legislation is also being amended. The conduct of financial institutions is currently regulated under various pieces of legislation, and by various regulators.
Risk management (continued)

The National Credit Act (NCA) regulates the credit industry, ensuring that credit providers guard against reckless lending and over-indebting customers. Amendments to the NCA will grant greater enforcement and rule-making powers to the National Credit regulator. The Financial Advisory and Intermediary Services Act (FAIS) regulates advice and intermediary services in relation to specific financial products. Risk and controls have been identified across the business, and these are reviewed and monitored regularly. Annual reports are also submitted to the regulators. FAIS is also being amended to include regulation of activities in relation to professional clients. The FSB has also introduced the Treating Customers Fairly (TCF) framework, which considers fairness outcomes for customers throughout the product lifecycle. A gap analysis is under way to assess the level of compliance with TCF, and to guide business on implementation and management reporting.

The draft Financial Sector Regulation Bill (Twin Peaks) proposes two new regulatory structures, the Prudential Authority and the Market Conduct Authority, incorporating portions of the Reserve Bank and the entire FSB structure. Financial institutions will be mono or dual regulated, depending on the activities they engage in.

Capital management and allocation

Capital measurement

Investec Limited and Investec plc are separately regulated entities. They operate under different regulatory capital regimes, and therefore it is difficult to directly compare the regulatory capital adequacy of the two entities. The following provides a brief outline of the regulatory environment relevant to the group’s capital management framework.

Investec Limited and Investec plc are separately regulated entities. They operate under different regulatory capital regimes, and therefore it is difficult to directly compare the regulatory capital adequacy of the two entities. The following provides a brief outline of the regulatory environment relevant to the group’s capital management framework.

Investec Limited is supervised for capital purposes by the SARB on a consolidated basis. Since 1 January 2013, Investec Limited has been calculating capital resources and requirements at a group level using the Basel III framework, as implemented in South Africa by the SARB, in accordance with the Bank’s Act and all related regulations.

Investec Limited uses the standardised approach to calculate its credit and counterparty credit risk and operational risk capital requirements. Equity risk, capital is calculated using the IRB approach by applying the simple risk-weight method. The market risk capital requirement is measured using an internal risk management model, approved by the SARB.

Various subsidiaries of Investec Limited are subject to additional regulation covering various activities or implemented by local regulators in other jurisdictions. For capital management purposes, it is the prevailing regulations applied to the consolidated Investec Limited group that are monitored most closely. Nevertheless, where capital is a relevant consideration, management within each regulated entity pays close attention to prevailing local regulatory rules as determined by their respective regulators. Management of each regulated entity, with the support of the group’s capital management functions, ensures that capital remains prudently above minimum requirements at all times.

Regulatory capital – Investec Limited

Current regulatory framework

Investec Limited is authorised by the FCA and is regulated by the FCA and the PRA on a consolidated basis. Since 1 January 2014 Investec Limited has been calculating capital resources and requirements at a group level using the Basel III framework, as implemented in the European Union through the Capital Requirements Directive IV (CRD IV). The group continues to phase in the remaining CRD IV rule changes, notably the grandfathering provisions applicable to non-qualifying capital instruments (reducing by 10% per annum until fully derecognised in 2022) and the increase in the minimum regulatory capital ratios. With effect from 1 January 2015, the common equity tier 1 capital requirement increased from 4% to 4.5%, while the tier 1 capital requirement increased from 5.5% to 6%. The group continues to hold capital in excess of the new minimum requirements.

Investec plc has also implemented the PRA Pillar 2A rule change and has from 1 January 2015 met at least 56% of its individual capital guidance, as determined by the internal capital adequacy assessment and supervisory review process, with common equity tier 1 capital. During April 2015 the PRA issued the Investec plc group with a revised Pillar 2A requirement of 2.5% of risk-weighted assets effective from 30 April 2015, of which 1.4% has to be met from Common equity tier 1 capital.

The Investec plc group has changed significantly during the financial year due to three strategic disposals, namely the sale of Investec Bank (Australia) Limited and the sales of the Start Mortgage Holdings Limited and the Kensington Group plc. Further information on these disposals can be found on page 22 in volume one.

Investec plc uses the standardised approach to calculate its credit and counterparty credit risk, securitisation and operational risk capital requirements. The mark-to-market method is used to calculate the counterparty credit risk exposure amount. The market risk capital requirement is calculated using standard rules. The group has obtained permission from its regulator to apply an internal risk management model when netting certain over-the-counter (OTC) derivative options within its portfolio.

Subsidiaries of Investec plc may be subject to additional regulations, as implemented by local regulators in other relevant jurisdictions. Where capital is a relevant consideration, management within each regulated entity pays close attention to prevailing local regulatory rules as determined by their respective regulators. For capital management purposes, it is the prevailing rules applied to the consolidated Investec plc group that are monitored closely. With the support of the group’s capital management function, local management of each regulated entity...
ensures that capital remains prudently above minimum requirements at all times.

**Regulatory considerations**

The regulatory environment has continued to evolve during 2015, with a vast number of new consultations, regulatory and implementing technical standards and other proposals being published or adopted, notably by the PRA, the BCBS, European Banking Authority (EBA) and the SARB.

### International

**Counterparty credit risk**

The BCBS continues to review the capital framework and its balance of simplicity, comparability and risk sensitivity. In March 2014, the BCBS published a final standardised approach for measuring counterparty credit risk exposures. The new standardised approach replaces both the Current Exposure Method and the Standardised Method and will apply to OTC derivatives, exchange-traded derivatives and long settlement transactions. In August 2014, the BCBS published a technical paper explaining the different modelling assumptions used in developing this new approach. The new standardised approach for counterparty credit risk will take effect from 1 January 2017.

**Pillar 3 disclosures**

In June 2014, the BSCS consulted on revisions to the Pillar 3 disclosure requirements, to promote greater consistency in the way banks disclose information about risks, as well as their risk measurement and management. The review proposed greater use of templates to achieve consistency. The final standard was published in January 2015 and will take effect from year end 2016 (Investec’s first disclosure will be for the financial year end March 2017).

**Operational risk**

In October 2014, the BCBS proposed revisions to the standardised approach for measuring operational risk capital. Once finalised, the revised standardised approach will replace the non-model based approaches, which comprise the basis indicator approach, the standardised approach and the alternative standardised approach. No implementation timeframe has been set.

**Market risk**

The BCBS continues to consult on the fundamental review of the trading book, and in December 2014 issued a third consultation paper, addressing outstanding issues. The proposals make further refinements to the new proposed market risk framework. A further Quantitative Impact Study (QIS) will be carried out in early 2015 to inform the final calibration of the new framework. The final standard will be published once all comments and the results of the QIS exercise have been assessed by the committee. No formal implementation date has been published by the BCBS to date.

### UK

**Pillar 2 framework**

With effect from 1 January 2015, the PRA requires firms to meet at least 56% of their individual capital guidance under the Pillar 2A capital framework with Common equity tier 1 capital. Previously the individual capital guidance, which is determined by the internal capital adequacy assessment and supervisory review process, could be met with total capital.

In January 2015, the PRA released a consultation paper proposing changes to their Pillar 2 framework, including introducing the PRA’s methodologies for setting Pillar 2 capital. In addition the PRA proposed to introduce the PRA buffer, which will replace the current Capital Planning Buffer (known as Pillar 2B). The PRA buffer will be met from Common equity tier 1 capital, and will transition in from January 2016 at 25%, increasing by 25% in each consecutive year until fully phased in by January 2019. All firms will be subject to a PRA buffer assessment and the PRA will set a PRA buffer only if it judges that the CRD IV buffers (capital conservation buffer and systemic risk buffer, if applicable) are inadequate for a particular firm given its vulnerability in a stress scenario, or where the PRA has identified risk management and governance failings, which the CRD IV buffers are not intended to address. To address weak risk management and governance, the PRA proposes applying a scalar ranging from 10% to 40% of a firms Common equity tier 1 Pillar 1 plus Pillar 2A capital requirement. The PRA is expected to issue final rules in July 2015, ahead of implementation on 1 January 2016.

**Capital buffers**

In April 2014, the PRA published its final rules and supervisory statement to implement the CRD IV provisions on capital buffers in the UK. The CRD IV creates a combined capital buffer that all firms will be expected to meet in addition to their Pillar 1 and Pillar 2 capital requirements. The combined buffer will include the capital conservation buffer, countercyclical capital buffer, buffer for global systemically important institutions (G-SIIs) and the systemic risk buffer (if applicable) and must be met with Common equity tier 1 capital. These buffers will be phased in from 1 January 2016. Firms that do not meet their combined buffer shall face restrictions on their distributions.

The CRD IV rules also require HM Treasury to designate authorities responsible for setting certain CRD IV buffers in the UK.
From 1 May 2014 the Bank of England is the designated authority for the countercyclical capital buffer (CCB) with policy decisions delegated to the Financial Policy Committee (FPC). At the FPC’s policy meeting held in March 2016, the committee chose to maintain the CCB buffer rate for UK exposures at 0%.

The PRA will be responsible for identifying G-Silos and setting their buffers and will also be responsible for identifying other systemically important institutions from 1 January 2016.

**Leverage ratio**

In July 2014, the FPC launched a consultation on the design of the leverage ratio framework for the UK. In November 2013, the Chancellor of the Exchequer asked the FPC to conduct a review into the role for the leverage ratio within the capital framework for UK banks, and to consider the case for the FPC having the power to implement a leverage ratio requirement ahead of the international timetable, or to set a higher baseline ratio in some circumstances for UK banks. The FPC issued its final report in October 2014 introducing a leverage ratio framework ahead of the international timetable for G-Silos and other major domestic UK banks and building societies.

The final recommendations included a minimum leverage ratio requirement of 3% to be implemented immediately, a supplementary leverage ratio buffer of 35% of corresponding risk-weighted systemic buffer rates, and a countercyclical leverage ratio buffer of 35% of the relevant risk-weighted countercyclical capital buffer rates applicable from 2018. The minimum leverage ratio requirement and countercyclical leverage ratio buffer will also apply to all PRA regulated banks, building societies and investment firms from 2018, subject to a review of progress of the international standards in 2017.

**Europe**

**Leverage ratio**

In October 2014, the European Commission adopted the leverage ratio delegated Act, establishing a common definition of the leverage ratio for EU banks which will be the basis for publishing the leverage ratio from the beginning of 2015 onwards. It does not introduce a binding leverage ratio. A decision on whether or not to introduce a binding leverage ratio will only be made in 2016. The Act aims to align the leverage ratio currently included in the Capital Requirements Regulation with the internationally agreed BCBS standard.

**Capital targets**

Over recent years, capital adequacy standards for banks have been raised as part of attempts to increase the stability and resilience of the global banking sector. Investec Limited and Investec plc have always held capital in excess of regulatory requirements and the individual groups continue to remain well capitalised. Accordingly, we are targeting a minimum Common equity tier 1 capital ratio of above 10% by March 2016, a tier 1 capital ratio of above 11% by March 2016 (current 10.5% target) and a total capital adequacy ratio target in the range of 14% to 17%. These targets are continuously assessed for appropriateness.

The DLC capital committee is responsible for ensuring that the impact of any regulatory change is analysed, understood, prepared and planned for. To allow the committee to carry out this function, the group’s Regulatory and Capital Management teams closely monitor regulatory developments and regularly present to the committee on the latest developments and proposals. As part of any assessment, the committee is provided with analysis setting out the group’s capital adequacy position, taking into account the most up-to-date interpretation of the rule changes. In addition, regular sessions with the board are held to ensure that members are kept up to date with the most salient changes to ensure the impact on the group and its subsidiaries is monitored and understood.

**Management of leverage**

At present Investec Limited calculates and reports its leverage ratio based on the latest SARB regulations. The leverage ratio is a non-risk-based measure intended to prevent excessive build up of leverage and mitigate the risks associated with deleveraging during periods of market uncertainty. The reporting of the leverage ratio in South Africa has been mandatory since 1 January 2013 as part of an exercise to monitor South African banks’ readiness to comply with the minimum standard of 4% from 1 January 2018. Following guidance from the SARB, Investec applies the rules as outlined in the most recent BCBS publication.

In the UK, the leverage ratio is a non-risk-based measure, with public disclosure applicable from 1 January 2015, applying the rules set out in the leverage ratio delegated Act. The leverage ratio is subject to a monitoring period from 1 January 2014 to 30 June 2016, at which point the EBA will report to the European Commission suggesting adequate calibration and appropriate adjustments to the capital and total exposure measure.

As with the governance of capital management, the DLC capital committee is responsible for ensuring that the impact of any regulatory changes on the leverage ratio is calculated, analysed and understood at all reporting levels.

**Leverage ratio target**

Investec is currently targeting a leverage ratio above 6%, but will continue to reassess this target for appropriateness pending the outcome of the EBA’s report in 2016.

**Capital management**

**Philosophy and approach**

Both the Investec Limited and Investec plc groups operate an approach to capital management that utilises both regulatory capital, as appropriate to that jurisdiction, and internal capital, which is an internal risk-based assessment of capital requirements. Capital management primarily relates to management of the interaction of both, with the emphasis on regulatory capital for managing portfolio level capital sufficiency and on internal capital for ensuring that returns are appropriate for the level of risk taken at an individual transaction or business unit level.

The determination of target capital is driven by our risk profile, strategy and risk appetite, taking into account regulatory and market factors applicable to the group. At the most fundamental level, we seek to balance our capital consumption between prudent capitalisation in the context of the group’s risk profile and optimisation of shareholder returns.

Our internal capital framework is designed to manage and achieve this balance.

The internal capital framework is based on the group’s risk identification, review and assessment processes and is used to provide a risk-based approach to capital allocation, performance and structuring of our balance sheet. The objectives of the internal capital framework are to quantify the minimum capital required to:

- Maintain sufficient capital to satisfy the board’s risk appetite across all risks faced by the group
- Provide protection to depositors against losses arising from risks inherent in the business
Risk management (continued)

The (simplified) integration of risk and capital management

- Provide sufficient capital surplus to ensure that the group is able to retain its going concern basis under relatively severe operating conditions
- Inform the setting of minimum regulatory capital through the Supervisory Review and Evaluation Process (SREP).

The DLC capital committee seeks to optimise the balance sheet such that capital held is in excess of internal capital. Internal capital performs a critical role in:

- Investment decision-making and pricing that is commensurate with the risk being taken
- Allocating capital according to the greatest expected marginal risk-based return, and tracking performance on this basis
- Determining transactional risk-based returns on capital
- Rewarding performance, taking into account the relative levels of risk adopted by forming a basis for the determination of economic value added at a transactional level, and hence the basis for discretionary variable remuneration
- Comparing risk-based performance across business areas.

The framework has been approved by the board and is managed by the DLC capital committee, which is responsible for oversight of the management of capital on a regulatory and an internal basis.

In order to achieve these objectives, the internal capital framework describes the following approach to the integration of risk and capital management.

**Risk assessment and reporting**

We review the business continuously to maintain a close understanding of our universe of risks, which are analysed through the risk management governance framework under stewardship of BRCC. Key risks are reviewed and debated by senior management on a continuous basis. Assessment of the materiality of risks is directly linked to the board’s stated risk appetite and approved risk management policies covering all key risks.

Key identified risks are monitored by Group Risk Management and by Internal Audit to ensure that each risk is managed to an acceptable level. Detailed performance and control metrics of these risks are reported to each ERRF and BRCC meeting including, where appropriate, the results of scenario testing. Key risk types that are considered fall within the following:

- Credit and counterparty risk
- Market risk
- Equity and investment risk in the banking book
- Balance sheet liquidity and non-trading interest rate risk
- Operational, conduct and reputational risk
- Legal risk (considered within operational risk for capital purposes).

Each of these risk categories may consist of a number of specific risks, each of which are analysed in detail and managed by ERRF, GRCC and BRCC.

**Risk modelling and quantification (internal capital)**

Internal capital requirements are quantified by analysis of the potential impact of key risks to a degree consistent with our risk appetite. Internal capital requirements are supported by the board-approved risk assessment process described above. Quantification of all risks is based on analysis of internal data, management expertise and judgement, and external benchmarking.

The following risks are included within the internal capital framework and quantified for capital allocation purposes:

- Credit and counterparty risk, including:
  - Underlying counterparty risk
  - Concentration risk
  - Securitisation risk
- Market risk
- Equity and investment risk held in the banking book
- Balance sheet risk, including:
  - Liquidity
  - Banking book interest rate risk
Internal capital requirements are quantified by analysis of the potential impact of key risks to a degree consistent with our risk appetite

- Strategic and reputational risks
- Pension risk (UK only)
- Operational risk, which is considered as an umbrella term and covers a range of independent risks including, but not limited to fraud, litigation, business continuity, outsourcing and out of policy trading. The specific risks covered are assessed dynamically through constant review of the underlying business environment.

**Capital planning and stress/scenario testing**

A group capital plan is prepared and maintained to facilitate discussion of the impact of business strategy and market conditions on capital adequacy. This plan is designed to assess capital adequacy under a range of economic and internal conditions over the medium term (three years), with the impact on earnings, asset growth, risk appetite and liquidity considered. The plan provides the board (via the BRCC) with an input into strategy and the setting of risk appetite by considering business risks and potential vulnerabilities, capital usage and funding requirements given constraints where these exist.

Capital planning is performed regularly, with regulatory capital being the key driver of decision-making. The goal of capital planning is to provide insight into potential sources of vulnerability of capital adequacy by way of market, economic or internal events. As such, we stress the capital plans based on conditions most likely to place us under duress. The conditions themselves are agreed by the DLC capital committee after research and consultation with relevant internal experts. Such plans are used by management to formulate balance sheet strategy and agree management actions, trigger points and influence the determination of our risk appetite.

The output of capital planning allows senior management to make decisions to ensure that the group continues to hold sufficient capital to meet its regulatory and internal capital targets. On certain occasions, especially under stressed scenarios, management may plan to undertake a number of actions. Assessment of the relative merits of undertaking various actions is then considered using an internal view of relative returns across portfolios which are themselves based on internal assessments of risk and capital.

Our capital plans are designed to allow senior management and the board to review:

- Changes to capital demand caused by implementation of agreed strategic objectives, including the creation or acquisition of new businesses, or as a result of the manifestation of one or more of the risks to which we are potentially susceptible
- The impact on profitability of current and future strategies
- Required changes to the capital structure
- The impact of implementing a proposed dividend strategy
- The impact of alternate market or operating conditions on any of the above.

At a minimum level, each capital plan assesses the impact on our capital adequacy over expected case, upturn and downturn scenarios. On the basis of the results of this analysis, the DLC capital committee and the BRCC are presented with the potential variability in capital adequacy and are responsible, in consultation with the board, for consideration of the appropriate response.

**Pricing and performance measurement**

The use of internal capital as an allocation tool means that all transactions are considered in the context of their contribution to return on risk-adjusted capital. This ensures that expected returns are sufficient after taking recognition of the inherent risk generated for a given transaction. This approach allows us to embed risk and capital discipline at the level of deal initiation. Using expectations of risk-based returns as the basis for pricing and deal acceptance ensures that risk management retains a key role in ensuring that the portfolio is appropriately managed for that risk.

In addition to pricing, returns on internal capital are monitored and relative performance is assessed on this basis. Assessment of performance in this way is a fundamental consideration used in setting strategy and risk appetite as well as rewarding performance.

These processes have been embedded across the business with the process designed to ensure that risk and capital management form the basis for key...
Risk management (continued)

decisions at both a group and at a transactional level. Responsibility for oversight for each of these processes ultimately falls to the BRCC.

For an assessment of return on equity and our return on internal capital utilised refer to pages 50 to 52 in volume one.

Accounting and regulatory treatment of group subsidiaries

Investec plc and Investec Limited are the two listed holding companies in terms of the DLC structure. Investec Bank plc and Investec Bank Limited are the main banking subsidiaries of Investec plc and Investec Limited, respectively.

Basis of consolidation

The regulatory basis of consolidation differs from the basis of consolidation used for financial reporting purposes. The financial accounting position of the DLC group is reported under IFRS and is described on page 22 of the annual financial statements.

The regulatory consolidation includes all financial sector subsidiaries, the majority of which are wholly owned by the relevant parent company. Investments in financial sector associates that are equity accounted in the financial accounting consolidation, whereas their exposures are proportionally consolidated in the regulatory consolidation. Subsidiaries and associates engaged in non-financial activities are excluded from the regulatory consolidation. In addition SPEs are not consolidated for regulatory purposes, where significant credit risk has been transferred to third parties. The positions the firm continues to hold in these securitisation SPEs will either be risk-weighted and/or deducted from common equity tier 1 capital.

Investec Bank plc, a regulated subsidiary of Investec plc, applies the provisions laid down in article 9 of the Capital Requirements Regulation (solo-consolidation waiver) and reports to the PRA on a solo-consolidation basis. Investec Bank plc has two solo-consolidation subsidiaries namely Investec Finance plc and Investec Investments (UK) Limited.

There are no current or foreseen material practical or legal impediments to the prompt transfer of capital resources or repayment of liabilities among the parent undertaking and its subsidiary undertakings.

Regulatory capital requirements are driven by the regulatory balance sheet and not the financial accounting balance sheet.

Regulatory capital and requirements

For regulatory capital purposes, our regulatory capital is divided into three main categories, namely common equity tier 1, tier 1 and tier 2 capital as follows:

- Common equity tier 1 capital comprises shareholders’ equity and related eligible non-controlling interests after giving effect to deductions for disallowed items (for example, goodwill and intangible assets) and other adjustments
- Additional tier 1 capital includes qualifying capital instruments that are capable of being fully and permanently written down or converted into common equity tier 1 capital at the point of non-viability of the firm, and other additional tier 1 instruments, which no longer qualify as additional tier 1 capital and are subject to grandfathering provisions and related eligible non-controlling interests
- Tier 2 capital comprises qualifying subordinated debt and related eligible non-controlling interests and other tier 2 instruments, which no longer qualify as tier 2 capital and are subject to grandfathering provisions.

Capital disclosures

The composition of our regulatory capital under a Basel III/CRD IV basis is provided in the table below.

º The capital adequacy disclosures follow Investec’s normal basis of presentation so as to show a consistent basis of calculation across the jurisdictions in which the group operates. For Investec plc and IBP this does not include the deduction of foreseeable dividends when calculating common equity tier 1 capital as now required under the Capital Requirements Regulation and EBA technical standards. The impact of the final proposed ordinary and preference dividends totalling £57 million for Investec plc and £15 million for IBP would be around 50bps and 10bps, respectively.

* Where: IBP is Investec Bank plc consolidated and IBL is Investec Bank Limited. The information for Investec plc includes the information for IBP. The information for Investec Limited includes the information for IBL.
Investec plc

Movement in risk-weighted assets
Total risk-weighted assets (RWAs) have decreased by 15% over the period, predominantly within credit risk RWAs.

Credit risk RWAs
For Investec plc consolidated reporting, we have adopted the standardised approach for calculating credit risk RWAs. Credit risk RWAs, which include equity risk, decreased by £2.4 billion. The decrease is primarily attributable to the strategic disposals, partially offset by strong loan growth across various business lines in our core loan book.

Counterparty credit risk RWAs and Credit Valuation Risk (CVA)
Counterparty credit risk RWAs increased by £165 million mainly due to increased trading volumes, while CVA RWAs decreased by £152 million driven by the application of CVA exemptions, post an internal review.

Market risk RWAs
We apply the standardised approach for calculating market risk RWAs. Market risk RWAs increased by £233 million, primarily due to an increase in foreign exchange risk, driven by the removal of an Australian Dollar hedge.

Operational risk RWAs
Operational risk RWAs are calculated using the standardised approach and increased by £31 million. The increase is due to a higher three-year average operating income.

Investec Limited

Movement in risk-weighted assets
Total RWAs grew by 8.6% over the period, with approximately 71% of this growth attributable to credit risk, 24% to equity risk and the remaining risk types contributing the balance.

Credit risk RWAs
For Investec Limited consolidated reporting, we have adopted the standardised approach for calculating credit risk RWAs. Credit risk RWAs grew by R15.2 billion with strong growth across the various businesses, including Corporate and Institutional Banking and Private Client Lending. While a portion of this growth is due to currency movement on foreign-denominated assets, the majority is the result of consistent growth across multiple asset classes, the most noticeable being term and short-dated corporate lending and lending secured by residential real estate. The impact of Basel III and the associated enhancements to the Banks Act by the South African Reserve Bank were implemented in 2013, and there has been minimal change in the methodology governing the calculation of required capital during the 2015 financial year.

Counterparty credit risk and credit valuation adjustment RWAs
Counterparty credit risk RWAs increased marginally by R259 million, driven by higher trading volumes and market fundamentals, while CVA over the period decreased by R652 million. While proportionally a large decrease, this figure is volatile due to the nature of the SARB CVA exemption notice which only implemented a CVA capital charge against foreign currency OTCs with foreign counterparties. CVA was implemented as part of Basel III in South Africa and captures the risk of deterioration in the credit quality of a bank’s OTC derivative counterparties. For the 2016 financial year, the SARB has withdrawn its exemption notice, resulting in a full implementation of CVA in South Africa as per Basel III. This will result in a significantly higher (but more stable) CVA RWAs for all banks going forward. We currently apply the standardised approach to the calculation of the CVA capital requirement.

Equity risk RWAs
Equity risk grew by approximately R5.1 billion over the period. The risk weight attributable to equity investments is relatively high, with listed equities attracting an effective 318% and unlisted equities 424%.

The impact of this is a proportionally much larger increase in RWAs than the associated balance sheet equity value. The growth is attributable to new investments and revaluations of existing assets.

Market risk RWAs
Market Risk RWAs are calculated using the Value at Risk (VaR) approach and has shown a reduction due to reduced market volatility local and a portfolio that exhibits better overall hedging.

Operational risk RWAs
Operational risk is calculated using the standardised approach and is driven by the levels of income over a three-year average period, applying specific factors applicable to the nature of the business generating the income.
**Movement in total regulatory capital**

The table below analyses the movement in common equity tier 1, additional tier 1 and tier 2 capital during the year.

* Where: IBP is Investec Bank plc consolidated and IBL is Investec Bank Limited. The information for Investec plc includes the information for IBP. The information for Investec Limited includes the information for IBL.

* The capital adequacy disclosures follow Investec’s normal basis of presentation so as to show a consistent basis of calculation across the jurisdictions in which the group operates. For Investec plc and IBP this does not include the deduction of foreseeable dividends when calculating common equity tier 1 capital as now required under the Capital Requirements Regulation and EBA technical standards. The impact of the final proposed ordinary and preference dividends totalling £57 million for Investec plc and £15 million for IBP would be around 50bps and 10bps, respectively. At 31 March 2014 the impact of the final proposed ordinary and preference dividends totalling £61 million for Investec plc and £32 million for IBP would be around 40bps and 50bps, respectively.

^\#^ Based on the group’s understanding of current regulations, ‘fully loaded’ is based on Basel III capital requirements as fully phased in by 2022.

** The leverage ratios are calculated on an end-quarter basis.

^\#^ Based on revised BCBS rules.

Credit ratings

In terms of our dual listed companies structure, Investec plc and Investec Limited are treated separately from a credit point of view. As a result, the rating agencies have assigned separate ratings to the significant banking entities within the group, namely Investec Bank plc and Investec Bank Limited. Certain rating agencies have also assigned ratings to the holding companies, namely, Investec plc and Investec Limited. Our ratings at 10 June 2015 are as follows:

<table>

Risk management (continued)
Internal Audit’s activity is governed by an internal audit charter which is approved by the group audit committees and is reviewed annually. The charter defines the purpose, authority and responsibilities of the function.

As a result of the regulatory responsibilities arising from the DLC structure, there are two group Internal Audit departments located in London and Johannesburg, responsible for Investec plc and Investec Limited respectively. Investec Bank plc (Irish branch) has its own Internal Audit function reporting into Investec plc Internal Audit. In combination, the functions cover all the geographies in which Investec operates. These functions use a global risk-based methodology and cooperate technically and operationally.

The heads of internal audit report at each audit committee meeting and have a direct reporting line to the chairman of the audit committee as well as the appropriate chief executive officers. They operate independently of executive management, but have regular access to their local chief executive officer and to BU executives. The heads of internal audit are responsible for coordinating internal audit efforts to ensure coverage is global and departmental skills are leveraged to maximise efficiency. For administrative purposes, the heads of internal audit also report to the global head of corporate governance and compliance. The functions comply with the International Standards for the Professional Practice of Internal Auditing, and are subject to an independent Quality Assurance Review (QAR) at appropriate intervals. The most recent independent QAR benchmarked the functions against the July 2013 publication by the Chartered Institute for Internal Auditors entitled Effective Internal Audit in the Financial Services Sector. The results were communicated to the audit committees in March 2014 and to the respective regulators. A QAR follow-up review was completed and results issued to the audit committees in January 2015 as well as to the respective regulators.

Annually, Internal Audit conducts a formal risk assessment of the entire business from which a comprehensive risk-based audit plan is derived. The assessment and programme are validated by executive management and approved by the responsible audit committee.

Very high risk businesses and processes are audited at least every 12 months, with other areas covered at regular intervals based on their risk profile. There is an ongoing focus on identifying fraud risk as well as auditing technology risks given Investec’s dependence on IT systems. Internal Audit also liaises with the external auditors and other assurance providers to enhance efficiencies in terms of integrated assurance. The annual plan is reviewed regularly to ensure it remains relevant and responsive, given changes in the operating environment. The audit committee approves any changes to the plan.

Significant control weaknesses are reported, in terms of an escalation protocol, to the local assurance forums, where remediation procedures and progress are considered and monitored in detail by management. The audit committee receives a report on significant issues and actions taken by management to enhance related controls. An update on the status of previously raised issues is provided by Internal Audit to each audit committee. If there are concerns in relation to overdue issues, these will be escalated to the executive risk review forum to expedite resolution.

Internal Audit proactively reviews its practices and resources for adequacy and appropriateness to meet an increasingly demanding corporate governance and regulatory environment, including the requirements of King III in South Africa. The audit teams comprise well-qualified, experienced staff to ensure that the function has the competence to match Investec’s diverse requirements. Where specific specialist skills or additional resources are required, these are obtained from third parties. Internal Audit resources are subject to review by the respective audit committees.
Compliance

Over the last year the pace of regulatory change in the financial sector has shown little signs of abating, and the pressure the industry has faced to implement various regulatory initiatives has continued to be resource intensive. In addition, the scale and frequency of regulatory fines and redress orders continues to impact firms’ balance sheets with the regulators’ intensive and intrusive approach to supervision expected to continue for the foreseeable future.

Global regulators have continued to focus on promoting stability and resilience in financial markets, with increasing emphasis on recovery and resolution plans and structural reforms to the banking sector as well as customer and market conduct related reforms.

Investec remains focused on complying with the highest levels of compliance professionalism and integrity in each of our jurisdictions. Our culture is a major component of our compliance framework and is supported by robust policies, processes and talented professionals who ensure that the interests of our customers and shareholders remain at the forefront of everything we do.

Investec plc – year in review

Conduct risk
The FCA continues to focus on advancing its three operational objectives: securing an appropriate degree of protection for consumers; protecting and enhancing the integrity of the UK financial system; and promoting effective competition in the interests of consumers. Our culture is a major component of our compliance framework and is supported by robust policies, processes and talented professionals who ensure that the interests of our customers and shareholders remain at the forefront of everything we do.

Consumer protection
The FCA has vigorously pursued its consumer protection objective since taking over from the FSA. This has included several strategic thematic reviews into most areas of consumer activity. These reviews have included: firms’ complaint handling, conflict management arrangements, manufacturing and distribution of structured products, affordability assessment and forbearance policies in consumer credit and mortgage lending, as well as the way firms incentivise front line sales staff and protect client assets.

Market integrity
The FCA has adopted a markedly different approach to supervising conduct in the wholesale markets to its predecessor, the FSA. The FCA is now adopting a more interventionist and assertive approach in identifying and addressing risks arising from wholesale conduct and scrutinising these markets more broadly than before. It is driven by the recognition that poor conduct in wholesale markets can result in detriment to retail customers and erode trust and confidence in the integrity of UK markets. This has become apparent in FCA’s more pronounced focus on the wholesale markets and outcomes for clients irrespective of their categorization as either retail or professional.

Specific wholesale conduct areas of regulatory focus over the past 12 months have included: conflicts of interests management; best execution and benchmark regulation.

Competition
On 1 April 2015, the FCA gained additional competition powers alongside the Competition and Markets Authority (the CMA), including investigation of breaches and enforcement of competition laws. The FCA has made use of these powers to carry out a number of competition market studies in areas such as: cash savings, credit cards and SME banking. The FCA is also planning further market studies into the investment and corporate banking sector, mortgage markets and investor charges in the asset management sector.

Investment services reform
European Regulators are in the process of reforming the rulebooks for Investment Services in the EU Markets, via enhancements to the Markets in Financial Instruments Directive (MiFID). This reform package, known as MiFID II, will form the legal framework governing the requirements applicable to investment firms, trading venues, data reporting service providers and third-country firms providing investment services or activities in the EU.

These reforms will drive change across Investec Bank plc, Investec Asset Management and Investec Wealth & Investment, with the majority of these reforms required to be implemented by January 2017.

Segregation of client assets and funds
Following the failures of Lehman Brothers and MF Global, the FCA has proposed fundamental changes to the Client Assets Protection Regime (CASS). These changes are designed to ensure that client assets and client money are segregated at all times and capable of being returned to clients swiftly in the event of a firm failure.

These new rules will require operational changes across Investec Bank plc, Investec Asset Management and Investec Wealth & Investment. This will include the manner in which firms segregate and manage client money and assets – through customer relationships, outsourcing arrangements, operations, IT systems and related policies and procedures.

These new CASS rules come into force in stages between December 2014 and 1 June 2015.

Senior managers and certified persons regime
The FCA and PRA are putting in place a new regulatory framework for individuals working in the UK banking sector. The incoming regime will consist of three key components:

I. A new Senior Managers Regime which will clarify the lines of responsibility at the top of banks, enhance the regulators’ ability to hold senior individuals in banks to account and require banks to regularly vet their senior managers for fitness and propriety.

II. A Certification Regime requiring firms to assess fitness and propriety of staff in positions where the decisions they make could pose significant harm to the bank or any of its customers; and

III. A new set of Conduct Rules, which take the form of brief statements of high level principles setting out the standards of behaviour for bank employees.
The new regime will come into force on 7 March 2016.

Structural banking reform

The Banking Reform Act received Royal Assent on 18 December 2013 and gave the UK authorities the powers to implement key recommendations of the Independent Commission on Banking (ICB) on banking reform, including ring-fencing of UK retail banking activities of a universal bank into a legally distinct, operationally separate and economically independent entity within the same group.

Ring-fencing was a key area of strategic focus during the period for the largest UK banks. The Banking Reform Act contains a de minimis exemption from the requirement to ring-fence, which is relevant to all but the largest UK deposit takers. Investec falls within this de minimis exemption and is therefore out of scope from the ring-fencing requirement.

Changes to regulatory landscape in the UK

On 1 April 2014 the FCA took over the regulation and supervision of consumer credit from the Office of Fair Trading. At the same time the newly established Competition and Markets Authority assumed responsibility for wider consumer protection and promotion of competition.

The Payment Systems Regulator was created on 1 April 2014 and became fully operational on 1 April 2015. The PSR is a competition-focused, economic regulator for domestic retail payment systems in the UK. It aims to promote innovation and ensure that payment systems are operated and developed in a way that promotes the interests of all the businesses and consumers that utilise them.

Financial crime

Financial crime continues to be a regulatory focus with regulators globally encouraging firms to adopt a dynamic approach to the management of risk and to increase efforts around systems and controls to combat both money laundering and bribery and corruption. In particular, the UK government published its first UK National Anti-Corruption Plan in December 2014, thereby indicating its intent to lie in anti-corruption with its efforts to strengthen the governance of banks and conduct in financial markets. The last year also saw the advent of a new type of targeted international sanctions in the midst of the Ukraine crisis. The sectoral sanctions imposed by the US and the EU on the Russian financial, energy and defence sectors will continue to be a challenge for firms as they attempt to comply with increasingly complex rules and expanding lists of banned individuals and businesses. This, together with developments around the EU fourth money laundering directive, will become a focus for Investec Bank plc.

Tax reporting

To combat tax evasion by US tax residents using offshore accounts and investments, the US has enacted the Foreign Account Tax Compliance Act (FATCA) which has a global impact on firms. Under FATCA, financial institutions outside the US are required to report specific information on their US customers to the US tax authorities, the Internal Revenue Service (IRS). Failure to meet the reporting obligations under FATCA would result in a 30% withholding tax on financial institutions. The UK, along with a number of other countries, has entered into an intergovernmental agreement with the US whereby the information will be passed over to the UK tax authorities who will then deal with the IRS.

Investec Limited – year in review

Changes to regulatory landscape in South Africa

The rapid pace of regulatory developments has continued from last year.

A second draft of the Financial Sector Regulation Bill, which was vastly different from the first draft, was released for comments in December 2014. The Bill creates the two new regulatory peaks within the financial services sector, i.e. the Bank Supervision Department of the SARB will transform into the Prudential Authority (PA), and the Financial Services Board (FSB) will transform into the Financial Sector Conduct Authority (FSCA). Both new authorities will have wider jurisdiction than the existing regulatory authorities, e.g. the PA’s jurisdiction will extend beyond banks (to insurance companies for instance), and the FSCA’s jurisdiction will also extend to the market conduct activities of banks; and both authorities will have wider law-making powers. The Bill also introduces consultation and co-ordination between the financial sector regulators and other regulators that have an impact on and oversight of activities of financial institutions, e.g. the National Credit Regulator.

The Financial Sector Regulatory Bill also proposes to amend the existing market conduct related legislation into an overarching ‘Conduct of Financial Institutions Act’ within the next two years. This will supersede existing industry-specific legislation in terms of the Banks Act, Long Term Insurance Act, Short Term Insurance Act and the Financial Advisory and Intermediary Services (FAIS).

Simultaneously, National Treasury (NT) published the Market Conduct Policy Framework for comment. This document outlined NT’s policy approach to market conduct, and will form the basis for their development of the market conduct regulatory framework and legislation. The Treating Customers Fairly regime will form part of this new framework.

The FSB released the Retail Distribution Review paper for comment in November 2014. The paper proposes a more proactive and interventionist regulatory framework for distributing retail financial products to customers.

The amendments to the National Credit Act and the Regulations came into effect on 13 March 2015. The amendments include the introduction of affordability assessment regulations.

Draft regulations in respect of over-the-counter derivatives were published for comment in the course of 2014.

Conduct risk (consumer protection)

Conduct risk remains a key area of concern for the regulators. While the regulatory framework is changing to create a dedicated regulator to supervise the conduct of financial institutions, the existing regulatory and legislative framework continues to be utilised to ensure that financial institutions take heed of conduct risk and that they have measures in place to mitigate or avoid such risks. Some examples include the SARB incorporating market conduct as a flavour of the year topic in 2014, the NCR amending the National Credit Act to include affordability assessment regulations, and the FSB amending the General Code of Conduct for Authorised Financial Services Providers to prohibit sign-on bonuses. The affected businesses continue to assess the impact of the regulatory requirements and implement changes where necessary.
Although the effective date for the Protection of Personal Information Act (POPI) has not yet been published, work continues on data protection and information management.

Financial crime
Financial crime continues to be a regulatory focus with amendments to governing legislation proposed for later this year. All accountable institutions are further effected by the Financial Intelligence Centre’s intended move to a new automated solution for registration and reporting, also scheduled for later this year.

Tax reporting
The intergovernmental agreement for South Africa has been ratified in parliament and is effective as of 28 October 2014. This allows South Africa to be treated as a participating country and thus avoid withholding tax on South African financial institutions. Investec is engaged in projects to ensure that operationally we are able to identify our US clients and that we comply with FATCA. In addition to FATCA, there is also an OECD Common Reporting Standard proposal, aiming for an internationally accepted single global tax reporting standard and automatic exchange of information. Mauritius has signed a Tax Information Exchange Agreement as well as an inter-governmental agreement with the IRS and therefore will also be treated as a participating country.
Definitions

**Adjusted shareholders’ equity**
Refer to calculation on page 50 in volume one

**Cost to income ratio**
Operating costs divided by operating income (net of depreciation on leased assets). Depreciation on operating leased assets has been netted off against operating income

**Core loans and advances**
Net loans and advances to customers plus net own originated securitised assets
Refer to calculation on page 31

**Dividend cover**
Adjusted earnings per ordinary share before goodwill and non-operating items divided by dividends per ordinary share

**Earnings attributable to ordinary shareholders before goodwill, acquired intangibles and non-operating items (i.e. adjusted earnings)**
Refer to page 53 in volume three

**Adjusted earnings per ordinary share before goodwill, acquired intangibles and non-operating items**
Refer to page 53 in volume three

**Effective operational tax rate**
Tax on profit on ordinary activities (excluding non-operating items) divided by operating profit

**Market capitalisation**
Total number of shares in issue (including Investec plc and Investec Limited) multiplied by the closing share price of Investec plc on the London Stock Exchange

**Net tangible asset value per share**
Refer to calculation on page 48 in volume one

**Non-operating items**
Reflects profits and/or losses on termination, restructuring or disposal of group operations and acquisitions made

**Operating profit**
Operating income less administrative expenses, impairments for bad and doubtful debts and depreciation of tangible fixed assets. This amount is before goodwill, acquired intangibles and non-operating items

**Operating profit per employee**
Refer to calculation on page 53 in volume one

**Recurring income**
Net interest income plus net annuity fees and commissions expressed as a percentage of total operating income

**Return on average adjusted shareholders’ equity**
Refer to calculation on page 50 in volume one

**Return on risk-weighted assets**
Adjusted earnings divided by average risk-weighted assets

**Risk-weighted assets**
Is calculated as the sum of risk-weighted assets for Investec plc and Investec Limited (converted into Pounds Sterling) as reflected on page 89

**Staff compensation to operating income ratio**
All employee-related costs expressed as a percentage of operating income

**Third party assets under administration**
Includes third party assets under administration managed by the Wealth & Investment, Asset Management and Property businesses

**Total capital resources**
Includes shareholders’ equity, subordinated liabilities and non-controlling interests

**Total equity**
Total shareholders’ equity including non-controlling interests

**Weighted number of ordinary shares in issue**
The number of ordinary shares in issue at the beginning of the year increased by shares issued during the year, weighted on a time basis for the period during which they have participated in the income of the group less treasury shares. Refer to calculation on page 53 in volume three

Directors’ responsibility statement

The following statement, which should be read in conjunction with the auditors’ reports set out on pages 12 to 15, is made with a view to distinguishing for stakeholders the respective responsibilities of the directors and of the external auditors in relation to the combined consolidated annual financial statements.

The directors are responsible for the preparation, integrity and objectivity of the combined consolidated annual financial statements that fairly present the state of affairs of the group at the end of the financial year and the net income and cash flows for the year, and other information contained in this report.

To enable the directors to meet these responsibilities:

• The board and management set standards and management implements systems of internal controls and accounting and information systems aimed at providing reasonable assurance that assets are safeguarded and the risk of fraud, error or loss is reduced in a cost-effective manner. These controls, contained in established policies and procedures, include the proper delegation of responsibilities and authorities within a clearly defined framework, effective accounting procedures and adequate segregation of duties

• The group’s internal audit function, which operates unimpeded and independently from operational management, and has unrestricted access to the group audit committee, appraises and, when necessary, recommends improvements in the system of internal controls and accounting practices, based on audit plans that take cognisance of the relative degrees of risk of each function or aspect of the business

• The group audit committees, together with Internal Audit, plays an integral role in matters relating to financial and internal control, accounting policies, reporting and disclosure.

To the best of our knowledge and belief, based on the above, the directors are satisfied that no material breakdown in the operation of the system of internal control and procedures has occurred during the year under review.

The group consistently adopts appropriate and recognised accounting policies and these are supported by reasonable judgements and estimates on a consistent basis and provides additional disclosures when compliance with the specific requirements in International Financial Reporting Standards (IFRS) are insufficient to enable users to understand the impact of particular transactions, other events and conditions on the group’s financial position and financial performance.

The annual financial statements of the companies and the group have been prepared in accordance with the respective Companies Acts of the United Kingdom and South Africa and comply with IFRS and Article 4 of the IAS Regulation and comply with UK GAAP in respect of Investec plc parent company accounts.

The directors are of the opinion, based on their knowledge of the companies, key processes in operation and enquiries, that adequate resources exist to support the companies on a going concern basis over the next year. These annual financial statements have been prepared on that basis.

It is the responsibility of the external auditors to report on the combined consolidated annual financial statements. Their reports to the members of the companies are set out on pages 12 to 15. As far as the directors are aware, there is no relevant audit information of which the external auditors are unaware.

Approval of annual financial statements

The directors’ report and the annual financial statements of the companies and the group, which appear on pages 5 to 11 and pages 16 to 133, were approved by the board of directors on 10 June 2015.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the companies’ website. Legislation in the United Kingdom governing the preparation and dissemination of the annual financial statements may differ from legislation in other jurisdictions.

 Directors’ report

Extended business review

We are an international specialist bank and asset manager that provides a diverse range of financial products and services to a niche client base in three principal markets, the United Kingdom, South Africa and Australia as well as certain other countries. Investec focuses on delivering distinctive profitable solutions for its clients in three core areas of activity namely, Asset Management, Wealth & Investment and Specialist Banking.

The strategic report on pages 18 to 21 in volume one provides an overview of our strategic position, performance during the financial year and outlook for the business. It should be read in conjunction with the sections on pages 22 to 180 in volume two which elaborate on the aspects highlighted in this review.

The directors’ report deals with the requirements of the combined consolidated Investec group, comprising the legal entities Investec plc and Investec Limited.

Authorised and issued share capital

Investec plc and Investec Limited

Details of the share capital are set out in note 42 to the annual financial statements.

Investec plc

During the year, the following shares were issued:

- 4 243 045 ordinary shares on 19 June 2014 at R56.00 pence per share
- 2 814 094 special converting shares on 23 June 2014 at R0.0002 each at par
- 610 254 special convertible redeemable preference shares on 15 August 2014 of R0.0002 each at par
- 185 643 class ILRP2 redeemable non-participating preference shares at R1 000.00 per share (R0.01 par and premium of R999.99 per share).

On 23 June 2014, Investec Limited redeemed 81 variable rate redeemable cumulative preference shares at R1 million per share (R0.60 par and premium of R999 999.40 per share).

Investec Limited did not repurchase any of its ordinary shares during the financial year ended 31 March 2015.

At 31 March 2015, Investec Limited held 21 162 694 shares in treasury (2014: 19.0 million). Investec plc held 8 325 971 million shares in treasury (2014: 10.6 million). The maximum number of shares held in treasury by Investec Limited during the period under review was 24 708 870.

Financial results

The combined results of Investec plc and Investec Limited are set out in the annual financial statements and accompanying notes for the year ended 31 March 2015. The preparation of these combined results was supervised by the group risk and finance director, Glynn Burger.

Ordinary dividends

Investec plc

An interim dividend was declared to shareholders as follows:

- 8.5 pence per ordinary share to non-South African resident shareholders and South African resident shareholders (2013: 8.0 pence) registered on 12 December 2014 and was paid on 29 December 2014.

The dividends were paid on 29 December 2014.

The directors have proposed a final dividend to shareholders registered on 31 July 2015, of 11.5 pence (2014: 11.0 pence) per ordinary share, which is subject to the approval of the members of Investec plc at the annual general meeting which is scheduled to take place on 6 August 2015 and, if approved, will be paid on 14 August 2015, as follows:

11.5 pence per ordinary share to non-South African resident shareholders (2014: 11.0 pence) registered on 31 July 2015.

To South African resident shareholders registered on 31 July 2015, through a dividend paid by Investec Limited on the SA DAS share, of 9.0 pence per ordinary share and 2.5 pence per ordinary share paid by Investec plc.

Investec Limited

An interim dividend of 146.0 cents per ordinary share (2013: 151.0 cents) was declared to shareholders registered on 12 December 2014 and was paid on 29 December 2014.

The directors have proposed a final dividend of 216 cents per ordinary share (2014: 196.0 cents) to shareholders registered on 31 July 2015 to be paid on 14 August 2015. The final dividend is subject to the approval of members of Investec Limited at the annual general meeting scheduled to take place on 6 August 2015.

Preference dividends

Investec plc

Non-redeemable, non-cumulative, non-participating preference shares

Preference dividend number 17 for the period 1 April 2014 to 30 September 2014, amounting to 7.52055 pence per share, was declared to members holding preference shares registered on 5 December 2014 and was paid on 15 December 2014.

Preference dividend number 18 for the period 1 October 2014 to 31 March 2015, amounting to 7.47945 pence per share, was declared to members holding preference shares registered on 12 June 2015 and will be paid on 22 June 2015.

Rand-denominated non-redeemable, non-cumulative, non-participating preference shares

Preference dividend number 7 for the period 1 April 2014 to 30 September 2014, amounting to 433.55137 cents per share, was declared to members holding Rand-denominated non-redeemable, non-cumulative, non-participating preference
shares registered on 5 December 2014 and was paid on 15 December 2014.

Preference dividend number 8 for the period 1 October 2014 to 31 March 2015, amounting to 438.17123 cents per share, was declared to members holding preference shares registered on 12 June 2015 and will be paid on 22 June 2015.

Preferred securities
The seventh annual distribution, fixed at 7.075%, on the €200 million fixed/floating rate, guaranteed, non-voting, non-cumulative perpetual preferred callable securities issued by Investec Tier 1 (UK) LP on 24 June 2005, is due and will be paid on 24 June 2014.

Investec Limited

Non-redeemable, non-cumulative, non-participating preference shares
Preference dividend number 20 for the period 1 April 2014 to 30 September 2014, amounting to 354.91885 cents per share, was declared to shareholders holding preference shares registered on 5 December 2014 and was paid on 15 December 2014.

Preference dividend number 21 for the period 1 October 2014 to 31 March 2015, amounting to 358.70081 cents per share, was declared to shareholders holding preference shares registered on 12 June 2015 and will be paid on 22 June 2015.

Class ILRP1 redeemable non-participating preference shares
Preference dividend number 4 for the period 1 April 2014 to 30 June 2014, amounting to 1256.38415 cents per share, was declared to shareholders holding preference shares on 25 July 2014 and was paid on 28 July 2014.

Preference dividend number 5 for the period 1 July 2014 to 30 September 2014, amounting to 1275.12771 cents per share, was declared to shareholders holding preference shares on 24 October 2014 and was paid on 27 October 2014.

Preference dividend number 6 for the period 1 October 2014 to 31 December 2014, amounting to 1303.46388 cents per share, was declared to shareholders holding preference shares on 23 January 2015 and was paid on 26 January 2015.

Preference dividend number 7 for the period 1 January 2015 to 31 March 2015, amounting to 1275.12771 cents per share, was declared to shareholders holding preference shares on 24 April 2015 and was paid on 28 April 2015.

Redeemable cumulative preference shares
Dividends amounting to R19 970 856 (2014: R23 731 999.98) were paid on the redeemable cumulative preference shares.

Directors and secretaries

Details of directors and secretaries of Investec plc and Investec Limited are reflected on pages 114 and 115 in volume one.

In accordance with the UK Corporate Governance Code, the entire board will offer itself for re-election at the 2015 annual general meeting.

OC Dickson, GFO Alford and MP Malungani did not offer themselves for re-election at the annual general meeting held on 7 August 2014.

Sir David Prosser retired from the board on 8 August 2014.

CR Jacobs, Lord Malloch-Brown and KL Shuenyane were appointed as directors on 8 August 2014. On 1 November 2014 and 1 January 2015 respectively, ZBM Bassa and LC Bowden were appointed as directors.

The appointments of CR Jacobs, Lord Malloch-Brown, KL Shuenyane, ZBM Bassa and LC Bowden terminate at the end of the annual general meeting on 6 August 2015, but being eligible will offer themselves for election.

The company secretary of Investec plc is David Miller.

As from 1 July 2014, the company secretary of Investec Limited is Niki van Wyk. Benita Coetsee resigned with effect from 30 June 2014.

Corporate governance

The group’s corporate governance board statement and governance framework are set out on pages 94 to 97 in volume one.

Share incentives

Details regarding options granted during the year are set out on page 50.

Audit committees

The audit committees comprising independent non-executive directors meet regularly with senior management, the external auditors, Operational Risk, Internal Audit, Compliance and the Finance division, to consider the nature and scope of the audit reviews and the effectiveness of our risk and control systems.

Further details on the role and responsibility of the audit committee are set out on pages 104 to 107 in volume one.

Auditors

Ernst & Young LLP have indicated their willingness to continue in office as auditors of Investec plc and Ernst & Young Inc. and KPMG Inc. have indicated their willingness to continue in office as joint auditors of Investec Limited.

A resolution to reappoint them as auditors will be proposed at the annual general meeting scheduled to take place on 6 August 2015.
Contracts

Refer to pages 156 to 158 in volume one for details of contracts with directors.

Subsidiary and associated companies

Details of principal subsidiary and associated companies are reflected on pages 116 to 122.

Major shareholders

The largest shareholders of Investec plc and Investec Limited are reflected on page 117 in volume one.

Special resolutions

Investec plc

At the annual general meeting held on 7 August 2014, special resolutions were passed in terms of which:

- A renewable authority was granted to Investec plc to acquire its own ordinary shares in accordance with the terms of section 701 of the Companies Act 2006
- A renewable authority was granted to Investec plc to acquire its own preference shares in accordance with the terms of section 701 of the Companies Act 2006

Investec Limited

At the annual general meeting held on 7 August 2014, the following special resolutions were passed in terms of which:

- A renewable authority was granted to Investec Limited and any of its subsidiaries to acquire its own ordinary shares in terms of the provisions of the South African Companies Act, No 71 of 2008
- A renewable authority was granted to Investec Limited to provide financial assistance in order to comply with the provisions of sections 44 and 45 of the South African Companies Act, No 71 of 2008
- A renewable authority was granted to Investec Limited to approve directors’ remuneration in order to comply with the provisions of sections 65(1)(h), 66(8) and 66(9) of the South African Companies Act, No 71 of 2008

Accounting policies and disclosure

Accounting policies are set having regard to commercial practice and comply with applicable United Kingdom and South African law and International Financial Reporting Standards.

The parent company accounts of Investec plc continue to be prepared under UK Generally Accepted Accounting Practice (UK GAAP).

These policies are set out on pages 22 to 30.

Financial instruments

Detailed information on the group’s risk management process and policy can be found in the risk management report on pages 4 to 96 in volume two.

Information on the group’s hedge accounting policy and the use of derivatives and hedges can be found on pages 26 and 27 and in notes 23 and 53.

Employees

Our policy is to recruit and promote on the basis of aptitude and ability, without discrimination of any kind. Applications for employment by disabled people are always considered bearing in mind the qualifications and abilities of the applicants.

In the event of employees becoming disabled, every effort is made to ensure their continued employment. Our policy is to adopt an open management style, thereby encouraging informal consultation at all levels about aspects of our operations, and motivating staff involvement in our performance by means of employee share schemes.

We are committed to ensuring the health, safety and welfare of our employees and to providing and maintaining safe working conditions. We have health and safety policies in all regions of operation that cover all legislated requirements and additional benefits are provided for staff where possible. We constantly seek to improve both policies and the execution of health and safety standards in all our offices.

This takes the form of staff education, regular fire drills and maintenance of an open door policy with regard to dialogue on the issue. Where appropriate, the appointment of individuals responsible for various areas of health and safety is made.

Further information is provided on pages 125 to 129 in volume one.

Political donations and expenditure

Investec plc did not make any donations for political purposes in the UK or the rest of the EU, nor did it make any political donations to political parties or other political organisations, or to any independent election candidates, or incur any political expenditure during the year. Invested Limited made political donations totalling R1 million in 2015 (2014: R2.5 million).

Environment, including greenhouse gas emissions

We are committed to pursuing sound environmental policies in all aspects of our business and seek to encourage and promote good environmental practice among our employees and within the community in which we operate.

Further information can be found on pages 122 to 138 in volume one.

Going concern

Refer to pages 96 and 97 in volume one for the directors’ statement in relation to going concern.

Research and development

In the ordinary course of business, Investec develops new products and services in each of its business divisions.
Additional information for shareholders

Schedule A to the directors’ report is a summary of certain provisions of Investec plc’s current Articles of Association and applicable English law concerning companies (the UK Companies Act 2006).

The board considers that this integrated annual report and annual financial statements, taken as a whole, is fair, balanced and understandable and provides the information necessary for shareholders to assess the group’s performance, business model and strategy.

On behalf of the boards of Investec plc and Investec Limited

Fani Titi
Chairman

10 June 2015

Stephen Koseff
Chief executive officer
Additional information for shareholders

Set out below is a summary of certain provisions of Investec plc’s current Articles of Association (the Articles) and applicable English law concerning companies (the UK Companies Act 2006). This is a summary only and the relevant provisions of the Articles or the Companies Act 2006 should be consulted if further information is required.

Share capital

The issued share capital of Investec plc at 31 March 2015 consists of 613,609,642 ordinary shares of £0.0002 each, 15,081,149 non-redeemable, non-cumulative, non-participating preference shares of £0.01 each, 2,275,940 ZAR non-redeemable, non-cumulative, non-participating preference shares of R0.001 each, 285,748,623 special converting shares of £0.0002 each, the special voting share of £0.001, the UK DAN share of £0.001 and the UK DAS share of £0.001 (each class as defined in the Articles).

Voting rights

Subject to any special rights or restrictions attaching to any class of shares, at a general meeting, every member present in person has, upon a show of hands, one vote and on a poll every member who is present in person or by proxy has one vote for each share. In the case of joint holders of a share, the vote of the senior who tenders a vote whether in person or by proxy shall be accepted to the exclusion of the votes of the other joint holders and for this purpose seniority shall be determined by the order in which the names stand in the register of members in respect of the share. Under the Companies Act 2006 members are entitled to appoint a proxy, who need not be a member of Investec plc, to exercise all or any of their rights to attend and vote on their behalf at a general meeting or class meeting. A member may appoint more than one proxy in relation to a general meeting or class meeting, provided that each proxy is appointed to exercise the rights attached to a different share or shares held by that member. A member that is a corporation may appoint an individual to act on its behalf at a general meeting or class meeting as a corporate representative. The person so authorised shall be entitled to exercise the same powers on behalf of such corporation as the corporation could exercise if it were an individual member of Investec plc.

Restrictions on voting

No member shall be entitled to vote either in person or by proxy at any general meeting or class meeting in respect of any shares held by him if any call or other sum then payable by him in respect of that share remains unpaid. In addition, no member shall be entitled to vote if he has been served with a notice after failure to provide Investec plc with information concerning the opinion of the board, justifies such payment.

The board may withhold payment of all or any part of any dividends or other monies payable in respect of Investec plc’s shares from a person with a 0.25% or more interest in nominal value of the issued shares if such a person has been served with a notice after failure to provide Investec plc with information concerning interests in those shares required to be provided under the Companies Act 2006.

Share capital

The issued share capital of Investec plc at 31 March 2015 consists of 613,609,642 ordinary shares of £0.0002 each, 15,081,149 non-redeemable, non-cumulative, non-participating preference shares of £0.01 each, 2,275,940 ZAR non-redeemable, non-cumulative, non-participating preference shares of R0.001 each, 285,748,623 special converting shares of £0.0002 each, the special voting share of £0.001, the UK DAN share of £0.001 and the UK DAS share of £0.001 (each class as defined in the Articles).

Purchase of own shares

Subject to the provisions of the Articles, the Companies Act 2006, the uncertificated securities regulations 2001 and every other statute for the time being in force concerning companies and affecting Investec plc, the approval of shareholders as provided in the Investec plc Articles, and without prejudice to any relevant special rights attached to any class of shares, Investec plc may purchase or may enter into a contract under which it will or may purchase, any of its own shares of any class, including without limitation any redeemable shares, in any way and at any price (whether at par or above or below par).

Dividends and distributions

Subject to the provisions of the Companies Act 2006, Investec plc may by ordinary resolution from time to time declare dividends not exceeding the amount recommended by the board. The board may pay interim dividends whenever the financial position of Investec plc, in the opinion of the board, justifies such payment.

The board may withhold payment of all or any part of any dividends or other monies payable in respect of Investec plc’s shares from a person with a 0.25% or more interest in nominal value of the issued shares if such a person has been served with a notice after failure to provide Investec plc with information concerning interests in those shares required to be provided under the Companies Act 2006.

Deadlines for exercising voting rights

Votes are exculsable at a general meeting of Investec plc in respect of which the business being voted upon is being heard. Votes may be exercised in person, by proxy, or in relation to corporate members, by corporate representatives. The Articles provide a deadline for submission of proxy forms of not less than 48 hours before the time appointed for the holding of the meeting or adjourned meeting.

Variation of rights

Subject to the Companies Act 2006, the Articles specify that rights attached to any class of shares may be varied with the written consent of the holders of not less than three-fourths in nominal value of the issued shares of that class, or with the sanction of an extraordinary resolution passed at a separate general meeting of the holders of those shares. At every such separate general meeting the quorum shall be two persons or, if there is only one holder, that holder at least holding or representing by proxy at least one-third in nominal value of the issued shares of the class (calculated excluding any shares held as treasury shares). The rights conferred upon the holders of any shares shall not, unless otherwise expressly provided in the rights attaching to those shares, be deemed to be varied by the creation or issue of further shares ranking pari passu with them. Where, under the company’s share incentive plan, participants are the beneficial owners of the shares, but not the registered owners, the participants are not entitled to exercise any voting rights until the shares are released to the participants. Under the company’s employee trust plan, the trustee does not vote in respect of unallocated shares.

Transfer of shares

All transfers of shares may be effected by transfer in writing in any usual or common form or in any other form acceptable to the directors. The instrument of transfer shall be signed by or on behalf of the transferor and (except in the case of fully paid shares) by or on behalf of the transferee. Transfers of
Schedule A to the directors’ report  
(continued)

shares which are in uncertificated form are 
effectuated by means of the CREST system.

The directors may, in the case of shares in 
certificated form, in their absolute discretion 
and without assigning any reason, refuse 
to register any transfer of shares (not 
being fully paid shares), provided that such 
discretion may not be exercised in such a 
way as to prevent dealings in the shares of 
that class from taking place on an open and 
proper basis. The directors may also refuse 
to register an allotment or transfer of shares 
(whether fully paid or not) in favour of more 
than four persons jointly. If the directors 
refuse to register an allotment or transfer 
they shall within two months after the date 
on which the letter of allotment or transfer 
was lodged with Investec plc send to the 
allottee or transferee a notice of the refusal.

The directors may decline to recognise any 
instrument of transfer unless the instrument 
of transfer is in respect of only one class of 
share and, when submitted for registration, 
is accompanied by the relevant share 
certificates and such other evidence as the 
directors may reasonably require. Subject 
to the Companies Act and regulations and 
applicable CREST rules, the directors may 
determine that any class of shares may be 
held in uncertificated form and that title to 
such shares may be transferred by means 
of the CREST system or that shares of 
any class should cease to be so held and 
transferred.

A number of the company’s employee 
share plans include restrictions on transfer 
of shares while the shares are subject to the 
plans, in particular, the share incentive plan.

Plc preference shares

The following are the rights and privileges 
which attach to the plc preference shares:

- On a return of capital, whether or not on 
a winding up (but not on a redemption 
or purchase of any shares by Investec 
plc) or otherwise, the plc preference 
shares will rank, pari passu with shares 
and with the most senior ranking preference 
shares of Investec plc in issue (if 
any) from time to time and with any 
other shares of Investec plc that are 
expressed to rank pari passu therewith 
and as regards participation in the capital, 
and otherwise in priority to any other 
class of shares of Investec plc.

- Investec plc may, at its option, redeem 
all or any of the plc preference shares for 
the time being issued and outstanding 
on the first call date or any dividend 
payment date thereafter.

- Holders of plc preference shares will not 
be entitled to attend and vote at general 
meetings of Investec plc. Holders will 
be entitled to attend and vote at a class 
meeting of holders of plc preference 
shares.

Non-redeemable, 
non-cumulative, 
non-participating 
preference shares

The following are the rights and privileges 
which attach to the perpetual preference 
shares:

- Each perpetual preference share 
will rank as regards dividends and a 
repayment of capital on the winding 
up of Investec plc prior to the ordinary 
shares, the plc special converting 
shares, the UK DAN share, the UK 
DAS share, but pari passu with the 
preference shares. The perpetual 
preference shares shall confer on the 
holders, on a per perpetual preference 
shares and equal basis, the right on 
a return of capital on the winding-up 
of Investec plc of an amount equal to 
the aggregate of the nominal value 
and premiums in respect of perpetual 
preference shares issued, divided by the 
number of perpetual preference shares 
in issue.

- Each perpetual preference share may 
confer upon the holder thereof the 
right to receive out of the profits of 
Investec plc which it shall determine 
to distribute, in priority to the ordinary 
shares, the plc special converting 
shares, the UK DAN share and the UK 
DAS share, but pari passu with the 
preference shares, the preference 
dividend calculated in accordance with 
the Articles.

- The holders of the perpetual preference 
shares shall be entitled to receive notice 
of and be present but not to vote, either 
in person or by proxy, at any meeting of 
Investec plc, by virtue of or in respect 
of the perpetual preference shares, 
unless either or both of the following 
circumstances prevail at the date of the 
meeting:

Rand-denominated 
non-redeemable, 
non-cumulative, 
non-participating 
perpetual preference 
shares (the ZAR perpetual 
preference shares)

The ZAR perpetual preference shares are 
subject to substantially similar terms and 
conditions as the existing Pounds Sterling 
non-redeemable, non-cumulative, 
non-participating preference shares, 
as outlined above, save that they are 
denominated in South African Rand.

– The preference dividend or any part 
thereof remains in arrears and unpaid 
as determined in accordance with 
Article 150.2(e)(ii) after six months 
from the due date thereof; and/or

– A resolution of Investec plc is 
proposed which resolution directly 
ffects the rights attached to the 
perpetual preference shares or the 
interests of the holders thereof, 
or a resolution of Investec plc is 
proposed to wind up or in relation to 
the winding-up of Investec plc or for 
the reduction of its capital, in which 
event the preference shareholders 
shall be entitled to vote only on such 
resolution.
Shares required for the DLC structure

Investec SSC (UK) Limited, a UK trust company, specially formed for the purpose of the DLC structure, holds the plc special voting share, the plc special converting shares, the UK DAN share and the UK DAS share. These shares can only be transferred to another UK trust company, in limited circumstances.

The plc special voting shares are specially created shares so that shareholders of both Investec plc and Investec Limited effectively vote together as a single decision-making body on matters affecting shareholders of both companies in similar ways, as set out in the Articles.

Prior to a change of control, approval of termination of the sharing agreement (which regulates the DLC), liquidation or insolvency of Investec plc, the plc special converting shares have no voting rights, except in relation to a resolution proposing the: (i) variation of the rights attaching to the shares or (ii) winding-up, and they have no rights to dividends. The special converting shares are held on trust for the Investec Limited ordinary shareholders. Investec plc and Investec Limited have established dividend access trust arrangements as part of the DLC.

Investec plc has issued two dividend access shares, the UK DAS share and UK DAN share which enables Investec plc to pay dividends to the shareholders of Investec Limited. This facility may be used by the board to address imbalances in the distributable reserves of Investec plc and Investec Limited and/or to address the effects of South African exchange controls and/or if they otherwise consider it necessary or desirable.

Appointment and replacement of directors

Directors shall be no less than four and no more than 20 in number. A director is not required to hold any shares of Investec plc by way of qualification. Investec plc may by special resolution increase or reduce the maximum or minimum number of directors.

Powers of directors

Subject to the Articles, the Companies Act 2006, the CREST regulations and every other statute for the time being in force concerning companies and affecting Investec plc, and any directions given by ordinary or special resolution, the business of Investec plc will be managed by the board who may exercise all the powers of Investec plc.

The board may exercise all the powers of Investec plc to borrow money and to mortgage or charge any of its undertaking, property, assets and uncalled capital and to issue debentures and other securities, whether outright or as collateral security for any debt, liability or obligation of Investec plc or of any third party.

Significant agreements: change of control

The Articles of Association of both Investec plc and the Memorandum of Incorporation of Investec Limited ensure that a person cannot make an offer for one company without having made an equivalent offer to the shareholders of both companies on equivalent terms.

Pursuant to the terms of the agreements establishing the DLC structure, if either Investec plc or Investec Limited serves written notice on the other at any time after either party becomes a subsidiary of the other party or after both Investec plc and Investec Limited become subsidiaries of a third party the agreements establishing the DLC structure will terminate.

All of Investec plc’s share plans contain provisions relating to a change of control. Outstanding awards and options would normally vest and become exercisable on a change of control and, where applicable, subject to the satisfaction of any performance conditions at that time.
Independent auditor’s report to members of Investec plc

Opinion on financial statements

In our opinion:
• The combined consolidated financial statements give a true and fair view of the state of the group’s affairs as at 31 March 2015 and of its profit for the year then ended;
• The group financial statements have been appropriately prepared in accordance with IFRSs as adopted by the European Union;
• The parent company financial statements have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
• The financial statements have been prepared in accordance with the requirements of the Companies Act 2006 and, as regards the group financial statements, Article 4 of the IAS Regulation.

What we have audited

We have audited the financial statements of Investec plc for the year ended 31 March 2015, which comprise:
• The combined consolidated income statement;
• The combined consolidated statement of comprehensive income;
• The combined consolidated balance sheet;
• The combined consolidated statement of cash flows;
• The combined consolidated statement of changes in equity;
• The group accounting policies and the related notes set out on pages 22 to 133, together with certain risk notes marked as audited within volume two, Investec risk and Basel Pillar III report;
• the parent company balance sheet; and
• the parent company accounting policies and related notes set out on pages 126 to 128.

The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union. The financial reporting framework that has been applied in the preparation of the parent company financial statements is applicable law and United Kingdom Accounting Standards (United Kingdom Accepted Accounting Practice).

This report is made solely to the company’s members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company’s members those matters we are required to state to them in an auditor’s report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company’s members as a body, for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of directors and auditor

As explained more fully in the directors’ responsibility statement set out on page 4, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the group financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board’s Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the Investec plc combined consolidated and separate parent company’s circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Our assessment of risks of material misstatement and response to that risk

The table below shows the risks we identified that have had the greatest effect on the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team together with our audit response to the risks:

<table>
<thead>
<tr>
<th>Significant risk</th>
<th>Response</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk of inappropriate revenue recognition – Valuation of financial instruments, unlisted investments and embedded derivatives</td>
<td>We tested the design and operating effectiveness of controls for the valuation of financial instruments, unlisted investments and embedded derivatives. We performed a detailed examination of management’s valuation methodologies and assessed the appropriateness and consistency of the model inputs and key assumptions. Where such inputs and assumptions were not observable in the market we engaged our valuation specialists to critically assess whether they fell within an acceptable range based on relevant knowledge and experience of the market. In addition we tested material valuations in detail and where appropriate sought additional external evidence from that provided by management. In doing so, we assessed the methodologies used, the data used and the judgments and assumptions made, where valuation inputs were unobservable.</td>
</tr>
</tbody>
</table>
Our application of materiality

We apply the concept of materiality in both planning and performing the audit, and in evaluating the effect of misstatements on our audit and on the financial statements. For the purposes of determining whether the financial statements are free from material misstatement, we define materiality as the magnitude of misstatement that makes it probable that the economic decisions of a reasonably knowledgeable person, relying on the financial statements, would be changed or influenced.

When establishing our overall audit strategy we determined a magnitude of uncorrected misstatements that we judged would be material for the financial statements as a whole. We determined materiality for the group to be £22.7 million (2014: £22.0 million), which is approximately 5% (2014: 5%) of adjusted operating profit, and approximately 1% (2014: 1%) of equity.

We used adjusted operating profits to exclude the non-recurring gains/losses on group disposals, gains/losses related to litigation, claims and assessments.
The removal of these items in determining our materiality provided a stable basis which focused on the underlying profitability of the group. This provided a basis for determining the nature, timing and extent of risk assessment procedures, identifying and assessing the risk of material misstatement and determining the nature, timing and extent of further audit procedures.

Audit work at individual components is undertaken based on a percentage of our total performance materiality. The performance materiality set for each component is based on the relative size of the component and our view of the risk of misstatement at that component. In the current year the range of performance materiality allocated to components was £7.8 million to £1.9 million.

We agreed with the audit committee that we would report to the committee all audit differences in excess of £1.1 million (2014: £1.1 million), as well as differences below that threshold that, in our view warranted reporting on qualitative grounds.

We evaluate any uncorrected misstatements against both the quantitative measures of materiality described above and in light of other relevant qualitative considerations.

Certain disclosures required by the financial reporting framework have been presented in the Investec risk and Basel Pillar III disclosure report in volume two of the Annual Report, rather than in the notes to the financial statements and have been identified as audited.

An overview of the scope of our audit

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of whether the accounting policies are appropriate to the group’s circumstances and have been consistently applied and adequately disclosed, the reasonableness of significant accounting estimates made by the directors and the overall presentation of the financial statements.

Following our assessment of the risk of material misstatement to the group financial statements, our audit scope focused on selecting 21 (2014: 24) components which represent the principal business units within the group and account for 96% (2014: 96%) of the group’s total assets and 94% (2014: 94%) of the group’s adjusted operating profit before goodwill, intangibles and tax. Of these, 17 (2014: 23) were subject to a full scope audit, while at the remaining 4 (2014: 1) specific scope audit procedures were performed including full audit of the accounts that were impacted by our assessed risks of material misstatement. They were also selected to provide an appropriate basis for undertaking audit work to address the risks of material misstatement identified above. For the remaining 10 (2014: 15) components which were neither full nor specific scope and which account for 4% (2014: 4%) of the group’s total assets and 6% (2014: 6%) of the group’s adjusted operating profit before goodwill, intangibles and tax, we primarily performed analytical procedures to confirm there were no significant risks of material misstatement in the group financial statements.

The group audit team follow a programme of planned visits to full scope components that has been designed to ensure that the Senior Statutory Auditor visits or participates in meetings at each of the key locations where the group audit scope was focused at least once every year. In addition to the location visit, the group audit team reviewed key working papers supporting conclusions on significant risk areas and participated in the component team’s planning including the component team’s discussion of fraud and error.

Opinion on other matter prescribed by the Companies Act 2006

In our opinion:

- The part of the directors’ remuneration report to be audited has been properly prepared in accordance with the Companies Act 2006; and
- The information given in the strategic report and the directors’ report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following:

Under the ISAs (UK and Ireland), we are required to report to you if, in our opinion, information in the annual report is:

- Materially inconsistent with the information in the audited financial statements; or
- Apparently materially incorrect based on, or materially inconsistent with, our knowledge of the group acquired in the course of performing our audit; or
- Otherwise misleading.

In particular, we are required to consider whether we have identified any inconsistencies between our knowledge acquired during the audit and the directors’ statement that they consider the annual report is fair, balanced and understandable and whether the annual report appropriately discloses those matters that we communicated to the audit committee which we consider should have been disclosed.

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- Adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- The financial statements and the part of the directors’ remuneration report to be audited are not in agreement with the accounting records and returns; or
- Certain disclosures of directors’ remuneration specified by law are not made; or
- We have not received all the information and explanations we require for our audit.

Under the Listing Rules we are required to review:

- The directors’ statement, set out on page 7, in relation to going concern; and
- The disclosures made in the corporate governance report relating to the company’s compliance with the ten provisions of the UK Corporate Governance Code specified for our review.

Notes:

1. The maintenance and integrity of the Investec web site is the responsibility of the directors; the work carried out by the auditors does not involve consideration of these matters and, accordingly, the auditors accept no responsibility for any changes that may have occurred to the financial statements since they were initially presented on the web site.

2. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.
Independent auditor’s report to members of Investec Limited

To the shareholders of Investec Limited

We have audited the accompanying group annual financial statements of Investec Limited, which comprise the combined consolidated balance sheet as at 31 March 2015, the combined consolidated income statement, the combined consolidated statement of comprehensive income, the combined consolidated statement of changes in equity and combined consolidated cash flow statement for the year then ended, a summary of significant accounting policies and other explanatory notes as set out on pages 22 to 125 within volume three, the separate Investec Limited parent company accounts, which comprise the balance sheet as at 31 March 2015, the income statement and statement of comprehensive income, the statement of changes in equity and the cash flow statement for the year then ended, a summary of significant accounting policies and other explanatory notes as set out on pages 129 to 133 within volume three, and the information in the risk management section within volume two and the Remuneration report within volume one that is marked audited.

Directors’ responsibility for the financial statements

The company’s directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

Auditor’s responsibility

Our responsibility is to express an opinion on the consolidated and separate financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated and separate financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated and separate financial statements. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated and separate financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate balance sheets of Investec Limited at 31 March 2015, and its consolidated and separate income statements, consolidated and separate statements of comprehensive income, consolidated and separate statements of changes in equity and consolidated and separate cash flow statements for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa.

Other reports required by the Companies Act

As part of our audit of the consolidated and separate financial statements for the year ended 31 March 2015, we have read the directors’ report, audit committee’s report and the company secretary’s certificate for the purpose of identifying whether there are material inconsistencies between this report and the audited financial statements. These reports are the responsibility of the respective preparers. Based on reading these reports we have not identified material inconsistencies between these reports and the audited financial statements. However, we have not audited these reports and accordingly do not express an opinion on these reports.

### Additional information

- **Discontinued operations**
- **Dividends declared to perpetual preference shareholders**
- **Dividends paid to non-controlling interests**
- **Dividends paid to ordinary shareholders**
- **Remeasurement of net defined pension asset**
- **Foreign currency adjustments on translating foreign operations**
- **Gains on available-for-sale assets recycled to the income statement**
- **Fair value movements on cash flow hedges**
- **Profit after taxation**

---

Investec integrated annual report 2015 Financial statements
Accounting policies

Basis of presentation
The group annual financial statements are prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the European Union (EU) which comply with IFRSs as issued by the International Accounting Standards Board (IASB). At 31 March 2015, IFRS as endorsed by the EU are identical in all material respects to current IFRS applicable to the group, with differences only in the effective dates of certain standards. However, the group has early adopted these relevant standards to ensure compliance with both frameworks.

The group annual financial statements have been prepared on a historical cost basis, except for investment properties, available-for-sale investments, derivative financial instruments, financial assets and financial liabilities held at fair value through profit or loss or, subject to hedge accounting and liabilities for pension fund surpluses and deficits that have been measured at fair value.

Presentation of information
Disclosure under IFRS 7 Financial Instruments: Disclosures and IAS 1 Presentation of Financial Statements: Capital Disclosures relating to the nature and extent of risks have been included in sections marked as audited in the risk management report on pages 83 to 93 in volume two.

Certain disclosures required under IAS 24 Related Party Disclosures have been included in the section marked as audited in the remuneration report on pages 151 to 158 in volume one.

Restatements and presentation of information
The group has adopted the following new or revised standard from 1 April 2014:
IRIFIC 21 Levies
The interpretation clarifies that the obligating event that gives rise to a liability to pay a levy is the activity that triggers the payment of the levy and an entity does not have a constructive obligation to pay a levy that will be triggered in a future period as a result of being economically compelled to continue to operate in that future period. The new interpretation has been applied retrospectively and its application has caused the recognition date for the Financial Services Compensation Scheme (FSCS) levy to be changed from 31 December prior to the beginning of the relevant levy year to the following 1 April. The group has accordingly restated the prior periods to reflect this change and additional details are shown in note 59.

Other standards became effective during the year which did not have an impact on the group.

Basis of consolidation
Investec consists of two separate legal entities, being Investec plc and Investec Limited that operate under a dual listed company (DLC) structure. The effect of the DLC structure is that Investec plc and its subsidiaries and Investec Limited and its subsidiaries operate together as a single economic entity, with neither assuming a dominant role and accordingly are reported as a single reporting entity under IFRS.

All subsidiaries or structured entities are consolidated when the group controls an investee. The group controls an investee if it is exposed to, or has rights to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The financial results of subsidiaries are included in the consolidated annual financial statements of the group from the date on which control is obtained until the date the group can no longer demonstrate control.

Investec performs a reassessment of consolidation whenever there is a change in the substance of the relationship between Investec and an investee. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. Investec also holds investments, for example private equity investments, which give rise to significant, but not majority, voting rights. Assessing these voting rights and whether Investec controls these entities requires judgement that affects the date at which subsidiaries are consolidated or deconsolidated.

Entities, other than subsidiary undertakings, in which the group exercises significant influence over operating and financial policies, are treated as interests in associated undertakings. Interests in associated undertakings are accounted for using the equity method from the date that significant influence commences until the date that significant influence ceases. In circumstances where interests in associated undertakings or joint venture holdings arise in which the group has no strategic intention, these investments are classified as ‘venture capital' holdings and are designated as held at fair value through profit or loss.

For equity accounted associates, the combined consolidated annual financial statements include the attributable share of the results and reserves of associated undertakings. The group’s interests in associated undertakings are included in the consolidated balance sheet at cost plus the post-acquisition changes in the group’s share of the net assets of the associate.

The consolidated balance sheet reflects the associated undertakings net of accumulated impairment losses.

All intergroup balances, transactions and unrealised gains and losses within the group that do not reflect an impairment to the asset, are eliminated in full regarding subsidiaries and to the extent of the interest in an associate.

Segmental reporting
An operating segment is a component of the group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the group’s other components, whose operating results are reviewed regularly by chief operating decision makers which include members of the board and for which discrete financial information is available.

The group’s segmental reporting is presented in the form of a business analysis. The business analysis is presented in terms of the group’s three principal business divisions namely, Asset Management, Wealth & Investment and Specialist Banking. Group costs that are disclosed separately largely relate to group brand and marketing costs and a portion of executive and support functions which are associated with group-level activities. These costs are not incurred by the operating divisions and are necessary to support the operational functioning of the group. Historically, these numbers were reflected solely in the results of the Specialist Bank
and the group has now decided to reflect these separately.

A geographical analysis is also presented in terms of the main geographies in which the group operates representing the group’s exposure to various economic environments.

The Australian businesses are reported under the ‘UK and Other’ geographical segment and the ‘UK and Other’ Specialist Banking segment.

For further detail on the group’s segmental reporting basis refer to pages 69 to 92 in volume one of the divisional review section of the integrated annual report.

**Business combinations and goodwill**

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at the acquisition date fair value and the amount of any prior non-controlling interest in the acquiree. For each business combination, the group measures the non-controlling interest in the acquiree either at fair value or at the proportionate share of the acquiree’s identifiable net assets. Acquisition costs incurred are expensed immediately in the income statement.

When the group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and the designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at each acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the group’s previously held equity interest in the acquiree is remeasured to fair value at each acquisition date through the income statement.

Any contingent consideration to be transferred by the group will be recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration, which is deemed to be an asset or liability, will be recognised in accordance with IAS 39 in the income statement. If the contingent consideration is classified as equity, it will not be remeasured until it is finally settled within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interest over the net identifiable assets acquired and liabilities assumed. If this consideration and amount recognised for non-controlling interest is less than the fair values of the identifiable net assets acquired, the discount on acquisition is recognised directly in the income statement as a gain in the year of acquisition.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. The group tests goodwill acquired in a business combination for impairment annually, irrespective of whether an indication of impairment exists and in accordance with IAS 36.

For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the group’s cash-generating units that are expected to benefit from the combination.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation.

Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating units retained.

**Share-based payments to employees**

The group engages in equity-settled share-based payments in respect of services received from employees.

The fair value of the services received in respect of equity-settled share-based payments is determined by reference to the fair value of the shares or share options on the date of grant to the employee. The cost of the share-based payment, together with a corresponding increase in equity, is recognised in the income statement over the period the service conditions of the grant are met with the amount changing according to the number of awards expected to vest. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the group’s best estimate of the number of equity instruments that will ultimately vest.

Fair value measurements are based on option pricing models, taking into account the risk-free interest rate, volatility of the underlying equity instrument, expected dividends and current share prices.

Where the terms of an equity-settled award are modified, the minimum expense recognised in staff costs is the expense as if the terms had not been modified. An additional expense is recognised for any modification which increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the employee as measured at the date of modification.

**Foreign currency transactions and foreign operations**

The presentation currency of the group is Pounds Sterling, being the functional currency of Investec plc. The functional currency of Investec Limited is South African Rand.

Foreign operations are subsidiaries, interests in associated undertakings or branches of the group, the activities of which are based in a functional currency other than that of the reporting entity. The functional currency of group entities is determined based on the primary economic environment in which the entity operates.

Foreign currency transactions are translated into the functional currency of the entity in which the transaction arises based on rates of exchange ruling at the date of the transaction.

At each balance sheet date foreign currency items are translated as follows:

- Monetary items (other than monetary items that form part of the net investment in a foreign operation) are translated using closing rates, with gains and losses recognised in the income statement
- Exchange differences arising on monetary items that form part of the net investment in a foreign operation are determined using closing rates and recognised as a separate component of equity (foreign currency translation
Revenue recognition

Revenue consists of interest income, fee and commission income, investment income, trading income arising from customer flow, trading income arising from balance sheet management and other trading activities and other operating income.

Revenue is recognised when it can be reliably measured and it is probable that the economic benefits will flow to the entity. Revenue related to provision of services is recognised when the related services are performed. Revenue is measured at the fair value of the consideration received or receivable.

Interest income is recognised in the income statement using the effective interest method. Fees charged on lending transactions are included in the effective yield calculation to the extent that they form an integral part of the effective interest rate yield, but exclude those fees earned for a separately identifiable significant act, which are recognised upon completion of the act. Fees and commissions charged in lieu of interest are recognised as income as part of the effective interest rate on the underlying loan.

The effective interest method is based on the estimated life of the underlying instrument and, where this estimate is not readily available, the contractual life.

Fee and commission income includes fees earned from providing advisory services as well as portfolio management and includes rental income from investment properties. Investment advisory and management fees are accrued over the period to which the income relates. Performance fees are recognised when they become receivable. No revenue is recognised if there are significant uncertainties regarding recovery of the consideration due.

Investment income includes income, other than margin from securities held for the purpose of generating interest yield, dividends and capital appreciation.

Customer flow trading income includes income from trading activities arising from making and facilitating client activities.

Trading income arising from balance sheet management and other trading activities consists of proprietary trading income and other gains and losses arising from balance sheet management.

Trading profit includes the unrealised profit on trading portfolios, which are marked to market daily. Equity investments received in lieu of corporate finance fees are included in investment portfolio and valued accordingly.

Dividend income is recognised when the group’s right to receive payment is established.

Included in other operating income is incidental rental income, gains on realisation of properties (other than investment properties which is included in investment income), operating lease income, income from interests in associated undertakings, income from assurance activities and revenue from consolidated private equity investments. Operating costs associated with these investments are included in operating costs in the income statement.

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the group has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the group measures the fair value of an instrument using the quoted price in an active market for that instrument.

A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the group uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

If an asset or a liability measured at fair value has a bid price and an ask price, then the group measures assets and long positions at a bid price and liabilities and short positions at an ask price.

The group classifies disclosed fair values according to a hierarchy that reflects the significance of observable market inputs. A transfer is made between the hierarchy when the inputs have changed or there has been a change in the valuation method. Transfers are deemed to occur at the end of each semi-annual reporting period.

Financial instruments

Financial instruments are initially recognised at their fair value. For financial assets or financial liabilities not held at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets or financial liabilities are included in the initial fair value. All other transaction costs are recorded in the income statement immediately.

Regular way purchase and sales transactions in respect of financial assets that require delivery of a financial instrument within the timeframe established by market convention are recorded at trade date.

Financial assets and liabilities held at fair value through profit or loss

Financial instruments held at fair value through profit or loss include all instruments classified as held-for-trading and those instruments designated as held at fair value through profit or loss.

Financial instruments classified as held-for-trading or designated as held at fair value are initially recognised at fair value less costs to acquire. The group uses the market approach to determine fair value, which is based on unadjusted quoted prices for identical or similar assets or liabilities in active markets.

The group applies a market approach to measuring fair value using inputs that market participants use to measure fair value in pricing. The group uses a fair value hierarchy that reflects the degree to which inputs are observable in the market. The fair value hierarchy is based on the lowest level input that is significant in determining the fair value of the asset or liability.

The group uses a market approach to measuring fair value using inputs that market participants use to measure fair value in pricing. The group uses a fair value hierarchy that reflects the degree to which inputs are observable in the market. The fair value hierarchy is based on the lowest level input that is significant in determining the fair value of the asset or liability.
value through profit or loss are recorded at fair value on the balance sheet with changes in fair value recognised in the income statement. Financial instruments are classified as trading when they are held with the intention of short-term disposal, held with the intention of generating short-term profit, or are derivatives which are not designated as part of effective hedges. Financial instruments designated as held at fair value through profit or loss are designated as such on initial recognition of the instrument and remain in this classification until derecognition.

Financial assets and liabilities are designated as held at fair value through profit or loss only if:

- It eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases, or
- A group of financial assets, financial liabilities or both is managed and its performance is evaluated on a fair value basis in accordance with a documented risk management or investment strategy and information about the group is provided internally on that basis to the group’s key management personnel, and
- A contract contains one or more embedded derivatives (which significantly modifies the cash flows that would be required by the contract and is not clearly prohibited from separation from the host contract) and the group has designated the entire hybrid contract as a financial instrument at fair value through profit or loss.

**Held-to-maturity financial assets**

Held-to-maturity financial assets are non-derivative financial instruments with fixed or determinable payments and maturity dates which the group has the intention and ability to hold to maturity. Subsequent to initial recognition, held-to-maturity assets are measured at amortised cost using the effective interest method, less impairment losses.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The amortisation is included in interest income in the income statement. The losses arising from impairment of such investments are recognised in the income statement.

**Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and exclude the following:

- Those that the group intends to trade in, which are classified as held-for-trading and those that the group designates as at fair value through profit or loss,
- Those that the group designates as available-for-sale,
- Those for which the group may not recover substantially all of its initial investment, other than because of credit deterioration, which is accounted for as available-for-sale instruments.

Subsequent to initial recognition, loans and receivables are measured at amortised cost, using the effective interest method, less impairment losses. The effective interest rate represents the rate that exactly discounts future projected cash flows through the expected life of the financial instrument, to the net carrying amount of the financial instrument. Included in the calculation of the effective interest rate is any discount or premium on acquisition and fees that are an integral part of the effective interest rate.

Losses arising from impairment of such investments are recognised in the income statement line ‘impairment losses on loans and advances’.

Interest on impaired financial assets is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

**Securitisation/credit investment and trading activities exposures**

The group makes use of securitisation vehicles as a source of finance, as a means of risk transfer and to leverage returns through the retention of equity tranches in low default rate portfolios. The group predominantly focuses on the securitisation of residential and commercial mortgages and lease receivables. The group also trades in structured credit investments.

The structured entities are consolidated under IFRS 10 Consolidated Financial Statements when the group has exposure to or rights to, variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Loans and advances that are originated are transferred to structured entities, and the structured entities issue debt securities to external investors to fund the purchase of the securitised assets. When the group consolidates the structured entity, the group recognises the assets and liabilities on a gross basis. When the group does not consolidate the structured entity, the securitised assets are derecognised and only any position still held by the group in the structured entity is reflected.

**Available-for-sale financial assets**

Available-for-sale financial assets are those which are designated as such or do not qualify to be classified as designated at fair value through profit or loss, held-to-maturity, or loans and receivables. They include strategically held equity instruments that are not interests in associated undertakings, joint ventures or subsidiaries of the group. Further, certain debt instruments that are held at fair value due to being quoted on an active market, which are neither actively traded nor held-to-maturity instruments, are classified as available-for-sale financial assets.

Financial assets classified as available-for-sale are measured at fair value with unrealised gains and losses recognised directly in other comprehensive income in the available-for-sale reserve. When the asset is disposed of, the cumulative gain or loss previously recognised in other comprehensive income is recognised in the income statement. Interest earned while holding available-for-sale financial assets is reported as interest income using the effective interest rate. Dividends earned while holding available-for-sale financial assets are recognised in the income statement when the right of payment has been established.

If an available-for-sale instrument is determined to be impaired, the respective cumulative unrealised losses previously recognised in other comprehensive income are included in the income statement in the period in which the impairment is identified.

Impairments on available-for-sale equity instruments are not reversed once recognised in the income statement.
If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the income statement, the impairment loss is reversed, limited to the impairment value previously recognised in the income statement.

**Financial liabilities**

Financial liabilities are classified as non-trading, held-for-trading or designated as held at fair value through profit or loss.

Non-trading liabilities are recorded at amortised cost applying the effective interest method.

Held-for-trading liabilities or liabilities designated as held at fair value through profit or loss are measured at fair value.

All changes in fair value of financial liabilities are recognised in the income statement.

**Day-one profit or loss**

When the transaction price differs from the fair value of other observable current market transactions in the same instrument or based on the valuation technique whose variables include only data from observable markets, the difference between the transaction price and fair value is recognised immediately in the income statement.

In cases where fair value is determined using data which is not observable, the difference between the transaction price and model value is only recognised in the income statement when the inputs become observable, or when the instrument is derecognised or over the life of the transaction.

**Impairments of financial assets held at amortised cost**

Financial assets carried at amortised cost are impaired if there is objective evidence that the group would not receive cash flows according to the original contractual terms. Financial assets are assessed for impairment at each balance sheet date and when an indicator of impairment is identified.

The test for impairment is based either on specific financial assets or collectively on a portfolio of similar, homogeneous assets. Over and above individual collective impairments raised at specific portfolio levels, the group recognises a collective impairment allowance at a central level (within the Specialist Banking business segment) that takes into account macro-economic factors, mainly driven by data related to the prevailing credit markets and which indicate incurred but not specifically identified losses across the loan portfolios (that is, exposures in all business segments). Assets specifically identified as impaired are excluded from the collective assessment.

Impairments are credited to an allowance account which is carried against the carrying value of financial assets. Interest continues to be accrued on the reduced carrying amount based on the original effective interest rate of the asset. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or transferred to the group.

An allowance for impairment is only reversed when there is objective evidence that the credit quality has improved to the extent that there is reasonable assurance of timely collection of principal and interest in terms of the original contractual agreement.

The impairment is calculated as the difference between the carrying value of the asset and the expected cash flows (including net expected proceeds on realisation of collateral) discounted at the original effective rate. Impairments of financial assets held at amortised cost are recognised in the income statement.

To cater for any shortfall between regulatory provision requirements (in the respective jurisdictions) and impairments based on the principles above, a transfer is made from distributable to non-distributable reserves, being the regulatory general risk reserve. The non-distributable regulatory risk reserve ensures that minimum regulatory provisioning requirements are maintained.

**Derecognition of financial assets and liabilities**

A financial asset, or a portion thereof, is derecognised when the group’s rights to cash flows have expired or when the group has transferred its rights to cash flows relating to the financial assets and either: (a) the group has transferred substantially all the risk and rewards associated with the financial assets or (b) the group has neither transferred nor retained substantially all the risks and rewards associated with the financial assets but has transferred control of the asset.

A financial liability is derecognised when it is extinguished, that is when the obligation is discharged, cancelled or expired. When an existing financial liability is replaced or modified with substantially different terms, such a replacement or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the income statement.

**Reclassification of financial instruments**

The group may reclassify, in certain rare circumstances, non-derivative financial assets out of the held-for-trading category and into the available-for-sale, loans and receivables, or held-to-maturity categories. It may also reclassify, in certain circumstances, financial instruments out of the available-for-sale category and into the loans and receivables category. Reclassifications are recorded at fair value at the date of reclassification, which becomes the new amortised cost.

**Derivative instruments**

All derivative instruments of the group are recorded on the balance sheet at fair value. Positive and negative fair values are reported as assets and liabilities, respectively.

Derivative positions are entered into either for trading purposes or as part of the group’s asset and liability management activities to manage exposures to interest rate and foreign currency risks. Both realised and unrealised profit and losses arising on derivatives are recognised in the income statement as part of trading income (other than circumstances in which cash flow hedging is applied as detailed in the hedge accounting section below).

Derivative instruments transacted as economic hedges which do not qualify for hedge accounting and derivatives that are entered into for trading purposes are treated in the same way as instruments that are held-for-trading.

Credit derivatives are entered into for trading purposes. Credit derivatives are initially recognised at their fair values, being the transaction price of the derivative. Subsequently the derivatives are carried at fair value, with movements in fair value through profit and loss, based on the current market price or remeasured price. The counterparty risk from derivative transactions is taken into account when reporting the fair value of derivative positions. The adjustment to the fair value is known as the credit value adjustment (CVA).

**Hedge accounting**

The group applies either fair value or cash flow hedge or hedge of net investments in...
Accounting policies (continued)

foreign operations accounting when the transactions meet the specified hedge accounting criteria. To qualify for hedge accounting treatment, the group ensures that all of the following conditions are met:

- At inception of the hedge, the group formally documents the relationship between the hedging instrument(s) and hedged item(s) including the risk management objectives and the strategy in undertaking the hedge transaction. Also at the inception of the hedge relationship, a formal assessment is undertaken to ensure the hedging instrument is expected to be highly effective in offsetting the designated risk in the hedged item. A hedge is expected to be highly effective if the changes in fair value or cash flows attributable to the hedged risk during the period for which the hedge is designated are expected to offset in a range of 80% to 125%.

- For cash flow hedges, a forecasted transaction that is the subject of the hedge must be highly probable and must present an exposure to variations in cash flows that could ultimately affect profit and loss.

- The effectiveness of the hedge can be reliably measured, i.e. the fair value or cash flows of the hedged item that are attributable to the hedged risk and the fair value of the hedging instrument can be reliably measured.

- The hedge effectiveness is assessed on an ongoing basis and determined actually to have been highly effective throughout the financial reporting periods for which the hedge was designated.

For qualifying fair value hedges, the change in fair value of the hedging instrument is recognised in the income statement. Changes in fair value of the hedged item that is attributable to the hedged risk are also recognised in the income statement.

For qualifying cash flow hedges in respect of non-financial assets and liabilities, the change in fair value of the hedging instrument, relating to the effective portion is initially recognised directly in other comprehensive income is reclassified to the income statement immediately and recognised in trading income from balance sheet management and other trading activities.

For qualifying cash flow hedges in respect of financial assets and liabilities, the change in fair value of the hedging instrument, which represents an effective hedge, is initially recognised in other comprehensive income and is released to the income statement in the same period during which the relevant financial asset or liability affects the income statement. Any ineffective portion of the hedge is immediately recognised in the income statement.

Qualifying hedges of a net investment in a foreign operation including a hedge of a monetary item that is accounted for as part of the net investment are accounted for in a way similar to cash flow hedges. Changes in the fair value of the hedging instrument relating to the effective portion of the hedge are recognised in other comprehensive income while any gains or losses relating to the ineffective portion are recognised in the income statement. On disposal of the foreign operation, the cumulative value of any such gain or loss recorded in other comprehensive income is reclassified to the income statement.

Hedge accounting is discontinued when it is determined that the instrument ceases to be highly effective as a hedge; when the derivative expires, or is sold, terminated or exercised; when the hedged item matures or is sold or repaid; when a forecasted transaction is no longer deemed highly probable or when the designation as a hedge is revoked.

Embedded derivatives

To the extent that a derivative may be embedded in a hybrid contract and the hybrid contract is not carried at fair value with changes in fair value recorded in the income statement, the embedded derivative is separated from the host contract and accounted for as a stand-alone derivative if and only if:

- The economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract.

- A separate instrument with the same terms as the embedded derivative would meet the definition of a derivative.

Offsetting of financial assets and liabilities

Financial assets and liabilities are offset when there is both an intention to settle on a net basis (or simultaneously) and a currently enforceable legal right to offset exists.

Issued debt and equity financial instruments

Financial instruments issued by the group are classified as liabilities if they contain a contractual obligation to deliver cash or another financial asset.

Financial instruments issued by the group are classified as equity where they confer on the holder a residual interest in the group, and the group has no obligation to deliver either cash or another financial asset to the holder. The components of compound issued financial instruments are accounted for separately with the liability component separated first and any residual amount being allocated to the equity component.

Equity instruments issued by subsidiaries of Investec plc or Investec Limited are recorded as non-controlling interests on the balance sheet.

Equity instruments are initially measured net of directly attributable issue costs.

Treasury shares represent issued equity repurchased by the group which has not been cancelled. Treasury shares are deducted from shareholders’ equity and represent the purchase consideration, including directly attributable costs. Where treasury shares are subsequently sold or reissued, net proceeds received are included in shareholders’ equity.

Dividends on ordinary shares are recognised as a deduction from equity at the earliest of payment date or the date that it is approved by Investec plc (in relation to dividends declared by Investec plc) and Investec Limited (in relation to dividends declared by Investec Limited) shareholders.

Sale and repurchase agreements (including securities borrowing and lending)

Where securities are sold subject to a commitment to repurchase them, at a fixed price or a selling price plus a lender’s return, they remain on-balance sheet. Proceeds received are recorded as a liability on the balance sheet under ‘repurchase agreements and cash

Investec integrated annual report 2015
Financial statements

27
Accounting policies (continued)

collateral on securities lent’. Securities that are purchased under a commitment to resell the securities at a future date are not recognised on the balance sheet. The consideration paid is recognised as an asset under ‘reverse repurchase agreements and cash collateral on securities borrowed’.

The difference between the sale and repurchase prices is treated as interest expense and is accrued over the life of the agreement using the effective interest method.

Securities borrowing transactions that are not cash collateralised are not included in the balance sheet. Securities lending and borrowing transactions which are cash collateralised are accounted for in the same manner as securities sold or purchased subject to repurchase commitments.

The cash collateral from agency-based scrip lending transactions are disclosed on a net basis, in accordance with master netting agreements and the intention to settle net.

Financial guarantees

Financial guarantee contracts issued by the group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due, in accordance with the terms of a debt instrument. Financial guarantees are initially recognised at fair value, adjusted for the transaction costs that are directly attributable to the issuance of the guarantee.

Subsequent to initial recognition, the liability under each guarantee is measured at the higher of the amount recognised less cumulative amortisation and the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee. Subsequent to initial measurement all changes in the balance sheet carrying value are recognised in the income statement.

Instalment credit, leases and rental agreements

A finance lease is a lease that transfers substantially all of the risks and rewards incidental to ownership of an asset. An operating lease is a lease other than a financial lease.

Where classified as a finance lease, amounts outstanding on these contracts, net of unearned finance charges, are included in loans and advances where the group is the lessor and included in liabilities where the group is the lessee. Finance charges on finance leases and instalment credit transactions are credited or debited to income in proportion to the capital balances outstanding at the rate implicit in the agreement.

Where classified as operating leases, rentals payable/receivable are charged/credited in the income statement on a straight-line basis over the lease term. Contingent rentals are accrued to the income statement when incurred.

Property and equipment

Property and equipment are recorded at cost less accumulated depreciation and impairments.

Cost is the cash equivalent paid or the fair value of the consideration given to acquire an asset and includes other expenditures that are directly attributable to the acquisition of the asset.

Depreciation is provided on the depreciable amount of each component on a straight-line basis over the expected useful life of the asset.

The depreciable amount related to each asset is determined as the difference between the cost and the residual value of the asset. The residual value is the estimated amount, net of disposal costs that the group would currently obtain from the disposal of an asset in similar age and condition as expected at the end of its useful life.

The current and comparative annual depreciation rates for each class of property and equipment is as follows:

- Computer and related equipment 20% – 33%
- Motor vehicles 20% – 25%
- Furniture and fittings 10% – 20%
- Freehold buildings 2%
- Leasehold property and improvements*

*Leasehold improvements depreciation rates are determined by reference to the appropriate useful life of its separate components, limited to the period of the lease. Leasehold property depreciation rates are determined by reference to the period of the lease.

No depreciation is provided on freehold land. However, similar to other property-related assets, it is subject to impairment testing when an indication of impairment exists.

Routine maintenance and service costs for group assets are expensed as incurred. Subsequent expenditure is only capitalised if it is probable that future economic benefits associated with the item will flow to the group.

Investment property

Properties held for capital appreciation or rental yield are classified as investment properties. Investment properties are carried at fair value, with fair value gains and losses recognised in the income statement in investment income.

Fair value of investment property is calculated by taking into account the expected rental stream associated with the property, and is supported by market evidence.

Trading properties

Trading properties are carried at the lower of cost and net realisable value.

Intangible assets

Intangible assets are recorded at cost less accumulated amortisation and impairments.

For intangible assets with a finite life, amortisation is provided on the depreciable amount of each intangible asset on a straight-line basis over the expected useful life of the asset (currently three to twenty years). The depreciable amount related to each intangible asset is determined as the difference between the cost and the residual value of the asset.

Impairment of non-financial assets

At each balance sheet date the group reviews the carrying value of non-financial assets, other than investment property, for indication of impairment. The recoverable amount, being the higher of fair value less cost of disposal and value in use, is determined for any assets for which an indication of impairment is identified. If the
recoverable amount of an asset is less than its carrying value, the carrying value of the asset is reduced to its recoverable value.

Impairment losses are recognised as an expense in the income statement in the period in which they are identified. Reversals of impairment losses are recognised in income in the period in which the reversals are identified, to the extent that the carrying value of the asset does not exceed the amount that would have been calculated without impairment.

Trust and fiduciary activities

The group acts as a trustee or in other fiduciary capacities that result in the holding, placing or managing of assets for the account of and at the risk of clients. As these are not assets of the group, they are not recognised on the balance sheet but are included at market value as part of assets under administration.

Taxation and deferred taxation

Current tax payable is provided on the amount expected to be payable on taxable profit at rates that are enacted or substantively enacted and applicable to the relevant period.

Deferred taxation is provided using the balance sheet method on temporary differences between the carrying amount of an asset or liability in the balance sheet and its tax base, except where such temporary differences arise from:

- The initial recognition of goodwill
- The initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction has no effect on the income statement or taxable profit
- In respect of temporary differences associated with the investments in subsidiaries and interests in associated undertakings, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets or liabilities are measured using the tax rates that have been enacted or substantively enacted at the balance sheet date.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the deferred tax asset can be utilised.

Items recognised directly in other comprehensive income are net of related current and deferred taxation.

Insurance contracts

Insurance contracts are those contracts in which the group assumes significant insurance risk. The deposit components of insurance contracts are unbundled and accounted for separately. Insurance premiums are recognised in the period in which the group is entitled to the premium. Insurance claims are recognised in the income statement in the period in which a contractual obligation arises for the group to make payment under an insurance contract.

Reinsurance assets and liabilities and associated premiums/claims are not offset in the income statement or balance sheet.

Insurance liabilities are measured at actuarial values, and are tested for adequacy on an annual basis. Any deficiency identified is recognised in the income statement.

Insurance income is included in other operating income.

Employee benefits

The group operates various defined contribution schemes and two closed defined benefit schemes.

In respect of the defined contribution scheme, all employer contributions are charged to income as incurred, in accordance with the rules of the scheme, and included under staff costs.

The assets of the defined benefit schemes are measured at their market value at the balance sheet date and the liabilities of the schemes are measured using the projected unit credit method. The discount rate used to measure the schemes’ liabilities is the current rate of return on an AA corporate bond at the balance sheet date of equivalent term and currency to the liabilities. The extent to which the schemes’ assets exceed or fall short of the schemes’ liabilities is shown as a surplus (to the extent that it is considered recoverable) or deficit in the balance sheet.

Actuarial gains and losses related to the defined benefit asset or liability are recognised immediately directly in other comprehensive income.

The group has no liabilities for other post-retirement benefits.

Borrowing costs

Borrowing costs that are directly attributable to property developments which take a substantial period of time to develop are capitalised.

Provisions, contingent liabilities and contingent assets

Provisions are recognised when the group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the income statement net of any reimbursement. Contingent assets and contingent liabilities are not recognised on the balance sheet.

Standards and interpretations issued but not yet effective

The following significant standards and interpretations, which have been issued but are not yet effective, are applicable to the group. These standards and interpretations have not been applied in these annual financial statements. The group intends to comply with these standards from the effective dates.

IFRS 9 Financial Instruments

IFRS 9 Financial Instruments was issued in July 2014 will replace certain key elements of IAS 39. The mandatory effective date for IFRS 9 is from 1 January 2018 with
Accounting policies (continued)

There are additional disclosures and consequential amendments in IFRS 7 resulting from the introduction of the hedge accounting chapter in IFRS 9. These will become effective when IFRS 9 is applied.

IFRS 15 Revenue from Contracts with Customers

In May 2014, the IASB issued IFRS 15 Revenue from Contracts with Customers. The standard is effective for annual periods beginning on or after 1 January 2017 with early application permitted. IFRS 15 provides a principles-based approach for revenue recognition, and introduces the concept of recognising revenue for obligations as they are satisfied. The standard should be applied retrospectively, with certain practical expedients available. The group does not anticipate a material impact on adoption of this standard.

All other standards and interpretations issued but not yet effective are not expected to have a material impact on the group.

Key management assumptions

In preparation of the annual financial statements the group makes estimations and applies judgement that could affect the reported amount of assets and liabilities within the next financial year. Key areas in which judgement is applied include:

\[ \text{Valuation of unlisted investments} \]

- Valuation of unlisted investments primarily in the private equity, direct investments portfolios and embedded derivatives. Key valuation inputs are based on the most relevant observable market inputs, adjusted where necessary for factors that specifically apply to the individual investments and recognising market volatility.

\[ \text{Details of unlisted investments can be found in note 15 with further analysis contained in the risk management section on pages 45 to 47 in volume two.} \]

- The determination of impairments against assets that are carried at amortised cost and impairments relating to available-for-sale financial assets involves the assessment of future cash flows which is judgemental in nature.

\[ \text{Refer to pages 31 to 43 in volume two in the risk management section for further analysis on impairments.} \]

Details of the directors’ emoluments, pensions and their interests are disclosed in the remuneration report on pages 151 to 158 in volume one.
7. **Share-based payments**

The group operates share option and long-term share incentive plans for employees, the majority of which are on an equity-settled basis. The purpose of the staff share schemes is to promote an *esprit de corps* within the organisation, create an awareness of Investec’s performance and provide an incentive to maximise individual and group performance by allowing all staff to share in the risks and rewards of the group.

*Further information on the group share options and long-term incentive plans is provided on pages 176 to 177 in volume one of the remuneration report and on our website.*

* Of the £59.9 million charge (2014: £66.9 million), £56.0 million (2014: £62.2 million) is included in operating costs and £3.9 million (2014: £4.7 million) in the income statement in net loss on disposal of subsidiaries and operating costs arising from integration, restructuring and partial disposal of subsidiaries respectively. Included in the above income statement charge is as an accelerated share-based payment charge as a result of modifications to certain options granted. This expense for the year was £0.01 million (2014: £0.3 million).

For the year to 31 March £’000

</tbody>
</table>

**Weighted average fair value of options and long-term grants at measurement date**

- 2015: £3.71
- 2014: £3.27
- 2015: R69.52
- 2014: R51.73

The fair values of options granted were calculated using a Black-Scholes option pricing model. For options granted during the year, the inputs into the model were as follows:

- **Share price at date of grant**
  - UK: £5.16 – £5.72
  - South Africa: R90 – R100.57
- **Exercise price**
  - UK: £nil, £5.16 – £5.72
  - South Africa: Rnil
- **Expected volatility**
  - UK: 25.24% – 30%
  - South Africa: 25.24% – 30%
- **Option life**
  - UK: 4.5 – 5.25 years
  - South Africa: 1 – 5 Years
- **Expected dividend yields**
  - UK: 4.86% – 5.04%
  - South Africa: 4.45% – 4.62%
- **Risk-free rate**
  - UK: 1.36% – 1.70%
  - South Africa: 0.98% – 1.44%

Expected volatility was determined based on the implied volatility levels quoted by the equity derivatives trading desk. The expected volatility is based on the respective share price movement over the last six months but also includes an element of forward expectation.

The expected attrition rates used were determined based on historical group data with an adjustment to actual attrition on final vesting.

* In accordance with IFRS, dividends attributable to equity holders are accounted for when a constructive liability arises i.e. on declaration by the board of directors and approval by the shareholders where required. Investec is of the view that EPS is best reflected by adjusting for earnings that are attributed to equity instruments (other than ordinary shares) on an accrual basis and therefore adjusts the paid dividend on such instruments to accrued in arriving at adjusted EPS.
9. **Earnings per share** (continued)

**Headline earnings per share - pence**

Headline earnings per share has been calculated and is disclosed in accordance with the JSE Listings Requirements, and in terms of circular 2/2013 issued by the South African Institute of Chartered Accountants.

The directors have proposed a final dividend in respect of the financial year ended 31 March 2015 of 11.5 pence per ordinary share.

This will be paid as follows:

- For Investec Limited shareholders, through a dividend payment by Investec Limited of 216 cents per ordinary share
- For Investec plc non-South African shareholders, through a dividend paid by Investec plc of 11.5 pence per ordinary share
- For Investec plc South African shareholders, through a dividend payment by Investec plc of 2.5 pence per ordinary share and through a dividend payment on the SA DAS share of 9 pence per ordinary share.

The final dividend will be payable on Friday, 14 August 2015 to shareholders on the register at the close of business on Friday, 31 July 2015.

Investec leases assets to third parties under operating and finance lease arrangements including transport assets, machinery and property. The leases typically run for a period of three years or longer. Lessees are entitled to the use of the properties leased to them for their own business purposes for the duration of the contracted lease period.

</table>

The group reclassified £112.3 million and £7.8 million to the loans and receivables and available-for-sale classifications, respectively. The amount reclassified reflected the fair value of the financial assets at the date of reclassification. As the majority of these assets have been written down by the current year end, the group does not deem it material to undertake any further disclosure in the annual financial statements for the current year and the prior year. The carrying value of the assets reclassified is £21.2 million (2014: £31.7 million) and the fair value is £21.1 million (2014: 16.4 million).

14. Fair value hierarchy

The table below analyses recurring fair value measurements for financial assets and financial liabilities. These fair value measurements are categorised into different levels in the fair value hierarchy based on the inputs to the valuation technique used. The different levels are identified as follows:

Level 1 – quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs)

Assets and liabilities related to the long-term assurance business attributable to policyholders have been excluded from the analysis as the change in fair value of related assets is attributable to policyholders.

Fair value disclosures on investment properties are included in the investment properties note 32 on page 84.

<tr>
<td>Balance as at 31 March 2014</td>
<td>869,172</td>
<td>904,089</td>
<td>(34,917)</td>
</tr>
</tbody>
</table>

For the year ended 31 March 2015, there were transfers from the level 2 to the level 3 category to the value of £62.7 million because the significance of the unobservable inputs used to determine the fair value increased sufficiently to warrant a transfer. For the remaining transfers, the group transfers between levels within the fair value hierarchy when the observability of inputs change or if the valuation methods change.
### 14. Fair value hierarchy (continued)

</tbody>
</table>

* The sensitivity of the fair value of liabilities arising on securitisation of other assets has been considered together with other securitised assets.

** The price-earnings multiple has been stressed on an investment by investment basis in order to obtain the aggressive and conservative valuations.

^ These valuation sensitivities have been stressed individually using varying scenario-based techniques to obtain the aggressive and conservative valuations.

# The variation techniques applied have changed from the previous year due to the sale and deconsolidation of various liabilities held in the previous year.

* The sensitivity of the fair value of liabilities arising on securitisation of other assets has been considered together with other securitised assets.

^ Other – The valuation sensitivity for the private equity and embedded derivatives (profit share) portfolios has been assessed by adjusting various inputs such as expected cash flows, discount rates, earnings multiples rather than a single input. It is deemed appropriate to reflect the outcome on a portfolio basis for the purposes of this analysis as the sensitivity of the investments cannot be determined through the adjustment of a single input.

In determining the value of level 3 financial instruments, the following are the principal inputs that can require judgement:

**Credit spreads**

Credit spreads reflect the additional yield that a market participant would demand for taking exposure to the credit risk of an instrument.

The credit spread for an instrument forms part of the yield used in a discounted cash flow calculation. In general, a significant increase in a credit spread in isolation will result in a movement in fair value that is unfavourable for the holder of a financial instrument. It is an unobservable input into a discounted cash flow valuation.

**Discount rates**

Discount rates are the interest rates used to discount future cash flows in a discounted cash flow valuation method. The discount rate takes into account time value of money and uncertainty of cash flows.

**Volatilities**

Volatility is a key input in the valuation of derivative products containing optionality. Volatility is a measure of the variability or uncertainty in returns for a given derivative underlying. It represents an estimate of how much a particular underlying instrument, parameter or index will change in value over time. Volatilities are a key input into the Black-Scholes valuation method.

**Cash flows**

Cash flows relate to the future cash flows which can be expected from the instrument and requires judgement. Cash flows are inputs into a discounted cash flow valuation.

**EBITDA**

A company’s earnings before interest, taxes, depreciation and amortisation. This is the main input into a price-earnings multiple valuation method.

**Price earnings multiple**

The price-to-earnings ratio is an equity valuation multiple used in the adjustment of underlying market prices. It is a key driver in the valuation of unlisted investments.

Financial instruments for which fair value approximates carrying value

^ For financial assets and financial liabilities that are liquid or have a short-term maturity (less than three months) it is assumed that the carrying amounts approximate their fair value and have been reflected in level 1. This assumption also applies to demand deposits and savings accounts without a specific maturity which are included in customer accounts (deposits) and variable rate financial instruments.

* Management has re-evaluated the significance of the unobservable inputs for certain loans and advances and have concluded that it is appropriate to transfer these instruments to a level 2 valuation.

Financial instruments for which fair value approximates carrying value

^ For financial assets and financial liabilities that are liquid or have a short-term maturity (less than three months) it is assumed that the carrying amounts approximate their fair value and have been reflected in level 1. This assumption also applies to demand deposits and savings accounts without a specific maturity which are included in customer accounts (deposits) and variable rate financial instruments.
15. Fair value of financial instruments at amortised cost

Financial instruments for which fair value does not approximate carrying value

Fixed-rate financial instruments

The fair value of fixed-rate financial assets and financial liabilities carried at amortised cost are estimated by comparing spreads earned on the transactions with spreads earned on similar new transactions entered into by the group. The estimated fair value of fixed interest-bearing deposits is based on discounted cash flows, using prevailing market interest rates for debts with similar credit risk and maturity. For quoted sub-debt issued, the fair values are calculated based on quoted market prices. For those notes issued where quoted market prices are not available, a discounted cash flow model is used based on a current interest rate yield curve appropriate for the remaining term to maturity. Certain financial instruments, that would normally be carried at fair value, continue to be recognised at transaction price. This occurs when the fair value would normally be determined using valuation techniques which cannot be relied on due to insufficient external inputs. This results in gains or losses which have not been recognised on the balance sheet.

The following table sets out the group’s principal valuation techniques used in determining the fair value of its financial assets and financial liabilities:

<table>
<thead>
<tr>
<th>Financial Instrument Type</th>
<th>Valuation Method</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bank debt securities</td>
<td>Valued using a cash flow model of the bonds, discounted by an observable market credit curve.</td>
</tr>
<tr>
<td>Other debt securities</td>
<td>Priced with reference to similar trades in an observable market as well as calculation of the present value of future cash flows, discounted as appropriate.</td>
</tr>
<tr>
<td>Loans and advances to customers</td>
<td>Calculation of the present value of future cash flows, discounted as appropriate.</td>
</tr>
<tr>
<td>Own originated loans and advances to customers securitised</td>
<td>Calculation of the current cash flows of fixed-rate loans at current expected interest rates.</td>
</tr>
<tr>
<td>Other loans and advances</td>
<td>Calculation of the present value of future cash flows, discounted as appropriate.</td>
</tr>
<tr>
<td>Other securitised advances</td>
<td>Calculated using a model based on future cash flows.</td>
</tr>
<tr>
<td>Other assets</td>
<td>Calculation of the present value of future cash flows, discounted as appropriate.</td>
</tr>
<tr>
<td>Deposits by banks</td>
<td>Calculation of fair value using appropriate funding rates. Calculation of the present value of future cash flows, discounted as appropriate.</td>
</tr>
<tr>
<td>Repurchase agreements and cash collateral on securities lent</td>
<td>Calculation of the present value of future cash flows, discounted as appropriate.</td>
</tr>
<tr>
<td>Short-term customer accounts (deposits)</td>
<td>Where the deposits are short-term in nature, carrying amounts are assumed to approximate fair value. Where deposits are of longer-term maturities, they are valued using a cash flow model, discounted as appropriate.</td>
</tr>
<tr>
<td>Debt securities in issue</td>
<td>Where the debt securities are fully collateralised, fair value is equal to the carrying value. Other debt securities are valued using a cash flow model, discounted as appropriate to the securities for funding and interest rates.</td>
</tr>
<tr>
<td>Liabilities arising on securitisation of other assets</td>
<td>Valued using a cash flow model taking into account any hedging, discounted as appropriate.</td>
</tr>
<tr>
<td>Other liabilities</td>
<td>Where the other liabilities are short-term in nature, carrying amounts are assumed to approximate fair value.</td>
</tr>
<tr>
<td>Subordinated liabilities</td>
<td>Valued with reference to market prices.</td>
</tr>
</tbody>
</table>

23. Derivative financial instruments

The group enters into various contracts for derivatives both as principal for trading purposes and as customer for hedging foreign exchange and interest rate exposures. These include financial futures, options, swaps and forward rate agreements. The risks associated with derivative instruments are monitored in the same manner as for the underlying instruments. Risks are also measured across the product range in order to take into account possible correlations.

In the tables that follow, notional principal amounts indicate the volume of business outstanding at the balance sheet date and do not represent amounts at risk. The fair value of a derivative financial instrument represents the present value of future positive or negative cash flows which would have occurred had the rights and obligations arising from that instrument been closed out by the group in an orderly market transaction at balance sheet date.

<tr>
<td><strong>At the end of the year</strong></td>
<td><strong>22,820</strong></td>
<td><strong>34,026</strong></td>
</tr>
</tbody>
</table>

Deferred tax assets are recognised to the extent it is likely that profits will arise in future periods. The assessment of the likelihood of future profits is based on past performance and current projections.

Deferred taxation assets are not recognised in respect of capital losses and excess management expenses as crystallisation of capital gains and the eligibility of potential losses is uncertain.

There are trading losses carried forward of £106.4 million (2014: £131.5 million), capital losses carried forward of £37.8 million (2014: £26.2 million) and excess management expenses of £11.4 million (2014: £12.5 million) on which deferred tax assets have not been recognised due to uncertainty regarding future profits against which these losses can be utilised.

The Finance Act 2013 reduced the main rate of corporate taxation to 20% with effect from 1 April 2015. The effect of these reductions is reflected in the above calculation as the rate was substantively enacted before 31 March 2015.

*These are assets held by the group, in circumstances where the group is the lessor.

On 3 December 2010 the group acquired a portfolio of operating leased assets comprising motor vehicles. The operating lease income from this portfolio has been included in other operating income (note 5) and the depreciation of these operating leased assets has been shown separately on the face of the income statement.

</tbody>
</table>

All investment properties are classified as level 3 in the fair value hierarchy.

Fair value hierarchy – investment property

For all investment property that is measured at fair value, the current use of the property is considered the highest and best use. Properties are valued under the income capitalisation method and discounted cashflow method (DCF).

Under the income capitalisation method a property’s fair value is estimated based on the normalised net operating income generated by the property, which is divided by the capitalisation rate.

Under the DCF method, a property’s fair value is estimated using explicit assumptions about the benefits and liabilities of ownership over the asset’s life including an exit or terminal value. This involves the projection of a series of cash flows and, to this, an appropriate market-derived discount rate is applied to establish the present value of the income stream.

Valuation techniques used to derive level 3 fair values

For all classes of investment property, the significant unobservable inputs listed below are used in the income capitalisation method to determine the fair value measurement at the end of the reporting period.

<table>
<thead>
<tr>
<th>Significant unobservable inputs</th>
<th>Relationship between unobservable inputs and fair value measurement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expected Rental Value (ERV)</td>
<td>Increases/(decreases) in ERV would increase/(decrease) estimated fair value.</td>
</tr>
<tr>
<td>Equivalent yield</td>
<td>Increases/(decreases) in the equivalent yield would result in decreases/(increases) in the estimated fair value.</td>
</tr>
<tr>
<td>Long-term vacancy rate</td>
<td>Increases/(decreases) in the long-term vacancy rate would result in decreases/(increases) in the estimated fair value.</td>
</tr>
</tbody>
</table>

Given the high tenancy rates of the fund’s property portfolio, the long-term vacancy rate may not always be applicable. The table above includes the following descriptions and definitions relating to key unobservable inputs made in determining fair value:

<table>
<thead>
<tr>
<th>Significant unobservable inputs</th>
<th>Relationship between unobservable inputs and fair value measurement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expected Rental Value (ERV)</td>
<td>The rent at which space could be let in the market conditions prevailing at the date of valuation.</td>
</tr>
<tr>
<td>Equivalent yield</td>
<td>The equivalent yield is defined as the internal rate of return of the cash flow from the property, assuming a rise to ERV at the next review, but with no further rental growth.</td>
</tr>
<tr>
<td>Long-term vacancy rate</td>
<td>The ERV of the expected long-term average structural vacant space divided by ERV of the whole property. Long-term vacancy rate can also be determined based on the percentage of estimated vacant space divided by the total lettable area.</td>
</tr>
</tbody>
</table>

There are inter-relationships between ERV, the long-term vacancy rate and the equivalent yield. Having a lower/(higher) vacancy rate would increase/(decrease) the ERV for a property.

The following factors influence the equivalent yield applied by management when determining the fair value of a building:

- Vacancy rate
- Expected rental
- Lease term

Further analysis of investment properties is in the risk management section on pages 45 to 47 in volume two.

</tbody>
</table>

Goodwill is tested annually for impairment, or more frequently if evidence exists that goodwill might be impaired, by comparing the carrying value to its recoverable amount.

The recoverable amount of goodwill is determined based on expected cash flows within the cash-generating units of the group to which the goodwill is allocated. Key assumptions within the calculation include discount rates, growth rates in revenue and related expenditure and loan impairment rates.

Discount rates are based on pre-tax rates that reflect current market conditions, adjusted for the specific risks associated with the cash-generating unit. Growth rates are based on industry growth forecasts. Cash flow forecasts are based on the most recent financial budgets for the next financial year and are extrapolated for a period of three to five years, adjusted for expected future events.
33. **Goodwill** (continued)

**UK, Europe and Australia**

The three most significant cash-generating units giving rise to goodwill are Investec Asset Management, Kensington and Wealth & Investment which now includes the business of Williams de Broë (acquired in 2012 as part of the Evolution Group) which was merged with IWI in August 2012.

For Wealth & Investment goodwill of £236.3 million has been tested for impairment on the basis of the cash flow projections for the next three years discounted at 9.9% (2014: 10.3%) which incorporate an expected revenue growth rate of 2% (March 2014: 2%).

Sensitivity analysis has been carried out and it has been concluded that no reasonably possible change in the key assumptions would cause an impairment to be recognised.

For Investec Asset Management, the value placed on the business from the sale of 15% of the company to management in July 2013 comfortably supports the value of the goodwill of £88.0 million.

The sale of Kensington Group plc was effective on 31 January 2015. The net goodwill balance held of £39.7 million was written off to the loss on sale and is shown as a disposal in the reconciliation on page 85.

The sale of Investec Bank (Australia) Limited’s (IBAL) Professional Finance (Experian), Asset Finance and deposit-taking businesses was effective 31 July 2014. Goodwill of £24.6 million was disposed of in relation to these businesses. The balance of goodwill in Australia mainly relates to the Specialist Banking business and following an assessment it has now been fully impaired.

**South Africa**

The majority of the goodwill attributed to the South African operations relate to Investec Asset Management, particularly to the businesses from the Fedsure acquisition, which have been identified as a separate cash-generating unit. The goodwill relating to Fedsure has been tested for impairment, taking into account profitability, being the current year profits and the budgeted profits and funds under management. The discount rate applied of 14.47% is determined using the South African risk-free rate adjusted for the risk related to the cash-generating unit.

**Movement in goodwill**

**2015**

Goodwill arising from acquisitions (£0.18 million) relates to the acquisition of Mann Island Finance group in 2014 (as detailed in note 35).

Goodwill cost and impairment reduced following the disposal of Investec Bank (Australia) Limited and the Kensington Group in 2015 (as detailed in note 35).

**2014**

Goodwill cost and impairment reduced following the disposal of certain subsidiaries in 2014 (as detailed in note 35).

For the post-acquisition period of 8 April 2014 to 31 March 2015, the operating income of MIF totalled £7.5 million and profit before taxation totalled £0.9 million. There is no material difference between this and the operating income and profit if the acquisition had been on 1 April 2014 as opposed to 8 April 2014.

**Disposals**

The net loss on sale of subsidiaries of £93 million in the income statement arises from the sale of Investec Bank (Australia) Limited and the sale of the Start Mortgage Holdings and Kensington Group plc companies and subsidiaries as described below. The net cash inflow on these items amount to £226 million. Cash and cash equivalents in the subsidiaries disposed of was £75 million.

The sale of Investec Bank (Australia) Limited’s (IBAL) Professional Finance and Asset Finance and Leasing businesses and its deposit book to Bank of Queensland Limited was effective 31 July 2014 for cash proceeds of £122 million. This has resulted in the derecognition of approximately £1.7 billion of assets and approximately £1.7 billion of liabilities associated with the businesses sold.

The sale of the group’s Irish intermediated mortgage business, Start Mortgage Holdings Limited, together with certain other Irish mortgage assets to an affiliate of Lone Star Funds was effective on 4 December 2014. The sale of the UK intermediated mortgage business Kensington Group plc (Kensington) together with certain other Investec mortgage assets to funds managed by Blackstone Tactical Opportunities Advisors L.L.C. and TPG Special Situations Partners was effective on 30 January 2015 for cash proceeds of £170 million. This has resulted in the derecognition of approximately £4.1 billion of assets and approximately £2 billion of external liabilities associated with these businesses.
35. Acquisitions and disposals (continued)

* Reflected as movements in operating assets and operating liabilities within the cash flow (note 49).

During the year the group had a net cash inflow of £42.2 million due to transactions with the non-controlling interests of Investec Property Fund Limited.

2014

Acquisitions

There were no significant acquisitions of subsidiaries during the year ended 31 March 2014.

Disposals

The net gain on the sale of subsidiaries of £9.8 million in the income statement arises from the sale of Lease Direct Finance Limited and the sale of Investec Trust (Switzerland) SA, Investec Trust (Jersey) Limited and Investec Trust Mauritius Limited.

The net cash inflow on these items amounted to £38.2 million.

On 31 July 2013, Investec completed the sale of 15% of its Asset Management business, owned by Investec plc and Investec Limited, for a consideration of £180 million in cash to the senior management of the business who have also been granted options to acquire, over a period of seven years beginning on 1 April 2013, a further 5% interest. As part of this transaction Investec plc has realised a gain of £61.6 million on the disposal of a non-controlling interest in its subsidiary, Investec Asset Management Limited, which is reflected in equity together with an increase in non-controlling interests of £11.0 million. Investec Limited has realised a gain of £82.2 million on the disposal of a non-controlling interest in its subsidiary, Investec Asset Management Holdings (Pty) Ltd, which is reflected in equity together with an increase in non-controlling interests of £12.1 million. The group has funded £44.2 million of this acquisition, resulting in net proceeds of £122.7 million.

The business of Investec Assurance Limited is that of linked business with retirement funds. The retirement funds hold units in a pooled portfolio of assets via a linked policy issued by the company. The assets are beneficially held by Investec Assurance Limited. Due to the nature of a linked policy, Investec Assurance Limited’s liability to the policyholders is equal to the market value of the assets underlying the policies.

</tbody>
</table>

The group operates pension schemes throughout its areas of operation. The majority of the schemes are defined contribution schemes with the exception of two schemes in the UK being the Guinness Mahon Pension Fund scheme (GM scheme) and the Investec Asset Management Pension scheme (IAM scheme). Both schemes are final salary pension plans with assets held in separate trustee administered funds. The plans are subject to UK regulations, which require the trustees to agree a funding strategy and contribution schedule for the plans. The role of the trustees is to ensure that the schemes are administered in accordance with the scheme rules and relevant legislation, and to safeguard the assets in the best interest of all members and beneficiaries.

The trustees are solely responsible for setting investment policy and for agreeing funding requirements with the employer through the triennial valuation process. The schemes are closed to new members and the accrual of service ceased on 31 March 2002. The schemes have been valued at 31 March 2015 by qualified independent actuaries in accordance with IAS 19. There were no unpaid contributions in relation to the defined contribution schemes outstanding at the year end.

The major assumptions used were:

- **Discount rate**: 3.20% 4.40%
- **Rate of increase in salaries**: 3.00% 3.40%
- **Rate of increase in pensions in payment**: 1.80% – 3.00% 1.80% – 3.40%
- **Inflation (RPI)**: 3.00% 3.40%
- **Inflation (CPI)**: 2.00% 2.40%

Demographic assumptions

One of the most significant demographic assumptions underlying the valuation is mortality. The specific mortality rates used are based on the PCMA00 MC and PCFA00 base tables with allowance for future improvements in line with the medium cohort projection subject to a 1% underpin. The life expectancies underlying the valuation are as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Male aged 65</th>
<th>Female aged 65</th>
<th>Male aged 45</th>
<th>Female aged 45</th>
</tr>
</thead>
<tbody>
<tr>
<td>2015</td>
<td>87.8</td>
<td>89.8</td>
<td>89.7</td>
<td>91.2</td>
</tr>
<tr>
<td>2014</td>
<td>87.7</td>
<td>89.7</td>
<td>89.6</td>
<td>91.1</td>
</tr>
</tbody>
</table>

Sensitivity analysis of assumptions

The sensitivities are only presented for the GM scheme as the equivalent increases/decreases in assumptions for the IAM scheme do not have a material impact.

If the discount rate was 0.25% higher (lower), the scheme liabilities would decrease by approximately £6.2 million (increase £6.3 million) if all the other assumptions remained unchanged.

If the inflation assumption was 0.25% higher (lower), the scheme liabilities would increase by approximately £3.4 million (decrease by £3.4 million). In this calculation all assumptions related to the inflation assumption have been appropriately adjusted, that is the salary, deferred pension and pension in payment increases. The other assumptions remain unchanged.

If the salary increase assumption was 0.25% higher (lower), the scheme liabilities would increase by approximately £0.4 million (decrease by £0.4 million) if all the other assumptions remained unchanged.
40. **Pension commitments** (continued)

If the pension increases assumptions were 0.25% higher (lower), the scheme liabilities would increase by approximately £2.4 million (decrease by £2.4 million) if all the other assumptions remained unchanged.

If life expectancies were to increase (decrease) by one year, the scheme liabilities would increase by approximately £5.1 million (decrease by £5.1 million) if all the other assumptions remained unchanged.

If the deferred revaluation assumption was 0.25% higher the scheme liabilities would increase by £1.4 million, or decrease by £1.3 million if the deferred revaluation assumption decreased by 0.25%.

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated. The sensitivity analysis has been performed on the basis that the relevant assumption would occur in isolation, holding other assumptions constant.

In presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the same methodology that applied in calculating the defined benefit obligation liability recognised in the balance sheet.

**Risk exposures**

A description of the risks which the pension schemes expose Investec can be found in the Risk Management report on page 77. The group ultimately underwrites the risks relating to the defined benefit plans. If the contributions currently agreed are insufficient to pay the benefits due, the group will need to make further contributions to the plans.

The plan assets held in the scheme were:

<table>

</tr>
</tbody>
</table>

There are no assets which are unquoted.

None of the group’s own assets or properties occupied or used by the group is held within the assets of the scheme.

The investment strategy in place for the GM scheme is to switch to gilts over the period to 31 March 2021. At 31 March 2015, the allocation of the GM scheme’s invested assets was 100% to gilts and cash. This is ahead of the investment strategy. The higher allocation is due to additional switches from equities to gilts during the first and third quarter of 2013 under the agreed outperformance trigger mechanism. Details of the investment strategy can be found in the GM scheme’s statement of investment principles, which the trustees update as its policy evolves.

The trustees’ current investment strategy is to strike a balance between maximising the returns on the scheme’s assets and minimising the risks associated with lower than expected returns.

The triennial funding valuation of the schemes was carried out as at 31 March 2012. Contributions requirements, including any deficit recovery plans, were agreed between the group and the Trustees in March 2013 to address the scheme deficit.

Under the agreed contribution plan deficit contributions of £6 million were paid into the IAM scheme in March 2013, such that the scheme is now fully funded.

Under the agreed contribution plan deficit contributions of £4.3 million were paid into the GM scheme in the year to 31 March 2015 and the group expects to make £4.3 million of contributions to the defined benefit schemes in the 2015 – 2016 financial year.

The weighted average duration of the GM scheme’s liabilities at 31 March 2015 is 19 years (31 March 2014: 17 years). This includes average duration of active members of 25 years, average duration of deferred pensioners of 24 years and average duration of pensioners in payment of 11 years.

The weighted average duration of the IAM scheme’s liabilities at 31 March 2015 is 19 years (31 March 2014: 18 years). This includes average duration of deferred pensioners of 20.5 years and average duration of pensioners in payment of 11.5 years.

The only event of default in relation to the subordinated debt is the non-payment of principal or interest. The only remedy available to the holders of the subordinated debt in the event of default is to petition for the winding up of the issuing entity. In a winding up no amount will be paid in respect of the subordinated debt until all other creditors have been paid in full.

Guaranteed subordinated step-up notes

On 13 February 2015, Investec Finance plc redeemed at par the entire issue £33,793,000 of guaranteed subordinated step-up notes due in 2016. The notes had been guaranteed by Investec Bank plc and listed on the Luxembourg Stock Exchange.

Guaranteed undated subordinated callable step-up notes

Investec Finance plc has in issue £17,861,000 of 6.25% guaranteed undated subordinated step-up notes callable in 2017 at a discount (perpetual notes). Interest is paid semi-annually. The notes are guaranteed by Investec Bank plc and are listed on the Luxembourg Stock Exchange. The step-up notes may be redeemed by the issuer, at par, at any time after 23 January 2017, subject to the prior consent of the Prudential Regulation Authority. On 23 January 2017 the interest rate will be reset to become three-month LIBOR plus 2.11% payable quarterly in arrears.

Medium-term notes

Subordinated fixed-rate medium-term notes (denominated in Pounds Sterling)

On 17 February 2011 Investec Bank plc issued £500,000,000 of 9.625% subordinated notes due 2022 at a discount (2022 notes). Interest is paid semi-annually. The notes are listed on the London Stock Exchange. The notes will be redeemed at par on 17 February 2022. On 29 June 2011 Investec Bank plc issued £75,000,000 of 9.625% subordinated notes due 2022 at a premium (2022 notes) (to be consolidated and form a single series, and to be fungible, with the £500,000,000 2022 notes issued on 17 February 2011).

Subordinated floating rate medium-term notes (denominated in Australian Dollars)

The group disposed of its interest in Investec Bank (Australia) Limited on 31 July 2014. At that date the A$20,000,000 of floating rate medium-term notes issued by the company on 12 February 2010 and the A$50,000,000 of floating rate medium-term notes issued by the company on 20 December 2012, due to parties outside of the Investec Group, were removed from the balance sheet.

Callable subordinated notes

The group disposed of its interest in Kensington Group Limited on 30 January 2015. At that date the £69,767,000 of Callable Subordinated Notes due 2015, due to parties outside the Investec Group, were removed from the balance sheet.

IV08 13.735% subordinated unsecured callable upper tier 2 bonds

R200 million Investec Bank Limited IV08 locally registered subordinated unsecured callable bonds without a maturity date. Interest is paid six-monthly in arrears on 31 October and 30 April at a rate of 13.735% per annum until 30 April 2018. The company has the option to call the bonds from 30 April 2013 or on any interest payment date falling after 30 April 2018. If not called by 30 April 2018, the bonds will pay interest of 5.625% above JIBAR payable quarterly in arrears until called.

IV09 variable rate subordinated unsecured callable upper tier 2 bonds

R200 million Investec Bank Limited IV09 locally registered subordinated unsecured callable bonds without a maturity date. Interest is paid quarterly in arrears on 31 July, 31 October, 31 January and 30 April at a rate equal to three-month JIBAR plus 3.75% until 30 April 2018. The company has the option to call the bonds from 30 April 2013 or on any interest payment date falling after 30 April 2018. If not called by 30 April 2018, the bonds will pay interest of 5.625% above JIBAR payable quarterly in arrears until called.
41. Subordinated liabilities (continued)

* Less than £1,000.

The Investec Limited shares were issued in South African Rand. The amounts recorded above were calculated by reference to historic Pounds Sterling/Rand exchange rates.

In terms of the DLC structure, shareholders have common economic and voting rights as if Investec Limited and Investec plc were a single company. These include equivalent dividends on a per share basis, joint electorate and class right variations. The UK DAS share, UK DAN share, SA DAS share, the SA DAN share and the special converting shares have been issued to achieve this.

The unissued shares are under the control of the directors until the next annual general meeting.

**Staff share scheme**

The group operates a share option and a share purchase scheme for employees. The number of ordinary shares conditionally allocated to employees is disclosed in note 7.

Movements in the number of share options issued to (each option is in respect of one share) employees are as follows:

<table>

</table>

The purpose of the staff share scheme is to promote an esprit de corps within the organisation, create an awareness of Investec’s performance and provide an incentive to maximise individual and group performance by allowing all staff to share in the risks and rewards of the group.

The group makes awards available to staff members via the underlying share trusts. The particular instrument used varies from time to time depending on taxation legislation and factors affecting the group structure. Nevertheless, whatever the instrument chosen, its underlying value depends solely on the performance of the group’s share price.

At present, the practice of the group is to give all permanent staff members a share allocation based on their annual package after completing six months of employment. In line with the objective of providing a long-term incentive for staff, these share awards vest over periods varying from four to five years.

After the initial allocation referred to above, additional allocations are made to staff members at the discretion of group management and depending on the individual performance and contribution made by the respective staff members.

*The extent of the directors’ and staff interests in the incentive schemes is detailed on pages 157 and 158 and 178 to 180 in volume one.*

Issued by Investec Limited

32 214 499 (2014: 32 214 499) non-redeemable, non-cumulative, non-participating preference shares of one cent each, issued at various premiums:

- Preference share capital: 2
- Preference share premium: 228,057

Preference shareholders will be entitled to receive dividends if declared, at a rate limited to 77.77% of prime on R100 being the deemed value of the issue price of the preference share held. Preference shareholders receive dividends in priority to any payment of dividends to the holder of any other class of shares in the capital of the company not ranking prior or pari passu with the preference shares.

An ordinary dividend will not be declared by Investec Limited unless the preference dividend has been declared. If declared, preference dividends are payable semi-annually at least seven business days prior to the date on which Investec Limited pays its ordinary dividends, if any, but shall be payable no later than 120 business days after 31 March and 30 September respectively.

Issued by Investec plc

9 381 149 (2014: 9 381 149) non-redeemable, non-cumulative, non-participating preference shares of £0.01 each, issued at a premium of £8.58 per share.

- Preference share capital: 94
- Preference share premium: 79,490

5 700 000 (2014: 5 700 000) non-redeemable, non-cumulative, non-participating preference shares of £0.01 each, issued at a premium of £8.86 per share.

- Preference share capital: 57
- Preference share premium: 49,917

Preference shareholders will receive an annual dividend if declared based on the coupon rate (being equivalent to the base rate plus 1%) multiplied by the deemed value on a daily basis and payable in two semi-annual instalments.

An ordinary dividend will not be declared by Investec plc unless the preference dividend has been declared.

If declared, preference dividends are payable semi-annually at least seven business days prior to the date on which Investec plc pays its ordinary dividends, if any, but shall be payable no later than 120 business days after 31 March and 30 September respectively.
43. Perpetual preference shares of holding company
(continued)

Issued by Investec plc – Rand-denominated
1 859 900 (2014: 1 859 900) non-redeemable, non-cumulative, non-participating perpetual preference shares of ZAR0.001 each, issued at a premium of ZAR99.999 per share on 29 June 2011.
– Preference share capital * *
– Preference share premium 16 601 16 601

416 040 (2014: 416 040) non-redeemable, non-cumulative, non-participating perpetual preference shares of ZAR0.001 each, issued at a premium of ZAR 99.999 per share on 11 August 2011.
– Preference share capital * *
– Preference share premium 3 441 3 441

Rand-denominated preference shareholders will receive a dividend, if declared, based on the coupon rate (being equivalent to South African prime rate multiplied by 95%) multiplied by the deemed value on a daily basis and payable in two semi-annual instalments.

An ordinary dividend will not be declared by Investec plc unless the Rand preference dividend has been declared.

If declared, Rand preference dividends are payable semi-annually at least seven business days prior to the date on which Investec pays its ordinary dividends, if any, but shall be payable no later than 120 business days after 31 March and 30 September respectively.

Investec Limited issued R550 million Other Additional Tier 1 floating rate notes on 14 August 2014. Interest is payable quarterly on 12 August, 12 November, 12 February and 12 May at a rate equal to the three-month JIBAR plus 4.25%. There is no maturity date but the issuer has the option to redeem on 12 August 2024 and on every interest payment date thereafter.
### 47. Non-controlling interests

</tr>
</tbody>
</table>

**Perpetual preferred securities issued by subsidiaries**

- **Issued by Investec plc subsidiaries**
  - €200,000,000 (2014: €200,000,000) fixed/floating rate guaranteed non-voting non-cumulative perpetual preferred securities (preferred securities) were issued by Investec Tier 1 (UK) LP (a limited partnership organised under the laws of England and Wales) on 24 June 2005. The preferred securities which are guaranteed by Investec plc are callable at the option of the issuer subject to the approval of the UK Regulator on the tenth anniversary of the issue, and if not called are subject to a step-up in coupon of one and a half times the initial credit spread above the three-month Eurozone interbank offered rate. Until the tenth anniversary of the issue, the dividend on the preferred securities will be at 7.075%.
  - The issuer has the option not to pay a distribution when it falls due, but this would then prevent the payment of ordinary dividends by the company.
  - Under the terms of the issue, there are provisions for the preferred securities to be substituted for preference shares issued by the company if Investec plc’s capital ratios fall below the minimum level permitted by the regulator.

- **Issued by an Investec Limited subsidiary**
  - 15,447,630 (2014: 15,447,630) non-redeemable non-cumulative non-participating preference shares of one cent each issued at various premiums.
  - Preference shareholders will be entitled to receive dividends, if declared, at a rate of 83.33% of prime on R100 being the deemed value of the issue price of the preference share held.
  - Preference shareholders receive dividends in priority to any payment of dividends to the holder of any other class of shares in the capital of the company not ranking prior or pari passu with the preference shares.
  - An ordinary dividend will not be declared by Investec Bank Limited unless the preference dividend has been declared.
  - If declared, preference dividends are payable semi-annually at least seven business days prior to the date on which Investec Bank Limited pays its ordinary dividends, if any, but shall be payable no later than 120 business days after 31 March and 30 September respectively.

* Investec Asset Management Holdings (Pty) Ltd and Investec Property Fund Limited are subsidiaries of Investec Limited.

** Investec Asset Management Limited is an indirect subsidiary of Investec plc.

48. Finance lease disclosures

Finance lease receivables included in loans and advances to customers

Lease receivables due in:

- Less than one year: 238 618
- One to five years: 347 125
- Later than five years: 4 510

Unearned finance income: 94 746

At 31 March 2015, unguaranteed residual values accruing to the benefit of Investec were £2.7 million (2014: £29.4 million).

Finance leases in the group mainly relate to leases on property, equipment and motor vehicles.

<td>Total</td>
<td>1,061,266</td>
<td>908,581</td>
</tr>
</tbody>
</table>

The amounts shown above are intended only to provide an indication of the volume of business outstanding at the balance sheet date.

Guarantees are issued by Investec plc and Investec Limited on behalf of third parties and other group companies. The guarantees are issued as part of the banking business.

Financial Services Compensation Scheme

The Financial Services Compensation Scheme (FSCS), the UK’s statutory fund of last resort, provides compensation to customers of UK authorised financial institutions in the event that an institution which is a participating member of the FSCS is unable, or is likely to be unable, to pay claims against it.

The FSCS raises annual levies from participating members based on their level of participation (in the case of deposits, the proportion that their protected deposits represent of total protected deposits) as at 31 December of the year preceding the scheme year.

Following the default of a number of deposit takers in 2008, the FSCS has borrowed from HM Treasury to fund the compensation costs for customers of those firms. Although the majority of this loan is expected to be repaid from funds the FSCS receives from asset sales, surplus cash flow or other recoveries in relation to the assets of the firms that defaulted, any shortfall will be funded by deposit-taking participants of the FSCS.

Investec Bank plc is a participating member of the FSCS and the bank has accrued £1.65 million for its share of levies that will be raised by the FSCS. The accrual is based on estimates for the interest the FSCS will pay on the loan and estimates of the level of the bank’s market participation in the relevant periods. Interest will continue to accrue to the FSCS on the HM Treasury loan and will form part of future FSCS levies.

At the date of these financial statements, it is not possible to estimate whether there will ultimately be additional levies on the industry, the level of Investec’s market participation or other factors that may affect the amounts or timing of amounts that may ultimately become payable, nor the effect that such levies may have upon operating results in any particular financial period.

Legal proceedings

Investec operates in a legal and regulatory environment that exposes it to litigation risks. As a result, Investec is involved in disputes and legal proceedings which arise in the ordinary course of business. Investec does not expect the ultimate resolution of any of the proceedings to which Investec is party to have a significant adverse effect on the financial position of the group. These claims, if any, cannot be reasonably estimated at this time.

Specifically, a claim has been made in the Royal Court of Guernsey against ITG Limited (formerly Investec Trust (Guernsey) Limited), a subsidiary of Investec plc, for breach of equitable duty for skill and care with a related claim for liability for the debts of a client trust. The outcome of these claims cannot reasonably be estimated at this time but Investec does not expect the ultimate resolution of the proceedings to have a material adverse effect on the financial position of the group.
52. Related party transactions

</table>

The above outstanding balances arose from the ordinary course of business and on substantially the same terms, including interest rates and security, as for comparable transactions with third party counterparties.
53. Hedges

The group uses derivatives for the management of financial risks relating to its asset and liability portfolios, mainly associated with non-trading interest rate risks and exposures to foreign currency risk. Most non-trading interest rate risk is transferred from the originating business to the Central Treasury in the Specialist Bank. Once aggregated and netted Central Treasury, as the sole interface to the wholesale market for cash and derivative transactions, actively manages the liquidity mismatch and non-trading interest rate risk from our asset and liability portfolios. In this regard, Central Treasury is required to exercise tight control of funding, liquidity, concentration and non-trading interest rate risk within defined parameters.

The accounting treatment of accounting hedges is dependent on the classification between fair value hedges and cash flow hedges and in particular accounting hedges require the identification of a direct relationship between a hedged item and hedging instrument. This relationship is established in limited circumstances based on the manner in which the group manages its risk exposure. Below is a description of each category of accounting hedges achieved by the group.

### Fair value hedges

Fair value hedges are entered into mainly to hedge the exposure of changes in fair value of fixed-rate financial instruments attributable to interest rates.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

As at year end the hedges were both retrospectively and prospectively effective.

### Cash flow hedges

The group is exposed to variability in cash flows on future liabilities arising from changes in base interest rates. The aggregate expected cash flows are hedged based on cash flow forecasts with reference to terms and conditions present in the affected contractual arrangements. Changes in fair value are initially recognised in other comprehensive income and recycled to the income statement when the cash flow occurs. The nominal expected future cash flows that are subject to cash flow hedges are:

<table>

</tbody>
</table>

There was no ineffective portion recognised in the income statement.

Releases to the income statement for cash flow hedges are included in net interest income.
53. Hedges (continued)

Hedges of net investments in foreign operations

During the current year, the group has closed out various foreign exchange contracts it held to hedge the exposure of the Investec plc group balance sheet to its net investment, in Australian Dollars, in the Australian operations of the group.

<table>
<thead>
<tr>

The balances in the above table will not agree directly to the balances in the consolidated balance sheet as the table incorporates all cash flow on an undiscounted basis relating to both principal and those associated with all future coupon payments (except for trading liabilities and trading derivatives). Furthermore loan commitments are generally not recognised on the balance sheet. Trading liabilities and trading derivatives have been included in the ‘Demand’ time bucket and not by contractual maturity because trading liabilities are typically held for short periods of time. For an unaudited analysis based on discounted cash flows please refer to pages 68 and 69 in volume two.

**Consolidated structured entities**

Investec plc has no equity interest in the following structured entities which are consolidated. Typically a structured entity is an entity in which voting or similar rights are not the dominant factor in deciding control. The judgements to assess whether the group has control over these structures include assessing the purpose and design of the entity, considering whether the group or another involved party with power over the relevant activities is acting as a principal in its own right or as an agent on behalf of others.

55. Principal subsidiaries and associated companies – Investec plc (continued)

For additional detail on the assets and liabilities arising on securitisation refer to note 27. For details of the risks to which the group is exposed through all of its securitisations are included in the risk management report on page 48 to 51 in volume two.

The key assumptions for the main types of structured entities which the group consolidates are summarised below:

**Securitised residential mortgages**
The group has securitised residential mortgages in order to provide investors with exposure to residential mortgage risk and to raise funding. These structured entities are consolidated due to the group’s holdings of equity notes combined with its control over servicing activities. The group is not required to fund any losses above those incurred on the notes it has retained, such losses are reflected in any impairment of securitised mortgages as those assets have not been derecognised.

**Structured debt and loan portfolios**
The group has structured debt and loan portfolios for the purpose of issuing asset-backed securities. These structured entities are consolidated due to the group’s retention of equity notes and because it continues to act as the collateral manager. The group is not required to fund any losses above those incurred on the notes it has retained.

**Structured commercial real estate loan assets**
The group has securitised a number of commercial real estate loan assets. These structured entities are consolidated as the group has retained all of the notes issued. The group continues to recognise the commercial real estate loan assets on its balance sheet. The group is not required to fund any losses above those incurred on the notes it has retained.

**Securitised receivables**
The group has securitised portfolios of medium-term lease and hire purchase receivables. These structured entities are consolidated as the group has retained the equity notes and control over servicing activities. The group is not required to fund any losses above those incurred on the notes it has retained.

**Other structured entities – commercial operations**
The group also consolidates a number of structured entities where control arises from rights attached to lending facilities and similar commercial involvement. These arise primarily in the areas of aircraft funds where the group has rights which allow it to maximise the value of the assets held and investments in mining projects due to its exposure to equity like returns and ability to influence the strategic and financial decision-making.

The group is not required to fund any losses above those which could be incurred on debt positions held or swaps which exist with these structured entities. The risks to which the group is exposed from these structured entities are related to the underlying assets held in the structures. The total assets held in structured entities arising from commercial operations is £169.1 million (2014: £157.9 million).

**Significant restrictions**
As is typical for a large group of companies there are restrictions on the ability of the group to obtain distributions of capital, access the assets or repay the liabilities of members of the group due to the statutory, regulatory and contractual requirements of its subsidiaries. These are considered below:

**Regulatory requirements**
Subsidiary companies are subject to prudential regulation and regulatory capital requirements in the countries in which they are regulated.

These require entities to maintain minimum capital, leverage and exposure ratios restricting the ability of these entities to make distributions of cash or other assets to the parent company. Regulated subsidiaries of the group are required to maintain liquidity pools to meet PRA and local regulatory requirements. The main subsidiaries affected are: Investec Bank plc, Investec Bank (Channel Islands) Limited and Investec Bank (Switzerland) AG which must maintain compliance with the regulatory minimum.

Capital management within the group is discussed in the risk management report on pages 80 and 81 in volume two.

**Statutory requirements**
The group’s subsidiaries are subject to statutory requirements not to make distributions of capital and unrealised profits and generally maintain solvency. These requirements restrict the ability of subsidiaries to remit dividends, except in the case of a legal capital reduction or liquidation.
55. Principal subsidiaries and associated companies – Investec plc (continued)

Contractual requirements

Asset encumbrance – the group uses its financial assets to raise finance in the form of securitisations and through the liquidity schemes of central banks. Once encumbered, the assets are not available for transfer around the group. The assets typically affected are disclosed in notes 19 and 58.

Structured associates

The group has investments in a number of structured funds specialising in aircraft financing where the group acts as adviser or fund manager in addition to holding units within the fund. As a consequence of these roles and funding, the group has significant influence over the fund and therefore the funds are treated as associates.

The group applies the venture capital exemption to these holdings and, as such, the investments in the funds are accounted for at fair value and held within the investment portfolio on the balance sheet.

Unconsolidated structured entities

31 March 2015

The table below describes the types of structured entities that the group does not consolidate but in which it holds an interest and originally set up. In making the assessment of whether to consolidate these structured entities, the group has concluded that it does not have control after consideration in line with the accounting policies as set out on pages 22 to 30.

Financial support provided to the unconsolidated structured entity

There are no contractual agreements which require the group to provide any additional financial or non-financial support to these structured entities.

During the year, the group has not provided any such support and does not have any current intentions to do so in the future.

Sponsoring

The group considers itself a sponsor of a structured entity when it facilitates the establishment of the structured entity. The table below sets out information in respect of structured entities that the group sponsors, but in which the group does not have an interest.

Structured entities with no interest held

<table>

</thead>
<tbody>
<tr>
<td>Structured CDO and CLO securitisations^</td>
<td>Residential mortgage securitisations</td>
</tr>
</tbody>
</table>

Why it is considered a structured entity

This is a CDO and CLO securitisation where Investec has no continuing interest as the notes previously held have been redeemed or fully written off. The entity is considered structured as the vehicle was set up so that the variable return does not follow the shareholding.

These are residential mortgage securitisations where Investec has no continuing interest as the notes previously held have been redeemed or fully written off. The entities are considered structured as the vehicles are set up so that the variable returns do not follow the shareholding.

Income amount and type

Nil

Mortgage manager fees of £83 000 per annum.

Carrying amount of all assets transferred

£222 million of CDO and CLO assets.

£269 million of mortgage assets.

^ Collateralised Debt Obligation (CDO) and Collateralised Loan Obligation (CLO).

Interests in structured entities which the group has not set up

Purchased securitisation positions

The group buys and sells interests in structured entities that it has not originated as part of its trading activities, for example, residential mortgage securities, commercial mortgage securities, loans to corporates and resecuritisations. In such cases, the group typically has no other involvement with the structured entity other than the securities it holds as part of its trading activities and its maximum exposure to loss is restricted to the carrying value of the asset. Details of the value of these interest is included in the risk management report on pages 48 and 49.

The following subsidiaries are not consolidated for regulatory purposes:
- Investec Assurance Limited
- Investec Employee Benefits Holdings (Pty) Ltd and its subsidiaries

There are no subsidiaries which are consolidated for regulatory but not for accounting purposes.

Consolidated structured entities

Investec Limited has residual economic interests in the following structured entities which are consolidated. Typically a structured entity is an entity in which voting or similar rights are not the dominant factor in deciding control. The judgements to assess whether the group has control over these structures include assessing the purpose and design of the entity, considering whether the group or another involved party with power over the relevant activities is acting as a principal in its own right or as an agent on behalf of others.

For additional detail on the assets and liabilities arising on securitisation refer to note 27. For details of the risks to which the group is exposed through all of its securitisations are included in the risk management report on pages 48 and 49 in volume two.
56. Principal subsidiaries and associated companies – Investec Limited (continued)

The group considers that it has control over Investec Property Fund Limited as a result of the number of common directors with the holding company and the impact this has on the beneficial returns. Management considers this interest to currently be sufficient to meet the definition of control. Any change in the holding in Investment Property Fund Limited would require a re-assessment of the facts and circumstances.

The key assumptions for the main types of structured entities which the group consolidates are summarised below:

Securitised residential mortgages

The group has securitised residential mortgages in order to provide investors with exposure to residential mortgage risk and to raise funding. These structured entities are consolidated due to the group’s holdings of subordinated notes. The group is not required to fund any losses above those incurred on the notes it has retained; such losses are reflected in any impairment of securitised mortgages as those assets have not been derecognised.

Securitised third party originated residential mortgages

The group has a senior and subordinated investment in a third party originated structured entity. This structured entity is consolidated due to the group’s exposure to residual economic benefits. The group is not required to fund any losses above those incurred on the investment made.

Interests in Asset Management and Wealth & Investment Funds

Management have concluded that the investment funds in the Asset Management and Wealth & Investment businesses do not meet the definition of structured entities as the group does not hold material interests in these funds and currently does not provide financial support or other support. Transactions with these funds are conventional customer-supply relationships.

58. Derecognition

**Transfers of financial assets that do not result in derecognition**

The group has been party to securitisation transactions whereby assets continue to be recognised on the balance sheet (either fully or partially) although they have been subject to legal transfer to another entity. Securitisations may, depending on the individual arrangement, result in continued recognition of the securitised assets and the recognition of the debt securities issued in the transaction.

For transfer of assets in relation to repurchase agreements see note 19.

59. Restatements

The group has adopted the following new or revised standards from 1 April 2014:

**IFRIC 21 Levies**

The group has adopted IFRIC 21 Levies from 1 April 2014.

The cumulative impact of the restatement as at March 2013 is a decrease in operating costs and other liabilities of £4.7 million and an increase in taxation on operating profit before goodwill and deferred taxation liabilities of £1.0 million. The net impact on retained income at 31 March 2014 is an increase of £2.8 million.

The notes on pages 127 and 128 form an integral part of the financial statements.

Approved and authorised for issue by the board of directors on 10 June 2015 and signed on its behalf by:

Stephen Koseff
Chief executive officer
10 June 2015
Notes to Investec plc parent company accounts

a. Accounting policies

**Basis of preparation**
The parent accounts of Investec plc are prepared under the historical cost convention and in accordance with UK accounting standards, and on a going concern basis.

**Foreign currencies**
Monetary assets and liabilities in foreign currencies are translated into Pounds Sterling at exchange rates ruling at the balance sheet date. All foreign currency transactions are translated into Pounds Sterling at the exchange rate ruling at the time of the transaction. Forward foreign exchange contracts are revalued at the market rates ruling at the date applicable to their respective maturities. Any gain or loss arising from a change in exchange rates subsequent to the date of the transaction is included as an exchange gain or loss in the income statement.

**Investments**
Investments are stated at cost less any impairment in value.

**Income**
Dividends from subsidiaries are recognised when paid. Interest is recognised on an accrual basis.

**Taxation**
Corporate tax is provided on taxable profits at the current rate.

**Company’s own profit and loss account**
The company has taken advantage of the exemption in section 408 of the Companies Act 2006 to not present its own profit and loss account.

**Cash flow statement**
The company has taken advantage of the exemption in Financial Reporting Standard 1 to not present its own cash flow statement. A cash flow statement, prepared under International Financial Reporting Standards, is included in the consolidated financial statements of the group.

**Financial instruments**
The company has taken advantage of the exemption in Financial Reporting Standard 29 to not present its own disclosures in respect of financial instruments as disclosures prepared in accordance with International Reporting Standards are included in the consolidated annual financial statements of the group.

**Financial liabilities**
Financial liabilities are recorded at amortised cost applying the effective interest rate method.

**Related party transactions**
Transactions, arrangements and agreements involving directors and others are disclosed in note 52 to the group financial statements. The company has taken advantage of the exemptions available in Financial Reporting Standard 8 group from disclosing transactions with related parties which are wholly owned members of Investec plc group.

b. Investments in subsidiary undertakings

</table>

c. Bank loans

The company drew down a Pounds Sterling-denominated loan of £40 million on 10 February 2014 which bears interest at a fixed margin above three-month LIBOR and was repaid on 10 February 2015. During the year ended 31 March 2014, the company launched its own European Medium Term Note programme (EMTN). The company issued two fixed-rate notes under this programme. A US Dollar-denominated note of US$15 million was issued on 14 February 2014, repaid 16 February 2015 and on the same day a Euro-denominated note of €25 million was issued which matures 29 September 2017 and pays interest semi-annually.

e. Parent company profit and loss account

No profit and loss account is presented for the company as permitted by section 408 of the Companies Act 2006.

The company’s profit for the year, determined in accordance with the Act, was £161 330 000 (2014: £48 309 000).

f. Audit fees

Details of the company’s audit fees are set out in note 6 to the group financial statements.

g. Dividends

Details of the company’s dividends are set out in note 10 to the group financial statements.

h. Share capital

Details of the company’s ordinary share capital are set out in note 42 to the group financial statements. Details of the perpetual preference shares are set out in note 43 to the group financial statements.

i. Audit opinion

The audit opinion on the financial statements of the Investec plc parent company is included in the combined consolidated financial statements of Investec plc and Investec Limited for the year ended 31 March 2015.

The information as detailed here for Investec plc parent company is a summary. For detailed notes refer to the Investec plc group and company annual financial statements.

A list of the companies principal subsidiaries is detailed in note 55 to the group accounts on pages 121 to 122.

c. The company’s share capital is detailed in note 42 to the group accounts on pages 101 to 102.

d. The company’s perpetual preference shares are detailed in note 43 to the group accounts on page 103 to 104.

The information detailed here for Investec Limited parent company is a summary. For detailed notes refer to the Investec Limited group and company annual financial statements.
Definitions

Adjusted shareholders’ equity
Refer to calculation on page 50 in volume one

Cost to income ratio
Operating costs divided by operating income (net of depreciation on leased assets). Depreciation on operating leased assets has been netted off against operating income

Core loans and advances
Net loans and advances to customers plus net own originated securitised assets
Refer to calculation on page 31 in volume two

Dividend cover
Adjusted earnings per ordinary share before goodwill and non-operating items divided by dividends per ordinary share

Earnings attributable to ordinary shareholders before goodwill, acquired intangibles and non-operating items
(i.e. adjusted earnings)
Refer to page 53

Adjusted earnings per ordinary share before goodwill, acquired intangibles and non-operating items
Refer to page 53

Effective operational tax rate
Tax on profit on ordinary activities (excluding non-operating items) divided by operating profit

Market capitalisation
Total number of shares in issue (including Investec plc and Investec Limited) multiplied by the closing share price of Investec plc on the London Stock Exchange

Net tangible asset value per share
Refer to calculation on page 48 in volume one

Non-operating items
Reflects profits and/or losses on termination, restructuring or disposal of group operations and acquisitions made

Operating profit
Operating income less administrative expenses, impairments for bad and doubtful debts and depreciation of tangible fixed assets. This amount is before goodwill, acquired intangibles and non-operating items

Operating profit per employee
Refer to calculation on page 53 in volume one

Recurring income
Net interest income plus net annuity fees and commissions expressed as a percentage of total operating income

Return on average adjusted shareholders’ equity
Refer to calculation on page 50 in volume one

Return on average adjusted tangible shareholders’ equity
Refer to calculation on page 50 in volume one

Return on risk-weighted assets
Adjusted earnings divided by average risk-weighted assets

Risk-weighted assets
Is calculated as the sum of risk-weighted assets for Investec plc and Investec Limited (converted into Pounds Sterling) as reflected on page 89 in volume one

Staff compensation to operating income ratio
All employee-related costs expressed as a percentage of operating income

Third party assets under administration
Includes third party assets under administration managed by the Wealth & Investment, Asset Management and Property businesses

Total capital resources
Includes shareholders’ equity, subordinated liabilities and non-controlling interests

Total equity
Total shareholders’ equity including non-controlling interests

Weighted number of ordinary shares in issue
The number of ordinary shares in issue at the beginning of the year increased by shares issued during the year, weighted on a time basis for the period during which they have participated in the income of the group less treasury shares. Refer to calculation on page 53
